Case No. 24049

VERIFIED STATEMENT OF CARSON CULLEN

Carson Cullen deposes and states:

1. I am a landman for Mewbourne Oil Company ("Mewbourne"), and have personal knowledge of the matters stated herein. I have been qualified by the Division as an expert petroleum landman.

2. The purpose of this application is to force pool working interest and mineral owners into the Bone Spring horizontal spacing unit described below.

3. The interest owners being pooled have been contacted regarding the proposed wells but have simply refused to voluntarily commit their interests to the wells. Some interest owners are or may be unlocatable.

4. In this case Mewbourne seeks an order pooling all uncommitted mineral interests in the Bone Spring formation underlying a 160-acre horizontal spacing unit comprised of the S/2S/2 of Section 11, Township 24 South, Range 28 East, NMPM. The unit is dedicated to the Journey 11 B2MP Fee Well No. 1H, with a first take point in the SW/4SW/4 and a last take point in the SE/4SE/4 of Section 11. Applicant also requests approval for the above well to overlap the Journey 11/12 B1MP Fee Well No. 1H, located in the S/2S/2 of Section 11 and the S/2S/2 of Section 12, Township 24 South, Range 28 East, N.M.P.M. That well is operated by applicant.

5. A Form C-102 for the well is submitted as Exhibit 2-A.

There are no depth severances in the Bone Spring formation.

6. Land plats and information on the parties being pooled and their interests are set forth in Exhibit 2-B. To find the addresses for the parties we examined county and government records, and also conducted internet searches including google and drillinginfo.

SELF-AFFIRMED STATEMENT OF TYLER HILL

Tyler Hill deposes and states:

1. I am over the age of 18, and have personal knowledge of the matters stated herein.
2. I am a geologist for Mewbourne Oil Company ("Mewbourne"), and I am familiar with the geological matters involved in this case. I have been qualified by the Division as an expert petroleum geologist.
3. The following geological plats are attached hereto:
 - (a) Exhibit 3-A is a structure map on the top of the Second Bone Spring Sand. It shows that structure dips gently to the east. It also shows Second Bone Spring wells in the area, and that the wellbores are perpendicular to strike. It also shows a line of cross-section.
 - (b) Exhibit 3-B is an isopach of the Second Bone Spring Sand. It shows that the sand has a gross thickness of about 350 feet.
 - (c) Exhibit 3-C is a west-east cross section of the Bone Spring. The logs on the cross-section give a representative sample of the Second Bone Spring Sand in this area. The sand is continuous and uniformly thick across the well units.
4. I conclude from the maps that:
 - (a) The horizontal spacing units are justified from a geologic standpoint.
 - (b) The target zones are continuous and of uniform thickness across the well units.
 - (c) Each quarter section in the well units will contribute more or less equally to production.
 - (d) There is no faulting or other geologic impediment in the area which will affect the drilling of the subject wells.

EXHIBIT

3

5. Exhibit 3-D contains information on other Bone Spring wells drilled in this area. There is a preference for laydown wells.

6. Exhibit 3-E contains copies of the horizontal drilling plans for the subject wells. The well locations are orthodox.

7. The overlapping well units cause no problems for the wells. There is sufficient vertical distance between the wells, and a barrier between First and Second Bone Spring zone, to prevent interference.

