CASE NOS. 24327-24334<sup>1</sup>

STATE OF COLORADO )  
 ) ss.  
COUNTY OF DENVER )

Don Johnson, being duly sworn, deposes and states:

**BACKGROUND**

1. I am a Landman with Franklin Mountain Energy 3, LLC (“FME3”), over the age of 18, and have personal knowledge of the matters stated herein.

2. I have testified before the New Mexico Oil Conservation Division (the “Division”) and my credentials were accepted as a matter of record.

3. My work for FME3 includes the Delaware Basin and Lea County. I am involved in title, ownership, and leasing.

4. I am familiar with the applications FME3 filed in Case Nos. 24348, 24350-24355, and 24362. I am also familiar with the applications filed by MRC Permian (“MRC”) in Case Numbers 24327-24334. I am familiar with the land matters involved in these cases.

<sup>1</sup> MRC Permian Company (“MRC”) has now withdrawn its objection to FME3’s Parallel State Com cases and FME3 is presenting these cases as uncontested affidavit cases. MRC has not yet dismissed its competing cases in Case Nos. 24327-24334 and so FME3 is filing its exhibits in the MRC cases for completeness.

5. My testimony and exhibits addresses the information common to all cases and then addresses case specific information on a case-by-case basis.

**TESTIMONY AND EXHIBITS APPLICABLE TO ALL CASES**

6. FME3's cases involve applications for a 1295.88-acre development comprised of Bone Spring and Wolfcamp horizontal spacing units underlying Section 35, Township 18 South, Range 34 East, and Section 2, Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. FME3 has proposed a total of sixteen wells, known as its Parallel State Com wells.

7. In these cases, FME3 is seeking orders from the Division for compulsory pooling of interest owners who have refused to voluntarily pool their interests for the proposed Bone Spring and Wolfcamp horizontal spacing units described below, and in the wells to be drilled in the horizontal spacing units. FME3 also is requesting that it be designated operator of the wells. FME3 requests, to the extent necessary, approval of overlapping spacing units.

8. There are several reasons, from a land perspective, that FME3 should be designated operator of this acreage. First, as I will discuss in more detail, FME3 has the highest working interest in the proposed units and has the highest working interest control in the proposed units. Second, FME3's development plan will reduce surface facilities and surface impacts because FME3 will consolidate facilities with the Gold unit, which partially overlaps the Parallel units, in Section 35. Third, FME3 is a prudent operator, with the ability to develop the surface and is planning on developing this acreage in the near term. FME3 has extensive experience in developing this area and in investing in the infrastructure required for water management and gas takeaway necessary to support the development.

9. **Exhibit B-1** is a map showing the general location and the spacing units at issue.

10. **Exhibits B-2 and B-3** provide an overview of working interest within the Parallel Development Area.

11. With respect to the Wolfcamp units, as shown on **Exhibit B-2**, FME3 has:

- 84.3026% working interest in the W/2 W/2 Wolfcamp Unit (Case No. 24353);
- 79.0630% working interest in the E/2 W/2 Wolfcamp Unit (Case No. 24352);
- 37.0462% working interest in the W/2 E/2 Wolfcamp Unit (Case No. 24362);
- 49.4117% working interest in the E/2 E/2 Wolfcamp Unit (Case No. 24348).

12. FME3 has an interest across every tract in Sections 35 and 2 in conjunction with elections to participate, which is demonstrated on Exhibit B-2.

13. With respect to the Bone Spring units, as shown on **Exhibit B-3**, FME3 has:

- 84.3026% working interest in the W/2 W/2 Bone Spring Unit (Case No. 24354);
- 79.0630% working interest in the E/2 W/2 Bone Spring Unit (Case No. 24355);
- 37.0462% working interest in the W/2 E/2 Bone Spring Unit (Case No. 24350);
- 49.4117% working interest in the E/2 E/2 Bone Spring Unit (Case No. 24351)

14. FME3 has an interest across every tract in Sections 35 and 2 in conjunction with elections to participate, which is demonstrated on Exhibit B-3.

15. I will now discuss FME3's ability to prudently operate the property and, thereby, prevent waste and FME3's ability to timely locate well sites and to operate on the surface.

16. **Exhibit B-4** provides an overview of ownership by acreage. Together, the Gold and Parallel Units cover approximately 1,730.36 acres. As the exhibit reflects, FME3 and MRC are in trade discussions. Assuming those discussions are concluded, of the 1,730.36 acre, FME3 will own approximately 1225.79 acres (56%).

17. Attached as **Exhibit B-5** is a map demonstrating that the Parallel Units are part of FME3's comprehensive development plan for the area. The Parallel Development Area, which is the subject of these cases, is outlined in red. As this exhibit shows, FME3's Parallel wells in these cases are part of a comprehensive, holistic development in this area, which is efficient, thoughtful

and reduces overall footprint, and reduces surface disturbance, while increasing efficiencies and decreasing costs. FME3 has orders for the W/2W/2 Gold wells and has drilled those wells. FME3 has approved orders for the Satellite Wolfcamp Units, and approved orders for the Cross Units. FME3 currently has 2 rigs active in the Satellite Unit.

18. **Exhibit B-6** shows the area of overlap between the Gold units and the Parallel units, in the N/2N/2 of Section 35. FME3's overlapping development plans are intentionally designed to maximize the efficient production of hydrocarbons, prevent waste, and protect correlative rights. The plan will allow oil and gas reserves located in the N/2N/2 of Section 35 to be developed, which would otherwise be unrecoverable due to drilling constraints and set-back requirements. Additionally, co-developing the Gold and Parallel units will allow for consolidated well pads, facilities, and infrastructure, significantly minimizing surface disturbances and impacts to rangeland and habitat. FME3 has analyzed this concept internally, from both the drilling engineer perspective, reservoir engineer perspective, and economic perspective, and FME3's team has concluded that this layout will not result in waste or negatively impact correlative rights.

19. This exhibit also outlines the benefits of the overlapping drill pads and facilities approach, because it allows FME3 to integrate full development, which will reduce surface disturbance. Under FME3's development plan, the Parallel development will share drill pads with the Gold development. Under FME3's development plan, FME3 will be able to have a single CTB, which means less overall equipment and a reduction in overall surface footprint.

20. **Exhibit B-7** demonstrates that FME3's Gold/Parallel co-development plan will allow FME3 to decommission and reclaim one tank battery and consolidate production into a newer CTB and it will allow FME3 to have a single CTB, which has the benefit of creating a single point for third-party takeaway infrastructure.

21. FME3 understands the take-away constraints in this area and is taking steps to proactively address them.

22. **Exhibit B-8** provides an overview of the operational and logistical constraints in this area, as well as an overview of FME3's plans to address those constraints. **Exhibits B-9 to 11** provide greater detail on the constraints and FME3's proactive approach to resolve them.

23. **Exhibit B-9** discusses water takeaway constraints and steps FME3 is taking to address those constraints, including investing \$17.2 million of capital. FME3 is investing to expand the pipeline system to increase capacity, including 20 miles of pipeline infrastructure. FME3 is targeting in service Q2/Q3 2024.

24. **Exhibit B-10** discusses gas takeaway constraints and FME3's approach to address them. FME3 is investing \$19.8 million to address the gas takeaway constraints. FME3 is investing in gathering to gather gas to a single point, which has several benefits. It increases the appeal for third-party midstream operators and allows multiple third parties to connect, increasing flow assurance to prevent waste. FME3 is proposing to construct approximately 16 miles of pipeline infrastructure. FME3 already has or is securing the rights-of-way in place for those pipelines. Target in service is Q2/Q3 2024. FME3 also signed an acreage dedication with Northwind to facilitate Northwind's buildout to reach FME3's operated acreage.

25. **Exhibit B-11** demonstrates FME3's reliable oil pipeline solution. FME3 signed an acreage dedication with Plains to ensure oil pipeline takeaway would be in place day one for FME3's new development projects, including Parallel.

26. **Exhibit B-12** outlines FME3's recent activity in this area. FME3 has been active in the area and is committed to developing its acreage in this area. FME3 has turned on production 18 wells between October 2023 and June 2024.

27. FME3 has been diligently working to develop this area. **Exhibit B-13** identifies the timeline and future target dates.

28. Exhibit B-13 also identifies support FME3 has received for its development plan, namely:

- Warren Ventures, Ltd.: Executed JOA, naming FME3 as Operator and Letter of Support
- Surface Grazing Lessee: Letter of Support for FME3
- Otter Creek, LLC: Election to participate
- TBO Oil and Gas, LLC: Election to participate

29. **Exhibit B-14** is the letter of support FME3 received from Warren Ventures and the letter of support FME3 received from the Surface Grazing Lessee.

30. **Exhibit B-15** provides further detail on FME3's overlapping development plans and how those plans maximize production. Included in Exhibit B-15 is a depiction based on FME3's Gold State Com 801H well, which is based on the as-drilled survey of that well, with the planned Parallel State Com 801H well. This depiction demonstrates the overlap as well as the relationship between the Gold State Com 801H first take point and the projected Parallel State Com 801H first take point. The as drilled C-102 for the Gold State Com 801H well is attached as Exhibit B-15-a.

31. Prior to filing its applications, FME3 made a good faith effort to obtain voluntary joinder of the working interest owners in the proposed wells. To locate interest owners, FME3 conducted a diligent search of the public records in the county where the wells will be located and conducted phone directory and computer searches to locate contact information for parties entitled to notification. I mailed all working interest owners well proposals and an Authorization for Expenditure, and a form of Operating Agreement upon request.

32. FME3 sent its well proposal letters to the working interest owners and unleased mineral interest owners in July 2023.

33. **Exhibit B-16** is a summary of FME3's communications with working interest owners and unleased mineral interest owners, including MRC.

34. FME3 negotiated with the uncommitted interest owners in good faith.

35. I now provide specific testimony and exhibits for each of the Parallel cases. I address the cases from West to East rather than by case number.

#### **CASE NO. 24354 SPECIFIC TESTIMONY AND EXHIBITS**

36. Below is a brief description of the facts and exhibits for Case No. 24354.

37. In this case, FME3 seeks an order from the Division pooling all uncommitted mineral interests within a 324.13-acre, more or less, Bone Spring horizontal spacing unit comprising the W/2 W/2 of Section 35, Township 18 South, Range 34 East, and Lot 4, the SW/NW, and W/2SW of Section 2 (W/2 W/2 equivalent), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the **Parallel State Com 301H and Parallel State Com 501H wells**, to be horizontally drilled. The producing area for the wells is expected to be orthodox. A copy of the application for Case No. 24354 is attached as **Exhibit B-17**.

