NOTICE OF REVISED EXHIBITS

Permian Resources Operating, LLC applicant in the above-referenced cases, gives notice that it is filing the attached revised exhibit packet for acceptance into the record.

The revised exhibit packet includes a copy of the sample well proposal letters and AFE's (Exhibit C-10) and removes duplicate copies of mailing reports.

STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION

APPLICATION OF READ & STEVENS,
INC. FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO.

CASE NO. 23508

APPLICATION

Read & Stevens, Inc., through its undersigned attorneys, hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and the W/2 SW/4 of Section 4 and the W/2 W/2 of Section 9, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. In support of its application, Applicant states:

1. Applicant is a working interest owner in the proposed horizontal spacing unit and has the right to drill thereon.
2. Applicant seeks to designate Permian Resources Operating, LLC (OGRID No. 372165) as the operator of the proposed horizontal spacing unit and of the proposed initial wells.
3. Applicant seeks to initially dedicate the above-referenced horizontal spacing unit to the following proposed initial wells:
 - **Bane 4-9 Federal Com 111H, 121H, 122H, 171H, and 131H** wells, to be horizontally drilled from a surface location in the NE/4 NW/4 (Lot 3) of Section 4, Township 20 South, Range 34 East, to bottom hole locations in the SW/4 SW/4 (Unit M) of Section 9, Township 20 South, Range 34 East.

4. Applicant has sought and been unable to obtain voluntary agreement for the development of these lands from all interest owners in the subject spacing unit.

5. The pooling of interests will allow Applicant to obtain a just and fair share of the oil and gas underlying the subject lands, avoid the drilling of unnecessary wells, will prevent waste, and will protect correlative rights.

6. This application competes with the *Application of Cimarex Energy Co. for a Horizontal Spacing and Proration Unit and Compulsory Pooling, Lea County, New Mexico* filed in Case No. 23453. Applicant therefore requests that this matter be set on the June 1, 2023, and consolidated with Case No. 23453 for a contested hearing under the Prehearing Order issued in these competing cases.

WHEREFORE, Applicant requests that this application be set for hearing before an Examiner of the Oil Conservation Division on June 1, 2023, and, after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted interests in the horizontal well spacing unit;
- B. Designating Permian Resources Operating, LLC (OGRID No. 372165) as operator of the horizontal spacing unit and the horizontal wells to be drilled thereon;
- C. Authorizing Applicant to recover its costs of drilling, completing, and equipping the wells;
- D. Approving the actual operating charges and costs of supervision while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

- E. Imposing a 200% penalty for the risk assumed by Applicant in drilling and completing the wells against any working interest owner who does not voluntarily participate in the drilling of the wells.

Respectfully submitted,

HOLLAND & HART LLP

Read & Stevens, Inc., through its undersigned attorneys, hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted interests in the Wolfcamp formation underlying a standard 320-acre, more or less, horizontal well spacing unit comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and the W/2 SW/4 of Section 4 and the W/2 W/2 of Section 9, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. In support of its application, Applicant states:

1. Applicant is a working interest owner in the proposed horizontal spacing unit and has the right to drill thereon.
2. Applicant seeks to designate Permian Resources Operating, LLC (OGRID No. 372165) as the operator of the proposed horizontal spacing unit and of the proposed initial well.
3. Applicant seeks to initially dedicate the above-referenced horizontal spacing unit to the following proposed initial well:
 - **Bane 4-9 Federal Com 201H** well, to be horizontally drilled from a surface location in the NE/4 NW/4 (Lot 3) of Section 4, Township 20 South, Range 34 East, to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 9, Township 20 South, Range 34 East.

4. Applicant has sought and been unable to obtain voluntary agreement for the development of these lands from all interest owners in the subject spacing unit.

5. The pooling of interests will allow Applicant to obtain a just and fair share of the oil and gas underlying the subject lands, avoid the drilling of unnecessary wells, will prevent waste, and will protect correlative rights.

WHEREFORE, Applicant requests that this application be set for hearing before an Examiner of the Oil Conservation Division on June 1, 2023, and, after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted interests in the horizontal well spacing unit;
- B. Designating Permian Resources Operating, LLC (OGRID No. 372165) as operator of the horizontal spacing unit and the horizontal well to be drilled thereon;
- C. Authorizing Applicant to recover its costs of drilling, completing, and equipping the well;
- D. Approving the actual operating charges and costs of supervision while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- E. Imposing a 200% penalty for the risk assumed by Applicant in drilling and completing the well against any working interest owner who does not voluntarily participate in the drilling of the well.

Respectfully submitted,

HOLLAND & HART LLP

ATTORNEYS FOR READ & STEVENS, INC.

CASE _____: **Application of Read & Stevens, Inc. for Compulsory Pooling, Lea County, New Mexico.** Applicant in the above-styled cause seeks an order pooling all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 5 and the W/2 E/2 of Section 8, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Joker 5-8 Federal Com 113H, 125H, 126H, 173H, 133H** wells, to be horizontally drilled from a surface location in the NW/4 NE/4 (Lot 2) of Section 5, Township 20 South, Range 34 East, to bottom hole locations in the SW/4 SE/4 (Unit O) of Section 8, Township 20 South, Range 34 East. Also, to be considered will be the cost of drilling and completing the well and the allocation of the cost thereof, actual operating costs and charges for supervision, designation of Applicant as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 27 miles southwest of Hobbs, New Mexico.

STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION

APPLICATION OF READ & STEVENS,
INC. FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO.

CASE NO. 23519

APPLICATION

Read & Stevens, Inc., through its undersigned attorneys, hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 5 and the E/2 E/2 of Section 8, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. In support of its application, Applicant states:

1. Applicant is a working interest owner in the proposed horizontal spacing unit and has the right to drill thereon.
2. Applicant seeks to designate Permian Resources Operating, LLC (OGRID No. 372165) as the operator of the proposed horizontal spacing unit and of the proposed initial wells.
3. Applicant seeks to initially dedicate the above-referenced horizontal spacing unit to the following proposed initial wells:
 - **Joker 5-8 Federal Com 114H, 127H, 128H, 174H, 134H** wells, to be horizontally drilled from a surface location in the NW/4 NE/4 (Lot 2) of Section 5, Township 20 South, Range 34 East, to bottom hole locations in the SE/4 SE/4 (Unit P) of Section 8, Township 20 South, Range 34 East.

4. Applicant has sought and been unable to obtain voluntary agreement for the development of these lands from all interest owners in the subject spacing unit.

5. The pooling of interests will allow Applicant to obtain a just and fair share of the oil and gas underlying the subject lands, avoid the drilling of unnecessary wells, will prevent waste, and will protect correlative rights.

6. This application competes with the *Application of Cimarex Energy Co. for a Horizontal Spacing and Proration Unit and Compulsory Pooling, Lea County, New Mexico* filed in Case No. 23448. Applicant therefore requests that this matter be set on the June 1, 2023, and consolidated with Case No. 23448 for a contested hearing under the Prehearing Order issued in these competing cases.

WHEREFORE, Applicant requests that this application be set for hearing before an Examiner of the Oil Conservation Division on June 1, 2023, and, after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted interests in the horizontal well spacing unit;
- B. Designating Permian Resources Operating, LLC (OGRID No. 372165) as operator of the horizontal spacing unit and the horizontal wells to be drilled thereon;
- C. Authorizing Applicant to recover its costs of drilling, completing, and equipping the wells;
- D. Approving the actual operating charges and costs of supervision while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

- E. Imposing a 200% penalty for the risk assumed by Applicant in drilling and completing the wells against any working interest owner who does not voluntarily participate in the drilling of the wells.

Respectfully submitted,

HOLLAND & HART LLP

COMPULSORY POOLING APPLICATION CHECKLIST

ALL INFORMATION IN THE APPLICATION MUST BE SUPPORTED BY SIGNED AFFIDAVITS

Case: 23509	APPLICANT'S RESPONSE
Date	July 20, 2023
Applicant	Read & Stevens, Inc.
Designated Operator & OGRID (affiliation if applicable)	Permian Resources Operating, LLC (372165)
Applicant's Counsel:	Holland & Hart LLP
Case Title:	APPLICATION OF READ & STEVENS, INC. FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO
Entries of Appearance/Intervenors:	Cimarex Energy Co., Sandstone Properties, LLC, Northern Oil and Gas, Inc.
Well Family	Bane
Formation/Pool	
Formation Name(s) or Vertical Extent:	Bone Spring formation
Primary Product (Oil or Gas):	Oil
Pooling this vertical extent:	N/A
Pool Name and Pool Code:	Teas; Bone Spring, East (96637)
Well Location Setback Rules:	Statewide setbacks
Spacing Unit	
Type (Horizontal/Vertical)	Horizontal
Size (Acres)	320.44-acre, more or less
Building Blocks:	40 acres
Orientation:	Standup
Description: TRS/County	Lot 3 (NE/4 NW/4 equivalent), the SE/4 NW/4, and the E/2 SW/4 of Section 4 and the E/2 W/2 of Section 9, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico
Standard Horizontal Well Spacing Unit (Y/N), If No, describe and is approval of non-standard unit requested in this application?	Yes
Other Situations	
Depth Severance: Y/N. If yes, description	N/A
Proximity Tracts: If yes, description	No
Proximity Defining Well: if yes, description	No
Applicant's Ownership in Each Tract	Exhibit C-9
Well(s)	
Name & API (if assigned), surface and bottom hole location, footages, completion target, orientation, completion status (standard or non-standard)	Add wells as needed

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**APPLICATIONS OF CIMAREX ENERGY CO.
FOR A HORIZONTAL SPACING UNIT
AND COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO**

CASE NOS. 23448-23455

**APPLICATIONS OF CIMAREX ENERGY CO.
FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO**

CASE NOS. 23594-23601

**APPLICATIONS OF READ & STEVENS, INC.
FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO.**

CASE NOS. 23508-23523

SELF-AFFIRMED STATEMENT OF TRAVIS MACHA

1. My name is Travis Macha. I work for Permian Resources Operating, LLC (“Permian”) as a Senior Landman.

2. I have previously testified before the New Mexico Oil Conservation Division (“Division”) as an expert witness in petroleum land matters. My credentials as a petroleum landman have been accepted by the Division and made a matter of record.

3. I am familiar with the applications filed by Read & Stevens in these cases, and I am familiar with the status of the lands in the subject area. I am also familiar with the applications filed by Cimarex Energy Co. (“Cimarex”) in competing Case Nos. 23448-23455 and 23594-23601 and related land matters.

4. Read & Stevens, Inc. (“Read & Stevens”) is the applicant in these cases. It is a subsidiary of Permian. Read & Stevens owns a mineral interest in the subject acreage and has a

right to drill in the spacing units proposed under these cases. In each case, Permian will be the designated operator.

5. In my opinion, Read & Stevens' plan of development is superior to Cimarex's competing proposal. Cimarex's proposal to try to develop the Wolfcamp formation through wells drilled and completed in the Third Bone Spring interval will (1) violate the statutory mandate governing allocation of production under compulsory pooling orders; (2) impair correlative rights due to non-uniform ownership between the Bone Spring and Wolfcamp formations; and (3) violate the Division's regulations governing pool rules and standard horizontal well spacing units.

6. In contrast, Read & Stevens' plan is part of a comprehensive development across ten sections within the subject Township that suffers none of Cimarex's defects. By co-developing the Bone Spring and Wolfcamp formations as separate pools with separate horizontal wells, Read & Stevens' plan comports with the statutory requirements for allocating production in compulsory pooling, will fully protect owners' correlative rights, and meets the Division's requirements for the targeted pools and standard horizontal well spacing units.

7. Moreover, Permian is an experienced oil and gas operator in the potash area, which includes the acreage involved in its Joker project in Case Nos. 23516-23523 and has been proactive getting Potash Development Area and Drill Islands reviewed and approved by the BLM in accordance with BLM's requirements.

SUMMARY OF READ & STEVENS' APPLICATIONS AND PLAN OF DEVELOPMENT

8. In these consolidated cases, Read & Stevens seeks orders pooling all uncommitted mineral owners in the Bone Spring and Wolfcamp formations, as follows:

- Under **Case No. 23508**, Read & Stevens seeks to pool all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and the W/2 SW/4 of Section 4 and the W/2 W/2 of Section 9, Township 20 South,

Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Bane 4-9 Federal Com 111H, 121H, 122H, 171H, and 131H wells**, to be horizontally drilled from a surface location in the NE/4 NW/4 (Lot 3) of Section 4, Township 20 South, Range 34 East, to bottom hole locations in the SW/4 SW/4 (Unit M) of Section 9, Township 20 South, Range 34 East.

- Under **Case No. 23509**, Read & Stevens seeks to pool all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 3 (NE/4 NW/4 equivalent), the SE/4 NW/4, and the E/2 SW/4 of Section 4 and the E/2 W/2 of Section 9, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Bane 4-9 Federal Com 112H, 123H, 124H, 172H, 132H wells**, to be horizontally drilled from a surface location in the NE/4 NW/4 (Lot 3) of Section 4, Township 20 South, Range 34 East, to bottom hole locations in the SE/4 SW/4 (Unit N) of Section 9, Township 20 South, Range 34 East.
- Under **Case No. 23510**, Read & Stevens seeks to pool all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 4 and the W/2 E/2 of Section 9, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be dedicated to the following proposed initial wells:
 - **Bane 4-9 Federal Com 113H and 173H wells**, to be horizontally drilled from a surface location in the NW/4 NE/4 (Lot 2) of Section 4, Township 20 South, Range 34 East, to bottom hole locations in the SW/4 SE/4 (Unit O) of Section 9, Township 20 South, Range 34 East; and
 - **Bane 4-9 Federal Com 125H, 126H, and 133H wells**, to be horizontally drilled from a surface location in the NE/4 NE/4 (Lot 1) of Section 4, Township 20 South, Range 34 East, to bottom hole locations in the SW/4 SE/4 (Unit O) of Section 9, Township 20 South, Range 34 East.
- Under **Case No. 23511**, Read & Stevens seeks to pool all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 4 and the E/2 E/2 of Section 9, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Bane 4-9 Federal Com 114H, 127H, 128H, 174H, 134H wells**, to be horizontally drilled from a surface location in the NE/4 NE/4 (Lot 1) of Section 4, Township 20 South, Range 34 East, to bottom hole locations in the SE/4 SE/4 (Unit P) of Section 9, Township 20 South, Range 34 East.
- Under **Case No. 23512**, Read & Stevens seeks to pool all uncommitted interests in the Wolfcamp formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and

the W/2 SW/4 of Section 4 and the W/2 W/2 of Section 9, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Bane 4-9 Federal Com 201H well**, to be horizontally drilled from a surface location in the NE/4 NW/4 (Lot 3) of Section 4, Township 20 South, Range 34 East, to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 9, Township 20 South, Range 34 East.

- Under **Case No. 23513**, Read & Stevens seeks to pool all uncommitted interests in the Wolfcamp formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 3 (NE/4 NW/4 equivalent), the SE/4 NW/4, and the E/2 SW/4 of Section 4 and the E/2 W/2 of Section 9, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Bane 4-9 Federal Com 202H well**, to be horizontally drilled from a surface location in the NE/4 NW/4 (Lot 3) of Section 4, Township 20 South, Range 34 East, to a bottom hole location in the SE/4 SW/4 (Unit N) of Section 9, Township 20 South, Range 34 East.
- Under **Case No. 23514**, Read & Stevens seeks to pool all uncommitted interests in the Wolfcamp formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 4 and the W/2 E/2 of Section 9, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Bane 4-9 Federal Com 203H well**, to be horizontally drilled from a surface location in the NE/4 NE/4 (Lot 1) of Section 4, Township 20 South, Range 34 East, to a bottom hole location in the SW/4 SE/4 (Unit O) of Section 9, Township 20 South, Range 34 East.
- Under **Case No. 23515**, Read & Stevens seeks to pool all uncommitted interests in the Wolfcamp formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 4 and the E/2 E/2 of Section 9, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Bane 4-9 Federal Com 204H well**, to be horizontally drilled from a surface location in the NE/4 NE/4 (Lot 1) of Section 4, Township 20 South, Range 34 East, to a bottom hole location in the SE/4 SE/4 (Unit P) of Section 9, Township 20 South, Range 34 East.
- Under **Case No. 23516**, Read & Stevens seeks to pool all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and the W/2 SW/4 of Section 5 and the W/2 W/2 of Section 8, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Joker 5-8 Federal Com 111H, 121H, 122H, 171H, and 131H wells**, to be horizontally drilled from a surface location in the NE/4 NW/4 (Lot 3) of Section 5, Township 20 South, Range 34 East, to bottom hole locations in the SW/4 SW/4 (Unit M) of Section 8, Township 20 South, Range 34 East.

- Under **Case No. 23517**, Read & Stevens seeks to pool all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 3 (NE/4 NW/4 equivalent), the SE/4 NW/4, and the E/2 SW/4 of Section 5 and the E/2 W/2 of Section 8, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Joker 5-8 Federal Com 112H, 123H, 124H, 172H, 132H wells**, to be horizontally drilled from a surface location in the NE/4 NW/4 (Lot 3) of Section 5, Township 20 South, Range 34 East, to bottom hole locations in the SE/4 SW/4 (Unit N) of Section 8, Township 20 South, Range 34 East.
- Under **Case No. 23518**, Read & Stevens seeks to pool all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 5 and the W/2 E/2 of Section 8, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Joker 5-8 Federal Com 113H, 125H, 126H, 173H, 133H wells**, to be horizontally drilled from a surface location in the NW/4 NE/4 (Lot 2) of Section 5, Township 20 South, Range 34 East, to bottom hole locations in the SW/4 SE/4 (Unit O) of Section 8, Township 20 South, Range 34 East.
- Under **Case No. 23519**, Read & Stevens seeks to pool all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 5 and the E/2 E/2 of Section 8, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Joker 5-8 Federal Com 114H, 127H, 128H, 174H, 134H wells**, to be horizontally drilled from a surface location in the NW/4 NE/4 (Lot 2) of Section 5, Township 20 South, Range 34 East, to bottom hole locations in the SE/4 SE/4 (Unit P) of Section 8, Township 20 South, Range 34 East.
- Under **Case No. 23520**, Read & Stevens seeks to pool all uncommitted interests in the Wolfcamp formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and the W/2 SW/4 of Section 5 and the W/2 W/2 of Section 8, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Joker 5-8 Federal Com 201H well**, to be horizontally drilled from a surface location in the NE/4 NW/4 (Lot 3) of Section 5, Township 20 South, Range 34 East, to a bottom hole location in the SW/4 SW/4 (Unit M) of Section 8, Township 20 South, Range 34 East.
- Under **Case No. 23521**, Read & Stevens seeks to pool all uncommitted interests in the Wolfcamp formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 3 (NE/4 NW/4 equivalent), the SE/4 NW/4, and the E/2 SW/4 of Section 5 and the E/2 W/2 of Section 8, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to

the proposed **Joker 5-8 Federal Com 202H well**, to be horizontally drilled from a surface location in the NE/4 NW/4 (Lot 3) of Section 5, Township 20 South, Range 34 East, to a bottom hole location in the SE/4 SW/4 (Unit N) of Section 8, Township 20 South, Range 34 East.

- Under **Case No. 23522**, Read & Stevens seeks to pool all uncommitted interests in the Wolfcamp formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 2 (NW/4 NE/4 equivalent), the SW/4 NE/4, and the W/2 SE/4 of Section 5 and the W/2 E/2 of Section 8, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Joker 5-8 Federal Com 203H well**, to be horizontally drilled from a surface location in the NW/4 NE/4 (Lot 2) of Section 5, Township 20 South, Range 34 East, to a bottom hole location in the SW/4 SE/4 (Unit O) of Section 8, Township 20 South, Range 34 East.
- Under **Case No. 23523**, Read & Stevens seeks to pool all uncommitted interests in the Wolfcamp formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 5 and the E/2 E/2 of Section 8, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Joker 5-8 Federal Com 204H well**, to be horizontally drilled from a surface location in the NW/4 NE/4 (Lot 2) of Section 5, Township 20 South, Range 34 East, to a bottom hole location in the SE/4 SE/4 (Unit P) of Section 8, Township 20 South, Range 34 East.

