STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF COG OPERATING LLC FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO.

CASE NO. 25139

APPLICATION

COG Operating LLC ("COG" or "Applicant") (OGRID No. 229137), through its undersigned attorneys, files this application with the Oil Conservation Division, pursuant to the provisions of NMSA 1978, Section 70-2-17, for an order pooling all uncommitted interests in the Bone Spring Formation underlying a standard 480.72-acre, more or less, horizontal well spacing unit comprised of Lots 1-4 of Section 19, Lots 1-4 of Section 30, and Lots 1-4 of Section 31 (the W/2W/2), Township 25 South, Range 35 East, NMPM, Lea County, New Mexico. In support of this application, COG states:

1. Applicant is a working interest owner in the proposed horizontal spacing unit and has the right to drill thereon.

2. Applicant seeks to dedicate the above-referenced horizontal spacing unit to the Fairview Mills; Bone Spring (Code 96340) Pool.

3. COG seeks to dedicate to the horizontal spacing unit the **Pitchblende 19-30 Federal Com 602H** to be horizontally drilled from a surface location in the NW4NW4 (Unit D) of Section 19, with first take point in the NW4NW4 (Unit D) of Section 19 and last take point in the SW4SW4 (Unit M) of Section 31.

4. Applicant and its affiliates are the sole working interest owners and record title owner in this proposed unit but seeks a pooling order to commit certain non-costbearing owners, including overriding royalty owners, which have yet to ratify the

1

necessary federal communitization agreement which would voluntarily pool their interests.

5. The pooling of interests in the proposed unit will allow Applicant to obtain a just and fair share of the oil and gas underlying the subject lands, avoiding the drilling of unnecessary wells, will prevent waste, and will protect correlative rights.

WHEREFORE, Applicant requests that this application be set for hearing before an Examiner of the Oil Conservation Division on February 13, and, after notice and hearing as required by law, the Division enter an order:

- A. Approve the standard horizontal well spacing unit and pooling the interests of certain uncommitted non-cost bearing owners therein; and
- B. Designating Applicant as the operator of this spacing unit and the horizontal well to be drilled thereon.

Respectfully submitted,

By: <u>/s/ Keri Hatley</u>

Elizabeth Ryan Keri Hatley ConocoPhillips 1048 Paseo de Peralta Santa Fe, New Mexico 87501 (505) 780-8000 beth.ryan@conocophillips.com keri.hatley@conocophillips.com

Attorneys for COG Operating LLC

CASE 25139: Application of COG Operating LLC for Compulsory Pooling, Lea County, New Mexico. Applicant in the above style cause seeks an order pooling a standard 480.72-acre, more or less, horizontal well spacing unit in the Bone Spring Formation underlying the W/2W/2 Sections 19, 30 and 31, Township 25 South, Range 35 East, NMPM, Lea County, New Mexico. Applicant seeks to initially dedicate the abovereferenced spacing unit the proposed Pitchblende 19-30 Federal Com No. 602H well to be horizontally drilled from a surface location in the NW/4NW/4 (Unit D) Sec. 19, with first take point also in the NW4NW4 (Unit D) of Sec. 19 and last take point in the SW4SW4 (Unit M) of Section 31. Also to be considered is the designation of COG Operating LLC as the operator of the proposed spacing unit. The subject area is located approximately 14 miles west of Jal, New Mexico.

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF COG OPERATING LLC FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO.

CASE NO. 25139

SELF-AFFIRMED STATEMENT OF CAROLINE FREDERICK

1. My name is Caroline Frederick and I am a Landman with COG Operating LLC ("COG"), now a wholly-owned subsidiary of ConocoPhillips Company.

2. I have not previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum land matters. My credentials as a petroleum landman are attached to this statement and I am seeking to become certified as an expert witness in petroleum land matters by the Division.

