STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF EARTHSTONE OPERATING, LLC, FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case No. <u>234</u>75

APPLICATION

Earthstone Operating, LLC, ("Earthstone"), OGRID No. 331165, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division" or "OCD") pursuant to the provisions of NMSA 1978, Section 70-2-17, for an order (1) establishing a standard 320.00-acre, more or less, spacing and proration unit comprised of the E/2 E/2 of Sections 7 and 18, all in Township 21 South, Range 35 East, NMPM, Lea County, New Mexico, and (2) pooling all uncommitted mineral interests in the Bone Spring formation, designated as an oil pool, underlying said unit. Sections 7 and 18 are irregular sections with correction lots, but there are no such lots in the proposed unit.

In support of its Application, Earthstone states the following:

- 1. Earthstone is a working interest ("WI") owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon, subject to the Division's discretion.
- 2. This application competes with the application filed in Case No. 23366 by Mewbourne Oil Company ("Mewbourne"). The E/2 E/2 of Section 7 is within the North Wilson Deep Unit ("State EU") originally created in 1963 by OCD Order No. R-2621, and currently, Mewbourne is the designated operator for units contained wholly within the State EU; however,

Released to Imaging: 9/14/2023 4:35:47 PM

in Case No. 23366, Mewbourne has overreached the boundaries of the State EU by proposing a unit involving lands both inside the State EU (i.e. the E/2 E/2 of Section 7) and lands outside the State EU (i.e. E/2 E/2 of Section 18). Furthermore, Mewbourne is proposing to drill its surface hole on, and develop, Section 18, which Mewbourne, during proceedings before the OCD in 2020, explicitly agreed to exclude from the State EU as an express condition for the OCD's expansion of the State EU. *See* Order No. R-21721, ¶ 4(d) (showing that Mewbourne agreed to exclude the E/2 of Section 18 from the expansion of the State EU to satisfy the objection of Earthstone's predecessor in interest, which was a condition for the Division's approval for the lands currently included in the State EU).

- 3. Earthstone, who owns WI in the competing units covering the E/2 E/2 of Sections 18 and 7, respectfully submits that Mewbourne, by proposing a unit that includes the E/2 E/2 of Section 18, and the correlative rights and potential waste associated with the E/2 E/2 of Section 18 located outside the State EU, has invoked the necessity for the Division to exercise its authority to evaluate the competing applications for the purpose of selecting the best operator and development plan that would protect correlative rights, prevent waste, and maximize production of the proposed straddle unit covering the E/2 E/2 of Sections 7 and 18.
- 4. Earthstone has simultaneously filed applications in other cases for the development of the W/2 of Sections 7 and 18, which is not in the State EU but is a part of Earthstone's overall plan for the optimal development of all of Sections 7 and 18. Earthstone respectfully requests that the Division exercise its authority to adjudicate the competing applications, that being the straddle units proposed by both Earthstone and Mewbourne, within the larger context of the proposed development of Sections 7 and 18.

- 5. Accordingly, in this application, Earthstone proposes and dedicates to the HSU two initial wells: the **Outland 18-7 State Com 114H Well** and the **Outland 18-7 State Com 214H**Well, to be drilled to a sufficient depth to test the Bone Spring formation.
- 6. Earthstone proposes the **Outland 18-7 State Com 114H Well,** an oil well, to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 18 to a bottom hole location in the NE/4 NE/4 (Unit A) of Section 7.
- 7. Earthstone proposes the **Outland 18-7 State Com 214H Well,** an oil well, to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 18 to a bottom hole location in the NE/4 NE/4 (Unit A) of Section 7.
- 8. The proposed wells are orthodox in their locations, and the take points and completed intervals comply with setback requirements under the statewide rules.
- 9. Earthstone's review of the land records did not reveal any overlapping units; should an overlapping unit be discovered, Earthstone will satisfy notice as part of the permitting process. However, Earthstone is proposing a straddle unit that includes a section of land both inside and outside the North Deep Wilson Unit and therefore will be seeking approval of this overlap with the State EU during the adjudication process.
- 10. Earthstone has sought in good faith, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the wells or in the commitment of their interests to the wells for their development within the proposed HSU.
- 11. The pooling of uncommitted interests in the Bone Spring formation within the proposed HSU, and creation of the spacing unit, will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

12. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Earthstone requests that all uncommitted interests in this HSU be pooled and that Earthstone be designated the operator of the proposed horizontal wells and HSU.

WHEREFORE, Earthstone requests that this Application be set for hearing on May 4, 2023, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

- A. Establishing a standard 320.00-acre, more or less, spacing and proration unit comprised of the E/2 E/2 of Sections 7 and 18, all in Township 21 South, Range 35 East, NMPM, Lea County, New Mexico;
- B. Pooling all uncommitted mineral interests in the Bone Spring formation underlying the proposed HSU.
- C. Approving the Outland 18-7 State Com 114H Well and the Outland 18-7 StateCom 214H Well as the wells for the HSU.
- D. Approving the overlap of the HSU with the E/2 E/2 of Section 7 located within the Wilson North Deep Unit.
- E. Designating Earthstone as operator of this HSU and the horizontal wells to be drilled thereon;
- F. Authorizing Earthstone to recover its costs of drilling, equipping, and completing the wells;
- G. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

H. Setting a 200% charge for the risk assumed by Earthstone in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

ABADIE & SCHILL, PC

Attorneys for Earthstone Operating LLC

Application of Earthstone Operating, LLC for a Horizontal Spacing and Proration Unit and Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order from the Division: (1) establishing a standard 320.00-acre, more or less, spacing and proration unit comprised of the E/2 E/2 of Sections 7 and 18, all in Township 21 South, Range 35 East, NMPM, Lea County, New Mexico, and (2) pooling all mineral interests in the Bone Spring formation, designated as an oil pool, underlying the unit. Sections 7 and 18 are irregular with correction lots but there are no such lots in the proposed unit. The proposed wells to be dedicated to the horizontal spacing unit are the Outland 18-7 State Com 114H Well and the Outland 18-7 State Com 214H Well, both oil wells, to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 18 to a bottom hole location in the NE/4 NE/4 (Unit A) of Section 7. The proposed unit is a straddle unit that includes lands in the E/2 E/2 of Section 7 that are within the North Wilson Deep Unit. Applicant will seek approval for this overlap. The wells will be orthodox, and the take points and completed intervals will comply with the setback requirements under statewide Rules; also to be considered will be the cost of drilling and completing the wells and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the wells and unit; and a 200% charge for the risk involved in drilling and completing the wells. The wells and lands are located approximately 15 miles northwest of Eunice, New Mexico.

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF EARTHSTONE OPERATING, LLC, FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

Case No. 23477

APPLICATION

Earthstone Operating, LLC, ("Earthstone"), OGRID No. 331165, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division ("Division" or "OCD") pursuant to the provisions of NMSA 1978, Section 70-2-17, for an order (1) establishing a standard 320.00-acre, more or less, spacing and proration unit comprised of the W/2 E/2 of Sections 7 and 18, all in Township 21 South, Range 35 East, NMPM, Lea County, New Mexico, and (2) pooling all uncommitted mineral interests in the Bone Spring formation, designated as an oil pool, underlying said unit. Sections 7 and 18 are irregular sections with correction lots, but there are no such lots in the proposed unit.

In support of its Application, Earthstone states the following:

- 1. Earthstone is a working interest ("WI") owner in the proposed horizontal spacing and proration unit ("HSU") and has a right to drill a well thereon, subject to the Division's discretion.
- 2. This application competes with the application filed in Case No. 23365 by Mewbourne Oil Company ("Mewbourne"). The W/2 E/2 of Section 7 is within the North Wilson Deep Unit ("State EU") originally created in 1963 by OCD Order No. R-2621, and currently, Mewbourne is the designated operator for units contained wholly within the State EU; however,

Released to Imaging: 9/14/2023 4:35:47 PM

in Case No. 23365, Mewbourne has overreached the boundaries of the State EU by proposing a unit involving lands both inside the State EU (i.e. the W/2 E/2 of Section 7) and lands outside the State EU (i.e. W/2 E/2 of Section 18). Furthermore, Mewbourne is proposing to drill its surface hole on, and develop, Section 18, which Mewbourne, during proceedings before the OCD in 2020, explicitly agreed to exclude from the State EU as an express condition for the OCD's expansion of the State EU. *See* Order No. R-21721, ¶ 4(d) (showing that Mewbourne agreed to exclude the E/2 of Section 18 from the expansion of the State EU to satisfy the objection of Earthstone's predecessor in interest, which was a condition for the Division's approval for the current lands included in the State EU).