9. **Read & Stevens Exhibit C-1** contains draft Form C-102s for each well in these spacing units grouped by case. These forms demonstrate that the completed interval for the wells in each case will comply with statewide setbacks for oil wells. The exhibit shows that the wells targeting the Bone Spring formation in Case Nos. 23508-23511 and 23516-23519 will be assigned to the Teas; Bone Spring, East Pool [Pool Code 96637] and the wells targeting the Wolfcamp formation in Case Nos. 23512-23515 and 23520-23523 will be assigned to the Tonto; Wolfcamp Pool [Pool Code 59500].

10. **Read & Stevens Exhibit C-2** is a summary and overview of Read & Stevens' plans to drill and develop the Joker and Bane units, anticipated spud dates, the status of its federal APDs and potash Development Area approvals, an explanation of the relationship between Read & Stevens, First Century Oil, and Permian, and the status of its updated title work. Permian Resources

submitted its required Joker Potash Development Area to the BLM on February 17, 2023. Cimarex did not submit its overlapping competing Development Area to the BLM until July 7, 2023, and it was not received by the BLM until July 12, 2023.

TRACTS AND OWNERSHIP BREAKDOWN

11. **Read & Stevens Exhibit C-3** depicts a tract map on the left side of the exhibit illustrating the separately owned tracts of land in the Bone Spring formation comprising Sections 4, 5, 8 and 9. The land is 100% federal, and the federal lease numbers are referenced in each tract. On the right side of the exhibit is an illustration of the proposed spacing units across Sections 5 and 8 associated with the Joker Bone Spring spacing units and the proposed spacing units across Sections 4 and 9 associated with the Bane Bone Spring spacing units. It identifies the Bone Spring wells dedicated to each proposed spacing unit by case number.

12. **Read & Stevens Exhibit C-4** shows a similar tract map on the left side of the exhibit depicting separately owned tracts of land in the Wolfcamp formation for the same acreage. The land is 100% federal, and the federal lease numbers are referenced in each tract. On the right side of the exhibit is an illustration of the proposed spacing units across Sections 5 and 8 associated with the Joker Wolfcamp spacing units and the proposed spacing units across Sections 4 and 9 associated with the Bane Wolfcamp spacing units. It identifies the Wolfcamp wells dedicated to each proposed spacing unit by case number.

13. **Read & Stevens Exhibit C-5** is a list of the working interest owners in these cases. On the left side of the exhibits are the working interest owners in Sections 5 and 8 associated with the Joker cases (Case Nos. 23516-23523). At the top left is a list of the working interest owners in the Bone Spring formation. At the bottom left is a list of the working interest owners in the Wolfcamp formation. On the right side of the exhibit are the working interest owners in Sections

4 and 9 associated with the Bane cases (Case Nos. 23508-23515). At the top left is a list of the working interest owners in the Bone Spring formation. At the bottom left is a list of the working interest owners in the Wolfcamp formation. Permian seeks to pool the working interest owners highlighted in yellow and with a “Y” by their name under the column “Pooled Party?” The exhibit also summarizes Permian’s best understanding of the status of each party, such as whether it is likely to support Permian, Cimarex, or is neutral. The exhibit also notes at the bottom that there are important ownership differences in the working interest owners and ownership percentages between the Bone Spring and Wolfcamp formations that are explained in a later exhibit.

14. **Read & Stevens Exhibit C-6** is a list of the overriding royalty interest owners that Permian seeks to pool in all cases. The overriding royalty interest owners are the same in each case. The exhibit also summarizes Permian’s best understanding of the status of each overriding royalty interest owner, such as whether it is likely to support Read & Stevens (R&S), Cimarex, or is neutral.

15. **Read & Stevens Exhibit C-7** is a list of the record title owners in the Joker units (Sections 5 and 8) and the Bane units (Section 4 and 9) under each federal lease. Some record title owners have assigned away their operating rights but nevertheless must be pooled for Permian to obtain federal communitization agreements from the BLM. Accordingly, Permian seeks to pool all record title owners highlighted in yellow on this exhibit and with a “Y” by their name under the column “Pooled Party?” The applicable cases in which each record title owner is being pooled are identified in a separate column.

16. **Read & Stevens Exhibit C-8** is a series of slides breaking down the ownership interests in the Joker units (Case Nos. 23516-23523). The first slide of the exhibit provides an overview of the ownership share of each working interest in the Joker spacing units on a spacing

unit basis. At the top are the ownership breakdowns for the Joker units in the Bone Spring formation for each case. The ownership breakdown for the Joker units in the Wolfcamp is at the bottom. Ownership interests that differ between the Bone Spring and Wolfcamp formations are indicated in **bold**. Of particular interest, Magnum Hunter (an affiliate company to Cimarex) owns a greater share of the working interest in the Bone Spring formation than in the Wolfcamp formation in this acreage. In contrast, Read & Stevens (Permian), MRC Permian, Northern Oil & Gas, First Century (Permian), CBR Oil, CLM Production, Marks Oil, Wilbanks, Warren Associates, and the Cimarex entity itself owns a greater share of working interest in the Wolfcamp formation than in the Bone Spring formation in this acreage. Significantly, CLM Production and Warren Associates own no interest in the Bone Spring formation in this acreage. The second slide is an ownership breakdown for each spacing unit on a tract basis.

17. The following eight slides in the exhibit contain bar graphs illustrating the ownership differences in the share of working interests between the Bone Spring and Wolfcamp formations across Sections 5 and 8 for each of the Joker unit cases (Case Nos. 23516-23523). Owners with a different proportionate share of interests between the Bone Spring and Wolfcamp formations are indicated with a red bar. Also detailed in these slides are tract-by-tract leasehold ownership representations for each case broken out between the Bone Spring and Wolfcamp formations.

18. These bar graphs highlight a fatal problem with Cimarex's plan of development. Cimarex has not proposed initial wells for its Wolfcamp spacing units; instead, Cimarex plans to rely on its proposed Third Bone Spring wells to initially produce and develop separate spacing units in the Wolfcamp formation. This approach is problematic for a host of geologic and engineering reasons, which are separately addressed by Permian's technical witnesses. For

example, by failing to co-develop the Third Bone Spring with the Wolfcamp, Cimarex's plan will result in substantial waste by leaving unrecovered resources in the Wolfcamp. In addition to causing substantial waste, this approach is fatal due to the ownership differences between the Bone Spring and Wolfcamp formations. Because ownership between the formations is not uniform and Cimarex will not initially complete wells in the Wolfcamp, Cimarex's plan fails to protect the correlative rights of working interest owners in both formations.

19. As Cimarex states in its applications, they believe their proposed Third Bone Spring wells will "be drilled to a sufficient depth to test production and ultimately produce from the Wolfcamp formation." *See, e.g.*, Cimarex Application in Case No. 23594, ¶ 2. Cimarex's plan therefore proposes to intentionally drain reserves from Wolfcamp owners using a well dedicated to a Bone Spring pool with different owners and ownership percentages. Because the owners and ownership percentages between the formations are not uniform, allocation of production under this plan in a pooling order will impair the correlative rights of owners in both formations. New Mexico's compulsory pooling statute mandates that production be shared strictly on a surface acreage basis. *See* NMSA § 70-2-17 ("For the purpose of determining the portions of production owned by the persons owning interests in the pooled oil or gas, or both, such production shall be allocated to the respective tracts within the unit in the proportion that the number of surface acres included within each tract bears to the number of surface acres included in the entire unit." (emphasis added)). However, it is not possible to issue an order pooling Bone Spring and Wolfcamp spacing units and allocate production to owners in both pools on a surface acreage basis from wells completed in only the Bone Spring when ownership is not uniform.

20. Any effort to allocate production in a pooling order under Cimarex's plan would violate the express statutory requirement to allocate production on an acreage basis and would

impair owners' correlative rights. This is especially true for owners who own a greater working interest share in the Wolfcamp, such as Read & Stevens (Permian), MRC Permian, Northern Oil & Gas, First Century (Permian), CBR Oil, Marks Oil, Wilbanks, and the Cimarex entity itself or owners who own no interest in the Bone Spring at all, such as CLM Production and Warren Associates.

21. **Read & Stevens Exhibit C-9** is a similar series of slides breaking down the ownership interests in the Bane units (Case Nos. 23508-23515). As with the corresponding Joker unit exhibit, the first slide provides an overview of the ownership share of each working interest in the Bane spacing units on a spacing unit basis. At the top are the ownership breakdowns for the Bane units in the Bone Spring formation for each case. The ownership breakdown for the Bane units in the Wolfcamp is at the bottom. Ownership interests that differ between the Bone Spring and Wolfcamp formations are indicated in **bold**. Of particular interest, Javelina Partners and William A. Hudson II own a greater share of the working interest in the Bone Spring formation than in the Wolfcamp formation in this acreage. William A. Hudson II has no interest in the Wolfcamp formation. Whereas HOG Partnership LP has a greater working interest share in the Wolfcamp than it does in the Bone Spring. The second slide in the exhibit is an ownership breakdown for each spacing unit on tract basis.

22. Cimarex's competing Wolfcamp cases suffer the same fatal problem as its Bone Spring cases, but in these cases it has not proposed any initial wells to be completed in the Wolfcamp; instead, it proposes to initially develop the Wolfcamp formation only with Bone Spring wells. Allocation of production in a pooling order under Cimarex's plan would violate the express statutory requirement to allocate production within a spacing unit on an acreage basis and would impair owners' correlative rights.

WELL PROPOSALS, AFES & GOOD FAITH NEGOTIATIONS

23. **Read & Stevens Exhibit C-10** contains a sample of the well proposal letters and AFES for each well sent to owners with a working interest grouped by case. The costs reflected in the AFES are consistent with what Permian and other operators have incurred for drilling similar horizontal wells in the area.

24. Read & Stevens requests that the overhead and administrative costs for drilling and producing the proposed wells be set at \$8,000 per month while drilling and \$800 per month while producing and that they be adjusted annually in accordance with COPAS accounting procedures. These costs are consistent with what other operators are charging in this area for similar wells.

25. Read & Stevens does not intend pooled working interest owners to have to pay their proportionate share for wells that will not be drilled in the immediate near term. Accordingly, we request that the language of the standard pooling order governing submission of estimated well costs and well elections be modified to read as follows:

~~Operator shall submit No later than thirty (30) days after Operator submits the~~ Estimated Well Costs no sooner than 60 days before the commencement of the drilling of each initial well, and the owner of a Pooled Working Interest shall have 30 days upon receipt of the Estimated Well Costs to elect whether to pay its share of the Estimated Well Costs or its share of the actual costs to drill, complete and equip the well (“Actual Well Costs”) out of production from the well. An owner of a Pooled Working Interest who elects to pay its share of the Estimated Well Costs shall render payment to Operator no later than thirty (30) days after receipt of the Estimated Well Costs, and shall be liable for operating costs, but not risk charges for the well. An owner of a Pooled Working Interest who fails to pay its share of the Estimated Well Costs or who elects to pay its share of the Actual Well Costs out of production from the well shall be considered to be a “Non-Consenting Pooled Working Interest.”

26. **Read & Stevens Exhibit C-11** contains a general summary of the communications to reach voluntary agreement with uncommitted working interest owners. As indicated in the

exhibit, Read & Stevens has made a good faith effort to locate and reach voluntary agreement with the working interests to be pooled in these cases, including Cimarex and its related entities. There are no unlocatable parties. In my opinion, Read & Stevens has undertaken good faith efforts to reach agreement with uncommitted working interest owners.

27. Read & Stevens has provided the law firm of Holland & Hart LLP with the names and addresses of the parties that Read & Stevens seeks to pool and instructed that they be notified of this hearing. Read & Stevens has conducted a diligent search of all public records in the county where the properties are located, reviewed telephone directories, and conducted computer searches to locate contact information for each interest owner.

28. Also included in **Read & Stevens Exhibit C-12** are support letters from various working interest owners subject to these competing pooling cases, including Ard Oil,¹ Diamond Star,² Tierra Encantada,³ as well as CLM Production,⁴ CBR Oil Properties,⁵ and Warren Associates.⁶ Neither CLM Production nor Warren Associates own an interest in the Bone Spring Formation and would be incurably damaged if Cimarex's plans were approved. Additionally, Northern Oil & Gas⁷ has indicated strong concern over Cimarex's plan to disregard the Wolfcamp A and favors Read & Stevens/Permian's co-development plan between the Third Bone Spring and Wolfcamp A formations. CBR Oil Properties and Northern Oil & Gas do not own an interest in the Bone Spring in the E/2 of Sections 5 and 8 where they do own in the Wolfcamp and, therefore,

¹ Ard Oil's support letter is applicable to all cases, i.e., Case Nos. 23508-23523.

² Diamond Star's support letter is 23516 and 23520 (W/2 W/2 Joker in Bone Spring and Wolfcamp).

³ Tierra Encantada's support letter is 23516 and 23520 (W/2 W/2 Joker in Bone Spring and Wolfcamp).

⁴ CLM Production's support letter is applicable to Case No. 23520 only (W/2 W/2 Joker Wolfcamp).

⁵ CBR Oil Properties' support letter is applicable to Case Nos. 23517 (E/2W/2 Joker Bone Spring) and 23521(E/2 W/2 Joker Wolfcamp), 23522 (W/2 E/2 Joker Wolfcamp) and 23533 (E/2 E/2 Joker Wolfcamp).

⁶ Warren Associate's support letter is applicable to Case No. 23520 only (W/2 W/2 Joker Wolfcamp).

⁷ Northern Oil & Gas' support of a co-development plan is applicable to Case Nos. 23517, 23520-23523 (being the E/2 W/2 Joker in Bone Spring and Wolfcamp, and W/2 E/2, E/2 E/2 in the Wolfcamp).

would be incurably damaged if Cimarex's plans were approved as to that acreage. Further, 16 separate overriding royalty interest owners, who have been notified of the competing proposals, have expressed their support for Read & Stevens' proposals, attached as **Read & Stevens Exhibit C-13**. These overriding royalty interest owners own an interest in each of the competing cases, i.e., Case Nos. 23508-23523.

READ & STEVENS' COMPREHENSIVE PLANS

29. **Read & Stevens Exhibit C-14** includes a map providing an overview of Read & Stevens' comprehensive development plans within Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Sections 5 and 8, where the Joker spacing units are located, and Section 4 and 9, where the Bane units are located, are outlined in green. Immediately to the east are Read & Stevens' Riddler Bone Spring and Wolfcamp spacing units in Sections 3 and 10, which are outlined in blue recently approved under Order Nos. R-22748 and R-22754. To the south, in Sections 18 and 19 and Sections 17 and 20, are Read & Stevens' Batman and Robin developments, which are also outlined in blue, that were approved under Order Nos. R-22277, R-22284, R-22319, and R-22326, respectively.

30. As shown on the exhibit, Read & Stevens/Permian has an extensive position and comprehensive development plans for the area that will minimize surface disturbance by consolidating roads, flowlines, pads, and tank batteries. Similarly, to the offset Batman and Robin developments, Read & Stevens/Permian plans to commingle all production from its Joker and Bane units into the same battery, reducing surface impacts and minimizing waste by eliminating emissions by having fewer surface facilities and potential emission sources.

31. As noted on the exhibit, Read & Stevens/Permian has been the most active operator in this area over the last 36 months, drilling 4 Bone Spring wells and 1 Wolfcamp well in that time,

with plans to spud at least an additional 8 wells in the Bone Spring & Wolfcamp formations by the end of 2023. In comparison, Cimarex has drilled a single one-mile well in Township 20 South, Range 34 East, and two, two-mile wells in the adjacent Township to the north in the same timeframe.

32. A review of Division records confirms that offsetting Bone Spring and Wolfcamp developments have been pooled and developed through separately dedicated wells in conformance with the Division’s pool designations, as Read & Stevens proposes. Read & Stevens has not identified any precedent for Cimarex’s attempt to pool the Wolfcamp spacing units without Wolfcamp well proposals or dedicating initial wells to the proposed spacing units, including from Cimarex’s own limited offsetting production.

CONCLUSION

33. **Read & Stevens Exhibits C-1 through C-14** were either prepared by me or compiled under my direction and supervision.

34. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in these cases. This statement is made on the date next to my signature below.

Brief Status Update/General Info – Permian Land

- Bane anticipated spud date: Q2 2024
- Joker anticipated spud date: Q3 2024
- APD Status:
 - Joker: Pursuant to BLM rule, APD submissions within the Potash area are not welcome until a Potash Development Area (“DA”) is fully approved. Due to Cimarex contest, Potash DA remains unapproved. However, Permian has all 24 Joker APDs uploaded to the BLM’s AFMSS and can be submitted within 24 hours of approval.
 - Bane: Pursuant to NMOCD rule, an Operator must either obtain an interest in every tract or a compulsory pooling order prior to the submission of APDs. However, Permian has all Bane 24 APDs uploaded to the BLM’s AFMSS and can be submitted within 24 hours of either obtaining an Order or an interest in every tract.
- C-102s: All available, supplemented here with this presentation as Exhibit A-1.
- Joker Potash DA Status: Joker DA submitted to the BLM and all non-op/offset owners on February 17th prior to any Permian well proposal within the unit as is the customary order of business. BLM now relying on NMOCD Order to determine approval. While Cimarex has protested the Joker DA in February 2023, it finally submitted one of their own via letter dated June 26, 2023, not mailed til July 7, 2023, received by the BLM July 12th.
- Relationship of Parties: Permian Resources Operating, LLC closed the acquisition of **Read & Stevens** as well as **First Century Oil** on February 16, 2023 and has acquired the interest of **Avalon Energy**. Permian as the parent company will Operator on their behalf until all entities are consolidated.
- Title Opinions: Full Joker & Bane 2023 Drilling and Division Order Title Opinions rendered. Currently working curative items.
- Proposals/AFES/Support Docs: All available, supplemented here with this presentation as Exhibit A-9

Read & Stevens Plan Supports:

- Meaningful development of Bone Spring Formation & Wolfcamp Formations backed by real-time data and scientific tests
- Protection of correlative rights
- Prevention of economic and resource waste
- Proper & thoughtful alignment of pool rules with development plans

Cimarex Plan Supports:

- More simple assumption of easier development plan
- Violation of correlative rights
- Resource & economic waste of all interest owners
- Unclear pooling and development plans based on stated intent to deplete Wolfcamp utilizing Bone Spring landings

Entities with a **greater** interest in the **Bone Spring**: **Magnum Hunter (Cimarex)**, Highland, Avalon (PR), Prime Rock

Entities with a **greater** interest in the **Wolfcamp**: MRC, Northern, **First Century (PR)**, **Read & Stevens (PR)**, CBR, CLM Production, Warren Associates, Cimarex Energy, Marks Oil, Wilbanks Reserve

Entities with **NO** interest in the **Bone Spring**: CLM Production & Warren Associates

*All ownership information obtained from 2023 title opinions and reports

*Please note ownership differences between Bone Spring and Wolfcamp formations - BOLD

*Asterisk denotes pooled party

*Contractual Rights separate

*Status is of to best knowledge

RE: Bane 4-9 Federal Com – Well Proposals
Sections 4 & 9, T20S-R34E
Lea County, New Mexico

To Whom It May Concern:

Permian Resources Operating, LLC, as operator for Read & Stevens, Inc. (“Permian”), hereby proposes the drilling and completion of the following twenty-four (24) wells, the Bane 4-9 Federal Com wells at approximate locations within Township 20 South, Range 34 East:

1. Bane 4-9 Federal Com 111H – West Pad

SHL: 575’ FNL & 1,525’ FWL (or at a legal location within Lot 3) of Section 4

Targeted Interval: Wolfcamp XY
Total Cost: See attached AFE

The locations, TVDs, and targets are approximate and subject to change dependent on surface or subsurface issues encountered. These locations do fall within an approved potash drill island, so any surface changes remain subject to BLM approval. Permian is proposing to drill these wells under the modified terms of the 1989 AAPL Operating Agreement and a form of said Operating Agreement is enclosed. The Operating Agreement has the following general provisions:

- 100%/300%/300% non-consent provisions
- \$8,000/\$800 drilling and producing rates
- Permian Resources Operating, LLC named as Operator

Note that communitization agreements for each spacing unit shall be sent in a separate mailing.