38. Attached as **Exhibit B-17-a** are the C-102s for the wells proposed in Case No. 24354. The wells will develop the Airstrip, Bone Spring (Pool Code 960) and the Scharb, Bone Spring (Pool Code 55610).<sup>2</sup>

39. The producing area for the wells will be orthodox.

---

<sup>2</sup> For each well that has two pools, FME3 has provided three total C-102s—an overview C-102 that shows the entire unit and a C-102 for each pool.

40. Attached as **Exhibit B-17-b** is a lease tract map for Case No. 24354. This map shows the ownership breakdown. FME3 has 84.3026% working interest control (committed interests).

41. Attached as **Exhibit B-17-c** is an example proposal letter and the Authorizations for Expenditure (“AFEs”) for the proposed wells. The proposal letter identifies the proposed surface hole location and bottom hole location, and the approximate TVD. It also contains separate elections for each well. In my opinion, the estimated costs reflected on the AFEs are fair and reasonable, and are comparable to the costs of other wells of similar depth, length and completion method being drilled in this area of New Mexico.

42. There are no depth severances within the proposed spacing unit.

43. **Exhibit B-17-d** is a list of the parties to be pooled in Case 24354.

**ADDITIONAL TESTIMONY AND EXHIBITS APPLICABLE TO ALL CASES**

93. FME3 requests overhead and administrative rates of \$9,000/month during drilling and \$900/month while producing. These rates are fair and comparable to the rates charged by other operators for wells of this type in this area of Southeastern, New Mexico and consistent with the rates awarded by the Division in recent compulsory pooling orders. FME3 requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

94. FME3 requests the maximum cost plus 200% risk charge be assessed against non-consenting pooled working interest owners.

95. FME3 requests that it be designated operator of the wells.

96. FME3 requests that overriding royalty interest owners be pooled.

97. I provided Modrall with the names and addresses of uncommitted interest owners and overriding royalty interests owners of record in the Parallel units.

98. To the extent necessary, FME3 requests approval of overlapping spacing units.

99. FME3 filed amended applications to provide additional information about overlapping spacing units. I searched publicly available information to identify any additional operators or working interest owners in any of the spacing units the Parallel applications will overlap and provided that information to Modrall. To my knowledge, no operators or working interest owners in the existing wells have objected to FME3's applications.

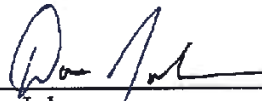

100. Based upon my knowledge of the land matters involved in these cases, education and training, it is my expert opinion that FME3's development plan will protect correlative rights and prevent waste.

101. The attachments to my Affidavit were prepared by me or compiled from company business records.

## FME3's Development Plan Minimizes Surface Disturbances

- FME3's plan reduces waste as the Parallel development will fully leverage the existing Gold CTB
  - Parallel and Gold wells are produced into the same CTB
- FME3's plan reduces waste as the Parallel development will share drill pads with the Gold development
  - Parallel and Gold wells are drilled from the same pads

# FME3's Development Plan Cleans Up Asset and Helps Third Parties Prevent Waste

- FME3's development plan provides the ability to decommission and reclaim one tank battery and consolidate production into a newer CTB
  - One older tank battery can be decommissioned
  - Removal of equipment and partial reclamation (still has pumping units)
- Consolidation of Parallel production into the Gold CTB creates a single point for 3<sup>rd</sup> Party connections
  - Plains (oil takeaway) is already connected to the Gold/Parallel CTB
  - Water takeaway is already connected to the Gold/Parallel CTB

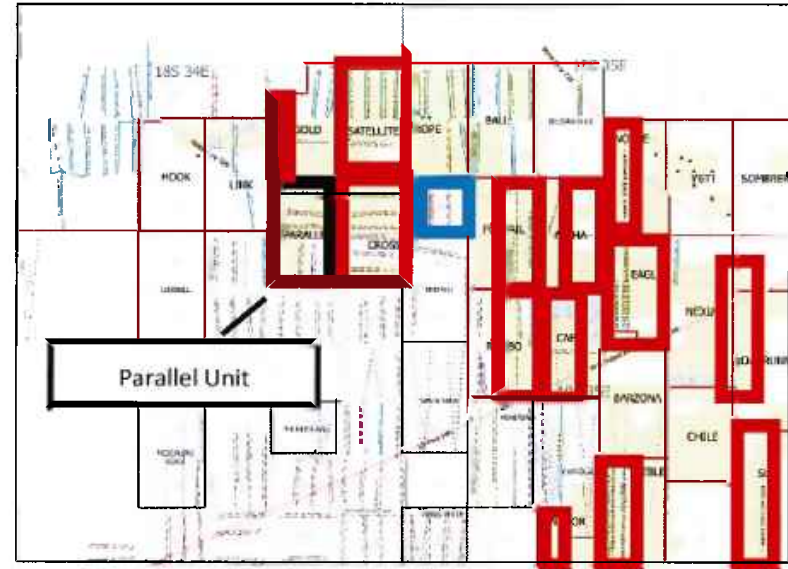

# FME3 Is Addressing Gas and Water Takeaway Constraints

- FME3 is investing significant capital into gas and water infrastructure to ensure pipeline solutions are in place
  - 2024 approved budget of \$37mm
  - FME3’s consolidated position supports FME3’s significant investment in infrastructure
  
- Existing infrastructure is not sized to support a 16-well horizontal project
  - Investments in pipelines are necessary
  
- 3<sup>rd</sup> party gas and water midstream companies are reluctant to spend the necessary capital
  - Operators need to be willing to help with the solution to foster development and prevent waste

= Matador Operated Project

= FME3 Operated Projects

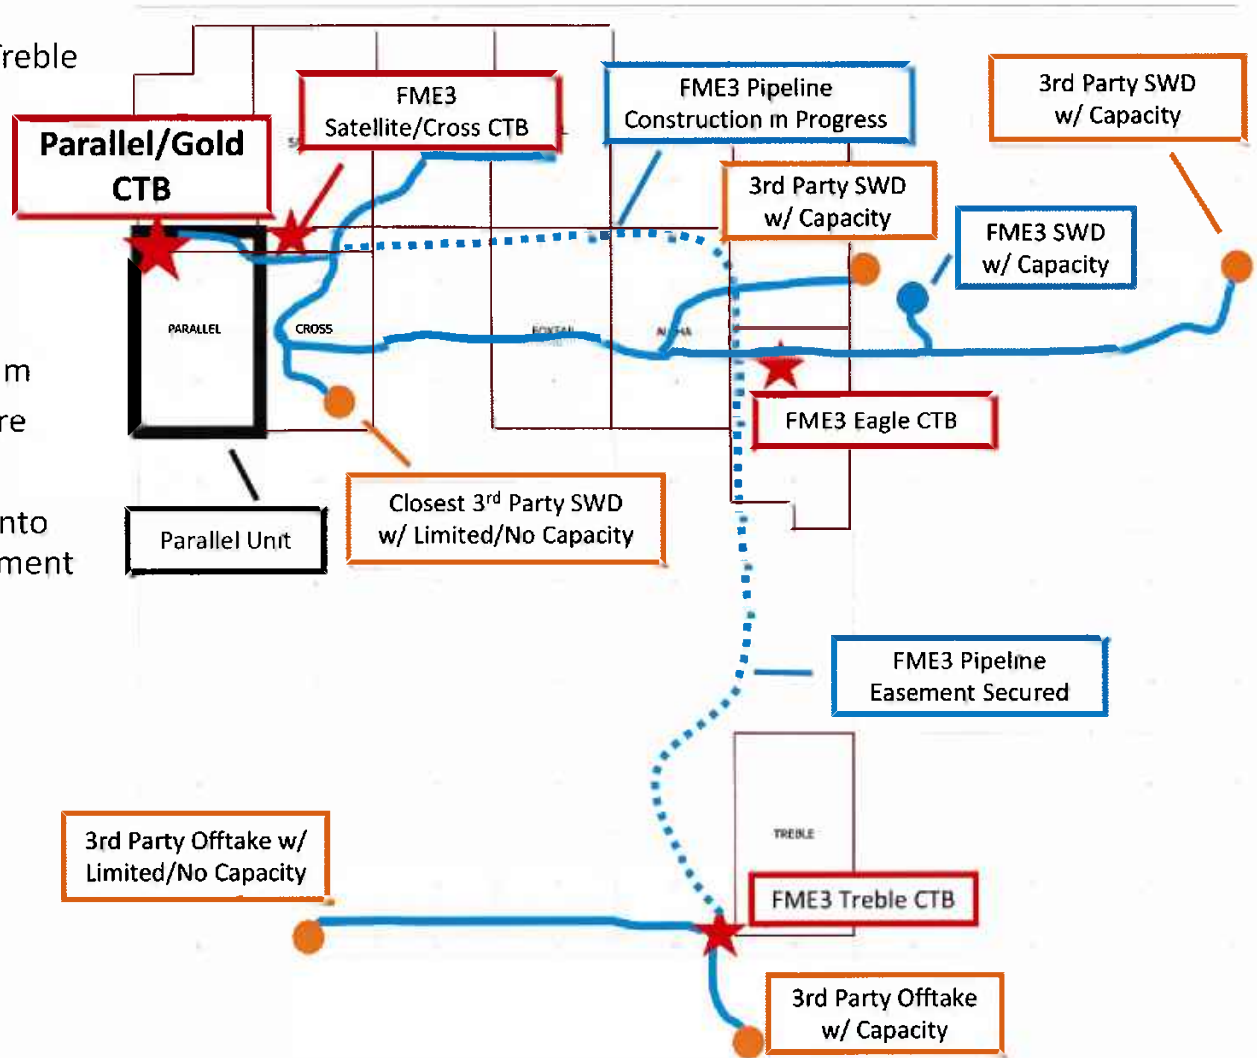

# FME3 Is Investing \$17.2mm of Capital to Solve Water Takeaway Constraints

- Adequate water takeaway does not exist to support a 16-well horizontal project
  - Closest 3<sup>rd</sup> Party SWD to project has limited to no capacity
  - FME3's recent projects at Eagle, Treble and Gold have pushed 3<sup>rd</sup> party capacities
- FME3 has existing company owned capacity and is investing to expand capacity
  - 2024 approved budget of \$17.2mm
  - ~20 miles of pipeline infrastructure
  - Target in service Q3 2024
  - Gold/Parallel CTB is already tied into the water system, ongoing investment is required to increase takeaway
- FME3 disposal access will include:
  - FME3 owned SWD
  - Firm takeaway contracts
  - Interruptible takeaway contracts

