CASE NO. 25002

**SELF-AFFIRMED STATEMENT
OF KRISTEEN RAMOS**

1. I am a landman with BTA Oil Producers, LLC ("BTA"). I am over 18 years of age, have personal knowledge of the matters addressed herein, and am competent to provide this Self-Affirmed Statement. I have previously testified before the New Mexico Oil Conservation Division ("Division") and my credentials as an expert in land matters were accepted as a matter of record.

2. I am familiar with the land matters involved in the above-referenced case. Copies of BTA's application and proposed hearing notice are attached as **Exhibit A-1**.

3. None of the parties proposed to be pooled in this case indicated opposition to this matter proceeding by affidavit, therefore I do not expect any opposition at hearing.

4. BTA seeks an order pooling all uncommitted interests in the Pennsylvanian Shale formation underlying a 640 acre, more or less, non-standard horizontal spacing unit comprised of the W/2 SW/4 of Section 12, W/2 W/2 of Section 13, W/2 NW/4 of Section 24, E/2 SE/4 of Section 11, E/2 E/2 of Section 14, and the E/2 NE/4 of Section 23, Township 17 South, Range 35 East, Lea County, New Mexico ("Unit").

5. The Unit will be dedicated to the following wells ("Wells"):

- a. **Box Elder 22115 24-13-12 State Com #3H**, which will be drilled from a surface hole location in the SW/4 NW/4 (Unit E) of Section 24 to a bottom hole location in the NW/4 SW/4 (Unit L) of Section 12; and

**BTA Oil Producers, LLC
Case No. 25002
Exhibit A**

- b. **Box Elder 22115 23-14-11 State Com #4H**, which will be drilled from a surface hole location in the SW/4 NW/4 (Unit E) of Section 24 to a bottom hole location in the NE/4 SE/4 (Unit I) of Section 11.
6. The completed interval of the Wells will be orthodox.
7. **Exhibit A-2** contains the C-102s for the Wells.
8. **Exhibit A-3** contains a plat identifying ownership by tract in the Unit. This exhibit also includes any applicable lease numbers, a unit recapitulation, and the interest BTA seeks to pool highlighted in yellow. BTA seeks to pool five parties and those parties are locatable.
9. BTA has conducted a diligent search of all county public records, including phone directories and computer databases, and also used the Accurint subscription service, to locate interest owners.
10. **Exhibit A-4** is a map that depicts the non-standard spacing unit in relation to the outline of a standard spacing unit. The map also identifies the interest owners in the tracts surrounding the proposed Unit, who were provided notice of BTA's application.
11. BTA's request for approval of a non-standard spacing unit will allow it to consolidate surface facilities and will consequently prevent surface, environmental, and economic waste.
- a. The non-standard unit will allow BTA to minimize surface use. Centralizing equipment for facilities for the Wells will reduce the total acreage needed for surface facilities by 4 acres of the total amount that would be necessary absent a non-standard unit.
- b. Surface facilities and equipment, pipelines, and rights-of-way for one well cost approximately \$4,500,000.00. While the centralized facilities will be larger, so

that they may handle production from multiple wells, I estimate the overall savings, if a non-standard unit is approved, will be approximately \$4,000,000.00. This will reduce the overall well costs and improve economics for the wells.

- c. A common facility also reduces the number of flares BTA may need to use in the case of emergency from 4 to 2. Additionally, the VOC reduction is nearly 50%.

As a result, approval of a non-standard spacing unit is necessary to prevent waste and protect correlative rights.

12. **Exhibit A-5** contains a sample well proposal letter and AFEs sent to the working interest owners in the Wells. The estimated costs reflected on the AFEs are fair and reasonable and comparable to the cost of other wells of similar depth and length drilled in the subject formation in the area.

13. In my opinion, BTA made a good-faith effort to reach voluntary joinder of uncommitted interests in the Wells as shown by the chronology of contacts provided in **Exhibit A-6**.

14. BTA requests overhead and administrative rates of \$12,000 per month while the Wells are being drilled and \$1,200 per month while the Wells are producing. These rates are fair and are comparable to the rates charged by BTA and other operators in the vicinity.

15. The attached exhibits were either prepared by me or under my supervision or were compiled from company business records.