Please indicate your election to participate in the drilling and completion of the proposed wells in the space provided below. Please sign and return one copy of this letter, a signed copy of the proposed AFE, and your geologic well requirements.

In the interest of time, should we not reach an agreement within thirty (30) days of the date of your receipt of this letter, Permian will apply to the New Mexico Oil Conservation Division for compulsory pooling of your interest into a spacing unit for the proposed well. If you do not wish to participate, Permian would be interested in acquiring your interest in the subject lands which is subject to further mutually agreeable negotiation.

Thank you for your time and consideration, if you have any questions at all, please don't hesitate to contact me at 432.400.1037 or by email at travis.macha@permianres.com.

Respectfully,

Travis Macha
Senior Landman

The costs on this AFE are estimates only and may not be construed as a ceiling on any specific item or the total cost of the project. Taking installation approved under the AFE may be delayed up to a year after the well has been completed. In executing this AFE, the Participant agrees to pay its proportionate share of actual costs incurred, including local, state, regulatory, hook-up and well costs under the terms of the applicable joint operating agreement, regulatory order or other agreement covering this well. Participants shall be covered by and billed proportionately for Operator's well

The costs on this AFE are estimates only and may not be construed as a ceiling on any specific item or the total cost of the project. Taking installation approved under the AFE may be delayed up to a year after the well has been completed. In executing this AFE, the Participant agrees to pay its proportionate share of actual costs incurred, including local, state, regulatory, backflow and well costs under the terms of the applicable joint operating agreement, regulatory order or other agreement covering this well. Participants shall be covered and billed proportionately for Operator's well.

The costs on this AFE are estimates only and may not be construed as a ceiling on any specific item or the total cost of the project. Taking installation approved under the AFE may be delayed up to a year after the well has been completed. In executing this AFE, the Participant agrees to pay its proportionate share of actual costs incurred, including local corporate overhead, backhaul and well costs under the terms of the applicable joint operating agreement, regulatory order or other agreement covering this well. Participants shall be covered and billed proportionately for Operator's well.

The costs on this AFE are estimates only and may not be construed as ceilings on any specific item or the total cost of the project. Taking installation approved under the AFE may be delayed up to a year after the well has been completed. In executing this AFE, the Participant agrees to pay its proportionate share of actual costs incurred, including local corporate overhead, backhaul and well costs under the terms of the applicable joint operating agreement, regulatory order or other agreement covering this well. Participants shall be covered and billed proportionately for Operator's well.

The costs on this AFE are estimates only and may not be construed as a ceiling on any specific item or the total cost of the project. Taking installation approved under the AFE may be delayed up to a year after the well has been completed. In executing this AFE, the Participant agrees to pay its proportionate share of actual costs incurred, including local, state, and federal regulatory, backhaul and well costs under the terms of the applicable joint operating agreement, regulatory order or other agreement covering this well. Participants shall be covered and billed proportionately for Operator's well.

The costs on this AFE are estimates only and may not be construed as a ceiling on any specific item or the total cost of the project. Taking installation approved under the AFE may be delayed up to a year after the well has been completed. In executing this AFE, the Participant agrees to pay its proportionate share of actual costs incurred, including local, state, regulatory, hook-up and well costs under the terms of the applicable joint operating agreement, regulatory order or other agreement covering this well. Participants shall be covered and billed proportionately for Operator's well.

RE: Joker 5-8 Federal Com – Well Proposals
Sections 5 & 8, T20S-R34E
Lea County, New Mexico

To Whom It May Concern:

Permian Resources Operating, LLC, as operator for Read & Stevens, Inc. ("Permian"), hereby proposes the drilling and completion of the following twenty-four (24) wells, the Joker 5-8 Federal Com wells at approximate locations within Township 20 South, Range 34 East:

FIRST BONE SPRING FORMATION:

- 1. Joker 5-8 Federal Com 111H - (West Pad)**
SHL: 380' FNL & 2,179' FWL (or at a legal location in Lot 3) of Section 5
FTP: 100' FNL & 330' FWL of Section 5
LTP: 100' FSL & 330' FWL of Section 8
BHL: 10' FSL & 330' FWL of Section 8
Standard Spacing Unit: Lot 4, SWNW, W2SW of Section 5, W2W2 of Section 8, T20S-R34E
TVD: 9,576'
TMD: 19,861'
- 2. Joker 5-8 Federal Com 112H – (West Pad)**
SHL: 380' FNL & 2,212' FWL (or at a legal location in Lot 3) of Section 5
FTP: 100' FNL & 1,650' FWL of Section 5
LTP: 100' FSL & 1,650' FWL of Section 8
BHL: 10' FSL & 1,650' FWL of Section 8
Standard Spacing Unit: Lot 3, SENW, E2SW of Section 5, E2W2 of Section 8, T20S-R34E
TVD: 9,596'
TMD: 19,881'
- 3. Joker 5-8 Federal Com 113H – (East Pad)**
SHL: 380' FNL & 2,005' FEL (or at a legal location in Lot 2) of Section 5
FTP: 100' FNL & 2,310' FEL of Section 5
LTP: 100' FSL & 2,310' FEL of Section 8
BHL: 10' FSL & 2,310' FEL of Section 8
Standard Spacing Unit: Lot 2, SWNE, W2SE of Section 5, W2E2 of Section 8, T20S-R34E
TVD: 9,616'
TMD: 19,901'

BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. C-10
Submitted by: Read & Stevens, Inc.
Hearing Date: July 20, 2023
Case Nos. 23516-23523

4. Joker 5-8 Federal Com 114H – (East Pad)

SHL: 380' FNL & 1,840' FEL (or at a legal location in Lot 2) of Section 5

SHL: 250' FNL & 2,245' FWL (or at a legal location in Lot 3) of Section 5
FTP: 100' FNL & 990' FWL of Section 5
LTP: 100' FSL & 990' FWL of Section 8
BHL: 10' FSL & 990' FWL of Section 8
Standard Spacing Unit: Lot 4, SWNW, W2SW of Section 5, W2W2 of Section 8, T20S-R34E
TVD: 10,926'
TMD: 21,211'

22. Joker 5-8 Federal Com 202H - (West Pad)

SHL: 250' FNL & 2,311' FWL (or at a legal location in Lot 3) of Section 5
FTP: 100' FNL & 2,310' FWL of Section 5
LTP: 100' FSL & 2,310' FWL of Section 8
BHL: 10' FSL & 2,310' FWL of Section 8
Standard Spacing Unit: Lot 3, SENW, E2SW of Section 5, E2W2 of Section 8, T20S-R34E
TVD: 10,926'
TMD: 21,211'

23. Joker 5-8 Federal Com 203H - (East Pad)

SHL: 250' FNL & 1,939' FEL (or at a legal location in Lot 2) of Section 5
FTP: 100' FNL & 1,650' FEL of Section 5
LTP: 100' FSL & 1,650' FEL of Section 8
BHL: 10' FSL & 1,650' FEL of Section 8
Standard Spacing Unit: Lot 2, SWNE, W2SE of Section 5, W2E2 of Section 8, T20S-R34E
TVD: 10,906'
TMD: 21,191'

24. Joker 5-8 Federal Com 204H - (East Pad)

SHL: 250' FNL & 1,873' FEL (or at a legal location in Lot 2) of Section 5
FTP: 100' FNL & 330' FEL of Section 5
LTP: 100' FSL & 330' FEL of Section 8
BHL: 10' FSL & 330' FEL of Section 8
Standard Spacing Unit: Lot 1, SENE, E2SE of Section 5, E2E2 of Section 8, T20S-R34E
TVD: 10,896'
TMD: 21,181'

The locations, TVDs, and targets are approximate and subject to change dependent on surface or subsurface issues encountered. These locations do fall within an approved potash drill island, so any surface changes remain subject to BLM approval. Permian is proposing to drill these wells under the modified terms of the 1989 AAPL Operating Agreement and a form of said Operating Agreement is enclosed. The Operating Agreement has the following general provisions:

- 100%/300%/300% non-consent provisions
- \$8,000/\$800 drilling and producing rates
- Permian Resources Operating, LLC named as Operator

Note that communitization agreements for each spacing unit shall be sent in a separate mailing.

Please indicate your election to participate in the drilling and completion of the proposed wells in the space provided below. Please sign and return one copy of this letter, a signed copy of the proposed AFE, and your geologic well requirements.

Please further note that the Sections 5 & 8 require a Potash Development Area to be approved by the Bureau of Land Management prior to any permits to be submitted. Permian has submitted for this development area and conducted federal onsite. This development area has been protested by Cimarex. Any development of these two sections will be subject to that protest being dismissed.

In the interest of time, should we not reach an agreement within thirty (30) days of the date of your receipt of this letter, Permian will apply to the New Mexico Oil Conservation Division for compulsory pooling of your interest into a spacing unit for the proposed well. If you do not wish to participate, Permian would be interested in acquiring your interest in the subject lands which is subject to further mutually agreeable negotiation.

Thank you for your time and consideration, if you have any questions at all, please don't hesitate to contact me at 432.400.1037 or by email at travis.macha@permianres.com. Due to the number of inquiries received, email may be the quickest way to receive a response.

Operator Note: Permian has recently drilled a pilot hole in the N/2 of Section 18 of T20S-R34E to the southwest of the Joker unit and is presently drilling a 3rd Bone Spring/Wolfcamp XY spacing test in Sections 18 & 19 (Batman Unit). Permian further plans a second 1st Bone Spring/2nd Bone Spring spacing test in Sections 17 & 20 of T20S-R34E directly south of the Joker unit later this year (Robin Unit). The learnings from the pilot hole and both spacing tests will be implemented by Permian in all zones here in order to ensure thoughtful and efficient development.

Respectfully,

Travis Macha
Senior Landman

The costs on this AFE are estimates only and may not be construed as ceilings on any specific item or the total cost of the project. Tubing installation approved under the AFE may be delayed up to a year after the well has been completed. In executing this AFE, the Participant agrees to pay its proportionate share of actual costs incurred, including, legal, curative, regulatory, brokerage and well costs under the terms of the applicable joint operating agreement, regulatory order or other agreement covering this well. Participants shall be covered by and billed proportionately for Operator's well control and general liability insurance unless participant provides Operator a certificate evidencing its own insurance in an amount acceptable to the Operator by the date of spend.

The costs on this AFE are estimates only and may not be contrasted as callings on any specific item or the total cost of the project. Tubing installation approved under the AFE may be delayed up to a year after the well has been completed. In executing this AFE, the Participant agrees to pay its proportionate share of actual costs incurred, including, legal, curative, regulatory, brokerage and well costs under the terms of the applicable joint operating agreement, regulatory order or other agreement covering this well. Participants shall be covered by and billed proportionately for Operator's well control and general liability insurance unless participant provides Operator a certificate evidencing its own insurance in an amount acceptable to the Operator by the date of sign.

The costs on this AFE are estimates only and may not be contrasted as callings on any specific item or the total cost of the project. Tubing installation approved under the AFE may be delayed up to a year after the well has been completed. In executing this AFE, the Participant agrees to pay its proportionate share of actual costs incurred, including, legal, curative, regulatory, brokerage and well costs under the terms of the applicable joint operating agreement, regulatory order or other agreement covering this well. Participants shall be covered by and billed proportionately for Operator's well control and general liability insurance unless participant provides Operator a certificate evidencing its own insurance in an amount acceptable to the Operator by the date of spend.

The costs on this AFE are estimates only and may not be construed as ceilings on any specific item or the total cost of the project. Tubing installation approved under the AFE may be delayed up to a year after the well has been completed. In executing this AFE, the Participant agrees to pay its proportionate share of actual costs incurred, including, legal, curative, regulatory, brokerage and well costs under the terms of the applicable joint operating agreement, regulatory order or other agreement covering this well. Participants shall be covered by and billed proportionately for Operator's well control and general liability insurance unless participant provides Operator a certificate evidencing its own insurance in an amount acceptable to the Operator by the date of sign-off.

The costs on this AFE are estimates only and may not be construed as ceilings on any specific item or the total cost of the project. Tubing installation approved under the AFE may be delayed up to a year after the well has been completed. In executing this AFE, the Participant agrees to pay its proportionate share of actual costs incurred, including, legal, curative, regulatory, brokerage and well costs under the terms of the applicable joint operating agreement, regulatory order or other agreement covering this well. Participants shall be covered by and billed proportionately for Operator's well control and general liability insurance unless participant provides Operator a certificate evidencing its own insurance in an amount acceptable to the Operator by the date of spend.

The costs on this AFE are estimates only and may not be contrasted as callings on any specific item or the total cost of the project. Tubing installation approved under the AFE may be delayed up to a year after the well has been completed. In executing this AFE, the Participant agrees to pay its proportionate share of actual costs incurred, including, legal, curative, regulatory, brokerage and well costs under the terms of the applicable joint operating agreement, regulatory order or other agreement covering this well. Participants shall be covered by and billed proportionately for Operator's well control and general liability insurance unless participant provides Operator a certificate evidencing its own insurance in an amount acceptable to the Operator by the date of sign-off.

The costs on this AFE are estimates only and may not be construed as ceilings on any specific item or the total cost of the project. Tubing installation approved under the AFE may be delayed up to a year after the well has been completed. In executing this AFE, the Participant agrees to pay its proportionate share of actual costs incurred, including, legal, curative, regulatory, brokerage and well costs under the terms of the applicable joint operating agreement, regulatory order or other agreement covering this well. Participants shall be covered by and billed proportionately for Operator's well control and general liability insurance unless participant provides Operator a certificate evidencing its own insurance in an amount acceptable to the Operator by the date of spend.

RE: Joker & Bane Developments
Township 20 South, Range 34 East, Lea Co., New Mexico
Sections 4, 5, 8, & 9

To Whom It May Concern,

The purpose of this letter is to help bring a greater understanding and lessen any potential confusion surrounding the previously proposed developments in this area. As you may be aware Permian Resources Operating, LLC ("Permian") has recently closed the acquisition of Read & Stevens, Inc. and First Century Oil, Inc. effective February 16, 2023.

WHEREAS, on February 17, 2023, Permian proposed a twenty-four (24) well project within sections 4 & 9 of T20S-R34E (the "Bane" project) as well as a potash development area encompassing sections 5 & 8 of T20S-R34E (the "Joker" project). Permian subsequently sent formal Joker well proposals out in March subsequent to Cimarex Energy Company's ("Cimarex") filing for compulsory pooling on both Permian project areas.

To provide a brief update on the status of these projects to-date:

- **Bane**: Contested hearing at the New Mexico Oil Conservation Division ("NMOCD") between Permian and Cimarex presently scheduled for July 20th, 2023.
- **Joker**: Cimarex, Joseph W. Foran, and MRC Permian have issued protest of Permian's potash development area proposal which is necessary to have in place for development by any party. Similarly, to Bane a contested hearing is scheduled at the NMOCD for July 20th, 2023.
- **Applications for Permits to Drill ("APDs")**: Permian has conducted on sites with the Bureau of Land Management on both Joker and Bane, has fully prepared C-102s, and is ready to file permits. Permian is presently prevented by NMOCD rule and is refraining from filing these permits due to the contests.

Attached herein to this letter is a synopsis of Permian's well preparation, development plans, informal thoughts, and intentions for speedy and thoughtful development of Joker & Bane. Once you review the attached materials herein, if you so choose to elect to support Permian as operator of Joker & Bane you may sign below in the indicated space and return a copy of it using the enclosed return envelope.

EXHIBIT C-12

We look forward to taking the necessary steps forward to developing these projects in a meaningful manner and having any open conversations with you as seen fit. We appreciate the time and consideration taken into this, if you have any questions, please don't hesitate to reach out to the undersigned at travis.macha@permianres.com.

Respectfully,

Travis Macha

RE: Joker Development
Township 20 South, Range 34 East, Lea Co., New Mexico
Sections 5 & 8

To Whom It May Concern,

The purpose of this letter is to allow Northern Oil and Gas, Inc. ("Northern") as an impacted working interest owner within the below referenced development the opportunity to make reference to its opinion on the development strategy.

WHEREAS, on February 17, 2023, Permian Resources Operating as operator for Read & Stevens, Inc. ("Permian") proposed a potash development area encompassing sections 5 & 8 of T20S-R34E (the "Joker" project). Permian subsequently sent formal Joker well proposals out in March subsequent to Cimarex Energy Company's ("Cimarex") filing for compulsory pooling on the Permian project area.

To provide a very brief summary of Permian's development

- **Joker:** Twenty-Four (24) wells proposed, including four (4) falling in the 3rd Bone Spring formation and four (4) in the Wolfcamp A formation.

WHEREAS, Northern owns working interests in both the Bone Spring and Wolfcamp formation that are not equal and would be impacted if a well permitted in one formation was draining hydrocarbons from the other formation.

WHEREAS, Northern may provide its opinion of the development of the hydrocarbons in the Joker unit, including Permian's plan to co-develop the 3rd Bone spring and Wolfcamp A formations together.

Respectfully,

Travis Macha
Senior Landman

[Statement/Signature Page Follows]

EXHIBIT C-12

The undersigned hereby acknowledges the importance of thoughtfully evaluating the co-development of the 3rd Bone Spring Formation along with the Wolfcamp XY in and around the vicinity of the referenced Joker unit and supports the scientific exploration of the two formations together, with consideration for the varying ownership interests in each formation.

The purpose of this letter is to help bring a greater understanding and lessen any potential confusion surrounding the previously proposed developments in this area. As you may be aware Permian Resources Operating, LLC ("Permian") has recently closed the acquisition of Read & Stevens, Inc. and First Century Oil, Inc. effective February 16, 2023.

WHEREAS, on February 17, 2023, Permian proposed a twenty-four (24) well project within sections 4 & 9 of T20S-R34E (the "Bane" project) as well as a potash development area encompassing sections 5 & 8 of T20S-R34E (the "Joker" project). Permian subsequently sent formal Joker well proposals out in March subsequent to Cimarex Energy Company's ("Cimarex") filing for compulsory pooling on both Permian project areas.

To provide a brief update on the status of these projects to-date:

- **Bane**: Contested hearing at the New Mexico Oil Conservation Division ("NMOCD") between Permian and Cimarex presently scheduled for July 20th, 2023.
- **Joker**: Cimarex, Joseph W. Foran, and MRC Permian have issued protest of Permian's potash development area proposal which is necessary to have in place for development by any party. Similarly, to Bane a contested hearing is scheduled at the NMOCD for July 20th, 2023.
- **Applications for Permits to Drill ("APDs")**: Permian has conducted on sites with the Bureau of Land Management on both Joker and Bane, has fully prepared C-102s, and is ready to file permits. Permian is presently prevented by NMOCD rule and is refraining from filing these permits due to the contests.

Attached herein to this letter is a synopsis of Permian's well preparation, development plans, informal thoughts, and intentions for speedy and thoughtful development of Joker & Bane. Once you review the attached materials herein, if you so choose to elect to support Permian as operator of Joker & Bane you may sign below in the indicated space and return a copy of it using the enclosed return envelope.