— Solid Line = In-Service FME3 pipelines  
 - - - Dashed Line = FME3 pipelines in progress, easement secured

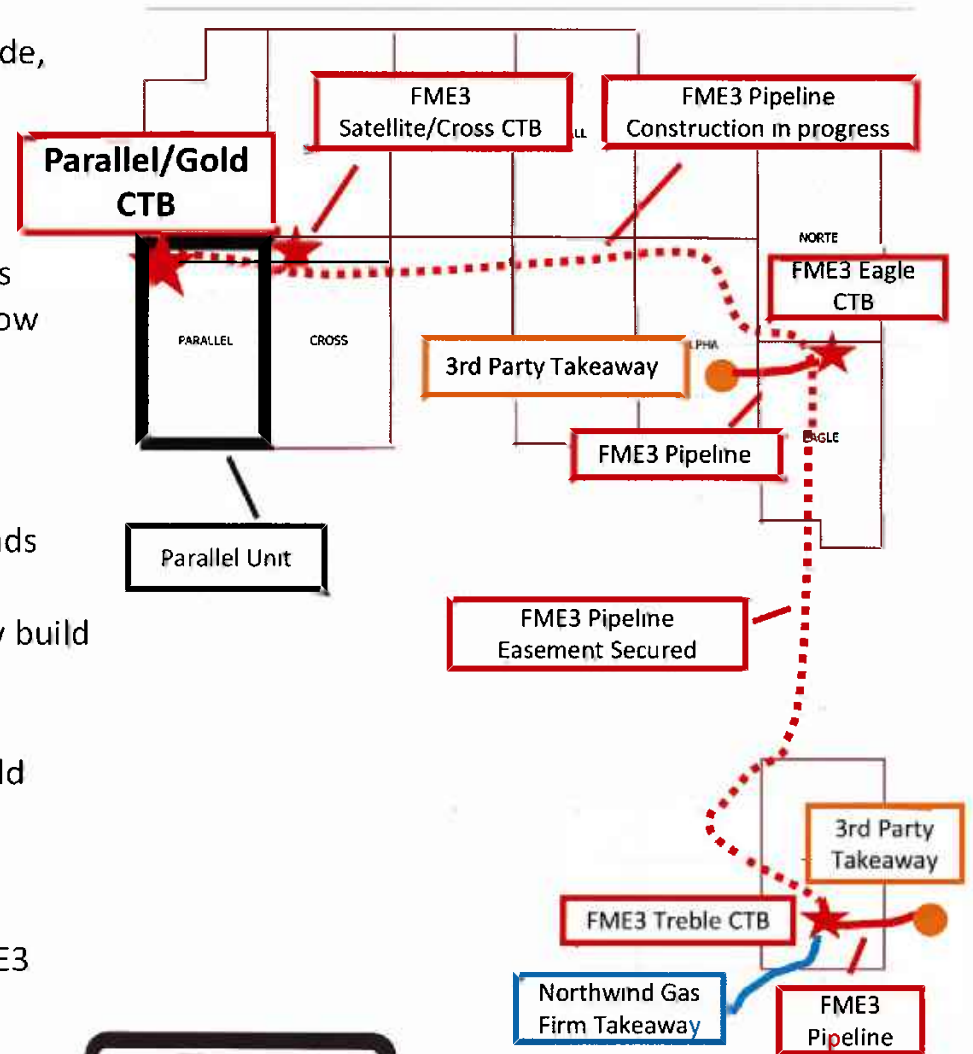

## FME3 Is Investing \$19.8mm of Capital to Solve Gas Takeaway Constraints

- Adequate gas takeaway does not exist to support a 16-well horizontal project
  - FME3's recent projects at Eagle, Treble and Gold have maxed out 3<sup>rd</sup> party capacities
  - Existing capacity is for sweet gas (no hydrogen sulfide, h2s)
    - Shallower 1BS/2BS zones expected to have h2s
- FME3 is investing in gathering gas to a single point
  - Increases appeal for 3<sup>rd</sup> party midstream companies
  - Allows multiple 3<sup>rd</sup> parties to connect, increasing flow assurance to prevent waste
  - 2024 approved budget of \$19.8mm
    - ~16 miles of pipeline infrastructure
    - Target in service Q2/Q3 2024
    - Initial investments into treating for sweet offloads
- 3<sup>rd</sup> Party Investment is required – Northwind is a new build
  - FME3 is anchor customer for this area
  - Northwind's initial build stopped ~8 miles to South
  - FME3 signed an acreage dedication to facilitate build
  - Northwind will gather h2s gas
- FME3 gas takeaway will include:
  - Firm Northwind offload with 100% capacity for FME3 forecasted volumes
  - Interruptible offloads
  - Potential for other options for flow assurance

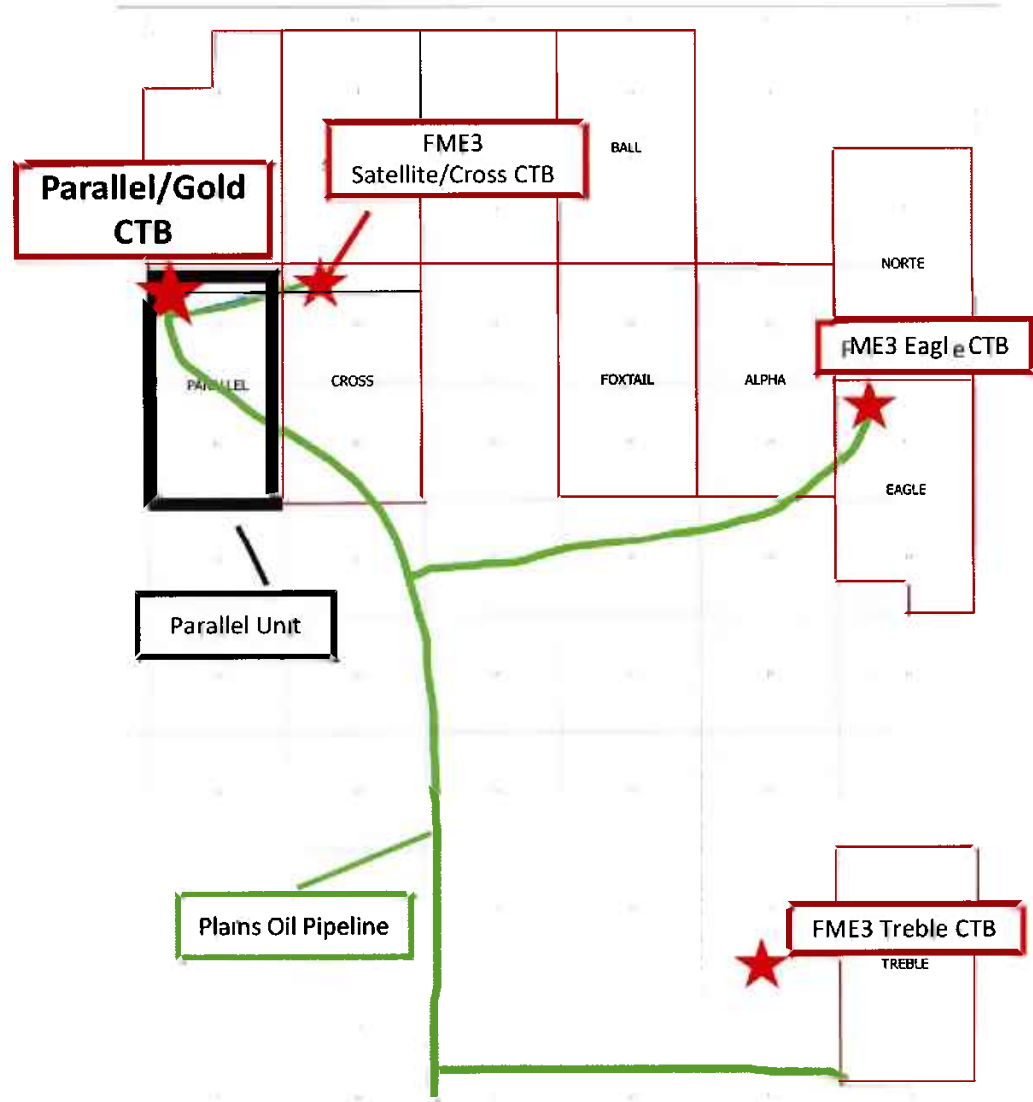

— Solid Line = In-Service FME3 pipelines  
 - - - Dashed Line = FME3 pipelines in progress, easement secured

# FME3 Has a Reliable Oil Pipeline Solution in Place

- FME3 strives to get all production on pipeline to reduce truck traffic and associated waste
- FME3 signed an acreage dedication with Plains to ensure oil pipeline takeaway would be in place day 1 for new developments
- Plains oil pipeline is already tied into the Gold/Parallel CTB

# FME3 Is All Systems Go

- FME3 is very active in the 6-mile radius of Parallel Development Area
  - **FME3 has turned on production 18 wells between October 2023 and June 2024**

To Whom It May Concern,

Since May of 2023, Tivis Ranch ("Tivis") has been cooperatively working with Franklin Mountain Energy 3, LLC ("FME3") as they plan their oil & gas development near and within our acreage boundaries. FME3 has been operating responsibly on the Tivis Lands since that time. To date, FME3 has drilled 4 wells and currently has 2 rigs drilling on Tivis Lands. Production infrastructure including power, pipelines, flowlines, and access roads have all been installed in conjunction with input of Tivis Ranch.

FME3 is the most communicative Operator that Tivis Ranch works with. The planned use of Tivis Lands has been communicated in detail and timely compensation has been provided for surface disturbances. FME3 consistently offers meetings to answer questions and provide development updates. FME3 has shown the upmost respect to the Tivis Ranch and family; we are grateful for the care they have taken while developing assets on our lands. I look forward to their continued partnership.