3. I am familiar with the application filed by COG in this case and the status of the lands in the subject area.

4. In Case No. 25139, COG seeks to pool uncommitted interests in the Bone Spring formation underlying a standard 480.72-acre, more or less, horizontal well spacing unit comprised of Lots 1-4 of Section 19, Lots 1-4 of Section 30, and Lots 1-4 of Section 31 (the W/2W/2), Township 25 South, Range 35 East, NMPM, Lea County, New Mexico and dedicate the unit to the proposed **Pitchblende 19-30 Federal Com 602H** (API No. 30-025-53697) to be horizontally drilled from a surface location in the NW/4NW/4 (Unit D) of Section 19, with first take point in the NW/4NW/4 (Unit D) of Section 19, and last take point in the SW/4SW/4 (Unit M) of Section 31.

> BEFORE THE OIL CONSERVATION DIVISION Santa Fe, New Mexico Exhibit No. C Submitted by: COG Operating LLC Hearing Date: February 13, 2025 Case No. 25139

Received by OCD: 2/6/2025 1:58:54 PM

5. **COG Exhibit C-1** contains the C-102 for the proposed well. The well is dedicated to the Fairview Mills; Bone Spring (Code 96340) Pool. The completed interval for the well will comply with statewide setbacks for oil wells.

6. **COG Exhibit C-2** identifies the tracts of land comprising the proposed spacing unit and associated lease numbers, which consists of federal acreage.

7. **COG Exhibit C-3** shows the interest owners and the percentage of their interest by tract. A unit recapitulation, showing the percentage of ownership interests in the proposed spacing unit, is also included in the exhibit.

8. COG and its affiliates are the sole working interest owners and record title owners in this proposed unit but seeks a pooling order to commit a certain non-costbearing owner, including overriding royalty owner, which has yet to ratify the necessary federal communitization agreement which would voluntarily pool their interest. The party that COG seeks to pool are highlighted in yellow in COG Exhibit C-3.

9. **COG Exhibit C-4** is a chronology of contacts, which reflects a summary of my efforts to locate and communicate with the party that COG seeks to pool. In my opinion, COG has undertaken good-faith, diligent efforts to locate and reach an agreement with the interest owner.

10. Because the interest COG seeks to pool is a non-cost-bearing interests, COG is not requesting to assess a proportionate share of costs, risk charges, or overhead and administrative costs for drilling and producing the existing or proposed wells.

11. COG has examined the federal and county records, conducted computer searches, and engaged in other good faith efforts to locate the most recent addresses for all of the parties that it seeks to pool.

12. COG Exhibit C-1 through C-4 were either prepared by me or compiled under my direct supervision, or contain company business records.

13. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this selfaffirmed statement will be used as written testimony in this case. This statement is made on the date next to my signature below.

Received by OCD: 2/6/2025 1:58:54 PM

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

RATIFICATION OF COMMUNITIZATION AGREEMENT PITCHBLENDE 19-30 E2W2 BS FED COM

STATE OF NEW MEXICO	§
	§
COUNTY OF LEA	§

COG Operating LLC, as Operator, executed a Communitization Agreement, effective as of the date therein, communitizing and combining the oil and gas leases set forth therein, insofar as they cover the communitized area for **Pitchblende 19-30 E2W2** spacing and proration units comprised of the E2W2 of Sections 19, 30 and 31, Township 25 South, Range 35 East, N.M.P.M., Lea County, New Mexico, as to the Bone Spring formation.

OGX Minerals II LP, whose address is PO Box 2064, Midland, Texas 79702, is the owner of an overriding royalty interest located in that portion of the communitized area located in the SE4SW4 of Section 30 and the E2SW4 of Section 31, Township 25 South, Range 35 East, N.M.P.M., Lea County, New Mexico.

OGX Minerals II LP to adopt, ratify and confirm the Communitization Agreement insofar as it covers the right, title and interest of **OGX Minerals II LP** in and to the oil and gas leases and the lands included in the communitized area created by COG Operating LLC.

In consideration of the premises, *OGX Minerals II LP* does hereby adopt, ratify and confirm the abovedescribed Communitization Agreement insofar as it covers its right, title and interest in the oil and gas leases and the lands included in communitized area, and agrees that its interest is subject to all of the terms and provisions therein.

This Ratification is effective as of the effective date of the above-referenced Communitization Agreement.