EXHIBIT C-12

We look forward to taking the necessary steps forward to developing these projects in a meaningful manner and having any open conversations with you as seen fit. We appreciate the time and consideration taken into this, if you have any questions, please don't hesitate to reach out to the undersigned at travis.macha@permianres.com.

Respectfully,

Travis Macha

RE: Joker & Bane Developments
Township 20 South, Range 34 East, Lea Co., New Mexico
Sections 4, 5, 8, & 9

To Whom It May Concern,

The purpose of this letter is to help bring a greater understanding and lessen any potential confusion surrounding the previously proposed developments in this area. If you are receiving this letter, we show you to be a present owner of an overriding royalty interest within the respective project areas described below and could be substantially impacted by an operatorship decision entailed.

As you may be aware Permian Resources Operating, LLC ("Permian") has recently closed the acquisition of Read & Stevens, Inc. and First Century Oil, Inc. via public sale effective February 16, 2023.

WHEREAS, on February 17, 2023, Permian proposed a twenty-four (24) well project within sections 4 & 9 of T20S-R34E (the "Bane" project) as well as a potash development area encompassing sections 5 & 8 of T20S-R34E (the "Joker" project). Permian later sent formal Joker well proposals out in March subsequent to Cimarex Energy Company's ("Cimarex") filing for compulsory pooling on both Permian project areas utilizing well proposals it had sent in August of 2022.

To provide a brief update on the status of these projects to-date:

- **Bane**: Contested hearing at the New Mexico Oil Conservation Division ("NMOCD") between Permian and Cimarex presently scheduled for July 20th, 2023.
- **Joker**: Cimarex, Joseph W, Foran, and MRC Permian have issued protest of Permian's potash development area proposal which is necessary to have in place for development by any party. Similarly, to Bane a contested hearing is scheduled at the NMOCD for July 20th, 2023.
- **Applications for Permits to Drill ("APDs")**: Permian has conducted on sites with the Bureau of Land Management on both Joker and Bane, has fully prepared C-102s, and is ready to file APDs. Permian is presently prevented by NMOCD & BLM rule and is refraining from filing these due to the contests.

While formal thoughts on development and timing are not included in this letter for confidentiality purposes, it is Permian's intention for speedy and thoughtful development of Joker & Bane. Permian has spent substantial time and resources to understand the nature of the rock in these projects and is presently conducting spacing tests and gathering pilot hole data in the adjacent Batman development in addition to having obtained seismic over the entire area. If you choose to

EXHIBIT C-13

elect to support Permian as operator of Joker & Bane you may sign below in the indicated space and return a copy of it using the enclosed return envelope.

We look forward to taking the necessary steps forward to developing these projects in a meaningful manner and having any open conversations with you as seen fit. In the event you would like to explore a sale of your overriding royalty interest, please feel free to reach out and we will be happy to discuss further. We appreciate the time and consideration taken into this, if you have any questions, please don't hesitate to reach out to the undersigned at travis.macha@permianres.com.

Permian later sent formal Joker well proposals out in March subsequent to Cimarex Energy Company's ("Cimarex") filing for compulsory pooling on both Permian project areas utilizing well proposals it had sent in August of 2022.

To provide a brief update on the status of these projects to-date:

- **Bane:** Contested hearing at the New Mexico Oil Conservation Division ("NMOCD") between Permian and Cimarex presently scheduled for July 20th, 2023.
- **Joker:** Cimarex, Joseph W, Foran, and MRC Permian have issued protest of Permian's potash development area proposal which is necessary to have in place for development by any party. Similarly, to Bane a contested hearing is scheduled at the NMOCD for July 20th, 2023.
- **Applications for Permits to Drill ("APDs"):** Permian has conducted on sites with the Bureau of Land Management on both Joker and Bane, has fully prepared C-102s, and is ready to file APDs. Permian is presently prevented by NMOCD & BLM rule and is refraining from filing these due to the contests.

While formal thoughts on development and timing are not included in this letter for confidentiality purposes, it is Permian's intention for speedy and thoughtful development of Joker & Bane. Permian has spent substantial time and resources to understand the nature of the rock in these projects and is presently conducting spacing tests and gathering pilot hole data in the adjacent Batman development in addition to having obtained seismic over the entire area. If you choose to

EXHIBIT C-13

elect to support Permian as operator of Joker & Bane you may sign below in the indicated space and return a copy of it using the enclosed return envelope.

We look forward to taking the necessary steps forward to developing these projects in a meaningful manner and having any open conversations with you as seen fit. In the event you would like to explore a sale of your overriding royalty interest, please feel free to reach out and we will be happy to discuss further. We appreciate the time and consideration taken into this, if you have any questions, please don't hesitate to reach out to the undersigned at travis.macha@permianres.com.

Permian Resources
Attn: Kathryn Hanson
300 N Marienfeld St., Suite 1000
Midland, TX 79701

Dear Ms. Hanson:

Re: Joker and Bane Developments
Township 20S, Range 34E, Sections 4, 5, 8 and 9
Lea County, New Mexico

Thank you very much for the certified mail letter dated 6/1/2023 sent by Travis Macha, Senior Landman. I have completed the letter and I enclose the completed letter regarding the Joker area and the Bane area. Both were signed by me in my official capacity as the Managing Member of the Rubie Crosby Bell Family LLC (RCB FLLC).

The RCB FLLC agrees, understands and supports the proposition that Permian Resources Operating Company, LLC should be the operator in the Joker area and the Bane area.

I received the letter on Friday, 6/9/2023. I understand the circumstances in which Permian Resources recently closed the acquisition of Read and Stevens in a public sale effective 2/16/2023. I also understand that this letter was sent because the RCB FLLC is the current owner of an overriding royalty interest within the respective project areas (T20S, R34E, Sections 4, 5, 8 and 9 in Lea County). Based on the time and funds that Permian has expended, we believe that Permian is the better operator for this potential project.

I do have one request - you will note that the letter enclosed was addressed to the "Rubie Crosby Bell Family LP #1". Please note that the LP was converted in May of 2013 (over 10 years ago) into the Rubie Crosby Bell Family LLC and the conversion was recorded in the Lea County, NM clerk's records. Please make the appropriate change in your database. Please also note that the RCB FLLC is also on your records as owner #17589 as it is the current payee on various wells. If additional documentation is needed, please feel free to contact me.

Yours very truly,

Frank Robert Janusa, CPA
Managing Member

Re: Transfer Order/Joker & Bane Developments

Greetings,

We received the enclosed Joker & Bane Developments Letter-Operator Approval. Be advised that Madison M. Hinkle and Susan M. Hinkle, Individually and as husband and wife executed a Blanket Conveyance dated 2/1/2020 and filed in 2162.256, Lea County, New Mexico.

Please draw up a Transfer Order for completion by Penasco Petroleum, LLC.

Also, please update that mailing address and contact information.

Old Address:
P.O. Box 2292
Roswell, NM 88202

New Address:
P.O. Box 4168
Roswell, NM 88202

Contact Information
-Email: penasco4168@gmail.com
-Office No. 575.208.1990

Should you have any questions regarding any of the above, please do not hesitate to contact me at the phone number or email below.

Best Regards,

Jarrod Duran

Addressed to effected ORRI Owners

RE: Joker & Bane Developments
Township 20 South, Range 34 East, Lea Co., New Mexico
Sections 4, 5, 8, & 9

To Whom It May Concern,

The purpose of this letter is to help bring a greater understanding and lessen any potential confusion surrounding the previously proposed developments in this area. If you are receiving this letter, we show you to be a present owner of an overriding royalty interest within the respective project areas described below and could be substantially impacted by an operatorship decision entailed.

As you may be aware Permian Resources Operating, LLC ("Permian") has recently closed the acquisition of Read & Stevens, Inc. and First Century Oil, Inc. via public sale effective February 16, 2023.

WHEREAS, on February 17, 2023, Permian proposed a twenty-four (24) well project within sections 4 & 9 of T20S-R34E (the "Bane" project) as well as a potash development area encompassing sections 5 & 8 of T20S-R34E (the "Joker" project). Permian later sent formal Joker well proposals out in March subsequent to Cimarex Energy Company's ("Cimarex") filing for compulsory pooling on both Permian project areas utilizing well proposals it had sent in August of 2022.

To provide a brief update on the status of these projects to-date:

- **Bane**: Contested hearing at the New Mexico Oil Conservation Division ("NMOCD") between Permian and Cimarex presently scheduled for July 20th, 2023.
- **Joker**: Cimarex, Joseph W, Foran, and MRC Permian have issued protest of Permian's potash development area proposal which is necessary to have in place for development by any party. Similarly, to Bane a contested hearing is scheduled at the NMOCD for July 20th, 2023.
- **Applications for Permits to Drill ("APDs")**: Permian has conducted on sites with the Bureau of Land Management on both Joker and Bane, has fully prepared C-102s, and is ready to file APDs. Permian is presently prevented by NMOCD & BLM rule and is refraining from filing these due to the contests.

While formal thoughts on development and timing are not included in this letter for confidentiality purposes, it is Permian's intention for speedy and thoughtful development of Joker & Bane. Permian has spent substantial time and resources to understand the nature of the rock in these projects and is presently conducting spacing tests and gathering pilot hole data in the adjacent Batman development in addition to having obtained seismic over the entire area. If you choose to

EXHIBIT C-13

elect to support Permian as operator of Joker & Bane you may sign below in the indicated space and return a copy of it using the enclosed return envelope.

We look forward to taking the necessary steps forward to developing these projects in a meaningful manner and having any open conversations with you as seen fit. In the event you would like to explore a sale of your overriding royalty interest, please feel free to reach out and we will be happy to discuss further. We appreciate the time and consideration taken into this, if you have any questions, please don't hesitate to reach out to the undersigned at travis.macha@permianres.com.

Respectfully,

Travis Macha
Senior Landman

It is agreed and understood that the undersigned supports Permian Resources Operating, LLC as operator of the Joker Project Area (Sections 5 & 8, T20S-R34E, Lea Co., NM):

Area Overview

EXHIBIT C-14

Geographical Notes:

- Permian Resources/Read & Stevens is the most active operator in area past 36 months.
- Cimarex has spud one (1) single mile well in T20S-R34E since December 2017 and an additional two (2), two-miles north in T19S-R34E.
- Joker & Bane units planned to synchronize data, timing, and spacing with surrounding Batman, Robin, & Joker Units.

Pool Notes:

- Surrounding developments have always pooled Bone Spring and Wolfcamp formations separately. No precedent exists for Cimarex's attempt to pool Wolfcamp with no Wolfcamp proposals.

BLM Drill Island Name: Joker

Joker & Bane Contests
Proposed intervals:
Teas; Bone Spring [58960]
Tonto; Wolfcamp [59500]

Riddler Unit
Pooling Orders:
R-22748 to R-22754

Pooled intervals:
Teas; Bone Spring [58960]
Tonto; Wolfcamp [59500]

Batman Potash Development Area
Pooling Orders:
R-22277 to R-22284

Pooled intervals:
Teas; Bone Spring [58960]
Tonto; Wolfcamp [59500]

Robin Extension
Previously released 80 Acres, Permian won during May 2023 Fed Lease Sale (S2SW of Section 20)

Robin Potash Development Area
Pooling Orders:
R-22319 to R-22326

Pooled intervals:
Teas; Bone Spring [58960]
Tonto; Wolfcamp [59500]

SELF-AFFIRMED STATEMENT OF DAVRO CLEMENTS

1. My name is Davro Clements. I work for Permian Resources Operating, LLC (“Permian”) as a Senior Facilities Engineer.

2. I have not previously testified before the New Mexico Oil Conservation Division (“Division”) as an expert witness in oil and gas facilities engineering. I have included a copy of my resume as **Read and Stevens Exhibit D-1** for the Division to review and respectfully request that my credentials be accepted as a matter of record and that I be tendered as an expert in oil and gas facilities engineering.

3. I am familiar with the applications filed by Read & Stevens, Inc. (“Read & Stevens”) in these cases and Permian’s surface facilities and management plans.

4. **Read & Stevens Exhibit D-2** is a facilities overview with a plat showing Permian’s proposed Bane and Joker planned facilities, depicting the location of flow lines, well pads, and alternative locations for the project’s central tank batteries (“CTB”) in the subject area.

5. Permian's plan has been thoughtfully coordinated and on-site approved with the Bureau of Land Management ("BLM") to achieve minimal surface disturbance. Permian met with BLM and the Center of Excellence ("CEHMM") on location to coordinate use of existing roads and right-of-way corridors, and to prioritize the location of well pads and facility pads in open, flat areas to avoid disturbance of critical sand dune wildlife habitat for the Dunes Sagebrush Lizard ("DSL").¹ In coordination with BLM and CEHMM, Permian adjusted planned flowlines to match existing roads to reduce surface impacts and disturbance. Additionally, Permian plans to commingle all production from each project area at one of two potential CTB locations. Permian uses a compact construction design for its CTB with the ability to expand as needed, rather than having to build separate additional facilities.

6. **Read & Stevens Exhibit D-3** is an operations and environmental overview with a Permian CTB pictured, similar to what is planned for use at the Bane and Joker project area. The overview provides a breakdown of some of the features Permian plans at each CTB, which include the following:

WATER RECYCLING

7. Permian has a proven history of recycling produced water for reuse and plans to continue to do so as part of its full development for this project area. To date, approximately 75% of Permian's water use in its New Mexico operations is recycled water, about 54% of Permian's water use across its assets is recycled water, and, in its neighboring Batman Unit, 46% of the water used in its fracs was recycled water. It is important to note that freshwater used for Permian drilling

¹ The United States Fish and Wildlife Service ("USFWS") recently proposed listing the DSL under the Endangered Species Act ("ESA"). *See* Endangered and Threatened Wildlife and Plants; Endangered Species Status for the Dunes Sagebrush Lizard, 88 Fed. Reg. 42661 (proposed July 3, 2023) (to be codified at 50 C.F.R. pt. 17).

and frac operations is less than 1% to date (<1,000 ppm of chlorides), and the remaining water required, other than recycled water, comes from non-potable water. Further, Permian intends to permit and build a produced water re-use pit just a few miles southwest that will be used to support frac operations for full development of the Joker and Bane project area, as well as neighboring Topaz, Batman, and Robin Units.

CTB DESIGN

8. **Well Testing:** Each Bane and Joker well will have a dedicated test vessel, that will monitor well production 24/7, providing optimal well test performance numbers.

9. **Separation:** Permian plans to utilize a four-stage separation process to maximize retention of hydrocarbon production. As previously discussed, Permian's facility design allows its CTBs to be easily expanded, as needed, through a bolt-on expansion for full-scale development, while minimizing its footprint.

10. **Environmental:** Permian's CTB design has incorporated various environmental considerations. Each CTB has a containment system with a non-permeable liner, aluminum panel edging that is bolted together, and a sprayed-on sealant to protect soil and groundwater against inadvertent leaks and spills. Permian uses a vapor recovery system with innovative technology that includes 24/7 tank pressure monitoring that uses automatic gas blanketing to maintain positive pressure in the tanks and prevent oxygen intrusion. This gas blanketing system prevents oxygen from getting into gas gathering pipelines, which would otherwise result in shut-ins based on off-spec gas. Also, Permian's Tank Vapor Control System is operable up to 40 ounces per square inch (osi), which allows for a greater operating window and improved flexibility managing pressure swings in storage tanks; thus, limiting the risk of inadvertent venting and reducing waste. Permian also plans to use pipelines to move oil and produced water from its facilities. This means no trucks

hauling produced water and oil, minimizing truck traffic and substantially diminishing the risk of spills and accidents. Lastly, Permian will use air supplied pneumatic devices throughout its Bane and Joker facilities to help eliminate methane emissions.

11. **Read & Stevens Exhibit D-4** is an expanded infrastructure overview of the Joker and Bane facilities with a plat showing Permian's existing water gathering system and gas sales points for the Bane and Joker project. The exhibit is explained as follows:

WATER DISPOSAL

12. The solid blue line, running east to west, from the Batman CTB to the Whitten SWD (owned and operated by Permian) is part of Permian's \$2.5 million water gathering system to support the project area, which would include the Topaz, Batman, Robin, Joker, Bane and Riddler Units. The blue dashed line indicates Permian's plans for looping in the Bane and Joker Units as part of this full-scale development plan. As indicated on the plat, Permian would have multiple take-away points for saltwater disposal.

OIL & GAS SALES

13. Permian is currently in discussions with multiple companies on takeaway capacity and tie-in capability. As part of its prudent operatorship, Permian plans to secure options for take-away to add redundancy and increase reliability.

14. **Read & Stevens Exhibit D-5** is an overview and plat addressing the Dunes Sagebrush Lizard and Permian's proactive planning to meet conservation goals. As indicated by the plat, the subject area falls within lizard habitat. As such, Permian has already entered into a Candidate Conservation Agreement ("CAA") with CEHMM, the BLM, and New Mexico State Land Office, that requires Permian to take measures to preserve and protect project areas as it prudently develops its acreage, including avoiding lizard habitat, forgoing use of herbicides on

shinnery oak, monitoring for H₂S and preparing contingency plans, and making annual conservation payments that go toward habitat conservation, restoration, reclamation, and protection.

CONCLUSION

15. Permian's surface use and management plan minimizes surface disturbance and impacts, reduces waste, protects soils and groundwater from spills and contamination, and are protective of the environment. Moreover, Permian's plans are integrated and demonstrate a comprehensive planning approach across multiple projects in the area, *i.e.*, Topaz, Batman, Robin, Joker, Bane and Riddler, that will limit waste and unnecessary environmental impacts.

16. **Read & Stevens Exhibits D-1 through D-5** were either prepared by me or compiled under my direction and supervision.

17. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in these cases. This statement is made on the date next to my signature below.

