Case No. 24190

SELF-AFFIRMED STATEMENT OF CARSON CULLEN

Carson Cullen deposes and states:

1. I am a landman for Mewbourne Oil Company (“Mewbourne”), and have personal knowledge of the matters stated herein. I have been qualified by the Division as an expert petroleum landman.
2. The purpose of this application is to force pool working interest and unleased mineral owners into the Bone Spring horizontal spacing unit described below.
3. The interest owners being pooled have been contacted regarding the proposed wells but have simply refused to voluntarily commit their interests to the wells. Some interest owners are or may be unlocatable.
4. In this case Mewbourne seeks an order pooling all uncommitted mineral interest owners in the Bone Spring formation underlying a horizontal spacing unit comprised of the N/2S/2 of Section 9 and the N/2S/2 Section 8, Township 22 South, Range 27 East, NMPM. Applicant proposes to drill the Sandlot 9/8 Fee Well No. 525H, with a first take point in the NE/4SE/4 of Section 9 and a last take point in the NW/4SW/4 of Section 8.
5. There are no depth severances in the Bone Spring formation.
6. Land plats and information on the parties being pooled and their interests are set forth in Exhibit 2-A. To find the addresses for the parties we examined county and government records, and also conducted internet searches including google and drillinginfo.
7. Exhibit 2-B contains a sample copy of the proposal letters sent to the interest owners, together with an AFE for the well. The costs in the AFE are fair and reasonable for a well in this area of Eddy County.
8. Mewbourne has made a good faith effort to locate or obtain the voluntary joinder of the working interest and mineral owners in the proposed wells.
9. Mewbourne requests overhead and administrative rates of \$8000/month for a drilling well and \$800/month for a producing well. These rates are fair, and comparable to the rates charged by other operators for wells of this type in this portion of Eddy County. They are

EXHIBIT

2

also the rates set forth in the Joint Operating Agreement for the well unit. Mewbourne requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

10. Mewbourne requests that the maximum cost plus 200% risk charge be assessed against non-consenting working interest owners.

11. Applicant requests that it be designated operator of the well.

12. The attachments to this affidavit were prepared by me or under my supervision, or compiled from company business records.

13. The granting of this application is in the interests of conservation and the prevention of waste.

I understand that this Self-Affirmed Statement will be used as written testimony in these cases. I affirm that my testimony in paragraphs 1 through 13 above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date handwritten next to my signature below.

SELF-AFFIRMED STATEMENT OF TYLER HILL

Tyler Hill deposes and states:

1. I am over the age of 18, and have personal knowledge of the matters stated herein.
2. I am a geologist for Mewbourne Oil Company ("Mewbourne"), and I am familiar with the geological matters involved in these cases. I have been qualified by the Division as an expert petroleum geologist.
3. The following plats are attached hereto:
 - (a) Exhibit 3-A is an area locator plat.
 - (b) Exhibit 3-B is a structure map on the top of the Second Bone Spring Sand. It shows that structure dips gently to the east-northeast. It also shows proposed Second Bone Spring wells in the area, and that the wellbores are perpendicular to strike. It also shows a line of cross-section.
 - (c) Exhibit 3-C is a west-east cross section of the Bone Spring. The logs on the cross-section give a representative sample of the Second Bone Spring Sand in this area. The sand is continuous and uniformly thick across the well units.
4. I conclude from the maps that:
 - (a) The horizontal spacing units are justified from a geologic standpoint.
 - (b) The target zones are continuous and of uniform thickness across the well units.
 - (c) Each quarter section in the well units will contribute more or less equally to production.
 - (d) There is no faulting or other geologic impediment in the area which will affect the drilling of the subject wells.
5. Other Bone Spring wells drilled in this area show a preference for laydown wells.

EXHIBIT 3

6. Exhibit 3-D contains copies of the horizontal drilling plans for the subject wells. The well locations are orthodox.

I understand that this Self-Affirmed Statement will be used as written testimony in these cases. I affirm that my testimony in paragraphs 1 through 6 above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date written next to my signature below.