EXPERIENCE

ConocoPhillips | Midland, TX

Associate Land Negotiator

- Coordinate with surface land, engineering, geology, finance, legal, midstream, division order, HSE, and accounting functions on various projects in Lea County, New Mexico
 - Work with NMSLO and BLM staff on various ConocoPhillips-operated projects

Land Negotiator Intern

- Gain experience in mineral land work including deal negotiation, contract drafting, due diligence, and decision support
- Conduct lease, contract, and ownership analysis
- Collaborate with engineering, geology, finance and accounting functions

University Recruiting

• Aid in meeting ConocoPhillips' hiring needs by participating in recruiting events and interviews to identify intern and new hire candidates

<u>Texas Tech University System, Office of the Chancellor</u> | Lubbock, TX February 2020 – May 2023 Student Assistant

- Assist with Chancellor's office correspondence, executive and Board of Regents meetings, and special events for Texas Tech University System Relations
- Work with Chancellor's staff on special projects
- Serve as office liaison for the Chancellor's Ambassadors program

INVOLVEMENT

American Association of Professional Landmen

Member

• Attend trainings over various topics including New Mexico Pooling and Spacing Rules, Cessation of Production in New Mexico, Facilities, Production, and Permian Basin Oil and Gas Law

Permian Basin Landmen's Association

Member

• Attend meetings featuring educational guest speakers over Permian-specific industry topics

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

APPLICATION OF COG OPERATING LLC FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO.

CASE NO. 25139

SELF-AFFIRMED STATEMENT OF TYLER PATRICK

1. My name is Tyler Patrick, and I am a Geologist with COG Operating LLC ("COG"), now a wholly-owned subsidiary of ConocoPhillips Company.

2. I have not previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum geology. My credentials as a petroleum geologist are attached to this statement and I am seeking to become certified as an expert witness in petroleum land matters by the Division.

3. I am familiar with the application filed by COG in this case and have conducted a geologic study of the lands in the subject area.

4. **COG Exhibit D-1** is a locator map depicting COG's acreage in yellow for the Bone Spring formation within the proposed spacing unit. Existing producing Bone Spring formation wells in the Bone Spring 3rd sand interval, which is the interval targeted by COG's proposed well, are represented by a solid line in the color indicated by the Map Legend. The approximate wellbore path for COG's proposed well is within the Bone Spring 3rd sand interval and depicted with the dashed lines.

5. **COG Exhibit D-2** is a subsea structure map that I prepared on top of the base Bone Spring formation, with contour intervals of 50 feet. The data points are indicated by the crosses. The approximate wellbore paths for the proposed well is again depicted with a dashed line. This map shows that the formation is gently dipping down

BEFORE THE OIL CONSERVATION DIVISION Santa Fe, New Mexico Exhibit No. D Submitted by: COG Operating LLC Hearing Date: February 13, 2025 Case No. 25139 to the South direction in this area. I do not observe any faulting, pinchouts, or other geologic impediments to developing the targeted interval with horizontal wells in this area.

6. **COG Exhibit D-3** overlays a cross-section line consisting of two wells penetrating the Bone Spring formation that I used to construct a stratigraphic cross section from A to A'. I consider these well logs to be representative of the geology in the area.

7. **COG Exhibit D-4** is a stratigraphic cross-section using the representative wells depicted in COG Exhibit D-3. Each well in the cross-section contains gamma ray, resistivity, and porosity logs. The target interval within the Bone Spring 3rd sand is labeled on the exhibit. The cross-section demonstrates that the targeted interval is continuous across the proposed spacing unit.

8. My geologic study indicates the Bone Spring formation underlying the subject area is suitable for development by horizontal wells and the acerage comprising the proposed horizontal spacing unit will be productive and contribute proportionately to the production from the wells.

9. In my opinion, approval of this application is in the best interest of conservation, the prevention of waste, and protection of correlative rights.

10. **COG Exhibit D-1 through D-4** were either prepared by me or compiled under my direct supervision.

11. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this selfaffirmed statement will be used as written testimony in this case. This statement is made on the date next to my signature below.