EDUCATION

Louisiana State University, Baton Rouge, LA

Bachelor of Science in Petroleum Engineering; August 2010 - May 2014

GPA: 3.93

University of Alberta, Edmonton, Alberta Canada

Bachelor of Commerce in International Business & Law; August 2004 - May 2008

GPA: 3.34

EXPERIENCE

Senior Facilities Engineer; May 2022-Present

Permian Resources; Midland, TX

- Design, plan, and execute the construction of central tank batteries for Texas and New Mexico production operations
- Design produced water and low/high pressure gas gathering systems
- Monitor and optimize vapor recovery systems, increasing company vapor recovery in 2023 by 7% in TX and 9% in New Mexico
- Interface with marketing team and midstream companies on project execution and operations

Water Resources Manager; September 2021 – May 2022

EOG Resources; Midland, TX

- Managed a team of 40 people including engineers, admin, techs, foreman and field personnel
- Managed a \$29MM indirect capital and \$93MM direct capital budgets
- Interfaced with divisional management teams and Houston executive team

Senior Water Resources Engineer; February 2020 – September 2021

EOG Resources; Midland, TX

- Implemented leak detection on all reuse water transfer lines
- Reduced reuse water spill intensity rate by 60%
- Developed automated transfer systems to reduce cost and increase safety
- Decreased operating cost by 23% YOY
- Permitted, designed and built produced water treatment facilities

Completions Engineer II; October 2017 – February 2020

EOG Resources; Gillette, WY/Denver, CO

- Write new well completion procedures including perforating and hydraulic fracturing design
- Optimize stimulation cost and production volumes
- Develop a real-time field operation monitoring system
- Supervise field consultants and evaluate completion operation techniques

Senior Production Engineer; January 2016 – October 2017

EOG Resources; Stanley, ND

- Wrote initial artificial lift installation and well workover procedures
- Analyzed well performance and implemented changes to increase oil recovery
- Worked with production foreman to reduce lease operating expenses (LOE)

Facilities Engineer I; June 2014 – January 2016

EOG Resources; Stanley, ND

- Served as a project manager for the construction of a new salt water disposal
- Designed new salt water disposals and optimized existing salt water disposal facilities
- Implemented new recording procedures to monitor injection pressures in order to prevent wellbore damage

Drilling Engineer Intern; May 2013-August 2013

EOG Resources; Calgary, AB Canada

- Reviewed a proposed infill well, crossing nine existing offsets, and recommended risk mitigation techniques
- Evaluated surface equipment rental expenditures for drilling and proposed cost-cutting measures to potentially save \$280,000 per year
- Gained field experience in Drumheller, AB by sitting on an exploratory well from pad construction through production

Completions Engineer Intern; May 2012-August 2012

EOG Resources; Calgary, AB Canada

- Developed a new completions AFE budget
- Attended targeting meetings and wrote perforation programs
- Gained field experience in Waskada, MB by watching perforating, hydraulic fracturing, and installation of production equipment

HONORS/ACTIVITIES

- Fundamentals of Engineering (FE) exam
- Golden Key International Honor Society
- SPE at Louisiana State University: Treasurer 2013-2014

PERMIAN RESOURCES

JULY 20, 2023

Read & Stevens – Joker & Bane Federal Com

Joker – Sections 5 & 8, Township 20 South, Range 34 East, Lea Co., NM

Bane - Sections 4 & 9, Township 20 South, Range 34 East, Lea Co., NM

Case No.: 23508 through 23523

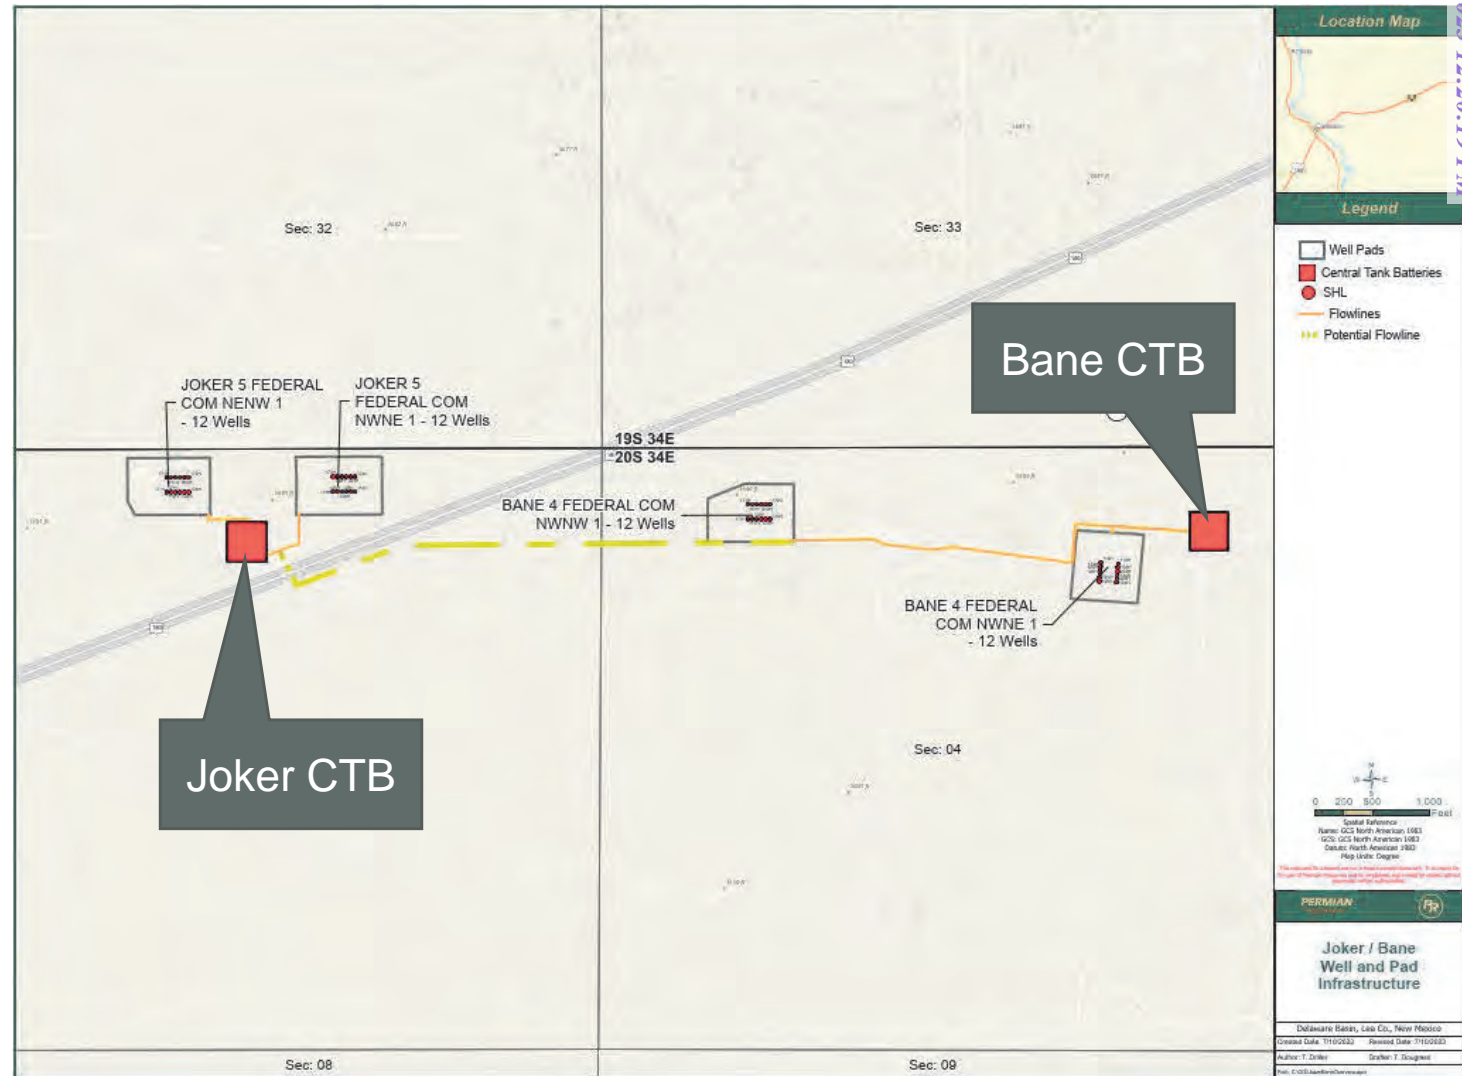

Facilities Overview

Facilities Notes

- Plan to commingle all wells at one CTB
- Two CTB Locations have been staked & permitted for potential commingling considerations
- Joker CTB
 - 350' x 450' pad
- Bane CTB
 - 350' x 450' pad
- Both CTB pad locations and flowline routes have been on-site approved by the BLM
- Locations thoughtfully selected to avoid several CEHMM-identified habitats

Operations & Environmental Overview

Water Use & Recycling

Historical Usage

- 75% YTD recycled water utilization in NM
- 54% YTD recycled water utilization across all PR assets
- 46% recycled water utilized on Batman fracs
- 1% YTD freshwater utilization across all PR assets, the rest coming from recycled water and non-potable water
- PR intends to permit and build a produced water pit in Jewitt area to support frac operations for full development

CTB Design

- **Well Testing**
 - Dedicated test vessels for every well
 - No bulk/test or interpolated well production allocations
- **Separation**
 - Four stages of fluid separation
 - Bolt-on expansion capability for full-scale development
- **Environmental**
 - Full-facility containment for soil impact mitigation
 - Oversized vapor recovery equipment
 - Gas blanketing
 - Tank Vapor Control System operable up to 40 psi
 - No planned truck hauling to/from CTB
 - Air-supplied pneumatic device operation

Infrastructure Overview

BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. D-4
Submitted by: Read & Stevens, Inc.
Hearing Date: July 20, 2023
Case Nos. 23508-23523

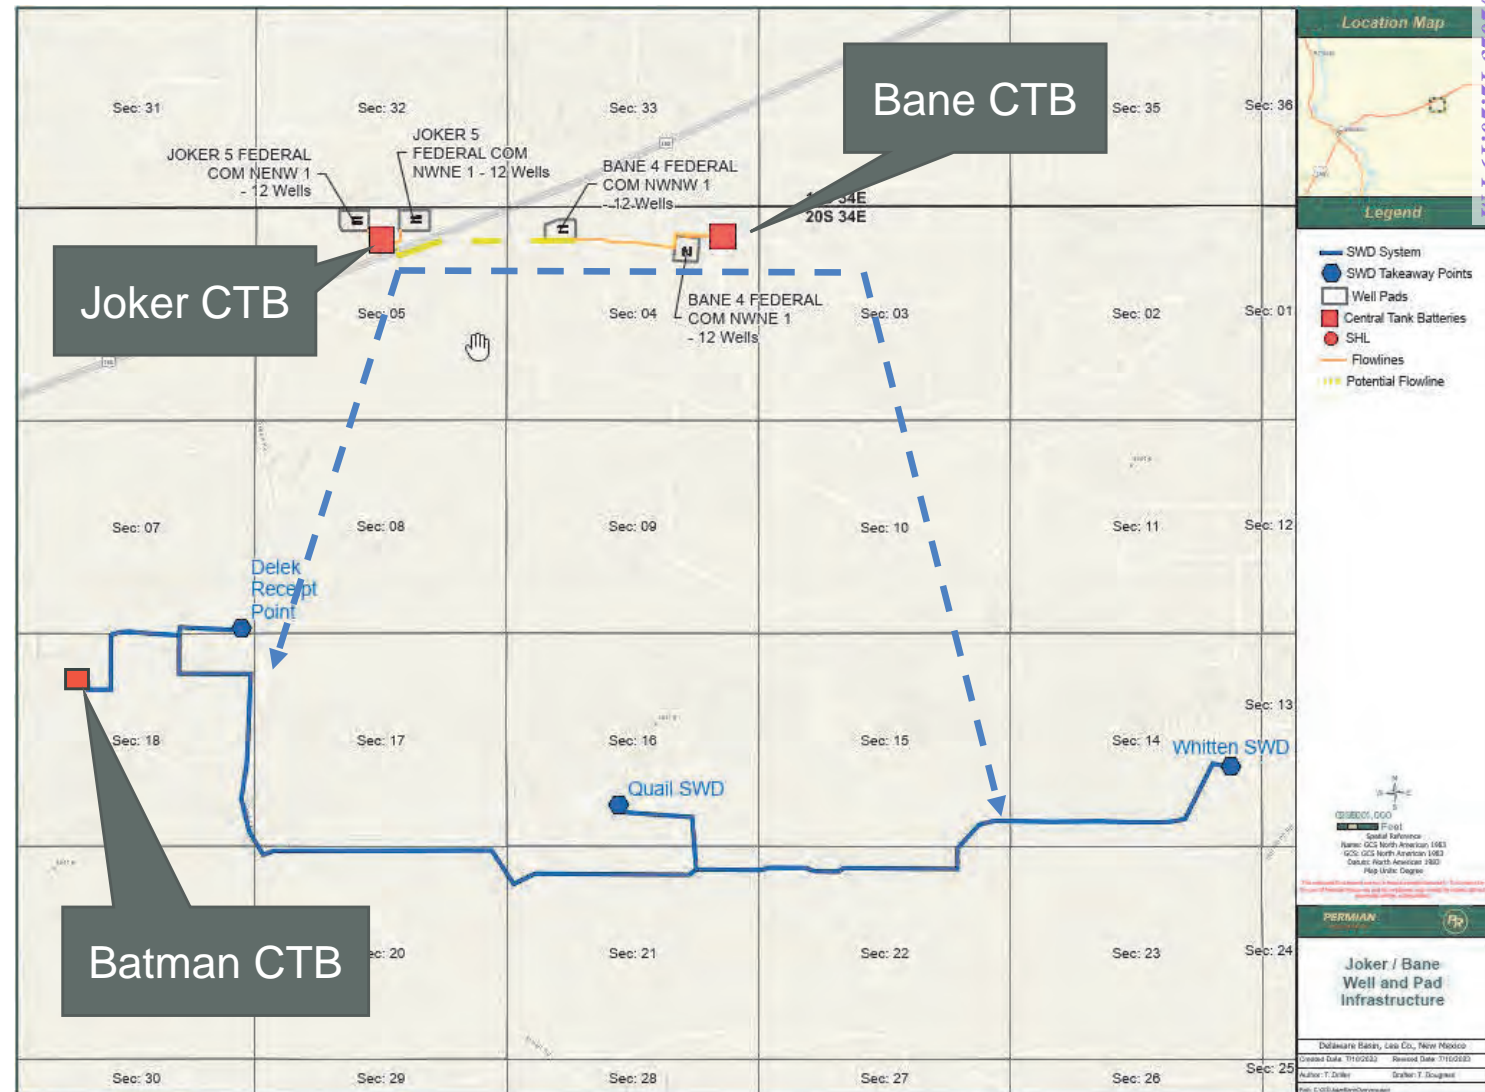

Water Disposal

- **Existing Infrastructure**
 - >6 miles of 12" gathering pipe
 - Connected to Delek, Fasken, and PR-operated Whitten SWD
 - PR plans to loop Joker and Bane facilities into existing gathering pipeline & pursue additional SWD takeaway options

Oil & Gas Sales

- **Purposefully undedicated**
 - PR is able to shop around for the best oil & gas terms & firm capacity in the area.
 - PR is in contact with several oil & gas midstream companies in the area
 - PR oil & gas infrastructure in place 2-miles to the south connected to Batman with spare capacity
 - PR seeking additional gas & oil takeaway options to add redundancy

Dunes Sagebrush Lizard Proactive Planning

BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. D-5
Submitted by: Read & Stevens, Inc.
Hearing Date: July 20, 2023
Case Nos. 23508-23523

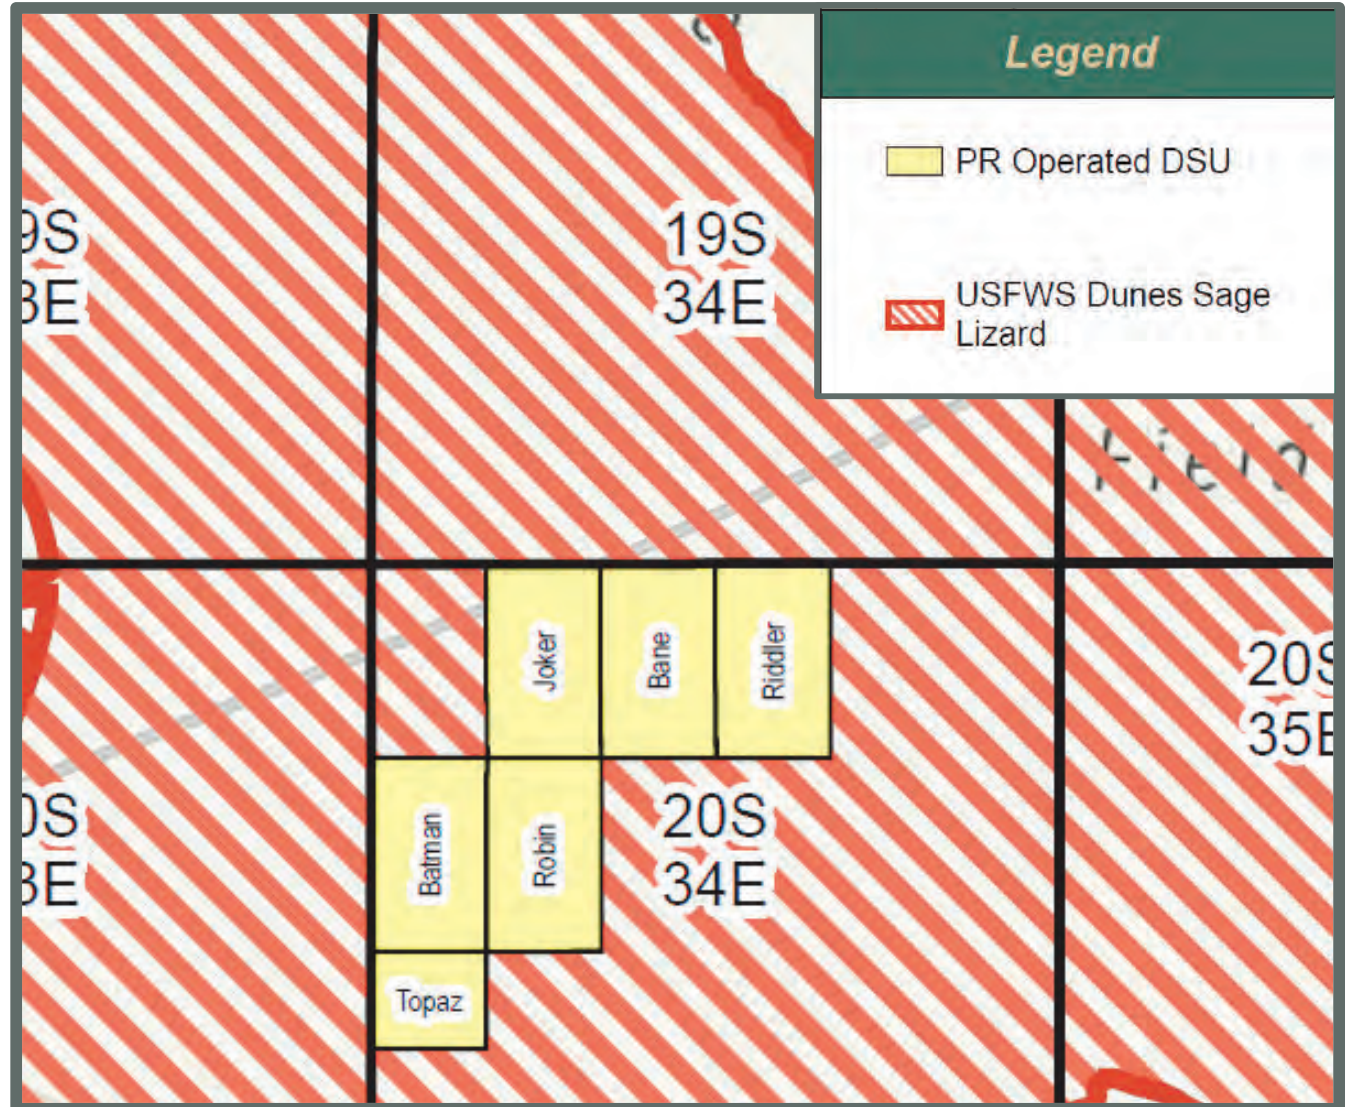

Ongoing Conservation Effort:

- The U.S. Fish and Wildlife Service announced on June 30, 2023, that they are proposing to list the Dunes Sagebrush Lizard (DSL) as endangered under the Endangered Species Act
- DSL is a species of spiny lizard found exclusively in the shinnery oak dunelands and shrublands of the Mescalero and Monahan's Sandhills in southeastern New Mexico and west Texas.

Permian Resources Proactivity:

- Permian has already entered into Candidate Conservation Agreements and has enrolled its acreage within the DSL habitat.
- As part of such Candidate Conservation Agreements, Permian Resources is currently taking all precautions to ensure that DSL habitat is not disturbed in connection with our drilling, completion, and production operations.

CASE NOS. 23508-23523

SELF-AFFIRMED STATEMENT OF IRA BRADFORD

1. My name is Ira Bradford. I work for Permian Resources Operating, LLC (“Permian”) as a Geologist.

2. I have previously testified before the New Mexico Oil Conservation Division (“Division”) as an expert witness in petroleum geology matters. My credentials as a petroleum geologist have been accepted by the Division and made a matter of record.

3. I am familiar with the applications filed by Read & Stevens, Inc. (“Read & Stevens”) in these cases, and I have conducted a geologic study of the lands in the subject area. I am also familiar with the applications filed by Cimarex Energy Co. (“Cimarex”) in competing Case Nos. 23448-23455 and 23594-23601 and related land matters.