Sincerely,

Wilberta Tivis

**APPLICATION OF FRANKLIN MOUNTAIN  
ENERGY 3, LLC FOR COMPULSORY POOLING  
AND, TO THE EXTENT NECESSARY, APPROVAL  
OF OVERLAPPING SPACING UNIT,  
LEA COUNTY, NEW MEXICO**

CASE NO. 24354

**APPLICATION**

Franklin Mountain Energy 3, LLC (“Franklin”), OGRID Number 331595, through its undersigned attorneys, hereby files this amended application<sup>1</sup> with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 324.13-acre, more or less, Bone Spring horizontal spacing unit comprising the W/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 4, the SW/NW, and W/2SW of Section 2 (the equivalent of the W/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Franklin seeks to dedicate the W/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 4, the SW/NW, and W/2SW of Section 2 (the equivalent of the W/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico to form a standard 324.13-acre, more or less, Bone Spring horizontal spacing unit.

<sup>1</sup> This application amends the application filed in Case No. 23848.

3. Franklin plans to drill the **Parallel State Com 301H and Parallel State Com 501H wells** to a depth sufficient to test the Bone Spring formation. The wells will be horizontally drilled, from a proposed surface hole location in the NE/4NW/4 (Unit C) of Section 35 to a proposed bottom hole location in the SW/4 SW/4 (Unit M) of Section 2; and the producing area for the wells is expected to be orthodox.

4. Franklin filed Case No. 23848 on September 5, 2023, in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice that the unit proposed in that application would “partially overlap a spacing unit in Section 35, Township 18 South, Range 34 E.” Application Case No. 23848, ¶ 4.

5. On December 1, 2023, the Division issued Order R-22971, which pooled uncommitted interests in a Bone Spring spacing unit comprised of the W/2SW/4 of Section 23, the W/2W/2 of Section 26, and the NW/4NW/4 of Section 35, Township 18 South, Range 34 East, Lea County, NM.

6. That unit is dedicated to Franklin Mountain Energy 3, LLC’s Gold State Com 301H well (API 30-0025-51666) and Gold State 601H (API 30-0025-51667) wells.

7. Franklin is filing this amended application, to the extent necessary, to provide notice that the spacing unit proposed in this application will partially overlap the Gold State Com Bone Spring spacing unit described above.

8. Franklin’s proposed spacing unit in this case will also partially overlap existing Bone Spring spacing units as follows:

- a. A 160-acre Bone Spring horizontal well spacing unit comprised of the N/2S/2 of Section 35 dedicated to Franklin Mountain’s Butter Cup 35 State Com 2H well (API 30-05-40642).

- b. A 160-acre Bone Spring horizontal well spacing unit comprised of the S/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 1H well (API 30-05-40634).
- c. A 164.13-acre Bone Spring horizontal well spacing unit comprised of the W2W2 of Section 2 dedicated to Franklin Mountain's Playa 2 State #002H (API 30-025-40549).

9. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

10. The pooling of all interests in the Bone Spring formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

11. Case No. 23848 is currently set for contested hearing on April 9, 2024.

12. Franklin requests that this case be set for a status conference on April 4, 2024 and then set for a contested hearing on April 9, 2024.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter its order:

A. Pooling all uncommitted interests in the Bone Spring formation underlying a horizontal spacing unit within the W/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 4, the SW/NW, and W/2SW of Section 2 (the equivalent of the W/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico;

B. Approving, to the extent necessary, the proposed overlapping spacing unit;

- C. Designating Franklin as operator of this unit and the wells to be drilled thereon;
- D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;
- E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

**CASE NO. 24354 : Application of Franklin Mountain Energy 3, LLC for compulsory pooling and, to the extent necessary, approval of an overlapping spacing unit, Lea County, New Mexico.** Applicant seeks an order from the Division pooling all uncommitted mineral interests within a 324.13-acre, more or less, Bone Spring horizontal spacing unit comprising the W/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 4, the SW/NW, and W/2SW of Section 2, Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the **Parallel State Com 301H and Parallel State Com 501H wells**, to be horizontally drilled, from a proposed surface hole location in the NE/4NW/4 (Unit C) of Section 35 to a proposed bottom hole location in the SW/4SW/4 (Unit M) of Section 2. The producing area for the wells is expected to be orthodox. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. The proposed horizontal spacing unit will partially overlap a 280-acre horizontal spacing unit W/2SW/4 of Section 23, the W/2W/2 of Section 26, and the NW/4NW/4 of Section 35, Township 18 South, Range 34 East dedicated to Franklin Mountain Energy 3, LLC's Gold State Com 301H well (API 30-0025-51666) and Gold State 601H (API 30-0025-51667) wells. Franklin's proposed spacing unit in this case will also partially overlap the following Bone Spring spacing units: A 160-acre Bone Spring horizontal well spacing unit comprised of the N/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 2H well (API 30-05-40642); a 160-acre Bone Spring horizontal well spacing unit comprised of the S/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 1H well (API 30-05-40634); and a 164.13-acre Bone Spring horizontal well spacing unit comprised of the W2W2 of Section 2 dedicated to Franklin Mountain's Playa 2 State #002H (API 30-025-40549). Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. **APPLICATION OF FRANKLIN MOUNTAIN  
ENERGY 3, LLC FOR COMPULSORY POOLING  
AND, TO THE EXTENT NECESSARY, APPROVAL  
OF OVERLAPPING SPACING UNIT,  
LEA COUNTY, NEW MEXICO**

CASE NO. 24353

**APPLICATION**

Franklin Mountain Energy 3, LLC ("Franklin"), OGRID Number 331595, through its undersigned attorneys, hereby files this amended application<sup>1</sup> with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 324.13-acre, more or less, Wolfcamp horizontal spacing unit comprising the W/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 4, the SW/NW, and W/2SW of Section 2 (the equivalent of the W/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Franklin seeks to dedicate the W/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 4, the SW/NW, and W/2SW of Section 2 (the equivalent of the W/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico to form a standard 324.13-acre, more or less, Wolfcamp horizontal spacing unit.

<sup>1</sup> This application amends the application filed in Case No. 23846.

3. Franklin plans to drill the **Parallel State Com 701H and Parallel State Com 801H wells** to a depth sufficient to test the Wolfcamp formation. The wells will be horizontally drilled from proposed surface hole locations in the NE/4NW/4 (Unit C) of Section 35 to proposed bottom hole locations in the SW/4SW/4 (Unit M) of Section 2, and the producing area for the wells is expected to be orthodox.

4. Franklin filed Case No. 23846 on September 5, 2023, in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice that the unit proposed in that application would “partially overlap a spacing unit in Section 35, Township 18 South, Range 34 E.” Application Case No. 23846, ¶ 4.

5. On December 1, 2023, the Division issued Order R-22970, which pooled uncommitted interests in a Wolfcamp spacing unit comprised of the W/2SW/4 of Section 23, the W/2W/2 of Section 26, and the NW/4NW/4 of Section 35, Township 18 South, Range 34 East, Lea County, NM.

6. That unit is dedicated to Franklin Mountain Energy 3, LLC’s Gold State Com 701H well (API 30-0025-51668) and Gold State 801H (API 30-0025-51669) wells.

7. Franklin is filing this amended application, to the extent necessary, to provide notice that the spacing unit proposed in this application will partially overlap the Gold State Com Wolfcamp spacing unit described above.

8. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Wolfcamp formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

9. The pooling of all interests in the Wolfcamp formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

10. Case No. 23846 is currently set for contested hearing on April 9, 2024.

11. Franklin requests that this case be set for a status conference on April 4, 2024 and then set for a contested hearing on April 9, 2024.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division and after notice and hearing as required by law, the Division enter its order:

A. Pooling all uncommitted interests in the Wolfcamp formation underlying a horizontal spacing unit within the W/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 4, the SW/NW, and W/2SW of Section 2 (the equivalent of the W/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico;

B. Approving, to the extent necessary, the proposed overlapping spacing unit;

C. Designating Franklin as operator of this unit and the wells to be drilled thereon;

D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;

E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and

F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

**CASE NO. 24355**

**APPLICATION**

Franklin Mountain Energy 3, LLC ("Franklin"), OGRID Number 331595, through its undersigned attorneys, hereby files this amended application<sup>1</sup> with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 324.02-acre, more or less, Bone Spring horizontal spacing unit comprising the E/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 3, the SE/NW, and E/2SW of Section 2 (the equivalent of the E/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Franklin seeks to dedicate the E/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 3, the SE/NW, and E/2SW of Section 2 (the equivalent of the E/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico to form a standard 324.02-acre, more or less, Bone Spring horizontal spacing unit.

<sup>1</sup> This application amends the application filed in Case No. 23847.

3. Franklin plans to drill the **Parallel State Com 302H and Parallel State Com 502H wells** to a depth sufficient to test the Bone Spring formation. The wells will be horizontally drilled from proposed surface hole locations in the NE/4NW/4 (Unit C) of Section 35 to proposed bottom hole locations in the SE/4SW/4 (Unit N) of Section 2, and the producing area for the wells is expected to be orthodox.

4. Franklin filed Case No. 23847 on September 5, 2023, in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice that the unit proposed in that application would “partially overlap a spacing unit in Section 35, Township 18 South, Range 34 E.” Application Case No. 23847, ¶ 4.

5. Franklin is filing this amended application, to the extent necessary, to provide notice that the spacing unit proposed in this application will partially overlap a proposed 280-acre more or less Bone Spring spacing unit comprising the E/2/SW of Section 23, the E/2W/2 of Section 26, and the NE/NW of Section 35, Township 18 South, Range 34 East, N.M.P.M., Lea County, New Mexico, dedicated to Franklin’s proposed Gold State Com 502 and 602H wells.

6. Franklin’s proposed spacing unit in this case will partially overlap existing Bone Spring spacing units as follows:

- a. A 160-acre Bone Spring horizontal well spacing unit comprised of the N/2S/2 of Section 35 dedicated to Franklin Mountain’s Butter Cup 35 State Com 2H well (API 30-05-40642).
- b. A 160-acre Bone Spring horizontal well spacing unit comprised of the S/2S/2 of Section 35 dedicated to Franklin Mountain’s Butter Cup 35 State Com 1H well (API 30-05-40634).

c. A 164.02-acre Bone Spring horizontal well spacing unit comprised of the E2W2 of Section 2 dedicated to Franklin Mountain's Playa 2 State #001H (API 30-025-40405).

7. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

8. The pooling of all interests in the Bone Spring formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

9. Case No. 23847 is currently set for contested hearing on April 9, 2024.

10. Franklin requests that this case be set for a status conference on April 4, 2024 and then set for contested hearing on April 9, 2024.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division and after notice and hearing as required by law, the Division enter its order:

A. Pooling all uncommitted interests in the Bone Spring formation underlying a horizontal spacing unit within the E/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 3, the SE/NW, and E/2SW of Section 2 (the equivalent of the E/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico;

B. Approving, to the extent necessary, the proposed overlapping spacing unit;

C. Designating Franklin as operator of this unit and the wells to be drilled thereon;

D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;

E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and

F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

LEA COUNTY, NEW MEXICO**

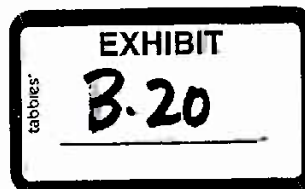

CASE NO. 24352

**APPLICATION**

Franklin Mountain Energy 3, LLC (“Franklin”), OGRID Number 331595, through its undersigned attorneys, hereby files this amended application<sup>1</sup> with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 324.02-acre, more or less, Wolfcamp horizontal spacing unit comprising the E/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 3, the SE/NW, and E/2SW of Section 2 (the equivalent of the E/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Franklin seeks to dedicate the E/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 3, the SE/NW, and E/2SW of Section 2 (the equivalent of the E/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico to form a standard 324.02-acre, more or less, Wolfcamp horizontal spacing unit.

<sup>1</sup> This application amends the application filed in Case No. 23845.

3. Franklin plans to drill the **Parallel State Com 702H and Parallel State Com 802H wells** to a depth sufficient to test the Wolfcamp formation. The wells will be horizontally drilled from proposed surface hole locations in the NE/4NW/4 (Unit C) of Section 35 to proposed bottom hole locations in the SE/4SW/4 (Unit N) of Section 2, and the producing area for the wells is expected to be orthodox.

4. Franklin filed Case No. 23845 on September 5, 2023, in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice that the unit proposed in that application would “partially overlap a spacing unit in Section 35, Township 18 South, Range 34 E.” Application Case No. 23845, ¶ 4.

5. Franklin is filing this amended application, to the extent necessary, to provide notice that the spacing unit proposed in this application will partially overlap a proposed 280-acre more or less Wolfcamp spacing unit comprising the E/2/SW of Section 23, the E/2W/2 of Section 26, and the NE/NW of Section 35, Township 18 South, Range 34 East, N.M.P.M., Lea County, New Mexico, dedicated to Franklin’s proposed Gold State Com 702 and 802H wells.

6. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Wolfcamp formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

7. The pooling of all interests in the Wolfcamp formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

8. Case No. 23845 is currently set for contested hearing on April 9, 2024.

9. Franklin requests that this case be set for a status conference on April 4, 2024 and then set for contested hearing on April 9, 2024.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division and after notice and hearing as required by law, the Division enter its order:

A. Pooling all uncommitted interests in the Wolfcamp formation underlying a horizontal spacing unit within the E/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 3, the SE/NW, and E/2SW of Section 2 (the equivalent of the E/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico;

B. Approving, to the extent necessary, the proposed overlapping spacing unit;

C. Designating Franklin as operator of this unit and the wells to be drilled thereon;

D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;

E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and

F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

OVERLAPPING SPACING UNIT,  
LEA COUNTY, NEW MEXICO**

CASE NO. 24350

**APPLICATION**

Franklin Mountain Energy 3, LLC ("Franklin"), OGRID Number 331595, through its undersigned attorneys, hereby files this amended application<sup>1</sup> with the Oil Conservation Division ("Division") pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 323.91-acre, more or less, Bone Spring horizontal spacing unit comprising the W/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 2, the SW/NE, and W/2SE of Section 2 (the equivalent of the W/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Franklin seeks to dedicate the W/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 2, the SW/NE, and W/2SE of Section 2 (the equivalent of the W/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico to form a standard 323.91-acre, more or less, Bone Spring horizontal spacing unit.

<sup>1</sup> This application amends the application filed in Case No. 23849.

3. Franklin plans to drill the **Parallel State Com 303H and Parallel State Com 503H wells** to a depth sufficient to test the Bone Spring formation. The wells will be horizontally drilled from proposed surface hole locations in the NE/4NE/4 (Unit A) of Section 35 to proposed bottom hole locations in the SW/4SE/4 (Unit O) of Section 2, and the producing area for the wells is expected to be orthodox.

4. Franklin filed Case No. 23849 in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice of an overlapping spacing unit.

5. Franklin's proposed spacing unit in this case will partially overlap the following existing Bone Spring spacing units:

- a. A 160-acre Bone Spring horizontal well spacing unit comprised of the N/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 2H well (API 30-05-40642).
- b. A 160-acre Bone Spring horizontal well spacing unit comprised of the S/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 1H well (API 30-05-40634).
- c. A 163.92-acre horizontal well spacing unit comprised of the W2E2 of Section 2 dedicated to Matador Production Company's King Cobra 2 State #002H (API 30-025-41060).

6. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

7. The pooling of all interests in the Bone Spring formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

8. Case No. 23849 is currently set for contested hearing on April 9, 2024.

9. Franklin requests that this case be set for a status conference on April 4, 2024 and then set for a contested hearing on April 9, 2024.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division and after notice and hearing as required by law, the Division enter its order:

A. Pooling all uncommitted interests in the Bone Spring formation underlying a horizontal spacing unit within the W/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 2, the SW/NE, and W/2SE of Section 2 (the equivalent of the W/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico;

B. Approving, to the extent necessary, the proposed overlapping spacing unit;

C. Designating Franklin as operator of this unit and the wells to be drilled thereon;

D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;

E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and

F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

This spacing unit will be dedicated to the **Parallel State Com 303H and Parallel State Com 503H wells**, to be horizontally drilled from proposed surface hole locations in the NE/4NE/4 (Unit A) of Section 35 to proposed bottom hole locations in the SW/4SE/4 (Unit O) of Section 2, and the producing area for the wells is expected to be orthodox. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. The proposed spacing unit in this case will partially overlap the following existing spacing units: A 160-acre Bone Spring horizontal well spacing unit comprised of the N/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 2H well (API 30-05-40642); a 160-acre Bone Spring horizontal well spacing unit comprised of the S/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 1H well (API 30-05-40634); and a 163.92-acre horizontal well spacing unit comprised of the W2E2 of Section 2 dedicated to Matador Production Company's King Cobra 2 State #002H (API 30-025-41060). Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. **APPLICATION OF FRANKLIN MOUNTAIN  
ENERGY 3, LLC FOR COMPULSORY POOLING  
AND, TO THE EXTENT NECESSARY, APPROVAL OF AN  
OVERLAPPING SPACING UNIT,  
LEA COUNTY, NEW MEXICO**

CASE NO. 24362

**APPLICATION**

Franklin Mountain Energy 3, LLC (“Franklin”), OGRID Number 331595, through its undersigned attorneys, hereby files this amended application<sup>1</sup> with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 323.91-acre, more or less, Wolfcamp horizontal spacing unit comprising the W/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 2, the SW/NE, and W/2SE of Section 2 (the equivalent of the W/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Franklin seeks to dedicate the W/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 2, the SW/NE, and W/2SE of Section 2 (the equivalent of the W/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico to form a standard 323.91-acre, more or less, Wolfcamp horizontal spacing unit.

<sup>1</sup> This application amends the application filed in Case No. 23852.

3. Franklin plans to drill the **Parallel State Com 703H and Parallel State Com 803H wells** to a depth sufficient to test the Wolfcamp formation and the producing area for the wells is expected to be orthodox. The Parallel State Com 703H well will be horizontally drilled from a proposed surface hole location in the NE/4NE/4 (Unit A) of Section 35 to a proposed bottom hole location in the SW/4SE/4 (Unit O) of Section 2, and the Parallel State Com 803H well will be horizontally drilled from a proposed surface hole location in the NW/4NE/4 (Unit B) of Section 35 to a proposed bottom hole location in the SW/4SE/4 (Unit O) of Section 2.

4. Franklin filed Case No. 23852 on September 5, 2023, in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice that the unit proposed in that application would “partially overlap a spacing unit in Section 35, Township 18 South, Range 34 E.” Application Case No. 23852, ¶ 4.

5. Franklin is filing this amended application, to the extent necessary, to provide notice that the spacing unit proposed in this application will partially overlap a 360-acre, more or less, Wolfcamp horizontal spacing unit comprising the W/2E/2 of Sections 23 and 26, and the NW/NE of Section 35, Township 18 South, Range 34 East, N.M.P.M., Lea County, New Mexico dedicated to Franklin’s proposed Gold State Com 703H and Gold State Com 803H wells.

6. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Wolfcamp formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

7. The pooling of all interests in the Wolfcamp formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

8. Case No. 23852 is currently set for contested hearing on April 9, 2024.

9. Franklin requests that this case be set for a status conference on April 4, 2024 and then set for contested hearing on April 9, 2024.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division and after notice and hearing as required by law, the Division enter its order:

A. Pooling all uncommitted interests in the Wolfcamp formation underlying a horizontal spacing unit within the W/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 2, the SW/NE, and W/2SE of Section 2 (the equivalent of the W/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico;

B. Approving, to the extent necessary, the proposed overlapping spacing unit;

C. Designating Franklin as operator of this unit and the wells to be drilled thereon;

D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;

E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and

F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

LEA COUNTY, NEW MEXICO**

CASE NO. 24351

**APPLICATION**

Franklin Mountain Energy 3, LLC (“Franklin”), OGRID Number 331595, through its undersigned attorneys, hereby files this amended application<sup>1</sup> with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 323.81-acre, more or less, Bone Spring horizontal spacing unit comprising the E/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 1, the SE/NE, and E/2SE of Section 2 (the equivalent of the E/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Franklin seeks to dedicate the E/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 1, the SE/NE, and E/2SE of Section 2 (the equivalent of the E/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico to form a standard 323.81 acre, more or less, Bone Spring horizontal spacing unit.

<sup>1</sup> This application amends the application in Case 23851.

