APPLICANT'S STATEMENT OF THE CASE

In Case No. 24283, Devon seeks an order pooling all uncommitted mineral interests in the

Wolfcamp formation, designated as an oil pool, underlying a non-standard 1,920-acre, more or

less, spacing and proration unit comprised of Lots 9 through 16 and the S/2 (aka Units I through P) of Sections 1, 2 and 3, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico. Sections 1, 2, and 3 are irregular sections containing correction lots.

Devon had previously pooled and orders were issued for two units which together cover the same 1,920-acre area as the HSU proposed herein. Those two units consist of (1) Lots 9 through 16 of Sections 1, 2 and 3, containing the Burton Flat 3-1 Fed State Com 623H Well (as established in Case No. 23911, Order No. R-23022); and (2) the S/2 of Sections 1, 2 and 3, containing the Burton Flat 3-1 Fed State Com 624H, 626H, and 826H Wells (as established in Case No. 23910, Order No. R-23021). In this Application, the non-standard spacing unit is proposed as part of a process to reconfigure the two existing units into the larger non-standard unit, a process which also involves Devon having filed with the Division an application for administrative approval of the proposed non-standard unit.

Devon proposes and dedicates to the HSU the **Burton Flat 3-1 Fed State Com 623H Well**, the **Burton Flat 3-1 Fed State Com 624H Well**, the **Burton Flat 3-1 Fed State Com 626H Well**, and the **Burton Flat 3-1 Fed State Com 826H Well**, as the initial wells, to be drilled to a sufficient depth to test the Wolfcamp formation.

The proposed wells will be orthodox in location, and their take points and completed intervals will comply with setback requirements under statewide rules.