4. Read & Stevens is targeting the Bone Spring formation in Case Nos. 23508-23511 and 23516-23519 and Wolfcamp formation in Case Nos. 23512-23515 and 23520-23523.

**BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. E
Submitted by: Read & Stevens, Inc.
Hearing Date: July 20, 2023
Case Nos. 23508-23523**

AREA DEVELOPMENT PLAN

5. **Read & Stevens Exhibit E-1** is a locator map. It shows Read & Stevens's acreage in yellow in the Delaware Basin, with the subject acreage for the proposed Bane and Joker project areas outlined in red. The map also outlines the potash area and the Capitan Reef.

6. **Read & Stevens Exhibit E-2** shows Permian's 3D seismic coverage in the area outlined in red (covering 36 square miles), with the subject proposed spacing units highlighted in yellow with blue outline. A pilot hole in the neighboring Batman Unit is also depicted, from which we collected full log suites and sidewall cores to characterize existing targets and potential future targets, along with four Third Bone Spring Sand wells and a W/2 Wolfcamp A well. The W/2 of the Batman project area has a similar stacked and staggered spacing design (a "wine rack" pattern) in analogous geology and targets that Permian plans to incorporate across all its units in this area, including the Joker and Bane units that are the subject of this contested proceeding, the offsetting Riddler Unit to the east, and Batman Unit to the southwest.

7. The top of **Read & Stevens Exhibit E-3** depicts a gun barrel diagram showing Permian's proposed Bane and Joker Units, and the west half of its adjacent Riddler Unit, along with Matador Production Company's ("Matador") existing Verna Rae Unit. This diagram demonstrates that Permian's plan for this acreage is part of a comprehensive development plan that would co-develop the target zone spacing, including the Third Bone Spring and Upper Wolfcamp zones, across multiple offsetting units. This plan is based on the successful development test Permian conducted in the analogous and offsetting Batman Unit. That test evaluated co-developing the Third Bone Spring and Upper Wolfcamp zones in the W/2 of Sections 18 and 19. Results confirm that there is a substantial benefit to co-developing the Third Bone Spring and Upper Wolfcamp using a wine-rack pattern and simultaneous completions that results in

incremental recovery of reserves that would otherwise not be produced. Permian's plan will maintain optimal spacing and co-development across this acreage, including with respect to existing offsetting production in the Verna Rae and Riddler Units, which will prevent waste and maximize recovery across all this acreage. The bottom of the exhibit gives a brief overview of Permian's development plan and an overhead view of the above-described co-development.

8. On the left side of **Read & Stevens Exhibit E-4** are gross pay contour maps across the subject acreage for both the Third Bone Spring and Wolfcamp A target zones, calculated using 4% density porosity cutoffs. The warmer colors indicate higher gross pay. Cooler colors reflect lower gross pay. The existing Batman Unit, operated by Permian, is highlighted in blue along with the proposed Joker and Bane Units just to the northeast. A type log is indicated with a red star on the map and the relevant log depths are included in the center panel of the exhibit. Target intervals in the base of the Third Bone Spring Sand and the top of Wolfcamp A are indicated alongside the log with yellow arrows. The pay maps demonstrate that the targeted Third Bone Spring Sand and Wolfcamp A in the proposed Bane and Joker units are geologically analogous to the same zones in Permian's recently developed Batman Unit immediately to the southwest.

9. On the right side of **Read & Stevens Exhibit E-5** is a diagram showing a line of cross-section in black consisting of wells penetrating the Bone Spring formation that I used to construct a stratigraphic cross-section from A to A' across the Bane, Joker, and Batman Units. On the left-hand side of the exhibit is a stratigraphic cross-section I prepared displaying open-hole logs run over the Bone Spring from the representative wells denoted from A to A'. For each well in the cross-section, the exhibit shows the following logs: gamma ray, resistivity, and porosity. The depiction is flattened on the top of the Wolfcamp as between the Batman, Bane, and Joker Units, and shows that the targeted intervals within the Bone Spring and Wolfcamp formations

across all three units are consistent and similar in thickness and quality. I consider these wells to be representative of the geology in the entire project area.

10. **Read & Stevens Exhibit E-6** is a simplified gun barrel block illustration depicting Read & Stevens' proposed wine rack pattern spacing across the Bone Spring and Wolfcamp formations on the left compared to Cimarex's proposed vertically stacked development on the right. As noted, Read & Stevens' plan at maximum development would be 24 wells per section compared to Cimarex's plan of 12 wells per section. A number bar on the right side of each gun barrel blocks tallies the number of wells proposed for each zone.

11. **Read & Stevens Exhibit E-7** is a side-by-side gun barrel comparison of Permian and Cimarex's development plans, showing offset footages and other well-specific details. Permian's plan demonstrates that its spacing assumes maximum development of all prospective zones and optimizes drilling flexibility.

BANE UNIT BONE SPRING WELLS: CASE NOS. 23508–23511

12. **Read & Stevens Exhibit E-8** is a locator map that shows each of the Bane Bone Spring spacing units outlined and labeled in blue with the respective case numbers indicated. It also shows a line of cross-section in black consisting of wells penetrating the Bone Spring formation that I used to construct a stratigraphic cross-section from A to A'. I consider these wells to be representative of the geology in the area. Additionally, the diagram includes all offsetting horizontal wells in the area, color coded by landing zone.

13. **Read & Stevens Exhibit E-9** is a subsea structure map that I prepared for the interval within the First Bone Spring Sand formation ("FBSG"), with a contour interval of 50 feet. The structure map shows the FBSG gently dipping to the south. The four proposed Bane FBSG wells are shown, along with the known FBSG offsetting wells in the area. The FBSG structure

appears consistent across the wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments in the proposed spacing units.

14. **Read & Stevens Exhibit E-10** is a subsea structure map that I prepared for the interval within the Second Bone Spring Sand formation (“SBSG”), with a contour interval of 50 feet. The structure map shows the SBSG gently dipping to the south. The eight proposed Bane SBSG wells are shown, along with the known SBSG offsetting wells in the area. The SBSG structure appears consistent across the wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments in the proposed spacing units.

15. **Read & Stevens Exhibit E-11** is a subsea structure map that I prepared for the interval within the Harkey formation, with a contour interval of 50 feet. The structure map shows the Harkey gently dipping to the south. The four proposed Bane Harkey wells are shown, along with the known Harkey offsetting wells in the area. The Harkey structure appears consistent across the wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments in the proposed spacing units.

16. **Read & Stevens Exhibit E-12** is a subsea structure map that I prepared for the interval within the Third Bone Spring Sand formation (“TBSG”), with a contour interval of 50 feet. The structure map shows the TBSG gently dipping to the south. The four proposed Bane TBSG wells are shown, along with the known TBSG offsetting wells in the area. The TBSG structure appears consistent across the wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments in the proposed spacing units.

17. **Read & Stevens Exhibit E-13** is a stratigraphic cross-section that I prepared displaying open-hole logs run over the Bone Spring formation from the representative wells denoted from A to A’ in the previous exhibit. The cross-section is flattened on top of the Wolfcamp

and runs north to south within the proposed project area. For each well in the cross-section, the exhibit shows the following logs: gamma ray, resistivity, and porosity. The targeted intervals in each of these cases is labeled and marked. The logs in the cross-section demonstrate that the targeted intervals are consistent and continuous across each proposed spacing unit.

18. **Read & Stevens Exhibit E-14** is a gun barrel diagram for the proposed Bane Bone Spring wells and spacing units showing the preferred spacing and across the Bone Spring formation. The proposed wells in the diagram correspond to the type log to display the approximate target interval for each well. This diagram demonstrates that Permian's proposed development for the Bone Spring is a comprehensive development plan that incorporates all zones of potential in the area which will prevent waste and maximize recovery across all this acreage.

BANE UNIT WOLFCAMP WELLS: CASE NOS. 23512–23515

19. **Read & Stevens Exhibit E-15** is a locator map that shows each of the Bane Wolfcamp spacing units outlined and labeled in blue with the respective case numbers indicated. It also shows a line of cross-section in black consisting of wells penetrating the Wolfcamp formation that I used to construct a stratigraphic cross-section from A to A'. I consider these wells to be representative of the geology in the area. Additionally, the diagram includes all horizontal wells in the area that are also within the Wolfcamp formation.

20. **Read & Stevens Exhibit E-16** is a subsea structure map that I prepared for the interval within the Wolfcamp formation, with a contour interval of 50 feet. The structure map shows the Wolfcamp gently dipping to the south. The four proposed Wolfcamp wells are shown, along with the known Wolfcamp offsetting wells in the area. The Wolfcamp structure appears consistent across the wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments in the proposed spacing units.

21. **Read & Stevens Exhibit E-17** is a stratigraphic cross-section that I prepared displaying open-hole logs run over the Wolfcamp formation from the representative wells denoted from A to A'. The cross-section is flattened on top of the Wolfcamp and runs north to south within the proposed project area. For each well in the cross-section, the exhibit shows the following logs: gamma ray, resistivity, and porosity. The targeted interval is labeled and marked. The logs in the cross-section demonstrate that the targeted interval is consistent and continuous across each proposed spacing unit.

22. **Read & Stevens Exhibit E-18** is a gun barrel diagram for the proposed Bane Wolfcamp wells and spacing units showing the preferred spacing and across the Wolfcamp formation. The proposed wells in the diagram correspond to the type log to display the approximate target interval for each well. This diagram demonstrates that Permian's proposed development for the Wolfcamp which will prevent waste and maximize recovery across all of this acreage.

JOKER UNIT BONE SPRING WELLS: CASE NOS. 23516–23519

23. **Read & Stevens Exhibit E-19** is a locator map that shows each of the Joker Bone Spring spacing units outlined and labeled in blue with the respective case numbers indicated. It also shows a line of cross-section in black consisting of wells penetrating the Bone Spring formation that I used to construct a stratigraphic cross-section from A to A'. I consider these wells to be representative of the geology in the area. Additionally, the diagram includes all offsetting horizontal wells in the area, color coded by landing zone.

24. **Read & Stevens Exhibit E-20** is a subsea structure map that I prepared for the interval within the FBSG, with a contour interval of 50 feet. The structure map shows the FBSG gently dipping to the south. The four proposed Joker FBSG wells are shown, along with the known FBSG offsetting wells in the area. The FBSG structure appears consistent across the wellbore

paths. I do not observe any faulting, pinchouts, or other geologic impediments in the proposed spacing units.

25. **Read & Stevens Exhibit E-21** is a subsea structure map that I prepared for the interval within the SBSG, with a contour interval of 50 feet. The structure map shows the SBSG gently dipping to the south. The eight proposed Joker SBSG wells are shown, along with the known SBSG offsetting wells in the area. The SBSG structure appears consistent across the wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments in the proposed spacing units.

26. **Read & Stevens Exhibit E-22** is a subsea structure map that I prepared for the interval within the Harkey formation, with a contour interval of 50 feet. The structure map shows the Harkey gently dipping to the south. The four proposed Joker Harkey wells are shown, along with the known Harkey offsetting wells in the area. The Harkey structure appears consistent across the wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments in the proposed spacing units.

27. **Read & Stevens Exhibit E-23** is a subsea structure map that I prepared for the interval within the TBSG, with a contour interval of 50 feet. The structure map shows the TBSG gently dipping to the south. The four proposed Joker TBSG wells are shown, along with the known TBSG offsetting wells in the area. The TBSG structure appears consistent across the wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments in the proposed spacing units.

28. **Read & Stevens Exhibit E-24** is a stratigraphic cross-section that I prepared displaying open-hole logs run over the Bone Spring formation from the representative wells denoted from A to A'. The cross-section is flattened on top of the Wolfcamp and runs north to

south within the project area. For each well in the cross-section, the exhibit shows the following logs: gamma ray, resistivity, and porosity. The targeted intervals in each of these cases is labeled and marked. The logs in the cross-section demonstrate that the intervals are consistent and continuous across each proposed spacing unit.

29. **Read & Stevens Exhibit E-25** is a gun barrel diagram for the proposed Joker Bone Spring wells and spacing units showing the preferred spacing and across the Bone Spring formation. The proposed wells in the diagram correspond to the type log to display the approximate target interval for each well. This diagram demonstrates that Permian's proposed development for the Bone Spring is a comprehensive development plan that incorporates all zones of potential in the area which will prevent waste and maximize recovery across all this acreage.

JOKER UNIT WOLFCAMP WELLS: CASE NOS. 23520–23523

30. **Read & Stevens Exhibit E-26** is a locator map that shows each of the Joker Wolfcamp spacing units outlined and labeled in blue with the respective case numbers indicated. It also shows a line of cross-section in black consisting of wells penetrating the Wolfcamp formation that I used to construct a stratigraphic cross-section from A to A'. I consider these wells to be representative of the geology in the area. Additionally, the diagram includes all offsetting horizontal wells in the area that are also within the Wolfcamp formation.

31. **Read & Stevens Exhibit E-27** is a subsea structure map that I prepared for the interval within the Wolfcamp formation, with a contour interval of 50 feet. The structure map shows the Wolfcamp gently dipping to the south. The four proposed Joker Wolfcamp wells are shown, along with the known Wolfcamp offsetting wells in the area. The Wolfcamp structure appears consistent across the wellbore paths. I do not observe any faulting, pinchouts, or other geologic impediments in the proposed spacing units.

32. **Read & Stevens Exhibit E-28** is a stratigraphic cross-section that I prepared displaying open-hole logs run over the Wolfcamp formation from the representative wells denoted from A to A'. The cross-section is flattened on top of the Wolfcamp and runs north to south within the project area. For each well in the cross-section, the exhibit shows the following logs: gamma ray, resistivity, and porosity. The targeted interval is labeled and marked. The logs in the cross-section demonstrate that the interval is consistent and continuous across the Wolfcamp formation.

33. **Read & Stevens Exhibit E-29** is a gun barrel diagram for the proposed Joker Wolfcamp wells and spacing units showing the preferred spacing and across the Wolfcamp formation. The proposed wells in the diagram correspond to the type log to display the approximate target interval for each well. This diagram demonstrates that Permian's proposed development for the Wolfcamp which will prevent waste and maximize recovery across all this acreage.

CONCLUSION

34. In my opinion, standup orientation of the proposed wells is the appropriate orientation for horizontal well development in this area and will efficiently and effectively develop the subject acreage.

35. Based on my geologic study, the Bone Spring and Wolfcamp formations underlying the subject area in each of the cases is suitable for development by horizontal wells and the acreage comprising the proposed spacing units will contribute more-or-less equally to the production from the wellbores. I have not identified any geologic impediments to drilling horizontal wells in the area of the spacing units proposed.

36. In my opinion, horizontal drilling will be the most efficient method to develop this acreage, to prevent the drilling of unnecessary wells, and to achieve the greatest ultimate recovery,

and that approving Read & Stevens' application will be in the best interest of conservation, the prevention of waste, and protection of correlative rights.

37. **Read & Stevens Exhibits E-1 through E-29** were either prepared by me or compiled under my direction and supervision.

38. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in these cases. This statement is made on the date next to my signature below.

 Permian Resources

Plan of Subsurface Development

Concentrated Subsurface Study Immediately Offset

Permian Resources Acreage

Thoughtful Approach to Development

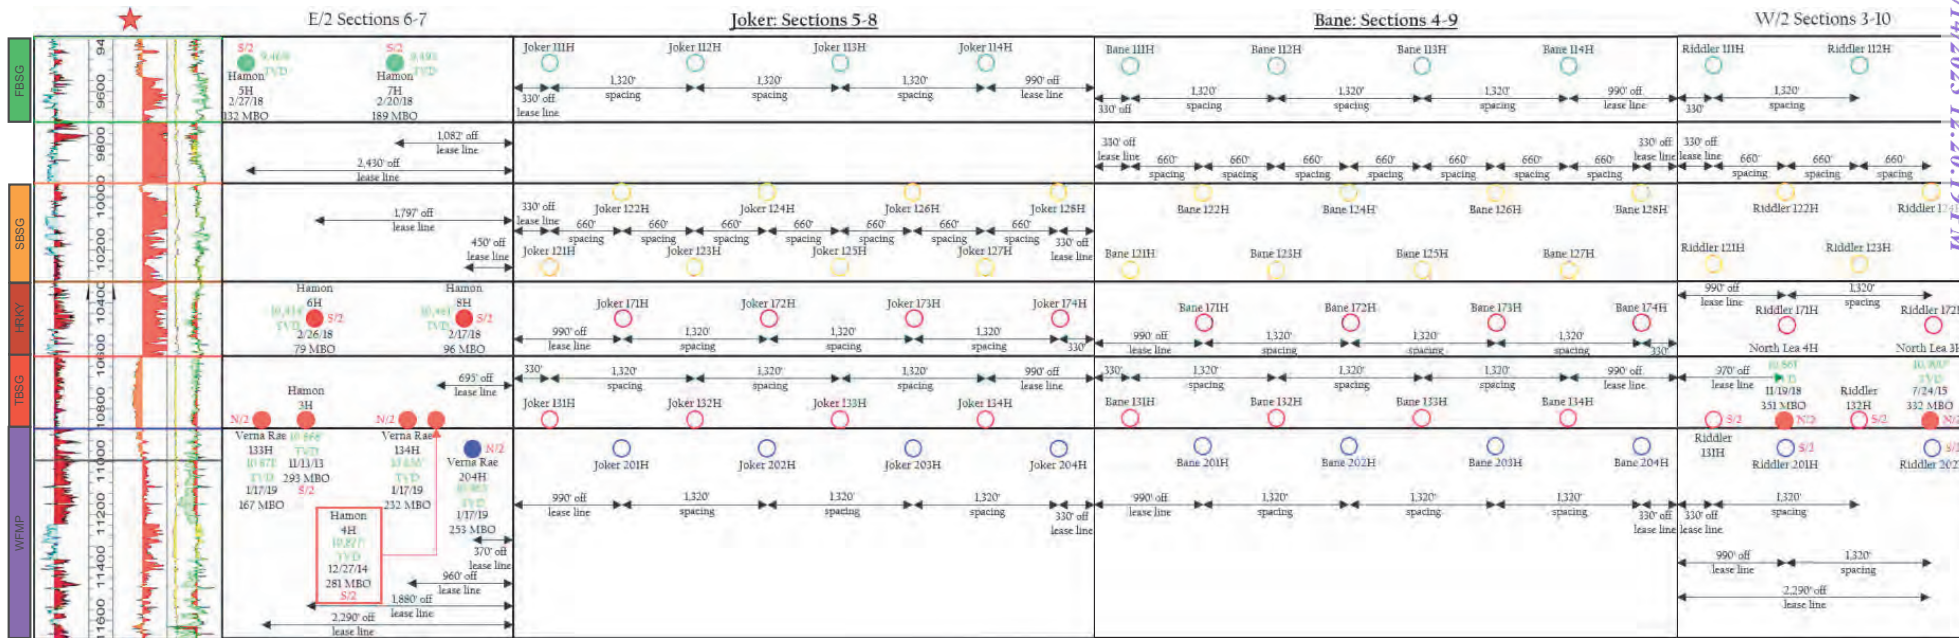

Permian Resources has devoted significant resources to evaluating, characterizing, and understanding the subsurface in the immediate area

- Purchased 36 square miles of 3D seismic covering not only PR's current owned acreage but also offset acreage to aid in fulsome subsurface understanding
- Drilled a pilot hole on the Batman 132H through the Penn Shale and collected full log suites and sidewall cores to characterize existing targets and potential future targets
- Pilot hole log data, core analysis, seismic and production data are being integrated for full subsurface characterization
- Co-developed 4 TBSG and 1 WFMP A in the Batman Unit with similar planned stack staggered spacing design to be incorporated across remaining PR units

Full Scale Development Plan

Joker, Bane, Riddler

Exhibit E-3

Development Plan

- PR's plan of development accounts for co-developed target zone spacing across multiple offsetting units
- Development plan expands upon the learnings from initial Batman Unit results of TBSG and WFMP A co-development, which are geologically analogous to the Joker and Bane units

CASE NOS. 23508-23523

SELF-AFFIRMED STATEMENT OF JOHN FECHTEL

1. My name is John Fechtel. I work for Permian Resources Operating, LLC (“Permian”) as a reservoir engineer.

2. I have not previously testified before the New Mexico Oil Conservation Division (“Division”) as an expert witness in reservoir engineering matters. Attached as **Read & Stevens Exhibit F-1** is my resume, outlining my education and work experience as a petroleum engineer. I graduated from the University of South Carolina in December of 2012 with a Bachelor of Science degree in Mechanical Engineering. Upon graduation, I joined Pioneer Natural Resources as an operations engineer and spent several years working as such in the West Panhandle Field and in Permian Vertical Operations. I began working as a reservoir engineer in late 2015 and held roles with Pioneer Natural Resources as a reservoir engineer on an asset development team, as an asset team lead, and as a senior reservoir engineer on the Permian regional engineering team. My responsibilities while a reservoir engineer at Pioneer Natural Resources were entirely in the

Permian Basin and included asset development planning (spacing, sequencing, scheduling, completion design, performance analysis, type curve generation, forecasting, etc), the delineation of appraisal targets, basin wide studies, software development and analytics support, and the management of various data science and machine learning initiatives. In 2019 I joined Colgate Energy as the Development and Planning Manager where I was responsible for Colgate's asset development inclusive of technical analysis, well selection, and scheduling. I also championed the buildout of internal engineering data systems, processes, and integrations, and supported A&D efforts, analysis, and underwriting. Upon Colgate's merger with Centennial Resource Development which created Permian Resources in September of 2022, my role changed to Reservoir Manager, which is my current role. My responsibilities as Reservoir Manager at Permian Resources continue to include asset development planning and technical analysis with oversight responsibilities for the reservoir engineers in area specific asset teams. My experience with Colgate and with Permian Resources has also been entirely Permian Basin focused. I believe these credentials qualify me to testify as an expert petroleum engineer and to have my credentials accepted by the Division and made a matter of record.