- 3. Earthstone, who owns WI in the competing units covering the W/2 E/2 of Sections 18 and 7, respectfully submits that Mewbourne, by proposing a unit that includes the W/2 E/2 of Section 18, and the correlative rights and potential waste associated with the W/2 E/2 of Section 18 located outside the State EU, has invoked the necessity for the Division to exercise its authority to evaluate the competing applications for the purpose of selecting the best operator and development plan that would protect correlative rights, prevent waste, and maximize production of the proposed straddle unit covering the W/2 E/2 of Sections 7 and 18.
- 4. Earthstone has simultaneously filed applications in other cases for the development of the W/2 of Sections 7 and 18, which is not in the State EU but is a part of Earthstone's overall plan for the optimal development of all of Sections 7 and 18. Earthstone respectfully requests that the Division exercise its authority to adjudicate the competing applications, that being the straddle units proposed by both Earthstone and Mewbourne, within the larger context of the proposed development of Sections 7 and 18.

- 5. Accordingly, in this application, Earthstone proposes and dedicates to the HSU two initial wells: the **Outland 18-7 State Com 113H Well** and the **Outland 18-7 State Com 223H**Well, to be drilled to a sufficient depth to test the Bone Spring formation.
- 6. Earthstone proposes the **Outland 18-7 State Com 113H Well,** an oil well, to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 18 to a bottom hole location in the NW/4 NE/4 (Unit B) of Section 7.
- 7. Earthstone proposes the **Outland 18-7 State Com 223H Well,** an oil well, to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 18 to a bottom hole location in the NW/4 NE/4 (Unit B) of Section 7.
- 8. The proposed wells are orthodox in their locations, and the take points and completed intervals comply with setback requirements under the statewide rules.
- 9. Earthstone's review of the land records did not reveal any overlapping units; should an overlapping unit be discovered, Earthstone will satisfy notice as part of the permitting process. However, Earthstone is proposing a straddle unit that includes a section of land both inside and outside the North Deep Wilson Unit and therefore will be seeking approval of this overlap with the State EU during the adjudication process.
- 10. Earthstone has sought in good faith, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the wells or in the commitment of their interests to the wells for their development within the proposed HSU.
- 11. The pooling of uncommitted interests in the Bone Spring formation within the proposed HSU, and creation of the spacing unit, will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

12. In order to provide for its just and fair share of the oil and gas underlying the subject lands, Earthstone requests that all uncommitted interests in this HSU be pooled and that Earthstone be designated the operator of the proposed horizontal wells and HSU.

WHEREFORE, Earthstone requests that this Application be set for hearing on May 4, 2023, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

- A. Establishing a standard 320.00-acre, more or less, spacing and proration unit comprised of the W/2 E/2 of Sections 7 and 18, all in Township 21 South, Range 35 East, NMPM, Lea County, New Mexico;
- B. Pooling all uncommitted mineral interests in the Bone Spring formation underlying the proposed HSU.
- C. Approving the Outland 18-7 State Com 113H Well and the Outland 18-7 StateCom 223H Well as the wells for the HSU.
- D. Approving the overlap of the HSU with the W/2 E/2 of Section 7 located within the Wilson North Deep Unit.
- E. Designating Earthstone as operator of this HSU and the horizontal wells to be drilled thereon;
- F. Authorizing Earthstone to recover its costs of drilling, equipping, and completing the wells;
- G. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

H. Setting a 200% charge for the risk assumed by Earthstone in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

DIRECT TESTIMONY OF AMANDA M. REDFEARN

- I, being duly sworn on oath, state the following:
- 1. I am over the age of eighteen years and have the capacity to execute this Affidavit, which is based on my personal knowledge.
- 2. I am employed as a Landman with Earthstone Operating, LLC, ("Earthstone"), and I am familiar with the subject application and the lands involved.
- 3. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum land matters. My credentials as a petroleum Landman have been accepted by the Division and made a matter of record previously. My education and work experience are as follows: I graduated from the University of Houston-Downtown in 2016 with a Bachelor of Arts degree in International Business with a PLM minor. I have been employed with Earthstone in their land department as a Landman since 2021. I have worked as a Landman in New Mexico for approximately 3 years and in Texas for approximately 6 years throughout my career. Prior to working as a Landman, I have worked and held petroleum land technical positions working

projects in Texas and Louisiana since 2012. Combined, I have 11 years of petroleum land industry experience.

- 4. This Testimony is submitted in connection with the filing by Earthstone of the above-referenced spacing and compulsory pooling applications pursuant to 19.15.4.12.A(1).
- 5. Earthstone seeks an order pooling all uncommitted mineral interest in the Wilson; Bone Spring formation; Pool Code: 64560, underlying a standard 320-acre, more or less, horizontal spacing and proration unit comprised of the E/2 E/2 of Sections 7 and 18; and seeks an order pooling all uncommitted mineral interest in the Wilson; Bone Spring formation; Pool Code: 64560, underlying a standard 320-acre, more or less, horizontal spacing and proration unit comprised of the W/2 E/2 of Sections 7 and 18 all in Township 21 South, Range 35 East, NMPM, Lea County, New Mexico.
 - a. Under <u>Case No. 23475</u>, Earthstone seeks to dedicate the **Outland 18-7 State Com**114H Well (API 30-025-pending) as an initial well, horizontally drilled from a surface location in the SE/4 SE/4 (Unit P) of Section 18 to a bottom hole location in the NE/4 NE/4 (Unit A) of Section 7; approximate TVD of 9,219'; approximate TMD of 19,219'; FTP in Section 18: 100' FSL, 330' FEL; LTP in Section 7: 100' FNL, 330' FEL.
 - b. Under <u>Case No. 23475</u>, Earthstone seeks to dedicate the **Outland 18-7 State Com 214H Well** (API 30-025-pending) as an initial well, horizontally drilled from a surface location in the SE/4 SE/4 (Unit P) of Section 18 to a bottom hole location in the NE/4 NE/4 (Unit A) of Section 7; approximate TVD of 9,798'; approximate TMD of 19,798'; FTP in Section 18: 100' FSL, 990' FEL; LTP in Section 7: 100' FNL, 990' FEL.

- c. Under <u>Case No. 23477</u>, Earthstone seeks to dedicate the **Outland 18-7 State Com**113H Well (API 30-025-pending) as an initial well, horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 18 to a bottom hole location in the NW/4 NE/4 (Unit B) of Section 7; approximate TVD of 9,238'; approximate TMD of 19,238'; FTP in Section 18: 100' FSL, 1,650' FEL; LTP in Section 7: 100' FNL, 1,650' FEL.
- d. Under <u>Case No. 23477</u>, Earthstone seeks to dedicate the **Outland 18-7 State Com 223H Well** (API 30-025-pending) as an initial well, horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 18 to a bottom hole location in the NW/4 NE/4 (Unit B) of Section 7; approximate TVD of 10,022'; approximate TMD of 20,022'; FTP in Section 18: 100' FSL, 2,310' FEL; LTP in Section 7: 100' FNL, 2,310' FEL.
- 6. Mewbourne Oil Company ("Mewbourne") submitted a competing application in Case No. 23365 and Case No. 23366 seeking to compulsory pool interest owners in a horizontal spacing unit comprised of the same acreage and developing the same formation as the wells proposed by Earthstone. Mewbourne has proposed a two well development plan whereas Earthstone has proposed a four well development plan.
- 7. I am aware that, in considering competing compulsory pooling applications, the Division considers a number of factors to determine which application is the superior development plan. One of those factors, which is critical here given the negotiations of the parties (Mewbourne and Earthstone's predecessor-in-interest, Chisolm Energy Operating, LLC), is the "negotiations between the competing parties prior to the application to force pool to determine if there was a good faith effort" to negotiate. *See* OCD Order No. R-21834.