16. In my opinion, the granting of BTA's application will serve the interests of conservation, the protection of correlative rights, and the prevention of waste.

17. I understand this Self-Affirmed Statement will be used as written testimony in this case. I affirm that my testimony above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date handwritten next to my signature below.

APPLICATION

In accordance with NMSA § 70-2-17 and NMAC 19.15.16.15(B)(5), BTA Oil Producers, LLC (OGRID No. 260297) (“BTA” or “Applicant”) applies for an order pooling all uncommitted interests in the Pennsylvanian Shale formation underlying a 640 acre, more or less, non-standard horizontal spacing unit comprised of the W/2 SW/4 of Section 12, W/2 W/2 of Section 13, W/2 NW/4 of Section 24, E/2 SE/4 of Section 11, E/2 E/2 of Section 14, and the E/2 NE/4 of Section 23, Township 17 South, Range 35 East, Lea County, New Mexico (“Unit”). In support of this application, BTA states the following:

1. Applicant is a working interest owner in the Unit and has the right to drill wells thereon.
2. The Unit will be dedicated to the following wells (“Wells”):
 - a. **Box Elder 22115 24-13-12 State Com #3H**, which will be drilled from a surface hole location in the SW/4 NW/4 (Unit E) of Section 24 to a bottom hole location in the NW/4 SW/4 (Unit L) of Section 12; and
 - b. **Box Elder 22115 23-14-11 State Com #4H**, which will be drilled from a surface hole location in the SW/4 NW/4 (Unit E) of Section 24 to a bottom hole location in the NE/4 SE/4 (Unit I) of Section 11.
3. The completed intervals of the Wells will be orthodox.
4. Approval of a non-standard horizontal spacing unit is necessary to prevent waste

**BTA Oil Producers, LLC

and protect correlative rights.

5. Applicant has undertaken diligent, good-faith efforts to obtain voluntary agreements from all interest owners to participate in the drilling of the Wells but has been unable to obtain voluntary agreements from all interest owners.

6. The pooling of uncommitted interests will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

7. In order to allow Applicant to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interest in the Unit should be pooled and Applicant should be designated as operator of the Wells and Unit.

WHEREFORE, Applicant requests that this application be set for hearing before an Examiner of the Oil Conservation Division on January 9, 2025, and, after notice and hearing as required by law, the Division enter an order:

- A. Approving a non-standard horizontal spacing unit pursuant to 19.15.16.15(B)(5) NMAC;
- B. Pooling all uncommitted interests in the Unit;
- C. Approving the Wells in the Unit;
- D. Designating Applicant as operator of the Unit and the Wells to be drilled thereon;
- E. Authorizing Applicant to recover its costs of drilling, equipping and completing the Wells;
- F. Approving the actual operating charges and costs of supervision while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

- G. Imposing a 200% penalty for the risk assumed by Applicant in drilling and completing the Wells against any working interest owner who does not voluntarily participate in the drilling of the Wells.

**APPLICATION OF BTA OIL PRODUCERS, LLC
FOR COMPULSORY POOLING AND APPROVAL
OF NON-STANDARD SPACING UNIT,
LEA COUNTY, NEW MEXICO**

CASE NO. 25002

**SELF-AFFIRMED STATEMENT
OF J.T. TRUONG**

1. I am employed by BTA Oil Producers, LLC ("BTA") as a geologist. I am over 18 years of age, have personal knowledge of the matters addressed herein, and am competent to provide this Self-Affirmed Statement. I have previously testified before the New Mexico Oil Conservation Division ("Division") and my credentials as an expert in geology were accepted and made a matter of record.

1. I am familiar with the geological matters that pertain to the above-referenced case.

2. **Exhibit B-1** is a project location map that shows the location of the proposed **Box Elder 22115 24-13-12 State Com #3H** and **Box Elder 22115 23-14-11 State Com #4H** wells ("Wells").