3. Franklin plans to drill the **Parallel State Com 304H and Parallel State Com 504H wells** to a depth sufficient to test the Bone Spring formation. The wells will be horizontally drilled from proposed surface hole locations in the NE/4NE/4 (Unit A) of Section 35 to proposed bottom hole locations in the SE/4SE/4 (Unit P) of Section 2, and the producing area for the wells is expected to be orthodox.

4. Franklin filed Case No. 23851 in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice of an overlapping spacing unit.

5. Franklin's proposed spacing unit in this case will partially overlap the following existing Bone Spring spacing units:

- a. A 160-acre Bone Spring horizontal well spacing unit comprised of the N/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 2H well (API 30-05-40642).
- b. A 160-acre Bone Spring horizontal well spacing unit comprised of the S/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 1H well (API 30-05-40634).
- c. A 160-acre horizontal well spacing unit comprised of the E2E2 of Section 2 dedicated to Matador Production Company's King Cobra 2 State #001H (API 30-025-40388).

6. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

7. The pooling of all interests in the Bone Spring formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

8. Case No. 23851 is currently set for contested hearing on April 9, 2024.

9. Franklin requests that this case be set for a status conference on April 4, 2024 and then set for a contested hearing on April 9, 2024.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division and after notice and hearing as required by law, the Division enter its order:

A. **CASE NO. 24351 : Application of Franklin Mountain Energy 3, LLC for compulsory pooling and, to the extent necessary, approval of an overlapping spacing unit, Lea County, New Mexico.** Applicant seeks an order from the Division pooling all uncommitted mineral interests within a 323.81-acre, more or less, Bone Spring horizontal spacing unit comprising the E/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 1, the SE/NE, and E/2SE of Section 2, Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the **Parallel State Com 304H and Parallel State Com 504H wells**, to be horizontally drilled from proposed surface hole locations in the NE/4NE/4 (Unit A) of Section 35 to proposed bottom hole locations in the SE/4SE/4 (Unit P) of Section 2, and the producing area for the wells is expected to be orthodox. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. The proposed spacing unit in this case will partially overlap the following existing Bone Spring spacing units: A 160-acre Bone Spring horizontal well spacing unit comprised of the N/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 2H well (API 30-05-40642); a 160-acre Bone Spring horizontal well spacing unit comprised of the S/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 1H well (API 30-05-40634); and a 160-acre horizontal well spacing unit comprised of the E2E2 of Section 2 dedicated to Matador Production Company's King Cobra 2 State #001H (API 30-025-40388). Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 24 miles west of Hobbs, New Mexico.

ENERGY 3, LLC FOR COMPULSORY POOLING  
AND, TO THE EXTENT NECESSARY, APPROVAL  
OF OVERLAPPING SPACING UNIT,  
LEA COUNTY, NEW MEXICO**

CASE NO. 24348

**APPLICATION**

Franklin Mountain Energy 3, LLC (“Franklin”), OGRID Number 331595, through its undersigned attorneys, hereby files this amended application<sup>1</sup> with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 323.81-acre, more or less, Wolfcamp horizontal spacing unit comprising the E/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 1, the SE/NE, and E/2SE of Section 2 (the equivalent of the E/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Franklin seeks to dedicate the E/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 1, the SE/NE, and E/2SE of Section 2 (the equivalent of the E/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico to form a standard 323.81 acre, more or less, Wolfcamp horizontal spacing unit.

<sup>1</sup> This application amends the application in Case 23850.

3. Franklin plans to drill the **Parallel State Com 704H and Parallel State Com 804H wells** to a depth sufficient to test the Wolfcamp formation. The Parallel State Com 704H well will be horizontally drilled from a proposed surface hole location in the NE/4NE/4 (Unit A) of Section 35 to a proposed bottom hole location in the SE/4SE/4 (Unit P) of Section 2, and the Parallel State Com 804H will be horizontally drilled from a proposed surface hole location in the NW/4NE/4 (Unit B) of Section 35 to a proposed bottom hole location in the SE/4SE/4 (Unit P) of Section 2. The producing area for the wells is expected to be orthodox.

4. Franklin filed Case No. 23850 on September 5, 2023, in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice that the unit proposed in that application would “partially overlap a spacing unit in Section 35, Township 18 South, Range 34 E.” Application Case No. 23850, ¶ 4.

5. Franklin is filing this amended application, to the extent necessary, to provide notice that the spacing unit proposed in this application will partially overlap a proposed 360-acre, more or less, Wolfcamp horizontal spacing unit comprising the E/2E/2 of Sections 23 and 26, and the NE/NE of Section 35, Township 18 South, Range 34 East, N.M.P.M., Lea County, New Mexico, dedicated to Franklin’s proposed Gold State Com 704 and 804H wells.

6. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Wolfcamp formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

7. The pooling of all interests in the Wolfcamp formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

8. Case No. 23850 is currently set for contested hearing on April 9, 2024.

9. Franklin requests that this case be set for a status conference on April 4, 2024 and then set for contested hearing on April 9, 2024.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division and after notice and hearing as required by law, the Division enter its order:

A. Pooling all uncommitted interests in the Wolfcamp formation underlying a horizontal spacing unit within the E/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 1, the SE/NE, and E/2SE of Section 2 (the equivalent of the E/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico;

B. Approving, to the extent necessary, the proposed overlapping spacing unit;

C. Designating Franklin as operator of this unit and the wells to be drilled thereon;

D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;

E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and

F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Geology

5. I conducted a geological study of the Bone Spring and Wolfcamp formations underlying FME3's Parallel State Com Development Area ("Parallel Development Area").

6. **Exhibit C-1** is a locator map, which identifies the general location of the Parallel Development Area within the Permian Basin.

7. **Exhibit C-2** is an excerpt from Snee & Zoback, 2018, identifying the horizontal stress orientation in this area. The preferred well orientation in this area is North South due to the  $S_{Hmax}$  direction.

#### **BONE SPRING GEOLOGY STUDY—CASES 24350, 24351, 24354 and 24355**

8. The exhibits behind **Tab C-3** are the geology study I prepared for the Bone Spring formation. In case numbers 24350, 24351, 24354 and 24355, FME3 proposes to drill a total of 8 wells—four First Bone wells and four Second Bone Spring wells. I have prepared two separate sets of slides for each target formation.

9. **Exhibit C-3-a** is the First Bone Spring Sand Structure map. The Parallel Development Area is identified by the pink box and the approximate location of the First Bone Spring wells are each identified by a black-dashed line. The contour interval used in this exhibit is 25 feet. The structure map shows that the structure dips gently to the south. This map also identifies the five wells I used for the cross-section, running from A to A'.

10. **Exhibit C-3-b** is a stratigraphic cross section. In my opinion, the well logs on the cross-section give a representative sample of the First Bone Spring Sand formation in the area. The target zone is identified by a bracket and the words "Producing Interval." I have also identified approximately where the Parallel First Bone Spring wells fall within the wells I used for the cross-section. Based on the cross section, I conclude that the First Bone Spring is present and porous in the Parallel Development Area.

11. **Exhibit C-3-c** is a First Bone Spring Sand Isopach, which shows that the gross reservoir thickens slightly to the south.

12. **Exhibit C-3-d** is the Second Bone Spring Sand structure map. The Parallel Development Area is identified by the pink box and the approximate location of the Second Bone Spring wells are each identified by a black-dashed line. The contour interval used in this exhibit is 25 feet. The structure map shows that the reservoir dips gently to the south. This map also identifies the five wells I used for the cross-section, running from A to A'.

13. **Exhibit C-3-e** is a stratigraphic cross section. In my opinion, the well logs on the cross-section give a representative sample of the Second Bone Spring Sand formation in the area. The target zone is identified by a bracket and the words "Producing Interval." I have also identified where the proposed Parallel Second Bone Spring wells falls within the wells I used for the cross-section. Based on the cross section, I conclude that the Second Bone Spring Sand is present and porous in the Parallel Development Area.

14. **Exhibit C-3-f** is a Second Bone Spring Sand Isopach, which shows that the structure thickens to the north.

15. I conclude from the Bone Spring geology study that:

- a. The horizontal spacing units are justified from a geologic standpoint.
- b. There are no structural impediments or faulting that will interfere with horizontal development.
- c. Each quarter-quarter section in the proposed units will contribute more or less equally to production.

**WOLFCAMP GEOLOGY STUDY—CASES 24348, 24352, 24353, and 24362**

16. The exhibits behind **Tab C-4** are the geology study I prepared for the Wolfcamp formation. In case numbers 24348, 24352, 24353, and 24362, FME 3 is proposing a total of 8 wells—four Wolfcamp A wells and four Wolfcamp B wells. I have prepared two separate sets of slides for each target formation.

17. **Exhibit C-4-a** is the Wolfcamp A Structure map. The Parallel Development Area is identified by the green box and the approximate location of the Wolfcamp A wells are each identified by a black-dashed line. The contour interval used in this exhibit is 25 feet. The structure map shows that the reservoir thins slightly to the south. This map also identifies the five wells I used for the cross-section, running from A to A’.

18. **Exhibit C-4-b** is a stratigraphic cross section. In my opinion, the well logs on the cross-section give a representative sample of the Wolfcamp A formation in the area. The target zone is identified by a bracket and the words “Producing Interval.” I have also identified where the proposed Parallel Wolfcamp A wells falls within the wells I used for the cross-section. Based on the cross section, I conclude that the Wolfcamp A is present and porous in the Parallel Development Area.

19. **Exhibit C-4-c** is a Wolfcamp A Isopach, which shows that the reservoir thins slightly to the south.

20. **Exhibit C-4-d** is the Wolfcamp B Structure map. The Parallel Development Area is identified by the green box and the approximate location of the Wolfcamp B wells are each identified by a black-dashed line. The contour interval used in this exhibit is 25 feet. The structure map shows that the reservoir dips slightly to the southwest. This map also identifies the five wells I used for the cross-section, running from A to A’.

21. **Exhibit C-4-e** is a stratigraphic cross section. In my opinion, the well logs on the cross-section give a representative sample of the Wolfcamp B formation in the area. The target zone is identified by a bracket and the words "Producing Interval." I have also identified where the proposed Parallel Wolfcamp B wells falls within the wells I used for the cross-section. Based on the cross section, I conclude that the Wolfcamp B is present and porous in the Parallel Development Area.

22. **Exhibit C-4-f** is a Wolfcamp B Isopach, which shows that the reservoir dips slightly to the southwest.

