**APPLICANT'S STATEMENT OF THE CASE**

In these consolidated cases, Applicant filed for approval of overlapping spacing units and compulsory pooling. However, due to notice issues, Applicant is dismissing the request for approval of overlapping spacing units and intends to pursue that relief administratively. Application therefore seeks orders pooling all uncommitted interests in Bone Spring formation underlying Section 34, Township 18 South, Range 34 East, and Section 3, Township 19 South, Ranger 34 East, NMPM, Lea County, New Mexico, as follows:

- **Case 24287** seeks to pool a standard 320-acre horizontal well spacing unit in the Bone Spring formation underlying the W2W2 of Sections 34 and 3 to be initially dedicated to the proposed **Art Smith State Com 121H** well to be horizontally drilled from a surface location in the NW4 of Section 34, with a first take point in the NW4NW4 (Unit D) of Section 34 and a last take point in the SW4SW4 (Unit M) of Section 3.
- **Case 24288** seeks to pool a standard 320-acre horizontal well spacing unit in the Bone Spring formation underlying the E2W2 of Sections 34 and 3 to be initially dedicated to the proposed **Art Smith State Com 122H** well to be horizontally drilled from a surface location in the NW4 of Section 34, with a first take point in the NE4NW4 (Unit C) of Section 34 and a last take point in the SE4SW4 (Unit N) of Section 3.
- **Case 24289** seeks to pool a standard 320-acre horizontal well spacing unit in the Bone Spring formation underlying the W2E2 of Sections 34 and 3 to be initially dedicated to the proposed **Art Smith State Com 127H** well to be horizontally drilled from a surface location in the SE4 of Section 27, with a first take point in the

NW4NE4 (Unit B) of Section 34 and a last take point in the SW4SE4 (Unit O) of Section 3.

- **Case 24290** seeks to pool a standard 320-acre horizontal well spacing unit in the Bone Spring formation underlying the E2E2 of Sections 34 and 3 to be initially dedicated to the proposed **Art Smith State Com 128H** well to be horizontally drilled from a surface location in the SE4 of Section 27, with a first take point in the NE4NE4 (Unit A) of Section 34 and a last take point in the SE4SE4 (Unit P) of Section 3.
- **Case 24291** seeks to pool a standard 160-acre horizontal well spacing unit in the Bone Spring formation underlying the W2W2 of Section 34 to be initially dedicated to the proposed **Art Smith State Com 131H** well to be horizontally drilled from a surface location in the NW4 of Section 34, with a first take point in the NW4NW4 (Unit D) and a last take point in the SW4SW4 (Unit M) of Section 34.
- **Case 24292** seeks to pool a standard 160-acre horizontal well spacing unit in the Bone Spring formation underlying the E2W2 of Section 34 to be initially dedicated to the proposed **Art Smith State Com 132H** well to be horizontally drilled from a surface location in the NW4 of Section 34, with a first take points in the NE4NW4 (Unit C) and a last take point in the SE4SW4 (Unit N) of Section 34.

Applicant seeks to have Matador Production Company (OGRID No. 228937) designated as the operator of these proposed spacing units. Applicant has sought but been unable to obtain voluntary agreement for development of this acreage from all affected mineral interest owners.

**APPLICANT’S PROPOSED EVIDENCE**

<b>WITNESS Name and Expertise</b>	<b>ESTIMATED TIME</b>	<b>EXHIBITS</b>
Isaac Evans, Landman	Self-Affirmed Statement	Approx. 5
Andrew Parker, Geologist	Self-Affirmed Statement	Approx. 3

**PROCEDURAL MATTERS**

Due to notice issues, Applicant has dismissed the requests for approval of overlapping horizontal well spacing units and intends to pursue that relief administratively. Applicant has also reduced the number of initial wells in the proposed spacing units and dismissed Case 24293. Applicant intends to present these remaining cases in a consolidated fashion by self-affirmed statements if there is no opposition at the time of hearing.

Respectfully submitted,

HOLLAND & HART LLP