8. The prior negotiations of the parties – Earthstone's predecessor, Chisholm Energy Operating, LLC ("Chisholm") and Mewbourne – evidence that Mewbourne has not proceeded in good faith in the negotiations over the development of the acreage in these competing applications. Chisholm (Earthstone's predecessor) entered appearances in Mewbourne's Case No. 21418 whereby Chisholm among several other working interest owners had objected to Mewbourne's application in the Case No. 21418 to expand the North Wilson Deep Unit ("NWDU"). Chisholm objected for the same reason that Earthstone filed this application: Earthstone has almost a 50% working interest in the WI in the E/2 of Section 18, and Mewbourne has none. Chisholm wanted to, like Earthstone wants to, make beneficial economic use of that interest, which will not be done if the Division grants to Mewbourne its compulsory pooling applications over Earthstone's here. Mewbourne previously agreed that it wouldn't expand the North Wilson Deep Unit because of that objection by Chisholm, which agreement Earthstone seeks to have Mewbourne abide by here, and so should the Division. Mewbourne's agreement with Chisholm which Earthstone seeks to vindicate in these applications is evidenced in the Joint Motion for Continuance filed November 29, 2020 in the OCD Case file that Chisholm had "extensive communications with Mewbourne and have articulated concerns to Mewbourne regarding the proposed expansion...." Chisholm specifically expressed concern in the same Joint Motion for Continuance that Mewbourne "...will use its designation as "Operator" of a state unit to challenge and impede the development plans of other working interest owners in the acreage who refused to commit to the expansion." After raising such concerns, Chisholm entered into negotiations with Mewbourne and reached an agreement that was intended to protect Chisholm's correlative rights specifically in the E/2 of Section 18, as consideration for Chisholm's withdrawal of its objections, evidenced and made of record in the December 3, 2020 hearing. See Case No. 21418, Dec. 3, 2020 Tr. at 5:20-23 (counsel

for Devon Energy, COG Operating, Chisholm, & Chevron: "Madam Examiner, just one brief announcement. Chisholm and Mewbourne have reached a voluntary agreement, so Chisholm is withdrawing its objection to formation of the units."). Additionally, it is written and memorialized in Order R-21721, that "The expanded Unit area was originally proposed to be 13,272.13 acres in size, but Mewbourne eliminated the E/2 of Section 18-21S-35E and Section 4-22S-35E at the request of Chisholm Energy Operating LLC and the SE/4 of Section 32-20S-36E at the request of COG Operating LLC. As now proposed, the Expanded Unit covers 12,142.39 acres."

- 9. Thus, the Division approved the NWDU only "for oil and gas produced from the following described 12,142.39 acres of State trust lands in Lea County, New Mexico," which includes only the E/2 of Section 7, but expressly excludes the E/2 of Section 18. Furthermore, while the OCD found that approval of the Expanded Unit will serve to prevent waste and protect correlative rights within the lands assigned to the unit area, it did not address the prevention of waste or protection of correlative rights outside the lands assigned to the unit area. As a result, matters of conservation remain unaccounted for in the E/2 of Section 18. Earthstone, as successor in interest to Chisholm, respectfully asks that background matters outlined in paragraphs 7 and 8 are also taken into account when reviewing Earthstone's and Mewbourne's competing applications.
 - 10. The proposed C-102 for each well is attached as **Exhibit A-1**.
- 11. A general location plat and a plat outlining the units being pooled is attached hereto as **Exhibit A-2**, which show the location of the proposed well within the unit. The location of each well is orthodox, and it meets the Division's offset requirements.
- 12. The parties being pooled, and the nature of their interests are listed on **Exhibit A-2** attached hereto. **Exhibit A-2** includes information regarding working interest owners and

overriding royalty interest owners. Earthstone owns 49.916667% WI in the E/2 of Section 18 and owns 24.421073% leasehold working interest in the N/4 of Section 7. However, by virtue of being a Working Interest Party to the North Wilson Deep Unit ("NWDU") and the N/4 of Section 7 lands are included in the NWDU, Earthstone's leasehold interests have been significantly diluted, as Evidenced on **Exhibit A-2**.

- April 4, 2023 to the NWDU Operating Agreement that was found in Mewbourne's provided Division Order Title Opinion for Mewbourne's North Wilson Deep Unit 6H well, evidenced on **Exhibit A-5** to determine the contractual working interests owners and ownership percentages in Tract 1 and Tract 2 as well as the proposed spacing unit ownership outlined on **Exhibit A-2**.
 - 14. There are no depth severances in the Bone Spring formation in this acreage.
- 15. Earthstone is proposing a straddle unit that includes a section of land both inside and outside the North Deep Wilson Unit and therefore will be seeking approval of this overlap with the State EU during the adjudication process.
- 16. I provided the law firm of Abadie & Schill P.C. a list of names and addresses for the uncommitted interest owners shown on **Exhibit A-2**. In compiling these addresses, I conducted a diligent search of the public records in Lea County, New Mexico, where the wells are located, and of phone directories and did computer searches to locate the contact information for parties entitled to notification. All working interest owners were locatable and noticed. I mailed all parties a well proposal, including an Authorization for Expenditure ("AFE"), for each well. Earthstone published notice in the Hobbs News-Sun, a newspaper of general circulation in Lea County, New Mexico, to account for any unlocatable parties and cover any contingencies regarding notice.

- 17. Earthstone has made a good faith effort to negotiate with the interest owners, but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the well or in the commitment of their interests to the well for its development within the proposed horizontal spacing unit. **Exhibit A-4** provides a chronology and history of contacts with the owners.
- 18. The interest owners being pooled have been contacted regarding the proposed wells but have failed or refused to voluntarily commit their interest in the wells. However, Earthstone has been in ongoing discussions with some of the interest owners to voluntarily enter into a Joint Operating Agreement. If a mutually agreeable Joint Operating Agreement is reached between Earthstone and another interest owner or owners, Earthstone requests that the voluntary agreement become operative and supersede the Division's order for said parties, except to the extent the Division deems it necessary to maintain spacing criteria for the purpose of conservation, the prevention of waste, and protection of correlative rights.
- 19. **Exhibit A-3** is a sample proposal letter and the AFEs for each proposed well. The estimated cost of the wells set forth in the AFEs is fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.
- 20. Earthstone requests overhead and administrative rates of \$7,500/month for drilling each well and \$750/month for producing each well. These rates are fair and comparable to the rates charged by other operators for wells of this type in this area of southeastern New Mexico. Earthstone requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.
- 21. Earthstone requests the maximum cost, plus 200% risk charge be assessed against non-consenting working interest owners to the extent needed.

- 22. Earthstone requests that it be designated operator of the units and wells.
- 23. In Order No. R-22739, Case No. 23478 and in Order No. R-22738, Case No. 23476, the Division approved the compulsory pooling of spacing units for Earthstone's companion wells, the Outland 18-7 State Com 111H, 112H, 212H, and 221H (now known as the Dovetail 18 7 State Com 11H, 112H, 212H, and 221H)¹, located in the W/2 of Sections 18 and 7, T21S, R35E ("Dovetail 18 7 Wells"). Operating arrangements have been made for the Dovetail 18 7 Wells and the Outland 18-7 State Com 114H, 214H, 113H, and 223H wells, located in the E/2 of Sections 18 and 7, T21S, R35E ("Outland 18-7 Wells")² to be co-developed for cost and efficiency purposes.
- 24. Earthstone has an existing active Surface Use Agreement dated June 12, 2017 with the surface owner covering the S/2 of Section 18, T21S, R35E and has obtained approval from the surface owner to construct well pads for the above referenced wells.
- 25. The surface location for the Outland 18-7 Wells subject of this application were staked on March 27, 2023. Earthstone's Outland 18-7 Wells' pad location follows existing roads and pipelines. Earthstone's operations will be connected with existing and favorable infrastructure that will not need to be tied into the NWDU or traverse lands that are located outside of the proposed spacing unit. Thus, Earthstone is able to use the surface in a more prudent manner for optimal development of the subject lands and less environmental impact and waste than Mewbourne's development plan. More information about Earthstone's pad placement and nearby existing infrastructure for the Outland 18-7 Wells and Dovetail 18 7 Wells is shown on **Exhibit** A-6.

¹ API numbers for the Dovetail 18 7 Sate Com Wells are 30-025-51728, 30-025-51729, 30-025-51730, and 30-025-51731

² Earthstone's current applications for compulsory pooling (Case No. 23475 and Case No. 23477)

- 26. The Exhibits to this Affidavit were prepared by me or compiled from Earthstone's company business records under my direct supervision.
- 27. The granting of this Application is in the best interests of conservation, the prevention of waste, and the protection of correlative rights.
 - 28. The foregoing is correct and complete to the best of my knowledge and belief.

