APPLICANT’S STATEMENT OF THE CASE

Under these consolidated cases, Permian seeks orders pooling in the Bone Spring formation (Esperanza; Bone Spring [97755]) for the referenced acreage, all in Township 22 South, Range 26 East, NMPM, Eddy County, New Mexico, as follows:

- Under **Case No. 25136**, Permian seeks to pool the uncommitted interests underlying a standard 642.24-acre, more or less, horizontal well spacing unit comprised of Lots 1-4 and the S/2 N/2 (N/2 equivalent) of irregular Sections 1 and 2, and initially dedicate this spacing unit to the proposed **Water Buffalo #131H**

well, to be horizontally drilled from a surface location in the NE/4 SE/4 (Unit I) of irregular Section 3, with a first take point in Lot 4 (NW/4 NW/4 equivalent) of irregular Section 2, and a last take point in Lot 1 (NE/4 NE/4 equivalent) of irregular Section 1; and

- Under **Case No. 25137**, Permian seeks to pool the uncommitted interest underlying a standard 640-acre, more or less, horizontal well spacing unit comprised of the S/2 of irregular Sections 1 and 2, and initially dedicate this spacing unit to the proposed **Water Buffalo #133H** well, to be horizontally drilled from a surface location in the NE/4 SE/4 (Unit I) of irregular Section 3, with a first take point in the NW/4 SW/4 (Unit L) of irregular Section 2, and a last take point in the NE/4 SE/4 (Unit I) of irregular Section 1.

The completed interval for each of the wells is expected to remain within 330 feet of the adjoining quarter-quarter section (or equivalent) tracts to allow inclusion of proximity tracts within the proposed horizontal spacing units under 19.15.16.15.B(1)(b) NMAC.

The completed interval for each well will comply with statewide setbacks for oil wells. Permian has sought and been unable to obtain voluntary agreement for the development of these lands from all working interest owners in the subject acreage.