23. I conclude from the Wolfcamp geology study that:

- a. The horizontal spacing units are justified from a geologic standpoint.
- b. There are no structural impediments or faulting that will interfere with horizontal development.
- c. Each quarter-quarter section in the proposed units will contribute more or less equally to production.

24. In my opinion, FME3's Parallel State Development plan prevents waste and protects correlative rights.

25. The attachments to my affidavit were prepared by me or compiled under my direction or supervision.

**CASE NO. 24351  
(FORMERLY 23851)**

**TO: AFFECTED PARTIES**

This letter is to advise you that Franklin Mountain Energy 3, LLC ("Franklin Mountain Energy 3") has filed the enclosed amended applications. The applications in the above captioned cases amend applications in Case Nos. 23850 and 23851. Franklin filed the amended applications, to the extent necessary, to provide notice that the spacing units in the applications will partially overlap proposed and/or existing spacing units.

In Case No. 24348, Franklin Mountain Energy 3 seeks an order from the Division pooling all uncommitted mineral interests within a 323.81-acre, more or less, Wolfcamp horizontal spacing unit comprising the E/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 1, the SE/NE, and E/2SE of Section 2, Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the **Parallel State Com 704H and Parallel State Com 804H wells**, to be horizontally drilled. The Parallel State Com 704H well will be horizontally drilled from a proposed surface hole location in the NE/4NE/4 (Unit A) of Section 35 to a proposed bottom hole location in the SE/4SE/4 (Unit P) of Section 2, and the Parallel

State Com 804H will be horizontally drilled from a proposed surface hole location in the NW/4NE/4 (Unit B) of Section 35 to a proposed bottom hole location in the SE/4SE/4 (Unit P) of Section 2. The producing area for the wells is expected to be orthodox. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. The spacing unit proposed in this application will partially overlap a proposed 360-acre, more or less, Wolfcamp horizontal spacing unit comprising the E/2E/2 of Sections 23 and 26, and the NE/NE of Section 35, Township 18 South, Range 34 East, N.M.P.M., Lea County, New Mexico, dedicated to Franklin's proposed Gold State Com 704 and 804H wells. Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 24 miles west of Hobbs, New Mexico.

In Case No. 24351, Franklin Mountain Energy 3 seeks an order from the Division pooling all uncommitted mineral interests within a 323.81-acre, more or less, Bone Spring horizontal spacing unit comprising the E/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 1, the SE/NE, and E/2SE of Section 2, Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the **Parallel State Com 304H and Parallel State Com 504H wells**, to be horizontally drilled from proposed surface hole locations in the NE/4NE/4 (Unit A) of Section 35 to proposed bottom hole locations in the SE/4SE/4 (Unit P) of Section 2, and the producing area for the wells is expected to be orthodox. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. The proposed spacing unit in this case will partially overlap the following existing Bone Spring spacing units: A 160-acre Bone Spring horizontal well spacing unit comprised of the N/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 2H well (API 30-05-40642); a 160-acre Bone Spring horizontal well spacing unit comprised of the S/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 1H well (API 30-05-40634); and a 160-acre horizontal well spacing unit comprised of the E2E2 of Section 2 dedicated to Matador Production Company's King Cobra 2 State #001H (API 30-025-40388). Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 24 miles west of Hobbs, New Mexico.

**APPLICATION OF FRANKLIN MOUNTAIN  
ENERGY 3, LLC FOR COMPULSORY POOLING  
AND, TO THE EXTENT NECESSARY, APPROVAL  
OF OVERLAPPING SPACING UNIT,  
LEA COUNTY, NEW MEXICO**

CASE NO. 24348

**APPLICATION**

Franklin Mountain Energy 3, LLC (“Franklin”), OGRID Number 331595, through its undersigned attorneys, hereby files this amended application<sup>1</sup> with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 323.81-acre, more or less, Wolfcamp horizontal spacing unit comprising the E/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 1, the SE/NE, and E/2SE of Section 2 (the equivalent of the E/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Franklin seeks to dedicate the E/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 1, the SE/NE, and E/2SE of Section 2 (the equivalent of the E/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico to form a standard 323.81 acre, more or less, Wolfcamp horizontal spacing unit.

---

<sup>1</sup> This application amends the application in Case 23850.

3. Franklin plans to drill the **Parallel State Com 704H and Parallel State Com 804H wells** to a depth sufficient to test the Wolfcamp formation. The Parallel State Com 704H well will be horizontally drilled from a proposed surface hole location in the NE/4NE/4 (Unit A) of Section 35 to a proposed bottom hole location in the SE/4SE/4 (Unit P) of Section 2, and the Parallel State Com 804H will be horizontally drilled from a proposed surface hole location in the NW/4NE/4 (Unit B) of Section 35 to a proposed bottom hole location in the SE/4SE/4 (Unit P) of Section 2. The producing area for the wells is expected to be orthodox.

4. Franklin filed Case No. 23850 on September 5, 2023, in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice that the unit proposed in that application would “partially overlap a spacing unit in Section 35, Township 18 South, Range 34 E.” Application Case No. 23850, ¶ 4.

5. Franklin is filing this amended application, to the extent necessary, to provide notice that the spacing unit proposed in this application will partially overlap a proposed 360-acre, more or less, Wolfcamp horizontal spacing unit comprising the E/2E/2 of Sections 23 and 26, and the NE/NE of Section 35, Township 18 South, Range 34 East, N.M.P.M., Lea County, New Mexico, dedicated to Franklin’s proposed Gold State Com 704 and 804H wells.

6. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Wolfcamp formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

7. The pooling of all interests in the Wolfcamp formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

8. Case No. 23850 is currently set for contested hearing on April 9, 2024.

9. Franklin requests that this case be set for a status conference on April 4, 2024 and then set for contested hearing on April 9, 2024.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division and after notice and hearing as required by law, the Division enter its order:

A. Pooling all uncommitted interests in the Wolfcamp formation underlying a horizontal spacing unit within the E/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 1, the SE/NE, and E/2SE of Section 2 (the equivalent of the E/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico;

B. Approving, to the extent necessary, the proposed overlapping spacing unit;

C. Designating Franklin as operator of this unit and the wells to be drilled thereon;

D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;

E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and

F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Franklin Mountain Energy 3, LLC (“Franklin”), OGRID Number 331595, through its undersigned attorneys, hereby files this amended application<sup>1</sup> with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 324.02-acre, more or less, Wolfcamp horizontal spacing unit comprising the E/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 3, the SE/NW, and E/2SW of Section 2 (the equivalent of the E/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Franklin seeks to dedicate the E/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 3, the SE/NW, and E/2SW of Section 2 (the equivalent of the E/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico to form a standard 324.02-acre, more or less, Wolfcamp horizontal spacing unit.

---

<sup>1</sup> This application amends the application filed in Case No. 23845.

3. Franklin plans to drill the **Parallel State Com 702H and Parallel State Com 802H wells** to a depth sufficient to test the Wolfcamp formation. The wells will be horizontally drilled from proposed surface hole locations in the NE/4NW/4 (Unit C) of Section 35 to proposed bottom hole locations in the SE/4SW/4 (Unit N) of Section 2, and the producing area for the wells is expected to be orthodox.

4. Franklin filed Case No. 23845 on September 5, 2023, in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice that the unit proposed in that application would “partially overlap a spacing unit in Section 35, Township 18 South, Range 34 E.” Application Case No. 23845, ¶ 4.

5. Franklin is filing this amended application, to the extent necessary, to provide notice that the spacing unit proposed in this application will partially overlap a proposed 280-acre more or less Wolfcamp spacing unit comprising the E/2/SW of Section 23, the E/2W/2 of Section 26, and the NE/NW of Section 35, Township 18 South, Range 34 East, N.M.P.M., Lea County, New Mexico, dedicated to Franklin’s proposed Gold State Com 702 and 802H wells.

6. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Wolfcamp formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

7. The pooling of all interests in the Wolfcamp formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

8. Case No. 23845 is currently set for contested hearing on April 9, 2024.

9. Franklin requests that this case be set for a status conference on April 4, 2024 and then set for contested hearing on April 9, 2024.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division and after notice and hearing as required by law, the Division enter its order:

A. Pooling all uncommitted interests in the Wolfcamp formation underlying a horizontal spacing unit within the E/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 3, the SE/NW, and E/2SW of Section 2 (the equivalent of the E/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico;

B. Approving, to the extent necessary, the proposed overlapping spacing unit;

C. Designating Franklin as operator of this unit and the wells to be drilled thereon;

D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;

E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and

F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

The wells will be horizontally drilled, from a proposed surface hole location in the NE/4NW/4 (Unit C) of Section 35 to a proposed bottom hole location in the SW/4 SW/4 (Unit M) of Section 2; and the producing area for the wells is expected to be orthodox.

4. Franklin filed Case No. 23848 on September 5, 2023, in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice that the unit proposed in that application would “partially overlap a spacing unit in Section 35, Township 18 South, Range 34 E.” Application Case No. 23848, ¶ 4.

5. On December 1, 2023, the Division issued Order R-22971, which pooled uncommitted interests in a Bone Spring spacing unit comprised of the W/2SW/4 of Section 23, the W/2W/2 of Section 26, and the NW/4NW/4 of Section 35, Township 18 South, Range 34 East, Lea County, NM.

6. That unit is dedicated to Franklin Mountain Energy 3, LLC’s Gold State Com 301H well (API 30-0025-51666) and Gold State 601H (API 30-0025-51667) wells.

7. Franklin is filing this amended application, to the extent necessary, to provide notice that the spacing unit proposed in this application will partially overlap the Gold State Com Bone Spring spacing unit described above.

8. Franklin’s proposed spacing unit in this case will also partially overlap existing Bone Spring spacing units as follows:

- a. A 160-acre Bone Spring horizontal well spacing unit comprised of the N/2S/2 of Section 35 dedicated to Franklin Mountain’s Butter Cup 35 State Com 2H well (API 30-05-40642).