3. I am familiar with the applications filed by Read & Stevens, Inc. ("Read & Stevens") in these cases, and I have conducted an engineering study of the lands in the subject area. I am also familiar with the applications filed by Cimarex Energy Co. ("Cimarex") in competing Case Nos. 23448-23455 and 23594-23601.

4. Read & Stevens is targeting the Bone Spring formation in Case Nos. 23508-23511 and 23516-23519 and Wolfcamp formation in Case Nos. 23512-23515 and 23520-23523. Of note, Read & Stevens believes it is important to co-develop the Third Bone Spring with the Wolfcamp A using a stacked and staggered "wine-rack" spacing pattern with simultaneous completions to

avoid waste. In contrast, Cimarex does not plan to separately develop the upper Wolfcamp pool with initial wells completed in the Wolfcamp and proposes instead a vertically stacked spacing pattern entirely within the Bone Spring.

THIRD BONE SPRING/WOLFCAMP OFFSETTING DEVELOPMENT

5. **Read & Stevens Exhibit F-2** is a map depicting offsetting development targeting the Third Bone Spring and Wolfcamp A. The proposed Joker and Bane Unit areas that are the subject of this contested hearing are depicted in orange, along with Permian Resources', as the parent company of Read and Stevens, offsetting operated units, the Riddler, Batman, Robin, and Topaz. The red lines depict producing horizontal Third Bone Spring wells and the purple lines represent Wolfcamp A producing wells, as reflected in the legend. the Third Bone Spring and Wolfcamp A have been a target for development generally across this area for some time. However, appraisals and development of these targets has largely consisted of development of either the Third Bone Spring or the Wolfcamp A alone, with only limited examples of co-development identified on the map as areas "1", "2", and "3". **Area 1** includes a mix of wells drilled and operated by Apache and Concho (now ConocoPhillips). **Area 2** immediately offsets the proposed Joker Units to the west, referred to as the Verna Rae, operated by Matador. And **Area 3**, which is Permian Resources' Batman project, immediately offsets the Joker Units to the southwest.

6. **Read & Stevens Exhibit F-3** depicts gross pay contour maps for the Third Bone Spring at the top left of the exhibit and for the Wolfcamp A in the bottom left of the exhibit. The Joker, Bane, and Batman Units are outlined in blue for reference. The location of a type log representative of the geology in the area is indicated with a red star. These are the same gross pay maps and type log that Ira Bradford referenced in his geology exhibits and testimony to confirm

that the Joker and Bane geology is analogous to the geology in Permian Resources' Batman Unit. Area 1 wells reflect similar quality Third Bone Spring rock to Areas 2 and 3; however, Area 1 wells exhibit a thinner, lower-quality Wolfcamp A zone compared to Areas 2 and 3 as indicated by the cooler colors in the Wolfcamp A acreage developed by the Area 1 wells.

7. On the right side of **Exhibit F-3** are well results from wells in all three Areas that have been co-developed between the Third Bone Spring and Wolfcamp A. The top chart shows oil production by month for wells grouped as follows:

- Light green represents the average normalized production of wells that are completed in the Third Bone Spring and were co-developed with wells completed in the Wolfcamp A zone in an area with a thicker, higher-quality gross pay interval.
- Dark green represents the average normalized production of wells that are completed in the Wolfcamp A in an area with a thicker, higher-quality gross pay interval and were co-developed with wells completed in the Third Bone Spring.
- Red represents the average normalized production of wells that are completed in the Third Bone Spring and were co-developed with wells completed in the Wolfcamp A zone in an area with a thinner, lower-quality gross pay interval.
- Blue represents the average normalized production of wells that are completed in the Wolfcamp A in an area with a thinner, lower-quality gross pay interval and were co-developed with wells completed in the Third Bone Spring.

8. As the graph reflects, production results vary depending on whether co-developed wells in the Third Bone Spring and Wolfcamp A targeted higher-quality Wolfcamp A rock. Co-developed wells in Areas 2 and 3 with a thicker, higher-quality Wolfcamp A zone outperformed

wells that were co-developed in Area 1, where the Wolfcamp A is thinner and lower quality. The bottom graph tells the same story using cumulative production.

9. **Read & Stevens Exhibit F-4** takes a closer look at the wells and production for the Third Bone Spring interval in Matador's Verna Rae Unit in Area 2 on the left side of the exhibit and Permian Resources' Batman Unit in Area 3 on the right side of the exhibit. In the middle is a locator map referencing the location of the type log with a red star and the location of the Third Bone Spring wells in each Area. The type log includes a blow up that shows that the target intervals are the same. The gun barrel shows that the Batman Unit follows the same wine-rack and horizontal spacing pattern used by Matador in the Verna Rae, which also matches the wine-rack and horizontal spacing pattern Read & Stevens proposes for its Joker and Bane Units and which Permian Resources has permitted in the Robin Unit. The production graphs on the left show the individual well production for the Verna Rae Unit, the colors of which match the gun barrel below them. Of note, both the Verna Rae 134H and the Verna Rae 204H, are extremely strong. The Verna Rea 133H however, which was not directly wine racked with a Wolfcamp A well, is a poorer performer. The Verna Rea results suggest that co-developing the Third Bone Spring and Wolfcamp A wells together results in better long-term performance and higher cumulative oil production than producing Third Bone Spring wells alone. Early time production from Permian Resources' Batman development corroborates this observation. The production profile and cumulative production for co-developed Third Bone Spring and Wolfcamp A wells in the Batman Unit show these wells are outperforming Third Bone Spring wells that are developed alone.

10. These results strongly support the conclusion that co-developing the Third Bone Spring and Wolfcamp A in this acreage with thicker, higher-quality Wolfcamp A rock is necessary to recover incremental reserves that would otherwise risk being left unproduced if this acreage is

developed with Third Bone Spring wells alone or without co-development, resulting in lost reserves and substantial waste. That means Cimarex's proposal, which does not include initial wells completed in the Wolfcamp A, risks stranding substantial reserves there, resulting in waste. As explained by Travis Macha, this outcome has severe consequences in this particular acreage where the owners and ownership percentages are not uniform between the Bone Spring and Wolfcamp formations. Cimarex's plan will particularly impair the correlative rights of owners, including Read & Stevens, who own a greater share of interests in the Wolfcamp or own only in the Wolfcamp. In contrast, and to optimize production and protect correlative rights in both targeted pools, Read & Stevens is proposing co-development across these tracks.

11. While Read & Stevens and Permian have undertaken a thoughtful, analytical approach to testing and planning its development in this acreage, with flexibility built in to its proposal to quickly respond to updated data and analyses, Cimarex has not demonstrated a similar level of planning or analysis in its development in this area to date or in their competing proposals.

12. **Read & Stevens Exhibit F-5** is an exhibit demonstrating the importance of having a comprehensive development plan, sequenced appropriately, to avoid impairing future development and reducing ultimate recovery. On the right side of the exhibit is a locator map showing the location of Read & Stevens' proposed Joker and Bane Units relative to four offsetting wells drilled and operated by Cimarex—the Lea 7 Federal Unit wells—located approximately 4 miles to the east. In that acreage, Cimarex targeted a single formation drilling four wells on three separate pads over four years. The well performance chart at the bottom shows the results. The redline shows the production profile for the first well drilled in the W/2 W/2 of the spacing unit. The second well, denoted with the blue line, produced just seven months before it was permanently abandoned when the third and fourth wells were drilled and completed represented in green. As

noted on the exhibit, repeatedly returning to units to develop small packages, as Cimarex did with its Lea 7 Federal Unit acreage, can be wasteful, inefficient, and can destroy the value of the minerals in at least two ways. First, developing in a partially depleted reservoir can reduce the effectiveness of hydraulic fracturing due to parent-child effects. Second, existing producing wells can be damaged, even to the point of losing wellbores, from offsetting completion operations. Our approach is to coordinate drilling rigs and completions for large-scale co-development following a thoughtful appraisal and development strategy customized to the acreage and that allows for rapid flexibility and responsiveness based on updated data and analysis.

13. On the right side of **Read & Stevens Exhibit F-6** shows an area of interest map across more than 430 square miles around the acreage of the proposed competing developments with Cimarex's acreage in pink and Permian Resources in green. Within this expansive area, Cimarex has drilled just 1 well in the last 5 years and just 32 wells in the last 10 years. Cimarex has almost exclusively used wasteful and inefficient single well pad developments and has drilled just a single two-mile lateral. Of note, Cimarex has not tested the co-development of the Third Bone Spring and Wolfcamp A anywhere within this area. The chart at the bottom left of the exhibit summarizes Cimarex's activity within this 430 square mile area and the accompanying bar graph provides an overview of spud counts through time.

14. **Read & Stevens Exhibit F-7** addresses Read & Stevens' other Bone Spring targets, including the First Bone Spring Sand, the Second Bone Spring Sand, and the Harkey. The map on the left identifies offsetting wells completed and producing within each interval targeted by Read & Stevens' applications within the area of interest. Green wells represent First Bone Spring Sand completions. Orange wells represent Second Bone Spring Sand completions. Red wells represent completions in the Harkey. The well performance graph on the exhibit

demonstrates that wells completed in these target zones within this area are all viable targets for development with variable performance. Permian Resources' five well Batman development represents the first phase of a thoughtful appraisal and development plan wherein we appraise the prospectivity of zones with the potential to communicate with a permitting strategy that allows us to immediately apply learnings to the next phase of the synchronized development. By permitting development in a manner that assumes delineation/appraisal is successful, Permian Resources is now prepared to immediately execute a continuation of our development plan, which involves the use of multiple synchronized drilling rigs to continue TBSG & WFMP co-development in immediately adjacent acreage while continuing the appraisal of the co-development of shallower Bone Spring targets. Just as Permian Resources has permitted development in Batman and Robin so that successful appraisal learnings can be immediately applied, Read and Stevens has proposed the exact same development pattern under the same construct in Joker and Bane. Doing so will allow for the immediate application of the appraisal and delineation learnings across Permian Resources' contiguous operating position to ensure maximum value generation and minimal waste.

15. On the left side of **Read & Stevens Exhibit F-8** are the combined production results from the two wellsets in the Batman appraisal of the co-development of the TBSG and the Wolfcamp A with the topmost plot representing the combined daily rates with the three co-developed Third Bone Spring and Wolfcamp A wells in blue and the two Third Bone Spring wells developed without the Wolfcamp A in red. The bottom plot represents the cumulative production for the same wellsets, and demonstrates that in just the first 40 days of production, the Third Bone Spring co-developed with the Wolfcamp A has produced seventy thousand barrels of oil more than the TBSG only development. Similar plots are shown on the right, this time at the well level and

colored by formation where green represents the Wolfcamp A and orange represents the Third Bone Spring. Of note is just how prolific the Wolfcamp A well has been to date, producing more than forty thousand barrels in the first forty days. Because of Permian Resources thoughtful plan of development we are recovering more resource than if we developed the TBSG alone and are able to immediately incorporate these learnings into our development plans. Read and Stevens' proposals on Joker and Bane represent a continuation of the exact same strategy.

CONCLUSION

16. In my opinion, Read & Stevens' plan to co-develop horizontal laterals across the Bone Spring and Wolfcamp formations using a stacked and staggered "wine-rack" spacing pattern with simultaneous completions—and in particular, co-developing the Third Bone Spring and Wolfcamp A together—is in the best interests of conservation, the prevention of waste, and protection of correlative rights.

17. **Read & Stevens Exhibits F-1 through F-8** were either prepared by me or compiled under my direction and supervision.

18. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in these cases. This statement is made on the date next to my signature below.

EXPERIENCE

2022-Current

RESERVOIR MANAGER, Permian Resources

- Responsible for the reservoir engineers on the asset development teams and all related field development planning including well spacing, type curve generation, completion design, and performance analysis
- Continued involvement in A&D efforts and deal evaluations

2019-2022

DEVELOPMENT & PLANNING MANAGER, Colgate Energy

- Lead efforts for most aspects of field development planning including well spacing, scheduling, type curve generation, completion design, and performance analysis
- Championed the build out of internal engineering data systems
- Heavily involved in A&D efforts from trades to bolt on acquisitions to corporate mergers

2017-2019

REGIONAL RESERVOIR ENGINEER, PXD- *Permian Strategic Planning and Field Development*

- Advanced production model study and implementation
 - Built automated forecasting programs for testing and validation of models proposed in academia
 - Proposed new methods for GOR forecasting
 - Built and implemented a program for derivative based forecasting
- Worked with software developers to build and support internal production forecasting and budgeting applications – responsible for ongoing efforts to evolve processes
- Project manager for concurrent machine learning based automated forecasting projects with internal data science groups and 3rd party vendors
- Responsible for field wide studies of reservoir and development topics including efforts to better predict interference from offset completions, to qualify GOR trends, and to correlate recovery factors with design parameters

2016-2017

DEVELOPMENT RESERVOIR ENGINEER, PXD– *Permian Strategic Planning and Field Development*

- Lead a multi-disciplinary team responsible for the development of Pioneer's assets in east Martin county
- Responsible for development planning including scheduling, type curve generation, economics, spacing, targeting, sequencing, high level completion design, infrastructure scoping and buildout, PDP forecasting, performance evaluations, and acreage trade support
- High activity levels with up to 5 active drilling rigs required vigilant attention to detail and cross-discipline organization
- Lead development team efforts to delineate northern acreage, to test Wolfcamp co-development, and to appraise the JoMill as a horizontal target

2013-2016

OPERATIONS ENGINEER, PXD- West Panhandle Field & Permian Vertical

EDUCATION

University of South Carolina Honors College, Columbia, SC
Bachelor of Science in Mechanical Engineering, December 2012

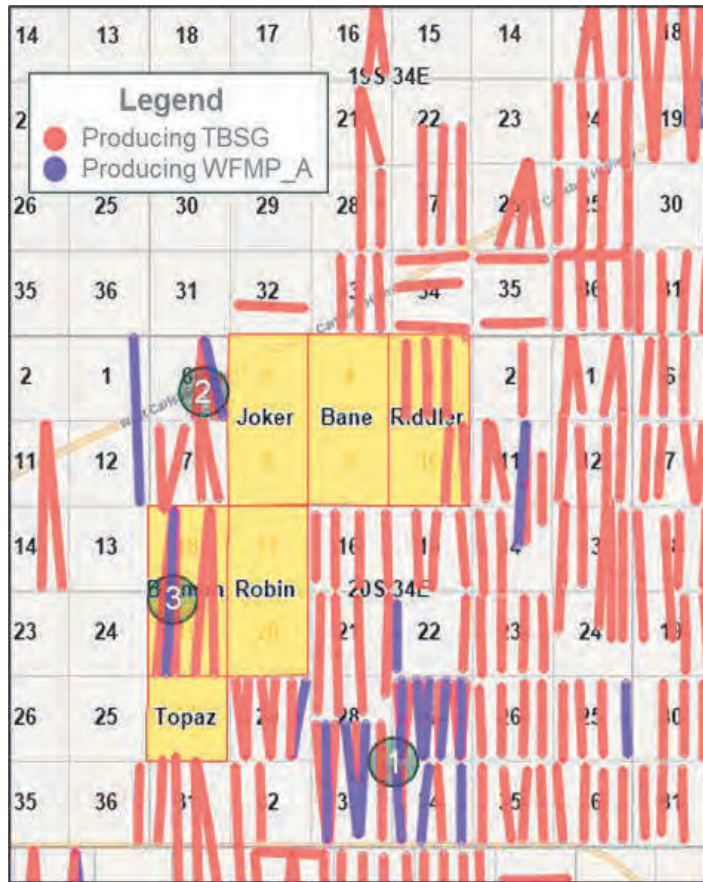

Cumulative GPA: 3.84/4.00

TBSG/WFMP A Offset Development

Variety of Development Sequences with Limited True Co-Development Testing

Offset TBSG/WFMP_A Development

Development and Delineation Overview

- The TBSG and the WFMP_A have been a target for development in this area
- Appraisal and development has largely consisted of the development of either the TBSG or the WFMP_A alone
- Examples of the appraisal and develop of the TBSG and WFMP_A together are limited and can be found primarily in just several different areas

Developments by Apache and Concho consist of a mix of delayed WFMP_A development in the case of Apache's Black and Tan (WFMP_A developed after the overlying TBSG), TBSG co-developed with the WFMP_A in 2-well pairs with each development delayed by more than a year in the case of Concho's Mas Federals, and full TBSG and WFMP_A co-development in the case of Concho's Little Bear development

- 1 Joker and Robin
- 2 Matador's co-development of the WFMP_A and TBSG in the Verna Rae development
- 3 Permian Resources appraisal of co-development of the TBSG and WFMP_A in Batman