Work Experience

ConocoPhillips, Midland, TX – August 2024 – Present Geologist

- Provide geological support within a multi-discipline team to plan and execute appraisal and development of horizontal targets in Lea County, NM.
 - Added 26 location
 - Drilled 8 wells
 - Working with land to increase WI and extend laterals

Grit Oil and Gas II, Houston, TX – October 2022 – February 2024 Geologist

- Planned and executed 2nd San Miguel horizontals in Dimmit & Maverick Co. Texas
 - Utilized StarSteer and Kingdom to plan and execute wells
 - Evaluated geochem data (XRF) to improve well placement in zone
 - Drilled/geosteered 42 horizontal wells ranging between 4 11,000' LL
 - 92% in zone
 - Avg. ~350 FPR ROP
 - Drilled 1 Glen Rose SWD
- Evaluated Eagle Ford potential

Maverick Natural Resources, Houston, TX – June 2019 – May 2022

- **Geologist Lead**
 - Lead a team focused on identifying and delivering value through inventory generation and prospect evaluations.
 - Increased development inventory from 6 locations to 100+ locations (30% IRR)
 - Supported Operated, Non-operated, Reserves, and Business Development teams
 - Presented budget, reserves, and development material to the Executive team and Board of Directors

Senior Geologist

Business Development

- Work in a multi-disciplined team to evaluate marketed and non-marketed positions throughout the continental United States.
 - 12 deals evaluated
 - 6 bids submitted
 - 2 acquisitions purchased

<u>ArkLaTex</u>

- Executed a two rig Cotton Valley development program in Smith County, Texas
 - o 5 wells drilled/geosteered in 2019 utilizing StarSteer and Petra software
 - Average IP 12 MMcf/d.
 - 1 Woodbine SWD
 - 15 Mbw/d capacity at minimum

Wyoming

- Work oil and gas properties throughout eastern and southwestern WY.
 - o Two new drill locations identified in a water flooded Morrison field.
 - Multiple recompletion opportunities identified on Moxa Arch.
 - Follow off-set operators for play extension into Maverick's acreage.
- Build behind pipe inventory focused on Cretaceous reservoirs.

Sheridan Production Company, Houston, TX – June 2017 – June 2019 Geologist

<u>East Texas Basin</u>

- Evaluate Pettet, Travis Peak, Cotton Valley, and Haynesville formations for new drill and recompletion opportunities.
 - Cotton Valley and Haynesville new drill opportunities are evaluated through offset production, depletion risk, and liquid yields.
 - Evaluate ~ 40 low producing or shut in wells for behind pipe potential.
 Determine wellbore integrity, reservoir pressure, and depletion risk with a multidiscipline team.
 - 7 projects funded
 - 5 projects executed
 - Recompletion projects average 70% ROR with 2 MMcf initial production per \$1 MM capital expenditure.

Permian Basin – Central Basin Platform

- Assisted with a 10 well horizontal San Andres drilling program in Ector County, Texas.
 - Worked with a multi-discipline team to identify reservoir sweet spots for horizontal development within a historical vertical field.
 - Created staking request for regulatory permitting
 - Work with directional drilling planners to maximize reservoir exposure and reduce drilling hazards and well porpoising.
 - Interpret real-time data and make recommendations to reduce drilling days

Independent Geologist, Midland, TX – May 2015 – June 2017 Multi-operator geological adviser

Delaware Basin, Texas

- Provided geological support for oil and gas prospects/plays from acquisition and development to divestment.
 - Analyzed 6 marketed deals in the Permian Basin.
 - Worked within a multi-disciplined team to raised \$200MM drilling capital to develop acreage in Reeves County, Texas.
 - Developed a 3 year drilling program to HBP 16,500 gross acres (11,200 net) fulfilling all CDC requirements.
 - Reduce LOE from \$2/Bw to \$0.2/Bw by converting an existing low production well into a Delaware sand SWD in Reeves County, Texas.
 - Improve well failures by identifying and reducing strontium and barium scaling by plugging off Wolfcampian water from lower Lenardian water in Pecos County, Texas.

Trans-Pecos Wells Logging, Midland, TX – January 2015 – May 2015 Mud logger

Permian Basin, New Mexico and Texas

- Familiarized mud loggers with how geologist utilize mud logs while performing all associated field mud logging responsibilities.
 - Consulted mud loggers on how geologist correlate ROP to off-set e-logs and interpret potential drilling hazards.
 - Caught and analyzed cutting for lithology, cut, and fluorescence.
 - Communicated with geologist regarding morning reports, unscheduled operations, and show interpretations.