- b. A 160-acre Bone Spring horizontal well spacing unit comprised of the S/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 1H well (API 30-05-40634).
  - c. A 164.13-acre Bone Spring horizontal well spacing unit comprised of the W2W2 of Section 2 dedicated to Franklin Mountain's Playa 2 State #002H (API 30-025-40549).
9. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.
10. The pooling of all interests in the Bone Spring formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.
11. Case No. 23848 is currently set for contested hearing on April 9, 2024.
12. Franklin requests that this case be set for a status conference on April 4, 2024 and then set for a contested hearing on April 9, 2024.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter its order:

- A. Pooling all uncommitted interests in the Bone Spring formation underlying a horizontal spacing unit within the W/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 4, the SW/NW, and W/2SW of Section 2 (the equivalent of the W/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico;
- B. Approving, to the extent necessary, the proposed overlapping spacing unit;

- C. Designating Franklin as operator of this unit and the wells to be drilled thereon;
- D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;
- E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

APPLICATION OF FRANKLIN MOUNTAIN  
ENERGY 3, LLC FOR COMPULSORY POOLING  
AND, TO THE EXTENT NECESSARY, APPROVAL OF AN  
OVERLAPPING SPACING UNIT,  
LEA COUNTY, NEW MEXICO

CASE NO. 24362

APPLICATION

Franklin Mountain Energy 3, LLC (“Franklin”), OGRID Number 331595, through its undersigned attorneys, hereby files this amended application<sup>1</sup> with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 323.91-acre, more or less, Wolfcamp horizontal spacing unit comprising the W/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 2, the SW/NE, and W/2SE of Section 2 (the equivalent of the W/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Franklin seeks to dedicate the W/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 2, the SW/NE, and W/2SE of Section 2 (the equivalent of the W/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico to form a standard 323.91-acre, more or less, Wolfcamp horizontal spacing unit.

---

<sup>1</sup> This application amends the application filed in Case No. 23852.

3. Franklin plans to drill the **Parallel State Com 703H and Parallel State Com 803H wells** to a depth sufficient to test the Wolfcamp formation and the producing area for the wells is expected to be orthodox. The Parallel State Com 703H well will be horizontally drilled from a proposed surface hole location in the NE/4NE/4 (Unit A) of Section 35 to a proposed bottom hole location in the SW/4SE/4 (Unit O) of Section 2, and the Parallel State Com 803H well will be horizontally drilled from a proposed surface hole location in the NW/4NE/4 (Unit B) of Section 35 to a proposed bottom hole location in the SW/4SE/4 (Unit O) of Section 2.

4. Franklin filed Case No. 23852 on September 5, 2023, in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice that the unit proposed in that application would “partially overlap a spacing unit in Section 35, Township 18 South, Range 34 E.” Application Case No. 23852, ¶ 4.

5. Franklin is filing this amended application, to the extent necessary, to provide notice that the spacing unit proposed in this application will partially overlap a 360-acre, more or less, Wolfcamp horizontal spacing unit comprising the W/2E/2 of Sections 23 and 26, and the NW/NE of Section 35, Township 18 South, Range 34 East, N.M.P.M., Lea County, New Mexico dedicated to Franklin’s proposed Gold State Com 703H and Gold State Com 803H wells.

6. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Wolfcamp formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

7. The pooling of all interests in the Wolfcamp formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

8. Case No. 23852 is currently set for contested hearing on April 9, 2024.

9. Franklin requests that this case be set for a status conference on April 4, 2024 and then set for contested hearing on April 9, 2024.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division and after notice and hearing as required by law, the Division enter its order:

A. Pooling all uncommitted interests in the Wolfcamp formation underlying a horizontal spacing unit within the W/2E/2 of Section 35, Township 18 South, Range 34 East, and Lot 2, the SW/NE, and W/2SE of Section 2 (the equivalent of the W/2E/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico;

B. Approving, to the extent necessary, the proposed overlapping spacing unit;

C. Designating Franklin as operator of this unit and the wells to be drilled thereon;

D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;

E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and

F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Franklin seeks to dedicate the W/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 4, the SW/NW, and W/2SW of Section 2 (the equivalent of the W/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico to form a standard 324.13-acre, more or less, Bone Spring horizontal spacing unit.

---

<sup>1</sup> This application amends the application filed in Case No. 23848.

3. Franklin plans to drill the **Parallel State Com 301H and Parallel State Com 501H wells** to a depth sufficient to test the Bone Spring formation. The wells will be horizontally drilled, from a proposed surface hole location in the NE/4NW/4 (Unit C) of Section 35 to a proposed bottom hole location in the SW/4 SW/4 (Unit M) of Section 2; and the producing area for the wells is expected to be orthodox.

4. Franklin filed Case No. 23848 on September 5, 2023, in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice that the unit proposed in that application would “partially overlap a spacing unit in Section 35, Township 18 South, Range 34 E.” Application Case No. 23848, ¶ 4.

**CASE NO. 24354** : **Application of Franklin Mountain Energy 3, LLC for compulsory pooling and, to the extent necessary, approval of an overlapping spacing unit, Lea County, New Mexico.** Applicant seeks an order from the Division pooling all uncommitted mineral interests within a 324.13-acre, more or less, Bone Spring horizontal spacing unit comprising the W/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 4, the SW/NW, and W/2SW of Section 2, Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the **Parallel State Com 301H and Parallel State Com 501H wells**, to be horizontally drilled, from a proposed surface hole location in the NE/4NW/4 (Unit C) of Section 35 to a proposed bottom hole location in the SW/4SW/4 (Unit M) of Section 2. The producing area for the wells is expected to be orthodox. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. The proposed horizontal spacing unit will partially overlap a 280-acre horizontal spacing unit W/2SW/4 of Section 23, the W/2W/2 of Section 26, and the NW/4NW/4 of Section 35, Township 18 South, Range 34 East dedicated to Franklin Mountain Energy 3, LLC's Gold State Com 301H well (API 30-0025-51666) and Gold State 601H (API 30-0025-51667) wells. Franklin's proposed spacing unit in this case will also partially overlap the following Bone Spring spacing units: A 160-acre Bone Spring horizontal well spacing unit comprised of the N/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 2H well (API 30-05-40642); a 160-acre Bone Spring horizontal well spacing unit comprised of the S/2S/2 of Section 35 dedicated to Franklin Mountain's Butter Cup 35 State Com 1H well (API 30-05-40634); and a 164.13-acre Bone Spring horizontal well spacing unit comprised of the W2W2 of Section 2 dedicated to Franklin Mountain's Playa 2 State #002H (API 30-025-40549). Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Franklin Mountain Energy 3, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 24 miles west of Hobbs, New Mexico.

APPLICATION OF FRANKLIN MOUNTAIN  
ENERGY 3, LLC FOR COMPULSORY POOLING  
AND, TO THE EXTENT NECESSARY, APPROVAL  
OF OVERLAPPING SPACING UNIT,  
LEA COUNTY, NEW MEXICO

CASE NO. 24355

APPLICATION

Franklin Mountain Energy 3, LLC (“Franklin”), OGRID Number 331595, through its undersigned attorneys, hereby files this amended application<sup>1</sup> with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests within a 324.02-acre, more or less, Bone Spring horizontal spacing unit comprising the E/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 3, the SE/NW, and E/2SW of Section 2 (the equivalent of the E/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico. Franklin also seeks, to the extent necessary, approval of an overlapping spacing unit. In support of this application, Franklin states as follows:

1. Franklin has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Franklin seeks to dedicate the E/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 3, the SE/NW, and E/2SW of Section 2 (the equivalent of the E/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico to form a standard 324.02-acre, more or less, Bone Spring horizontal spacing unit.

---

<sup>1</sup> This application amends the application filed in Case No. 23847.

3. Franklin plans to drill the **Parallel State Com 302H and Parallel State Com 502H wells** to a depth sufficient to test the Bone Spring formation. The wells will be horizontally drilled from proposed surface hole locations in the NE/4NW/4 (Unit C) of Section 35 to proposed bottom hole locations in the SE/4SW/4 (Unit N) of Section 2, and the producing area for the wells is expected to be orthodox.

4. Franklin filed Case No. 23847 on September 5, 2023, in which Franklin requested that uncommitted mineral interests in the above described unit be pooled. In that case, Franklin also provided notice that the unit proposed in that application would “partially overlap a spacing unit in Section 35, Township 18 South, Range 34 E.” Application Case No. 23847, ¶ 4.

5. Franklin is filing this amended application, to the extent necessary, to provide notice that the spacing unit proposed in this application will partially overlap a proposed 280-acre more or less Bone Spring spacing unit comprising the E/2/SW of Section 23, the E/2W/2 of Section 26, and the NE/NW of Section 35, Township 18 South, Range 34 East, N.M.P.M., Lea County, New Mexico, dedicated to Franklin’s proposed Gold State Com 502 and 602H wells.

6. Franklin’s proposed spacing unit in this case will partially overlap existing Bone Spring spacing units as follows:

- a. A 160-acre Bone Spring horizontal well spacing unit comprised of the N/2S/2 of Section 35 dedicated to Franklin Mountain’s Butter Cup 35 State Com 2H well (API 30-05-40642).
- b. A 160-acre Bone Spring horizontal well spacing unit comprised of the S/2S/2 of Section 35 dedicated to Franklin Mountain’s Butter Cup 35 State Com 1H well (API 30-05-40634).

c. A 164.02-acre Bone Spring horizontal well spacing unit comprised of the E2W2 of Section 2 dedicated to Franklin Mountain's Playa 2 State #001H (API 30-025-40405).

7. Franklin sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed spacing unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

8. The pooling of all interests in the Bone Spring formation underlying the proposed unit and approving, to the extent necessary, the overlapping spacing unit will prevent the drilling of unnecessary wells, prevent waste and protect correlative rights.

9. Case No. 23847 is currently set for contested hearing on April 9, 2024.

10. Franklin requests that this case be set for a status conference on April 4, 2024 and then set for contested hearing on April 9, 2024.

WHEREFORE, Franklin requests this application be set for hearing before an Examiner of the Oil Conservation Division and after notice and hearing as required by law, the Division enter its order:

A. Pooling all uncommitted interests in the Bone Spring formation underlying a horizontal spacing unit within the E/2W/2 of Section 35, Township 18 South, Range 34 East, and Lot 3, the SE/NW, and E/2SW of Section 2 (the equivalent of the E/2W/2 of Section 2), Township 19 South, Range 34 East, N.M.P.M., Lea County, New Mexico;

B. Approving, to the extent necessary, the proposed overlapping spacing unit;

C. Designating Franklin as operator of this unit and the wells to be drilled thereon;

D. Authorizing Franklin to recover its costs of drilling, equipping and completing the wells;

E. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and

F. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.