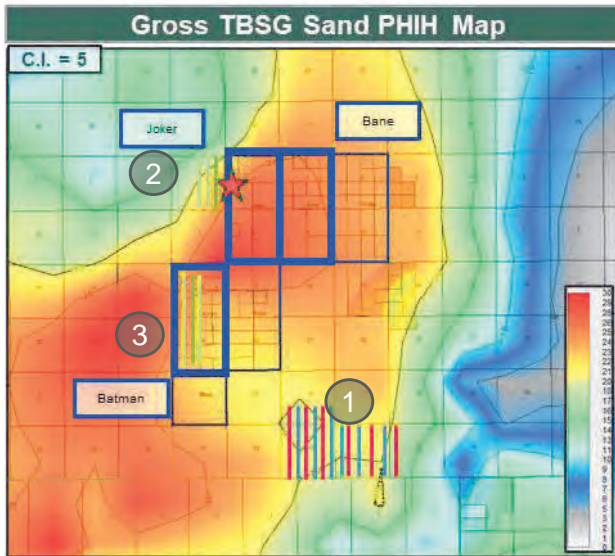

Key Examples of TBSG/WFMP A Co-Development

Limited Co-Development Testing in Geologically Analogous Rock

Locator Maps Against Pay Mapping

TBSG

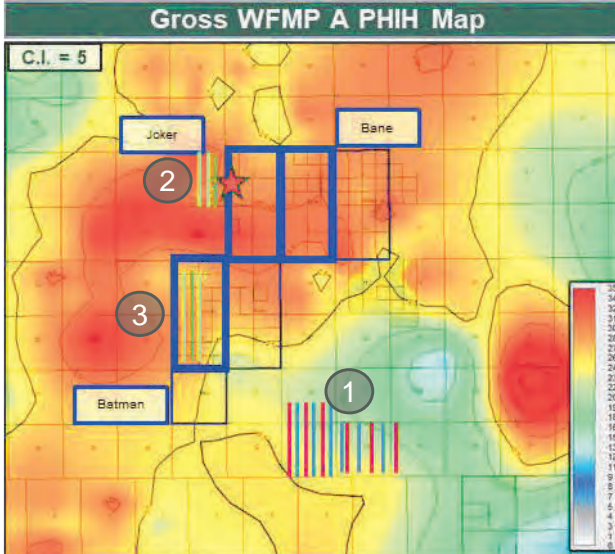

Consistent mapped pay quality in the TBSG Sand across key appraisals

WFMP_A

Consistent mapped pay quality in the areas 2, 3, and the Joker/Bane units

Degrading mapped pay quality area 1

- ① Denotes area of **lower** quality WFMP
- ② ③ Denotes area of **higher** quality WFMP

Well Results

Commentary

Examples of co-development between the TBSG and WFMP have returned very different results in areas of differing WFMP quality

When co-developed with the TBSG, WFMP_A results have been very strong in the higher quality WFMP analogous to the pay in the Joker and Bane units

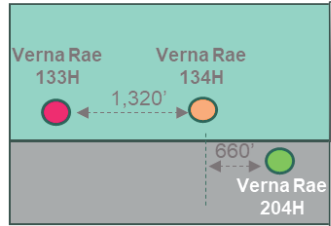

Production normalized to 10,000'

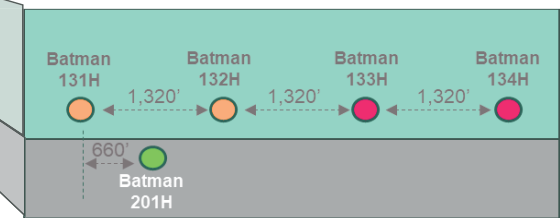

TBSG/WFMP A Co-Development

TBSG Not Degraded When Co-Dev with the WFMP in Immediate Offsets

Matador – Verna Rae

Permian Resources – Batman

Immediately offset of Joker and Bane are examples of successful co-development of the TBSG and WFMP at the exact same spacing and targeting that Permian Resources has proposed in Joker and Bane

Sequencing Matters

Maximizing Value and Preventing Waste Requires Proper Planning

Commentary

- Although not unique to this particular area, proper development sequencing is vitally important to ensure value is maximized and waste minimized
- Repeatedly returning to units to develop small packages is wasteful, inefficient, and value destructive as:
 - Developing in a partially depleted reservoir can reduce the effectiveness of hydraulic fracturing
 - Existing producing wells are often damaged even to the point of losing wellbores

Permian Resources' development strategy relies heavily on the use of sync'd rigs for large scale co-development with a thoughtful appraisal and permitting strategy that allows for the rapid incorporation of learnings

An Example of Improper Sequencing and Destroyed Value

Locator Map

Satellite View

Well Performance

Development Overview

Cimarex's development of the Lea 7 Federal unit ~4 miles to the east of the Bane unit features:

- The development of a single formation with 4 wells drilled over the span of 4+ years
- Three separate pads with their own associated infrastructure
- One lost and permanently abandoned wellbore after producing hydrocarbons for just months

Operator Activity

Cimarex Has Drilled 1 Well in 5 years

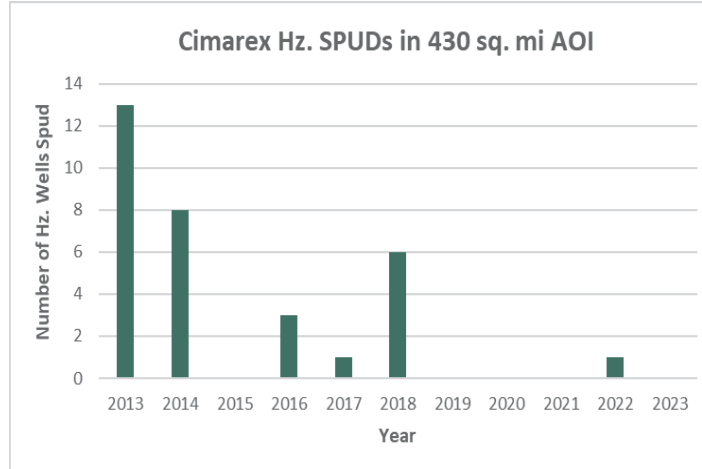

Commentary

In the 430+ sq. mile AOI around the Bane and Joker units, Cimarex has, over the last 10 years:

- Drilled a single two mile well (notably also the only well drilled in the last 5 years)
- Developed almost exclusively with single well pads
- Permanently abandoned 1 horizontal after producing for just 7 months
- Not tested the co-development of the TBSG and WFMP_A

Summary of Cimarex's Activity

SPUDs in AOI	Count	Avg Lateral Length (ft)*	Avg Wells per New Built Pad*	Avg Wells per Dev.*
2013	13	4,603	1	1
2014	8	4,331	1	1
2015	0	-	-	-
2016	3	5,517	1	1
2017	1	3,993	1	1
2018	6	4,450	1.2	1.5
2019	0	-	-	-
2020	0	-	-	-
2021	0	-	-	-
2022	1	9,253	RTP	1
2023	0	-	-	-
Total/Avg	32	4,696	1.1	1.2

Area of Interest

- Townships: 18S-21S
- Ranges: 33E-35E (32E-34E in TS 21S)
- Total Area: 432 sq. miles
- 2013+ SPUDs

Additional Bone Spring Targets

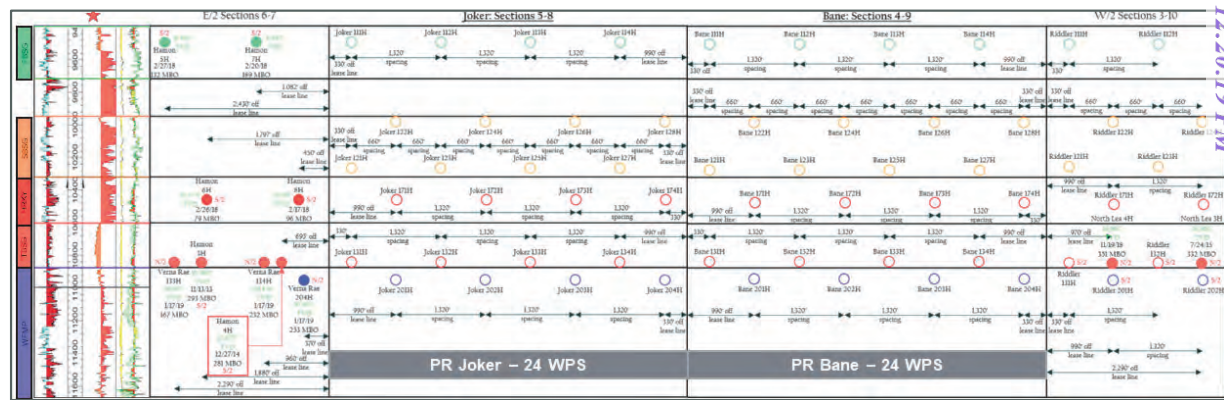

FBSG, SBSG, and Harkey Have Been Developed in the Area

Area of Interest

PR Proposed Gun Barrel

Well Performance

Commentary

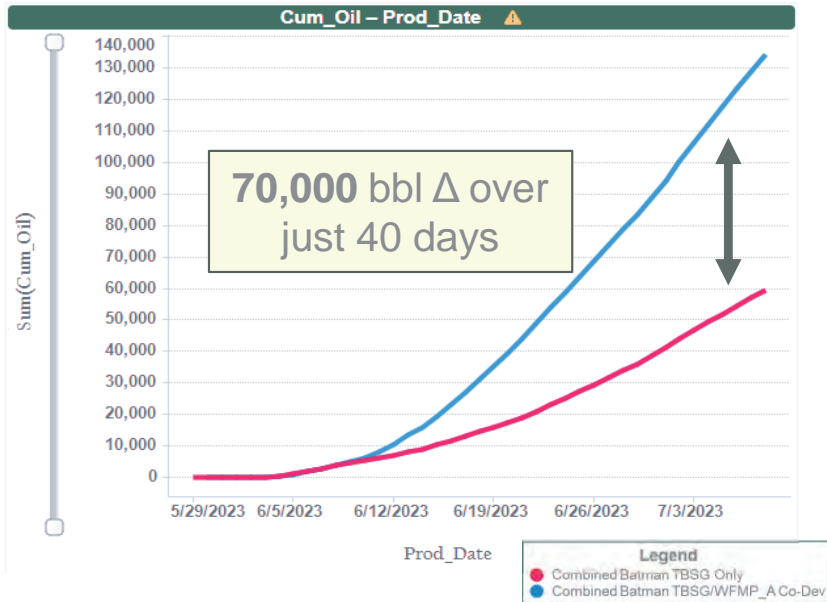

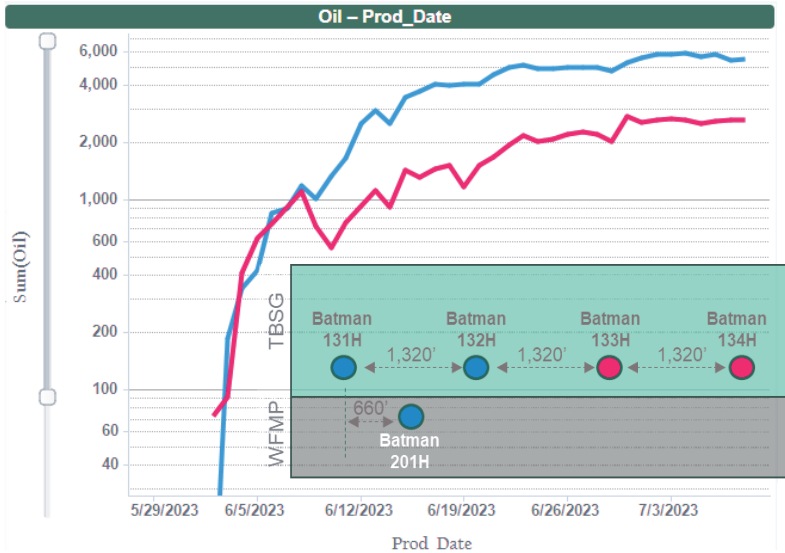

- All proposed targets are real targets with producing wells in the immediate area
- Permian Resources views permitting for the success case in terms of the delineation of targets with possible communication as an important piece of a development strategy that maximizes value and minimizes waste

Production normalized to 10,000'

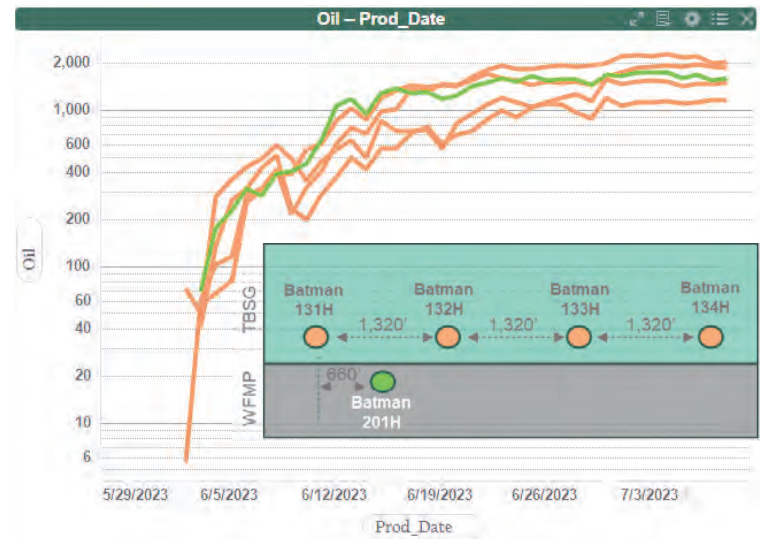

A Closer Look at Batman Results

Re: Application of Permian Resources Operating, LLC for Compulsory Pooling, Lea County, New Mexico: Bane 4-9 Federal Com 111H, 121H, 122H, 171H, and 131H wells

Ladies & Gentlemen:

This letter is to advise you that Read & Stevens, Inc. has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on June 1, 2023, beginning at 8:15 a.m., and the status of the hearing can be monitored through the Division’s website at <https://www.emnrd.nm.gov/ocd/>.

Due to ongoing construction and associated space limitations at the Wendell Chino Building, Parties, Counsel for Parties, and the public are encouraged to attend/participate via the Webex Meeting platform. To participate in the electronic hearing, see the instructions posted on the OCD Hearings website: <https://www.emnrd.nm.gov/ocd/hearing-info/>.

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of NMAC 19.15.4.13.B.

If you have any questions about this matter, please contact Travis Macha at (432) 400-1037 or travis.macha@permianres.com.

Sincerely,

Adam G. Rankin

TO: ALL INTEREST OWNERS SUBJECT TO POOLING PROCEEDINGS

**Re: Application of Permian Resources Operating, LLC for Compulsory Pooling,
Lea County, New Mexico: Bane 4-9 Federal Com 201H well**

Ladies & Gentlemen:

This letter is to advise you that Read & Stevens, Inc. has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on June 1, 2023, beginning at 8:15 a.m., and the status of the hearing can be monitored through the Division’s website at <https://www.emnrd.nm.gov/ocd/>.

Due to ongoing construction and associated space limitations at the Wendell Chino Building, Parties, Counsel for Parties, and the public are encouraged to attend/participate via the Webex Meeting platform. To participate in the electronic hearing, see the instructions posted on the OCD Hearings website: <https://www.emnrd.nm.gov/ocd/hearing-info/>.

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of NMAC 19.15.4.13.B.

If you have any questions about this matter, please contact Travis Macha at (432) 400-1037 or travis.macha@permianres.com.

Sincerely,

Adam G. Rankin

Re: Application of Permian Resources Operating, LLC for Compulsory Pooling, Lea County, New Mexico: Joker 5-8 Federal Com 111H, 121H, 122H, 171H, and 131H wells

Ladies & Gentlemen:

This letter is to advise you that Read & Stevens, Inc. has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on June 1, 2023, beginning at 8:15 a.m., and the status of the hearing can be monitored through the Division’s website at <https://www.emnrd.nm.gov/ocd/>.

Due to ongoing construction and associated space limitations at the Wendell Chino Building, Parties, Counsel for Parties, and the public are encouraged to attend/participate via the Webex Meeting platform. To participate in the electronic hearing, see the instructions posted on the OCD Hearings website: <https://www.emnrd.nm.gov/ocd/hearing-info/>.

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of NMAC 19.15.4.13.B.

If you have any questions about this matter, please contact Travis Macha at (432) 400-1037 or travis.macha@permianres.com.

Sincerely,

Adam G. Rankin

CERTIFIED RECEIPT REQUESTED

TO: ALL INTEREST OWNERS SUBJECT TO POOLING PROCEEDINGS

**Re: Application of Permian Resources Operating, LLC for Compulsory Pooling,
Lea County, New Mexico: Joker 5-8 Federal Com 201H well**

Ladies & Gentlemen:

This letter is to advise you that Read & Stevens, Inc. has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on June 1, 2023, beginning at 8:15 a.m., and the status of the hearing can be monitored through the Division’s website at <https://www.emnrd.nm.gov/ocd/>.

Due to ongoing construction and associated space limitations at the Wendell Chino Building, Parties, Counsel for Parties, and the public are encouraged to attend/participate via the Webex Meeting platform. To participate in the electronic hearing, see the instructions posted on the OCD Hearings website: <https://www.emnrd.nm.gov/ocd/hearing-info/>.

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of NMAC 19.15.4.13.B.

If you have any questions about this matter, please contact Travis Macha at (432) 400-1037 or travis.macha@permianres.com.

Sincerely,

Adam G. Rankin

Case No. 23508: Application of Read & Stevens, Inc. for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order pooling all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and the W/2 SW/4 of Section 4 and the W/2 W/2 of Section 9, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Bane 4-9 Federal Com 111H, 121H, 122H, 171H, and 131H** wells; to be horizontally drilled from a surface location in the NE/4 NW/4 (Lot 3) of Section 4, Township 20 South, Range 34 East, to bottom hole locations in the SW/4 SW/4 (Unit M) of Section 9, Township 20 South, Range 34 East. Also, to be considered will be the cost of drilling and completing the well and the allocation of the cost thereof, actual operating costs and charges for supervision, designation of Applicant as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 27 miles southwest of Hobbs, New Mexico.

Case No. 23511: Application of Read & Stevens, Inc. for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order pooling all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 1 (NE/4 NE/4 equivalent), the SE/4 NE/4, and the E/2 SE/4 of Section 4 and the E/2 E/2 of Section 9, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Bane 4-9 Federal Com 114H, 127H, 128H, 174H, 134H** wells, to be horizontally drilled from a surface location in the NE/4 NE/4 (Lot 1) of Section 4, Township 20 South, Range 34 East, to bottom hole locations in the SE/4 SE/4 (Unit P) of Section 9, Township 20 South, Range 34 East. Also, to be considered will be the cost of drilling and completing the wells and the allocation of the cost thereof, actual operating costs and charges for supervision, designation of Applicant as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 27 miles southwest of Hobbs, New Mexico.

Case No. 23516: Application of Read & Stevens, Inc. for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order pooling all uncommitted interests in the Bone Spring formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 4 (NW/4 NW/4 equivalent), the SW/4 NW/4, and the W/2 SW/4 of Section 5 and the W/2 W/2 of Section 8, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed Joker 5-8 Federal Com 111H, 121H, 122H, 171H, and 131H wells, to be horizontally drilled from a surface location in the NE/4 NW/4 (Lot 3) of Section 5, Township 20 South, Range 34 East, to bottom hole locations in the SW/4 SW/4 (Unit M) of Section 8, Township 20 South, Range 34 East. Also, to be considered will be the cost of drilling and completing the well and the allocation of the cost thereof, actual operating costs and charges for supervision, designation of Applicant as operator of the wells, and a 200% charge or risk involved in drilling said wells. Said area is located approximately 40 miles northeast of Carlsbad, New Mexico.

Case No. 23521: Application of Read & Stevens, Inc. for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order pooling all uncommitted interests in the Wolfcamp formation underlying a standard 320-acre, more or less, horizontal well spacing comprised of Lot 3 (NE/4 NW/4 equivalent), the SE/4 NW/4, and the E/2 SW/4 of Section 5 and the E/2 W/2 of Section 8, Township 20 South, Range 34 East, NMPM, Lea County, New Mexico. Said unit will be initially dedicated to the proposed **Joker 5-8 Federal Com 202H** well, to be horizontally drilled from a surface location in the NE/4 NW/4 (Lot 3) of Section 5, Township 20 South, Range 34 East, to a bottom hole location in the SE/4 SW/4 (Unit N) of Section 8, Township 20 South, Range 34 East. Also, to be considered will be the cost of drilling and completing the well and the allocation of the cost thereof, actual operating costs and charges for supervision, designation of Applicant as operator of the well, and a 200% charge for risk involved in drilling said well. Said area is located approximately 40 miles northeast of Carlsbad, New Mexico.