WORK EXPERIENCE

Earthstone Energy June 2021 – Current

Senior Landman – Permian (December 2022 – Current)

Landman – Permian (June 2021 – December 2022)

- Assist management and provide support on Texas and New Mexico acquisition due diligence efforts, review and prepare ABOS exhibits, closings, onboarding, integration, and operations of acquired assets totaling over \$2 billion to date
- Provide support and coordinate development plans with geologists, engineers, operations, and regulatory teams
- Analyze, identify, and quantify any present Land business risks involved in current and future development activity
- Coordinate with various local, state, and federal land entities to support operational activities
- Draft and negotiate JOAs, Assignments, Unit/Pooling Agreements, Production Sharing Agreements, Letter Agreements, Trades, Mineral and Surface Agreements, and other contracts necessary to acquire, develop, and operate
- Establish and manage relationships with landowners, landowner's attorneys, regulatory agencies, industry partners, and competitors
- Manage and direct brokers for title research, due diligence, and curative efforts
- Direct and work with title attorneys to secure necessary examination of title, rendering of title opinions, and resolving defects
- Provide support to DO and Accounting teams to resolve owner and partner JIB inquiries

Capitol Land Source January 2020 – June 2021

Landman – Permian

- Team lead and key advisor to client on two Permian based due diligence projects for acquisitions totaling \$425 million
- Project manager and coordinator with cross functional teams: conduct surface and mineral title research, generate ownership reports, and clear title on ~400 pipeline routes, wells, and OHPLs in New Mexico and Texas
- Coordinate with various local, state, and federal land entities to support client's operational activities

BHP Billiton June 2014 – March 2019

Landman – Eagle Ford and Permian (November 2017 – March 2019)

- Responsible for management and development of \$160 million Permian and Eagle Ford asset OBO budget
- Serve as the Land subject matter expert to collaboratively evaluate external well proposals on cross functional business unit teams
- Preform land evaluation/title due diligence prior to drill; verify, manage, and maintain new and existing ownership setups
- Review and resolve JIB disputes for JV Accounting in addition to approving cash calls from external partners
- Lead negotiator and project manager for Land transactions; acquire, maintain, and divest Permian and Eagle Ford assets
- Negotiate and draft various ancillary oil and gas agreements: Leases, Wellbore Assignments, Production Sharing Agreements, Farmout/Ins, Joint Operating Agreements, Trades, Mineral and Surface Agreements
- Provide work direction to field land agents and outside legal counsel

Land Technician – Eagle Ford (March 2017 – November 2017)

Land Technical Assistant II – Eagle Ford (June 2014 – March 2017)

- Responsible for assisting Eagle Ford Land Operations Team with development planning and maintenance of 125 pooled and
 retained acreage units. Preforming land evaluations prior to drill: review title and pursue curative to mitigate risks; navigate
 onerous lease provisions and amendments
- Work collaboratively with Eagle Ford Landmen, Well Delivery, Reservoir Engineering, Construction, Regulatory, and Drilling Engineering teams to plan for optimal new development locations
- Assisted with drilling roughly 100 wells, representing over \$100 billion in capital investment
- Propose and track AFEs to WI partners and work with JV Accounting to facilitate timely and accurate cash calls
- Draft and negotiate ancillary land agreements with landowners, attorneys, WI partners, Counties, and State of Texas: Surface
 and Subsurface Easements, Production Sharing and Production Allocation Agreements to maximize EUR and avoid stranding
 reserves, JOAs, Assignments, Lease and Unit Agreements
- Manage and provide GLO notifications pursuant to State Agreement provisions
- Manage and secure necessary well permitting waivers: Work with Regulatory and offsetting operators to obtain/grant SWR 37 waivers and off-lease point of penetration waivers

Cathexis Oil & Gas, LLC August 2012- March 2014

Land Tech I (Eagle Ford and Haynesville)

- Assist brokers with locating landowners, determining ownership in county court houses
- Coordinate and review Oil & Gas leases, Joint Operating Agreements, Assignments, Unitization Agreements, Rights-of- Way,
 Title Opinions, Contact Exhibits, and other various ancillary contracts

Re: Proposed Horizontal Bone Spring Wells

Outland 18-7 State Com 113H
Outland 18-7 State Com 114H
Outland 18-7 State Com 214H
Outland 18-7 State Com 223H
E/2 of Section 18-T21S-R35E &
E/2 of Section 7-T21S-R35E
Lea County, New Mexico

To whom it may concern,

Earthstone Operating, LLC ("Earthstone") hereby proposes the drilling of four horizontal wells to test the Bone Spring formation. Enclosed find an Authority for Expenditure ("AFE") for each subject well reflecting estimated costs to drill, test, complete and equip the well.

In connection with the above, please note the following:

- Outland 18-7 State Com 113H: 1st Bone Spring target to be drilled from a proposed legal surface hole location of 145' FSL & 1600' FEL of Section 18-21S-35E to a proposed bottom hole location of 50' FNL & 1650' FEL of Section 7-21S-35E.
- Outland 18-7 State Com 114H: 1st Bone Spring target to be drilled from a proposed legal surface hole location of 145' FSL & 1540' FEL of Section 18-21S-35E to a proposed bottom hole location of 50' FNL & 330' FEL of Section 7-21S-35E.
- Outland 18-7 State Com 214H: 2nd Bone Spring target to be drilled from a proposed legal surface hole location of 145' FSL & 1570' FEL of Section 18-21S-35E to a proposed bottom hole location of 50' FNL & 990' FEL of Section 7-21S-35E.

 Outland 18-7 State Com 223H: 2nd Bone Spring target to be drilled from a proposed legal surface hole location of 145' FSL & 1630' FEL of Section 18-21S-35E to a proposed bottom hole location of 50' FNL & 2310' FEL of Section 7-21S-35E.

Earthstone reserves the right to modify the SHL locations and drillings plans described above in order to address topography, cultural and/or environmental concerns, among other reasons. Earthstone will advise you of any such modifications.

Earthstone is proposing to drill this well under the terms of a modified 1989 AAPL form Operating Agreement covering the E/2 of Section 18 and the E/2 of Section 7, Township 21 South, Range 35 East, Lea County, New Mexico. Said Operating Agreement will name Earthstone Operating, LLC as Operator and will be made available for your review upon request.

Please indicate your election in the space provided below and return one (1) copy of this letter to the undersigned. Should you elect to participate, please also sign, and return one copy of each AFE.

If a response is not received within thirty (30) days from your receipt of this notice, Earthstone will begin filling pooling application(s) with the NMOCD.

Please feel free to contact the undersigned with any questions or concerns.

Sincerely,

Amanda Redfearn

Senior Landman

Re: Supplement to Well Proposal dated February 28, 2023

> Outland 18-7 State Com 113H Outland 18-7 State Com 114H Outland 18-7 State Com 214H Outland 18-7 State Com 223H E/2 of Section 18-T21S-R35E & E/2 of Section 7-T21S-R35E Lea County, New Mexico

Dear Working Interest Owner,

Earthstone Operating, LLC is providing this Supplemental Letter ("Supplement") to be incorporated into the Well Proposal dated February 28, 2023 ("Well Proposal"), in order to provide the overhead rates for the wells.

Earthstone Operating, LLC proposes overhead rates of \$7500 per month while drilling, and \$750 per month during production.

The estimated SHL, BHL, Authority for Expenditure, and all other specifications remain unchanged for the wells proposed, and the original Well Proposal dated February 28, 2023, remains in effect subject to this Supplement.

Please feel free to contact the undersigned with any questions or concerns.

Sincerely, Amanda Redfearn Senior Landman 281-771-3048 amanda@earthstonenergy.com

Statement of Estimated Well Cost

Field Name: Wilson; Bone Spring
Location: Lea Co., NM

AFE #: 23 - XX - XXXX

Estimate is for the drilling of a 2.0 mile 1st Bone Spring Sand lateral in Lea County, NM. 10-3/4" Surface casing will be set at 1,750' MD.The 1st Intermediate section will be 9-7/8" drilled through the Capitan Reef and 8-5/8" Casing set at 5,600' MD. A production interval will be drilled with OBM as a 7-7/8" curve, and 7-7/8" lateral to TD at approximately 19,000 MD', ~10,400' VS. 5.5" production casing will be run to surface. Scheduled as 19 days to Rig Release.