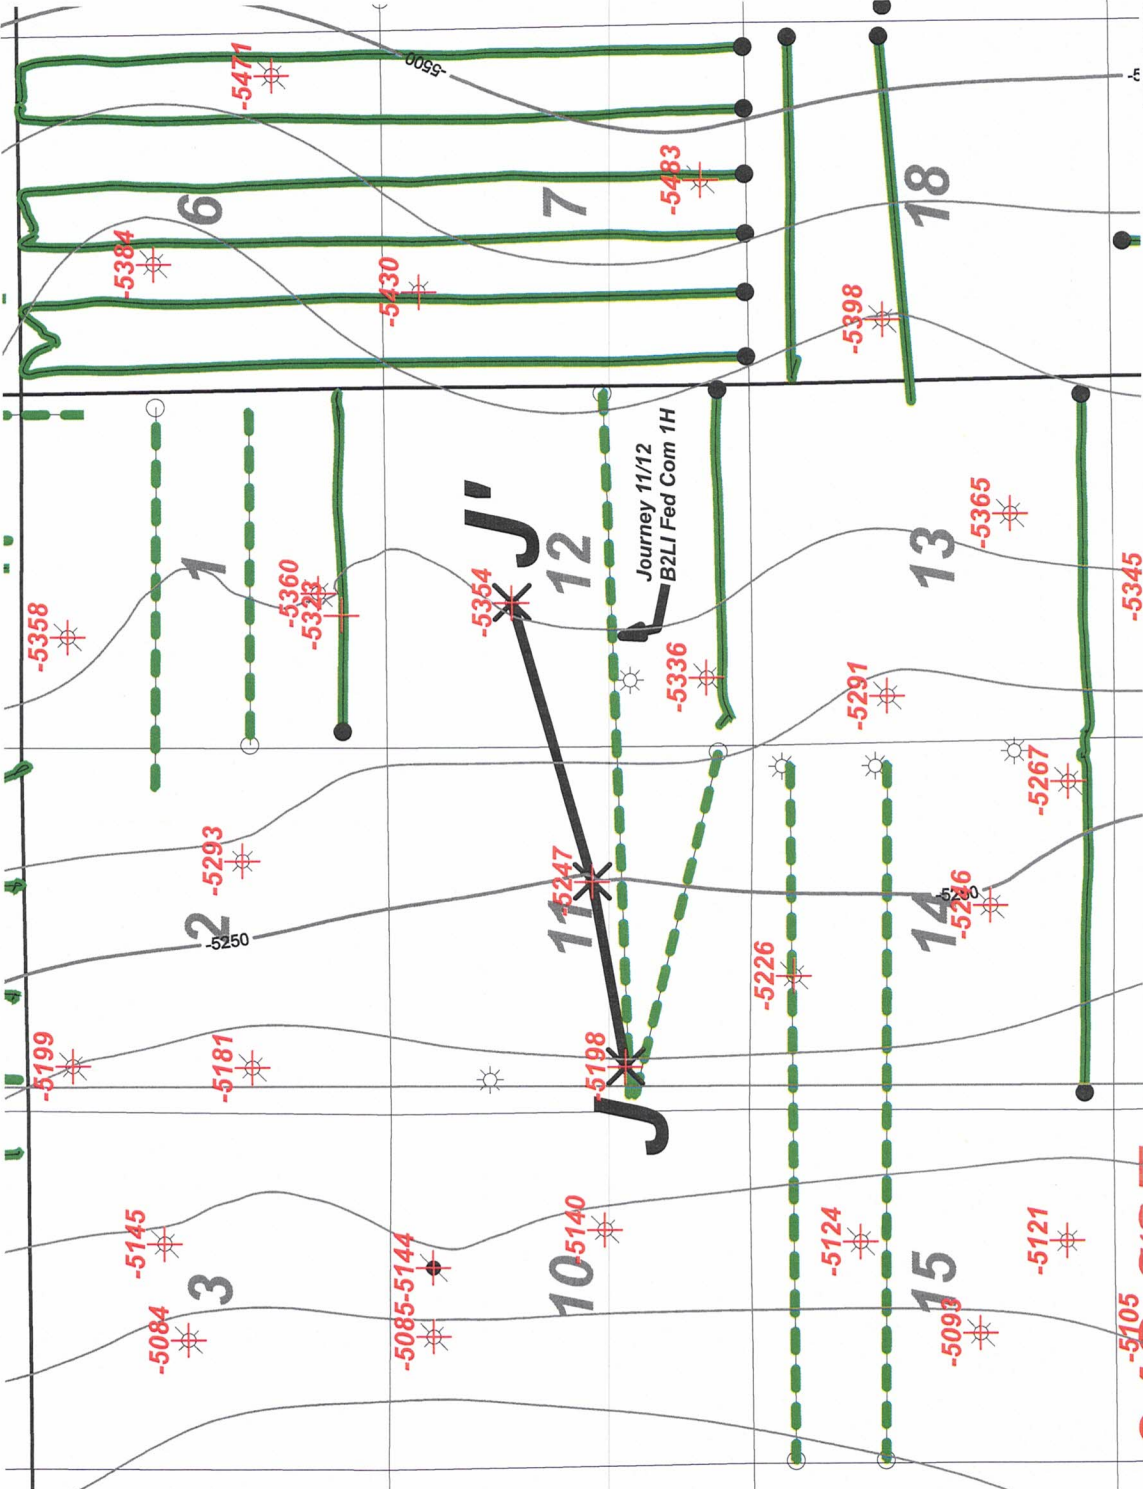

I understand that this Self-Affirmed Statement will be used as written testimony in these cases. I affirm that my testimony in paragraphs 1 through 7 above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date written next to my signature below.