3. BTA is targeting the Pennsylvanian Shale Formation. **Exhibit B-2** is a subsea structure map that I prepared for this interval with 100-foot contours. The proposed horizontal well spacing unit is highlighted in red and the initial well is depicted with a black dashed line. Existing producing wells in the Pennsylvanian Shale Formation interval are represented by solid orange lines. The structure map shows the Pennsylvanian Shale Formation. The structure appears consistent across the proposed spacing unit and I do not observe any faulting, pinch outs, or other geologic impediments to drilling horizontal wells in this area.

**BTA Oil Producers, LLC
Case No. 25002
Exhibit B**

4. **Exhibit B-2** also shows a cross-section line in blue running North to South reflecting three wells penetrating the Pennsylvanian Shale Formation that I used to construct a stratigraphic cross-section from A to A'. These wells contain good logs and I consider them representative of the geology in the subject area.

5. **Exhibit B-3** is a stratigraphic cross-section that I prepared using the logs from the three wells noted on Exhibit B-2. Each well in the cross-section contains the gamma ray in the first track and resistivity in the second track. The initial target interval is labeled and marked. The cross-section demonstrates that the targeted interval is continuous across the proposed spacing unit.

6. **Exhibit B-4** is a Gross Isopach map of the Pennsylvanian Shale Formation interval. The proposed horizontal well spacing unit is highlighted in red and the initial well is depicted with a red dashed line. Existing producing wells in the Pennsylvanian Shale Formation are represented by solid orange lines. The anticipated gross thickness of the Pennsylvanian Shale Formation interval is 350 to 450 ft. The gross isopach map demonstrates that the Pennsylvanian Shale Formation interval is present across the proposed spacing unit. The location of the previous cross-section from A-A' in Exhibit B-2 is also shown as a brown line on this map.

7. In my opinion, a stand-up orientation for the wells is appropriate to properly develop the subject acreage because of an established directional pattern and the known fracture orientation in this portion of the trend. Stand-up orientation is also supported by a study of the production of stand-up vs laydown orientation in the area, with stand-up well results being significantly better.

8. Based on my geologic study, the Pennsylvanian Shale Formation underlying the subject area is suitable for development by horizontal wells and the acreage comprising the

proposed spacing unit will be productive and contribute proportionately to the production from the wells.

9. In my opinion, the granting of BTA's application will serve the interests of conservation, the protection of correlative rights, and the prevention of waste.

10. The exhibits attached hereto were either prepared by me or under my supervision or were compiled from company business records.