Earthstone Operating, LLC

Statement of Estimated Well Cost

Well Name: Outland State 18-7 State Com 214H Project Descrip

Field Name: Wilson; Bone Spring
Location: Lea Co., NM

AFE #: 23 - XX - XXXX

Estimate is for the drilling of a 2.0 mile 2nd Bone Spring Sand lateral in Lea County, NM. 10-3/4" Surface casing will be set at 1,750' MD. The 1st Intermediate section will be 9-7/8" drilled through the Capitan Reef and 8-5/8" Casing set at 5,600' MD. A production interval will be drilled with OBM as a 7-7/8" curve, and 7-7/8" lateral to TD at approximately 20,000 MD', ~10,400' VS. 5.5" production casing will be run to surface. Scheduled as 20 days to Rig Release.

Earthstone Operating, LLC

Statement of Estimated Well Cost

Well Name: Outland State 18-7 State Com 223H

Field Name: Wilson; Bone Spring

Estimate is for the drilling of a 2.0 mile 2nd Bone Spring Sand lateral casing will be set at 1,750' MD. The 1st Intermediate section will be 9 and 8-5/8" Casing set at 5.600' MD. A production interval will be drill

AFE #: 23 - XX - XXXX

Estimate is for the drilling of a 2.0 mile 2nd Bone Spring Sand lateral in Lea County, NM. 10-3/4" Surface casing will be set at 1,750' MD.The 1st Intermediate section will be 9-7/8" drilled through the Capitan Reef and 8-5/8" Casing set at 5,600' MD. A production interval will be drilled with OBM as a 7-7/8" curve, and 7-7/8" lateral to TD at approximately 20,000 MD', ~10,400' VS. 5.5" production casing will be run to surface. Scheduled as 20 days to Rig Release.

Explained the competing apllication situation. Kaiser expressed they would like to remain nuetral and pickback up on JOA discussions given the uncertaintly of who would prevail as operator. 3/30/23: Landman reached out for an update to see if ESTE and MOC were able to work anything out. Since ESTE & MOC had not, I advised him of the May 4th hearing date in which our cases would be initally heard.

Received by OCD: 9/14/2023 4:24:55 PM

Magnum Hunter Production Inc 600 N. Marienfeld St., Suite 600 Midland, TX 79701	771722328073	3/31/2023	Monday 4/3/2023 at 10:57am				
Maverick Oil & Gas Corp C/O Kimbrough Engineering CO 1001 W Wall Street Midland, TX 79701	771429932951	771709914168	2/28/2023 3/30/2023	Wednesday 3/1/2023 at 10:54am Friday 3/31/2023 at 10:55am	call & email call	3/7/23 3/30/23	3/7/23: Had conversations with Ben about our development plans and competing applications with Mewbourne. He advised that he had not received Mewbourne's proposals. Maverick elected to participate on 3/7/23 in ESTE's proposed wells and discussed that parties would work on mutaual agreeded JOA to execute vs. going under order should ESTE prevail at hearing. 3/30/23: Provided a status update on the competing cases and advised of the May 4th hearing date.
Mewbourne Oil Company Attn: Land Department 500 West Texas, Suite 1020 Midland, TX 79701	771427779388	771709589305	2/28/2023 3/30/2023	Wednesday 3/1/2023 at 11:11am Friday 3/31/2023 at 10:22am	email & calls	12/8/22 - 5/9/2023	Multiple email and phone conversations were held from 12/8/22 to 5/9/23. ESTE attempted to work on a trade after receiving MOC's NWDU proposals but were unable to come to a mutual trade agreement. ESTE decided to compete for operatorship given lack of mutual beneficial trade and the history with our predecessor and the NWDU expansion. MOC stated they have a WI in the Bone Spring formation of section 18 multiple times via email exchanges in March however, could not provide requested conveyance docs or title supporting otherwise. It was later made a matter of record when MOC's attorney admitted they did not own a WI in section 18 as purported. ESTE did not find this as negotiating in good faith and proceeded with our competing applications. 5/9/23: MOC's landman reached out to see if a meeting could be setup between the parties to discuss how we could work through the parties issues. Meeting between ESTE & MOC's land teams were held on 5/11. Parties could not reach an agreement or alternative as MOC only desired for ESTE to participate in their proposed wells.

Penroc Oil Corporation	0.148241%
Javelina Partners	0.131770%
Zorro Partners	0.131770%
	100.000000%

Earthstone Operating, LLC Surface Development Operations Plans

- Active Surface Use Agreement dated June 12, 2017 between ESTE and Merchant Livestock.
- ESTE is considered to be in a good standing with the State of NM, BLM, and along with ranchers, and environmental stewardship.
- New Mexico SOPA compliance met and pad placement agreed upon for avoidance of residential setbacks
 - Staked March 27, 2023
- Operating arrangements have been made for Dovetail 18-7 State Com and Outland 18-7 State Com Development to be co-developed for cost and efficiency purposes.
- All three pad locations (Dovetail 18 7 and Outland 18-7) follow existing roads, pipelines, and neighboring operator's existing infrastructure. Earthstone's operations will be connected with existing and favorable infrastructure that will not need to be tied into a Unit or traverse lands that are located outside of the proposed spacing unit.

APPLICATION OF EARTHSTONE OPERATING, LLC, FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

> Case No. 23475 Case No. 23477

DIRECT TESTIMONY OF JASON J. ASMUS

I, Jason J. Asmus, being duly sworn on oath, state the following:

- 1. I am over the age of 18, and I have personal knowledge of the matters stated herein.
- 2. I am employed as a petroleum geologist for Earthstone Operating, LLC ("Earthstone"), and I am familiar with the subject applications and the geology involved.
- 3. I graduated in 2012 from Western Michigan University with a master's degree in Geology. I have worked at Earthstone Energy for approximately 1.5 years, and I have been working in New Mexico for 11 years. My Resume follows this testimony; my credentials as a petroleum geologist have been accepted by the New Mexico Oil Conservation Division ("Division") and made a matter of record.
- 4. This affidavit is submitted in connection with the filing by Earthstone of the above-referenced compulsory pooling application pursuant to 19.15.4.12.A(1) NMAC.
 - 5. **Exhibit B-1** is a location map of the pooled unit area.
- 6. **Exhibit B-2** and **Exhibit B-3** are structure maps of the 1st and 2nd Bone Spring Ss with contour interval of 25'. The unit being pooled is outlined in red, with proposed well locations

displayed as orange dashed lines. Furthermore, type cross-section wells displayed in Exhibit B-4 are highlighted by blue dots and connected by a blue line referenced as A-A'. The structure maps show that there is a regional down-dip to the W-NW. I do not observe any faulting, pinch-outs, or other geologic impediments to developing proposed target intervals within the 1st and 2nd Bone Spring Sandstone Formations.

- 7. **Exhibit B-4** is a structural cross-section from South to North. Each well in the cross-section contains a gamma ray and resistivity log. The cross-section demonstrates continuity of each target zone within the 1st and 2nd Bone Spring Sandstone Formations. The target landing zones, and average thickness of each, are outlined and annotated along the left edge of the cross-section. A red dashed arrow internal to each target landing zone identifies our intended lateral position within each proposed horizontal well, in addition to, the stratigraphic continuity of proposed target zones.
- 8. **Exhibit B-5** is a gun barrel representation of the unit development plan, approximate landing zones in reference to a type log for the area, and the associated spacing of proposed wellbores within the East half-section DSU.
- 9. From a geological and reservoir engineering perspective, as evidenced in the exhibits and as discussed below, Earthstone's development is superior to the competing development from Mewbourne Oil Company ("Mewbourne") in Case Nos. 23365 and 23366. Earthstone's development plan is superior to Mewbourne's because Earthstone's proposed staggered pattern in the 2nd Bone Spring helps mitigate the risk that is present in Mewbourne's development plan of hydrocarbon and pressure depletion for the existing wellbores in the adjacent North Wilson Deep Unit to the east. Earthstone's development plan is superior because

Earthstone's use of increased proppant intensity in its completion design provides greater oil estimated ultimate recovery ("EUR").