Apache Corporation, Midland, TX – April 2012 – January 2015

Geologist

- Provide geology support within a multi-discipline team for conventional and unconventional exploration throughout the Permian Basin utilizing:
 - Well logs (legacy and modern)
 - o 3D seismic volumes
 - Core and cutting data
 - Off-set production
- Coordinate with service companies regarding timing, questions, logistics, etc. Liaise with G&G Staff real time during well site operations. Monitor and interpret geo-steering efforts and provide real time recommendations to G&G Staff.
- Coordinated and efficiently ran a 6 rig program which averaged 4 rigs in the curve or lateral at a time.

Intercontinental Potash Corporation, Hobbs, NM – May 2010 – April 2012 Project Geologist

- Provide geologic support evaluating and commercializing a polyhalite mine and sulfate of potash processing facility. Duties included:
 - Manage all field activates including permitting, archeological surveys, drill site preparation, geologic interpretations, core point selection, field core processing, lab core processing, and assay sampling.
 - Prepare and update resource extent with grade heights from assay data.
 - Work with state and federal agencies to advance project.
 - Develop short-term exploration and infill plans.
 - Provide resource calculations (measured, indicated, and inferred).
 - Supervise drilling activities.
 - Drilled 12 exploration core holes with 100% success picking core point from real time drilling and cutting analysis.

Education

University of Texas Permian Basin, Odessa Texas

Major: Masters of Science in Geology Graduated: May 2015 Final paper title: Methods and Basic Interpretations of Drill Cuttings Analysis to Evaluate Unconventional Resource Plays.

Western State College of Colorado, Gunnison Colorado

Major: Bachelors of Art in Geology with a petroleum emphasis Graduated: December 2009 Senior Independent Project/Scholarship: Bartleson-Prather Research Scholarship for "Hydrologic Characterization of the Gunnison alluvial aquifer, Van Tuyl Ranch Gunnison, Colorado

APPLICATION OF COG OPERATING LLC FOR COMPULSORY POOLING, LEA COUNTY, NEW MEXICO.

CASE NO. 25139

SELF-AFFIRMED STATEMENT OF KERI HATLEY

- I am attorney-in-fact and authorized representative of COG Operating LLC ("COG"), the Applicant in this case. I have personal knowledge of the matter address herein and am competent to provide this self-affirmed statement.
- 2. The above-referenced application and notice of hearing on this application was sent by certified mail to the locatable affected party on the date set forth in the letter attached hereto.
- 3. The spreadsheet attached hereto contains the name of the party to whom notice was provided.
- The spreadsheet attached hereto contains the information provided by the United States Postal Service on the status of the delivery of this notice as of January 24, 2025.
- 5. I caused a notice to be published to the party subject to this compulsory pooling proceeding. An affidavit of publication from the publication's legal clerk with a copy of the notice publication is attached herein.
- 6. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as witness testimony in this file. This statement is made on the date next to my signature below.

Re: Application of COG Operating LLC for Compulsory Pooling, Lea County, New Mexico: *Pitchblende 19-30 601H, 602H, 701H, and 801H Wells* Case Nos.: 25138, 25139, and 25140

Dear Ms. Brasuel:

This letter is to advise you that COG Operating LLC has filed the enclosed applications with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on February 13, 2025, and the status of the hearing can be monitored through the Division's website at <u>https://www.emnrd.nm.gov/ocd/</u>.

It is anticipated that hearings will be held in a hybrid format with both in-person and virtual presentation options. The meeting will be held in the Pecos Hall Hearing Room at the Wendell Chino Building, 1st Floor, 1220 South Saint Francis Drive, Santa Fe, New Mexico. To participate virtually, see the instructions on the OCD Hearings website: https://www.emnrd.nm.gov/ocd/hearing_info/.

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of NMAC 19.15.4.13.B.

If you have any questions about this matter, please contact Caroline Frederick at (432)222-4721 or Caroline Frederick@conocophillips.com.

Sincerely, eri Hatlev