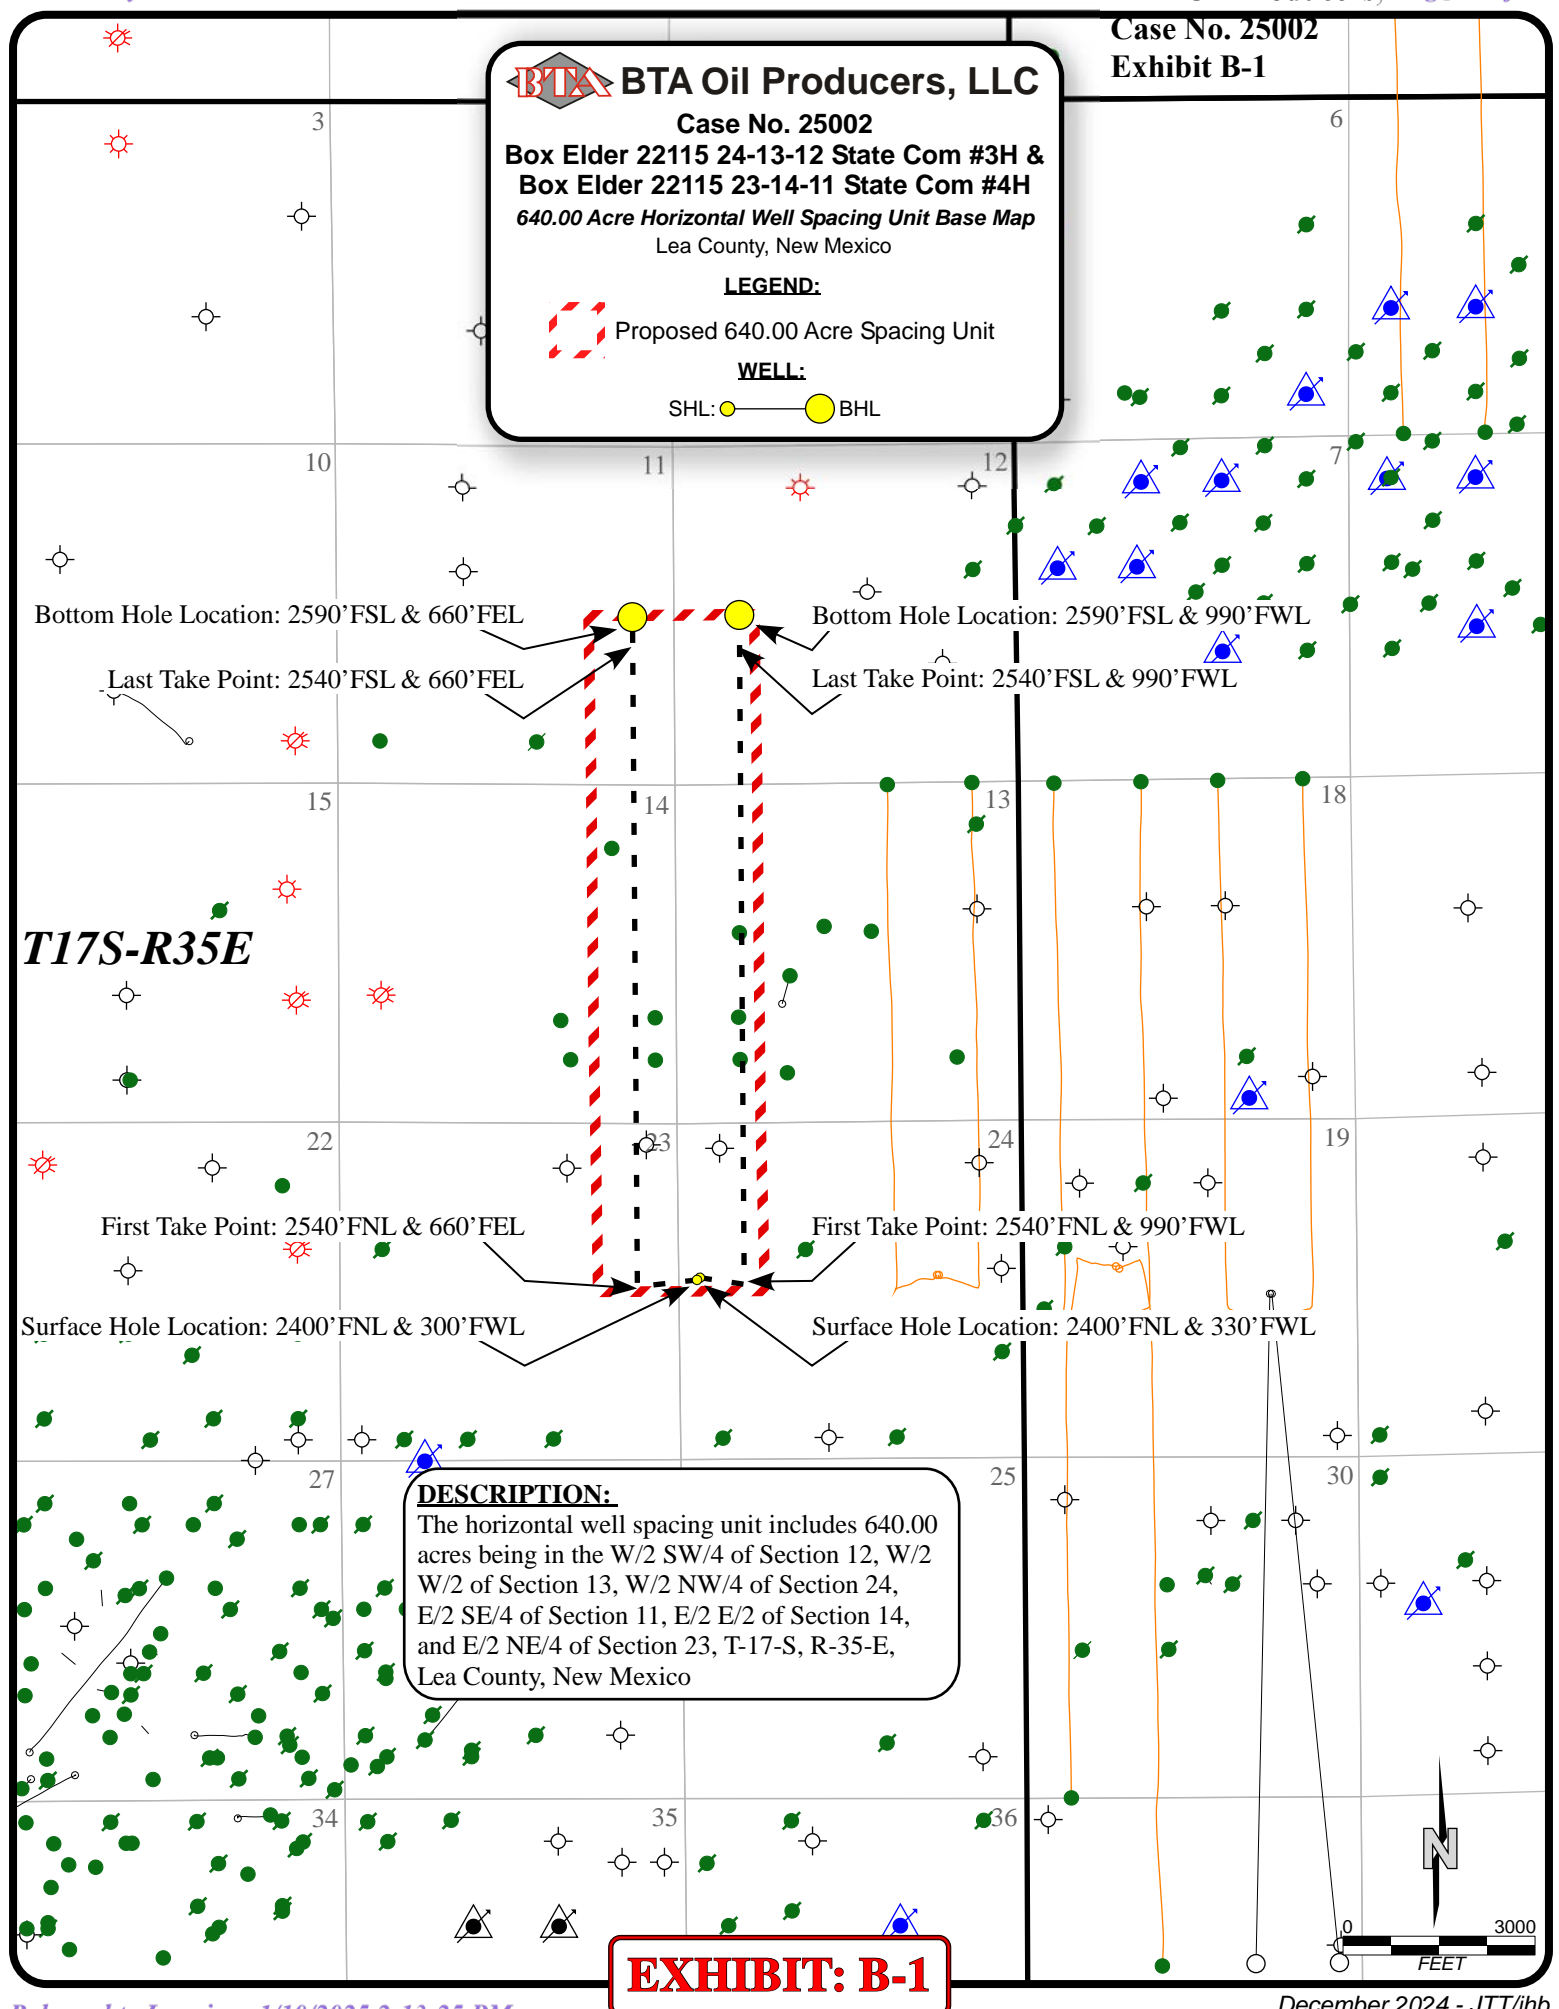

11. I understand this Self-Affirmed Statement will be used as written testimony in this case. I affirm my testimony above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date identified next to my signature below.