- 10. **Exhibit B-6** uses the same gun barrel representation as **Exhibit B-5** and provides cumulative oil production data through 9/1/2023 for the existing wellbores in the adjacent North Wilson Deep Unit to the east. The production data has been scaled to each wellbore's horizontal lateral length in feet. This scaling provides an equivalent measuring unit when comparing productivity between wellbores or different lateral lengths. Accounting for the total oil produced from the existing wellbores highlights the hydrocarbon and pressure depletion likely to be encountered when drilling a new wellbore offset to the west. The risk of depletion negatively impacts the productivity of the new wellbore. While any offset wellbore within 2,000ft to an existing producing wellbore is unlikely to fully avoid depletion, Earthstone's proposed staggered pattern in the 2nd Bone Spring helps mitigate the risk. Additionally, co-developing wellbores in the 1st Bone Spring also helps mitigate encountering depletion, should the 1st Bone Spring wells instead be drilled at a future date.
- 11. **Exhibit B-7** is a gun barrel representation of Mewbourne's proposed unit development plan. This depiction demonstrates the increased depletion risk from drilling an offset wellbore with closer spacing to an existing producing wellbore. The exhibit also highlights some variances in proposed hydraulic fracturing ("completion") design by each operator which can potentially affect well productivity and ultimate hydrocarbon recovery.
- 12. **Exhibit B-8** is a study performed by Earthstone's Reservoir Engineering team of well productivity and oil EUR for existing 2nd Bone Spring producing wells within an approximately 5-mile radius of the Outland 18-7 unit. This exhibit shows positive correlation trends between a well's EUR and increasing hydraulic fracturing intensity, which supports

Earthstone's use of increased proppant intensity in its completion design. The study also evaluates the impact on a well's EUR depending on how closely it is spaced to an existing producing well. This shows increasing spacing between wellbores leads to positive improvement in hydrocarbon recovery.

- 13. **Exhibits B-9 and B-10** provide two examples within an approximately 5-mile radius of the Outland 18-7 unit of similar development scenarios where new wellbores are drilled offset to existing producing wellbores and the resulting impact to the new wells' production. Each example shows an area map of the selected wellbores being analyzed. To the right of this map is a gun barrel representation of the wellbores which has a reference well in the center and the relative spacing to offset wells. Added details for each well include oil EUR, dates of first production, and abbreviated well names. The two charts at the bottom compare cumulative oil and gas production for each of the selected wells and are color-coded by well name. These more clearly show how increasing spacing to existing wells and applying a staggered pattern can mitigate depletion risk and lead to increased hydrocarbon recovery.
 - 14. Based on my geologic analysis of the area in discussion, I conclude the following:
 - a. The horizontal spacing and proration units are justified from a geologic standpoint.
 - b. There are no structural impediments or faulting that will interfere with horizontal development.
 - Each quarter-quarter section in the unit will contribute more or less equally to production.
- 15. The preferred well orientation in this area is North-South so that the wells run subperpendicular to the inferred orientation of the maximum horizontal stress. In addition, a N-S

development orientation has been established for this area as exhibited by most offset horizontal wells targeting the 1st and 2nd Bone Spring Sandstone Formations.

- 16. The Exhibits in this Affidavit were prepared by me or compiled from Earthstone's company business records under my direct supervision.
- 17. The granting of these Applications is in the interests of conservation, the prevention of waste and the drilling of unnecessary wells, and the protection of correlative rights.
 - 18. The foregoing is correct and complete to the best of my knowledge and belief.

Exhibit B-5 Gun Barrel Development Proposal

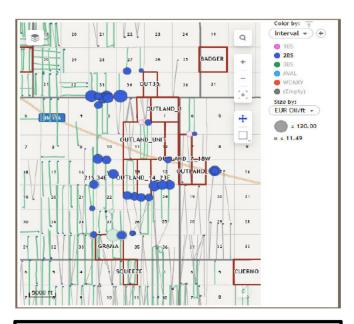

B-6 Reservoir Engineering - Earthstone Gun Barrel Development Proposal

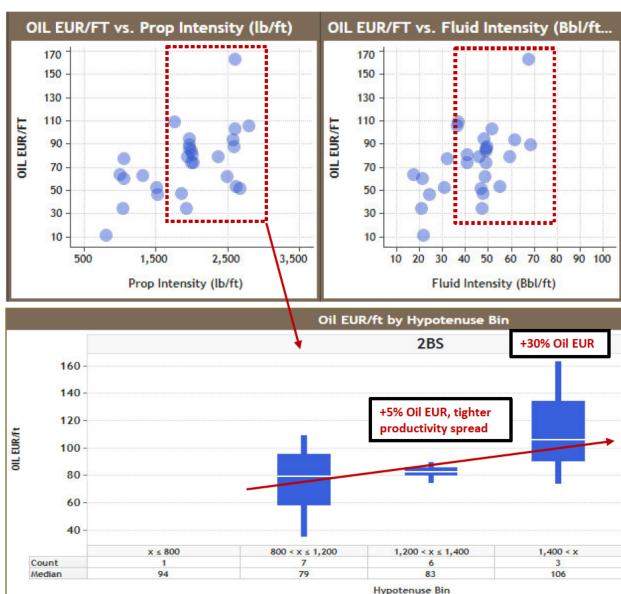

B-7 Reservoir Engineering - Mewbourne Gun Barrel Development Proposal

B-8 Reservoir Engineering - Offset 2nd Bone Spring Well Performance

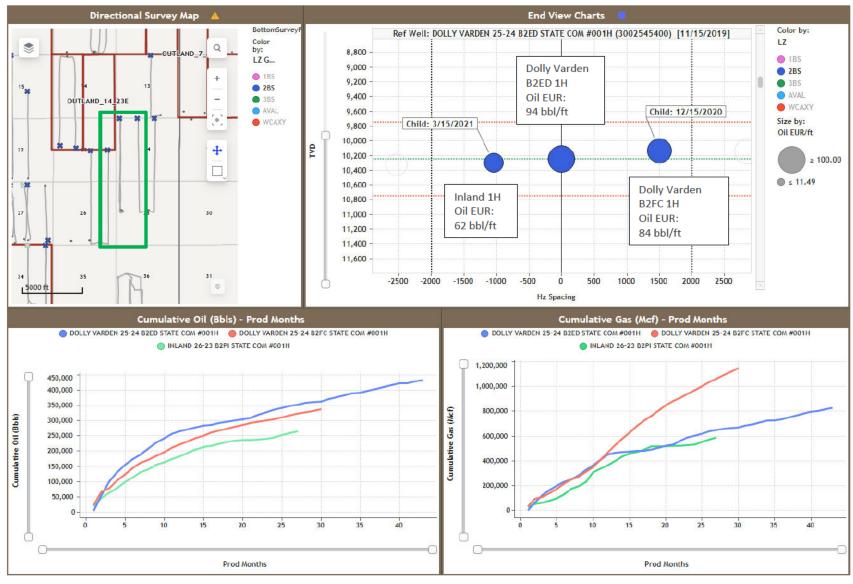

- Production, oil estimated ultimate recovery (EUR), and well spacing were evaluated for wells targeting 2nd Bone Spring and proximal to the Outland 18-7 unit
- Oil EUR was measured against several completion design parameters: proppant and fluid intensity
 - Generally, observe improved EUR with increasing stimulation
- Wells with completion intensities similar to ESTE and Mewbourne were then evaluated for oil EUR performance against hypotenuse spacing to nearest offset well
 - Wells spaced 1,200 1,700 ft show marked improvement over those spaced 800 – 1,200 ft

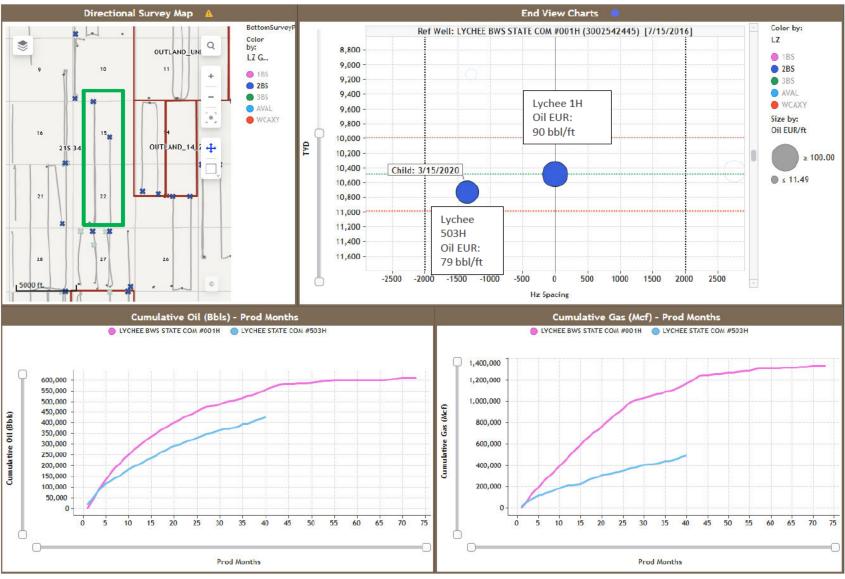

B-9 Reservoir Engineering - Spacing and Well Performance Example 1

- Dolly Varden B2ED 1H with two "child" offset wells to east and west, all with similar completions designs
- West child well at ~1,000 ft spacing with >30% reduction in EUR relative to parent
- Observed an ~10% oil EUR reduction in the east child well, compared to parent EUR Released to Imaging: 9/14/2023 4:35:47 PM

B-10 Reservoir Engineering - Spacing and Well Performance Example 2

- Lychee 1H with "child" offset well, Lychee 503H, to west at ~1,350 ft and vertical staggering of ~200 ft
- Child well oil EUR underperforming the parent well by ~13%
- Note the material variance in cumulative gas production in the lower right chart Released to Imaging: 9/14/2023 4:35:47 PM

APPLICATION OF EARTHSTONE OPERATING, LLC, FOR A HORIZONTAL SPACING UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO

> Case No. 23475 Case No. 23477

DIRECT TESTIMONY OF ENGINEER NICHOLAS GOREE

- I, Nicholas James Goree, being duly sworn on oath, state the following:
 - 1. I am over the age of 18, and I have personal knowledge of the matters stated herein.
- 2. I am a petroleum engineer employed by Earthstone Operating, LLC ("Earthstone"), and I am familiar with the subject applications of Earthstone and Mewbourne Oil Company ("Mewbourne") and the lands involved.
- 3. I am employed as a petroleum engineer with the title of Vice President of Drilling for Earthstone Operating, LLC ("Earthstone"), and I am familiar with the subject application and the geology involved.
- 4. I have worked at Earthstone for approximately 6 years; I have been working in New Mexico for 2 years. I have not testified previously before the New Mexico Oil Conservation Division ("Division") but ask that my credentials be accepted of record for the purpose of being qualified and recognized as an expert witness in petroleum land matters. My resume is attached for the Division's review and consideration. My education and work experience are as follows:

- a. I obtained a Bachelor's degree in Petroleum Engineering from the University of Oklahoma in 2010;
- b. I obtained a Master in Energy Business from Tulsa University in 2015;
- c. I have been working in the oil and gas industry since 2010 in various engineering capacities, including Drilling, Completions and Production Operations.
- 5. From an engineering perspective, Earthstone's development plan is superior to the competing proposal of Mewbourne for the following reasons:
 - a. As set froth in **Exhibit C-1**, Earthstone has a long history as an operator and entered the New Mexico Delaware basin in 2022 with its acquisition of Chisholm Energy Operating, LLC ("Chisholm"). With the acquisition of Chisholm, Earthstone acquired and became operator of 78 previously drilled wells. Subsequently in 2022, Earthstone acquired Titus NM Delaware and 51 previously drilled wells. Earthstone has drilled 74 wells in New Mexico. Earthstone thus operates 203 wells in the Delaware Basin, 74 of which it has drilled. Additionally, Earthstone operates 136 wells in the Midland Basin.
 - b. As **Exhibit C-2** shows, Earthstone recently successfully drilled 3 Outland State wells. So Earthstone is very familiar with drilling the acreage at issue in these applications, and can drill the proposed wells economically and efficiently. Earthstone owns and operates 3 producing horizontal wells in a section adjacent to the proposed Outland Horizontal Spacing Unit being contested. The landing zones and inter-well lateral spacing of the wells have been designed to both maximize the recovery of oil and gas from the proposed HSU and to

simultaneously minimize any negative impact on horizontal wells in adjacent HSUs.

- c. The proposed pad location minimizes additional potential surface disturbance, because Earthstone will be using existing infrastructure already in place and will be co-developing with Earthstone's Dove Tail 18-7 State Com development directly offsetting the proposed Outland 18-7 State Com wells.
- d. Operationally, examining AFE costs in comparison to that of Mewbourne's proposed NWDU 8H versus Earthstone's 18-7 214H AFE, Earthstone's overall proposal is \$461,540 or 4.2% cheaper than that of Mewbourne's. See Exhibits C-3 & C-4. Breaking cost differentials down specifically into drilling and completion/facilities shows that the largest differential is in drilling costs. See **Exhibit C-3**. An estimated \$388,300 is saved in Earthstone's AFE in comparison to Mewbourne. The majority of this cost savings is saved by the estimated drilling time saved, which favors Earthstone by 9 days. Also, during comparison of the AFEs, it was found Mewbourne is missing costs for closed loop drilling. This suggests that Mewbourne will be constructing a pit, which will cause additional surface disturbance and potential environmental damage. If Mewbourne's plan is to use closed loop drilling, then this oversight could drive cost differentials above \$500,000 between Mewbourne and Earthstone just on drilling operations. Evaluating completions and facilities costs, there is little difference in the intangible costs side. See Exhibit C-4. Even though costs are comparable, Earthstone's development plan plans to pump 28% more sand compared with Mewbourne, which should allow for greater fracture complexity

and greater future production. Evaluating Tangible costs, Earthstone is \$155,700 or 9.9% below Mewbourne's proposed costs. And even while Earthstone's development plan is cheaper, it's more efficient, because Earthstone's production includes the running of an Electrical Submersible Pump (ESP), which will allow for greater fluid production rates than Mewbourne's proposed artificial lift.

- 6. The Exhibits attached to this narrative testimony were prepared by me or compiled from Earthstone's company business records under my direct supervision.
- 7. The granting of this Application by Earthstone over Mewbourne's application is in the interests of conservation, the prevention of waste and the drilling of unnecessary wells, and the protection of correlative rights.
 - 8. The foregoing is correct and complete to the best of my knowledge and belief.

AFFIRMATION OF NOTICE

STATE OF NEW MEXICO)	
)	SS.
COUNTY OF BERNALILLO)	

- I, Matthew M. Beck, counsel for and authorized representative of Earthstone Operating, LLC, ("Earthstone"), the Applicant herein, being first duly sworn, upon oath, states the following:
- 1. Notice of the applications and hearing in the above-reference cases was timely sent by certified mail, return receipt requested, through the United States Postal Service on April 13, 2023, to all uncommitted interest owners sought to be pooled in this proceeding. Copies of notice letters and evidence of mailing to parties are attached hereto as Exhibits C-1 and C-2.
- 2. Notice was sent to the Hobbs News Sun, a newspaper of general circulation in Lea County, New Mexico, and timely published in said newspaper on April 18, 2023. See Exhibit C-3.
- 3. During Earthstone's additional review of the title, however, Earthstone discovered one additional ORRI owner, TWR IV, LLC ("TWR") who was not accounted for in the initial letter notices and publication notice. Earthstone, therefore, sent an additional letter notice to TWR

on April 28, 2023, and did a revised publication notice with the addition of TWR that was published on May 3, 2023. *See* attached as Exhibit C-4, and Exhibit C-2 at 1.

4. It is my understanding that Earthstone has made a reasonably diligent effort to find the names and addresses for the interest owners entitled to receive notice of the application and case herein.

I understand that this Affirmation will be used as written testimony before the Division in Case Nos. 23475 and 23477 and affirm that my testimony herein is true and made under penalty of perjury under the laws of the State of New Mexico.

Outland 18-7 State Com 114H Well (Case No. 23475)
Outland 18-7 State Com 214H Well (Case No. 23475)

Case Nos. 23475:

Dear Interest Owners:

This letter is to advise you that Earthstone Operating, LLC ("Earthstone"), has filed the enclosed application, Case No. 23475, with the New Mexico Oil Conservation Division ("Division") for the compulsory pooling of units in the Bone Spring formation.

In Case No. 23475, Earthstone seeks to pool the Bone Spring formation underlying the E/2 E/2 of Sections 7 and 18, all in Township 21 South, Range 35 East, NMPM, Lea County, New Mexico, a standard unit encompassing 320 acres, more or less, dedicated to the above-referenced 114H and 214H Wells.

A hearing has been requested before a Division Examiner on May 4, 2023, and the status of the hearing can be monitored through the Division's website. Division hearings will commence at 8:15 a.m., traditionally in Porter Hall at the Oil Conservation Division's Santa Fe Offices located at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505. However, under current Division policies, the hearing will be conducted remotely online. For information about remote access and status of the case, you can visit the Division's website at: https://www.emnrd.nm.gov/ocd/hearing-info/ or call (505) 476-3441.

abadieschill.com

214 McKenzie Street, Santa Fe, New Mexico, 87501

O: 970.385.4401 • F: 970.385.4901

You are being notified as an interest owner (subject to title examination) and are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Prehearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. mountain time on the Thursday preceding the scheduled hearing date. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: The names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact Amanda Redfearn at (281) 771-3048 or at amanda@earthstoneenergy.com.

Sincerely,

Darin C. Savage

Outland 18-7 State Com 113H Well (Case No. 23477) Outland 18-7 State Com 223H Well (Case No. 23477)

Case Nos. 23477:

Dear Interest Owners:

This letter is to advise you that Earthstone Operating, LLC ("Earthstone"), has filed the enclosed application, Case No. 23477, with the New Mexico Oil Conservation Division ("Division") for the compulsory pooling of units in the Bone Spring formation.

In Case No. 23477, Earthstone seeks to pool the Bone Spring formation underlying the W/2 E/2 of Sections 7 and 18, all in Township 21 South, Range 35 East, NMPM, Lea County, New Mexico, a standard unit encompassing 320 acres, more or less, dedicated to the above-referenced 113H and 223H Wells.

A hearing has been requested before a Division Examiner on May 4, 2023, and the status of the hearing can be monitored through the Division's website. Division hearings will commence at 8:15 a.m., traditionally in Porter Hall at the Oil Conservation Division's Santa Fe Offices located at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505. However, under current Division policies, the hearing will be conducted remotely online. For information about remote access and status of the case, you can visit the Division's website at: https://www.emnrd.nm.gov/ocd/hearing-info/ or call (505) 476-3441.

abadieschill.com

214 McKenzie Street, Santa Fe, New Mexico, 87501

O: 970.385.4401 • F: 970.385.4901

You are being notified as an interest owner (subject to title examination) and are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Prehearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. mountain time on the Thursday preceding the scheduled hearing date. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: The names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact Amanda Redfearn at (281) 771-3048 or at amanda@earthstoneenergy.com.

Sincerely,

Darin C. Savage

Attorney for Earthstone Operating, LLC

LEGAL NOTICE April 18, 2023

CASE No. 23477; Notice — to all parties and persons having any right, title, interest or claim in this case, including owners of working interest, overriding royalty interest, and record title, among others, whether such parties or persons are listed herein or not, as well as notice to all known and unknown heirs, devisees, assigns and successors of such affected parties and persons, which based on reasonable diligence include ZORRO PARTNERS; ALPHA ENERGY PARTNERS, LLC; CHEVRON U.S.A., INC.; CIMAREX ENERGY COMPANY; MAGNUM HUNTER PRODUCTION, INC.; CIMAREX ENERGY PRODUCTION CO. LC COMPANY; MEWBOURNE OIL COMPANY; MRC PERMIAN COMPANY; NORTHERN OIL AND GAS, INC.; PENROC OIL CORPORATION; SBI WEST TEXAS I LLC; OVY USA WTP. DEVON ENERGY PRODUCTION CO. LP; MAVERICK OIL & GAS CORP.; TIMOTHY R. MACDONALD; BELINDA GARNER, INDIVIDUALLY AND AS PERSONAL REPRESENTATIVE OF THE ESTATE OF JAMES H. GARNER, JR., DECEASED; SCHUYLER MARKS PAULSON; MONICA MARKS GERSH; CYNTHIA MAE. WILSON, TRUSTEE OF THE BYPASS TRUST CREATED BY THE WILL OF SCOTT EVANS WILSON DATED 7/17/2012; BEVERLY JEAN RENFRO BARR, TRUSTEE OF THE FAMILY TRUST CREATED BY WILL OF RICHARD KEVIN BARR; WILSON OIL COMPANY, LTD.; NEARBURG PRODUCING COMPANY EMPLOYEE FUND, CURTIS W. MEWBOURNE, TRUSTEE; APACHE CORPORATION, ASCENT ENERGY, LLC; FORTY ACRES ENERGY LLC; TLW INVESTMENTS INC; H&L EXPLORATION & PRODUCTION CO; JOE R. WRIGHT; MCCOMBS ENERGY, LTD; JAMES D. FINLEY; FINLEY RESOURCES; PETRO-QUEST EXPLORATION; SAMSON RESOURCES COMPANY; LEACO NEW MEXICO EXPL. & PROD.; EOG RESOURCES CRESCENT PORTER HALE FOUNDATION; ZPZ DELAWARE OIL COMPANY; HNG OIL COMPANY; and CAMPBELL INVESTMENT COMPANY; of EARTHSTONE OPERATING, LLC's application for approval of a spacing unit and compulsory pooling, Lea County, New Mexico, 37505. However, under current Division policies 2023, traditionally held at 1220 S. St. Francis, Santa Fe, New Mexico, 87505. However, under current Division policies, the hearing will be conducted remotely online. For information about remote access and the status of the case, you can visit the Division's website at: https://www.emprd.nm.gov/ocd/hearing-info/ or call (505) 476-3441. Earthstone Operating LLC, at 1400 Woodloch Forest Dr., Suite 300. The Woodlands, TX 77380, seeks an order from the Division: (1) establishing a standard 320.00-acre, more or less, spacing and proration unit comprised of the W/2 E/2 of Sections 7 and 18, all in Township 21 South, Range 35 East, NMPM, Lea County, New Mexico, and (2) pooling all mineral interests in the Bone Spring formation, designated as an oil pool, underlying the unit. Sections 7 and 18 are irregular with correction lots but there are no such lots in the proposed unit. The proposed wells to be dedicated to the horizontal spacing unit are the Outland 18-7 State Com 113H Well and the Outland 18-7 State Com 223H Well, both oil wells, to be horizontally drilled from a surface location in the SW/4 SE/4 (Unit O) of Section 18 to a bottom hole location in the NW/4 NE/4 (Unit B) of Section 7. The proposed unit is a straddle unit that includes lands in the W/2 E/2 of Section 7 that are within the North Wilson Deep Unit, a state exploratory unit. Applicant will seek approval for this overlap. The wells will be orthodox, and the take points and completed intervals will comply with the setback requirements under statewide Rules; also to be considered will be the cost of drilling and completing the wells and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the wells and unit; and a 200% charge for the risk involved in drilling and completing the wells. The wells and lands are located approximately 15 miles northwest of Eunice, New Mexico.

Outland 18-7 State Com 114H Well (Case No. 23475) Outland 18-7 State Com 214H Well (Case No. 23475)

Case Nos. 23475:

Dear Interest Owners:

This letter is to advise you that Earthstone Operating, LLC ("Earthstone"), has filed the enclosed application, Case No. 23475, with the New Mexico Oil Conservation Division ("Division") for the compulsory pooling of units in the Bone Spring formation.

In Case No. 23475, Earthstone seeks to pool the Bone Spring formation underlying the E/2 E/2 of Sections 7 and 18, all in Township 21 South, Range 35 East, NMPM, Lea County, New Mexico, a standard unit encompassing 320 acres, more or less, dedicated to the above-referenced 114H and 214H Wells.

A hearing has been requested before a Division Examiner on May 4, 2023, and the status of the hearing can be monitored through the Division's website. Division hearings will commence at 8:15 a.m., traditionally in Porter Hall at the Oil Conservation Division's Santa Fe Offices located at 1220 South Saint Francis Drive, Santa Fe, New Mexico 87505. However, under current Division policies, the hearing will be conducted remotely online. For information about remote access and status of the case, you can visit the Division's website at: https://www.emnrd.nm.gov/ocd/hearing-info/ or call (505) 476-3441.

O: 970.385.4401 • F: 970.385.4901

You are being notified as an interest owner (subject to title examination) and are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date.

Parties appearing in cases are required by Division Rule 19.15.4.13.B NMAC to file a Prehearing Statement at least four business days in advance of a scheduled hearing, but in no event later than 5 p.m. mountain time on the Thursday preceding the scheduled hearing date. This statement must be filed at the Division's Santa Fe office at the above specified address and should include: The names of the parties and their attorneys; a concise statement of the case; the names of all witnesses the party will call to testify at the hearing; the approximate time the party will need to present its case; and identification of any procedural matters that are to be resolved prior to the hearing.

If you have any questions about this matter, please contact Amanda Redfearn at (281) 771-3048 or at amanda@earthstoneenergy.com.

Sincerely,

Darin C. Savage
