Case No. 25896

**APPLICATION**

WPX Energy Permian, LLC (“WPX”), OGRID No. 246289, through its undersigned attorneys, hereby files this Application with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted mineral interests in the Wolfcamp formation, designated as a gas pool, underlying a standard 430.41-acre, more or less, spacing unit comprised of the E/2 of Section 26 and Lots 5, 6, 11 and 12 of Section 35, Township 26 South, Range 29 East, NMPM, Eddy County, New Mexico.

In support of its Application, WPX states the following:

1. WPX is a working interest owner in the proposed horizontal spacing unit (“HSU”) and has a right to drill a well thereon.
2. WPX has previously pooled this HSU in Case No. 25058, Order No. R-23662, and is submitting this new application because WPX has changed its development plan in order to include two initial wells. Therefore, WPX requests the Division to vacate Order No. R-23662 upon issuance of the new pooling order pursuant to this application such that the new pooling order will supplant and replace Order No. R-23662.
3. WPX proposes and dedicates to the HSU the **Steel Guitar 35-26 Fed Com 460H Well** and the **Steel Guitar 35-26 Fed Com 470H Well**, as initial wells, to be drilled to a sufficient depth to test the Wolfcamp formation.

4. WPX proposes the **Steel Guitar 35-26 Fed Com 460H Well**, a gas well, to be horizontally drilled from a surface location in or near the NE/4 NW/4 (Unit C) of Section 26 to a bottom hole location in Lot 11 of Section 35.

5. WPX proposes the **Steel Guitar 35-26 Fed Com 470H Well**, a gas well, to be horizontally drilled from a surface location in or near the NE/4 NE/4 (Unit A) of Section 26 to a bottom hole location in Lot 12 Section 35.

6. All the wells proposed herein are unorthodox in their locations, as take points and certain intervals do not comply with setback requirements under the statewide rules and Order No. R-14262; therefore, WPX will be applying administratively to the Division for approval of the non-standard locations.

7. WPX has sought in good faith but has been unable to obtain, voluntary agreement from all interest owners to participate in the drilling of the wells or in the commitment of their interests to the wells for their development within the proposed HSU.

8. The pooling of all interests in the Wolfcamp formation within the proposed HSU will avoid the drilling of unnecessary wells, prevent waste and protect correlative rights.

9. In order to provide for its just and fair share of the oil and gas underlying the subject lands, WPX requests that all uncommitted interests in this HSU be pooled and that WPX be designated the operator of the proposed horizontal wells and HSU.

**WHEREFORE**, WPX requests that this Application be set for hearing on February 5, 2026, before an Examiner of the Oil Conservation Division, and after notice and hearing as required by law, the Division enter an order:

A. Pooling all uncommitted mineral interests in the Wolfcamp formation, designated as a gas pool, underlying a standard 430.41-acre, more or less, spacing unit comprised of the E/2 of Sections 26 and Lots 5, 6, 11, and 12 of Section 35, Township 26 South, Range 29 East, NMPM, Eddy County, New Mexico.

B. Approving the **Steel Guitar 35-26 Fed Com 460H Well** and the **Steel Guitar 35-26 Fed Com 470H Well**, as the wells for the HSU.

C. Vacating previous Order No. R-23662 and supplanting the previous order with the order issued pursuant to this application.

D. Designating WPX as operator of this HSU and the horizontal wells to be drilled thereon;

E. Authorizing WPX to recover its costs of drilling, equipping, and completing the wells;

F. Approving actual operating charges and costs of supervision, to the maximum extent allowable, while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and

G. Setting a 200% charge for the risk assumed by WPX in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully submitted,

ABADIE & SCHILL, PC

**APPLICATION OF WPX ENERGY PERMIAN, LLC  
FOR A COMPULSORY POOLING,  
EDDY COUNTY, NEW MEXICO**

**Case No. 25896**

**AMENDED SELF-AFFIRMED STATEMENT OF TIM PROUT**

I, Tim Prout, state and affirm the following:

1. I am over the age of eighteen years and have the capacity to execute this Self-Affirmed Statement, which is based on my personal knowledge.
2. I am employed as a Senior Staff Landman with WPX Energy Permian, LLC (“WPX”), and I am familiar with the subject application and the lands involved.
3. I have previously testified before the New Mexico Oil Conservation Division (“Division”) as an expert witness in petroleum land matters and my credentials have been accepted by the Division and made a matter of record.
4. This affidavit is submitted in connection with the filing by WPX of the above-referenced application pursuant to 19.15.4.12.A(1).
5. WPX has previously pooled this HSU in Case No. 25058, Order No. R-23662, and is submitting this new application because WPX has changed its development plan in order to include two initial wells.
6. Under Case No. 25896, WPX seeks an order pooling all uncommitted mineral interests in the Wolfcamp formation (Purple Sage; Wolfcamp: Pool Code [98220]) underlying a standard 430.41-acre, more or less, spacing unit comprised of the E/2 of Section 26 and Lots 5, 6, 11, and 12 of Section 35, Township 26 South, Range 29 East, NMPM, Eddy County, New Mexico. WPX dedicates the Unit to the **Steel Guitar 35-26 Fed Com 460H Well and Steel Guitar 35-26**

**Fed Com 470H Well**, as initial wells, to be drilled to a sufficient depth to test the Bone Springs formation.

- Under **Case No. 25896**, WPX proposes the **Steel Guitar 35-26 Fed Com 460H Well**, a gas well, to be horizontally drilled from a surface location in or near the NE/4 NW/4 (Unit C) of Section 26 to a bottom hole location in Lot 11 of Section 35.
- Under **Case No. 25896**, WPX proposes the **Steel Guitar 35-26 Fed Com 470H Well**, a gas well, to be horizontally drilled from a surface location in or near the NE/4 NE/4 (Unit A) of Section 26 to a bottom hole location in Lot 12 Section 35.

7. The wells proposed herein are unorthodox in their locations, as take points and certain intervals do not comply with setback requirements under the statewide rules and Order No. R-14262; therefore, WPX will be applying administratively to the Division for approval of the non-standard locations.

8. **WPX Exhibit A-1** contains the C-102 for each of the two (2) wells.

9. **WPX Amended Exhibit A-2** contains a general location plat and a plat outlining the unit being pooled, which shows the locations of the proposed well within the unit. The well locations are orthodox, and they meet the Division's offset requirements. **WPX Amended Exhibit A-2** (at page 5) includes parties that WPX is seeking to pool in this Case, the nature of their interests, and information regarding the working interest owners, the overriding royalty interest owners, and the record title owners to be pooled. The addresses for eight (8) parties that were resent the notice letters have been updated on page 5 of the **WPX Amended Exhibit A-2**.

10. **WPX Amended Exhibit A-2** also contains a list of names and addresses for the uncommitted interest owners that I provided to the law firm of Abadie & Schill P.C. In compiling these addresses, I conducted a diligent search of the public records in Eddy County, New Mexico, where the wells are located, as well as phone directories and computer searches to locate the contact information for parties entitled to notification. Notice letters were timely mailed and all the WI Owners, ORRI owners, and Record Title Owners were locatable except for one (1) RT

owner. WPX published notice in the Carlsbad Current-Argus, a newspaper of general circulation in Eddy County, New Mexico, to account for any unlocatable parties and cover any contingencies regarding notice.

11. **WPX Exhibit A-3** is a sample proposal letter and the AFEs for the proposed wells. The estimated cost of the well set forth in the AFEs is fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

12. The interest owners being pooled have been contacted regarding the proposed wells but have failed or refused to voluntarily commit their interest in the wells. However, WPX has been in ongoing discussions with some of the interest owners to voluntarily enter into a Joint Operating Agreement. If a mutually agreeable Joint Operating Agreement is reached between WPX and another interest owner or owners, WPX requests that the voluntary agreement become operative and supersede the Division's order for said parties, except to the extent the Division deems it necessary to maintain spacing criteria for the purpose of conservation, the prevention of waste, and protection of correlative rights.

13. **WPX Exhibit A-4** provides a chronology and history of contacts with the owners. WPX has made a good faith effort to negotiate with the interest owners, but has been unable to obtain, a voluntary agreement from all interest owners to participate in the drilling of the wells or in the commitment of their interests to the wells for development within the proposed horizontal spacing unit.

14. **WPX Amended Exhibit A-5** provides an evidentiary notice list with all interest owners within the proposed unit and the commitment status of their interests. **WPX Amended Exhibit A-5** includes parties being pooled, the nature of their interests, and relevant information regarding the commitment status of working interest owners, the overriding royalty interest owners, and the record title owners to be pooled. **WPX Amended Exhibit A-5** states that the

notice letter that was originally mailed on January 13, 2026, was sent again on February 10, 2026, to nine (9) parties with updated addresses and to one party who had not yet received the notice letter as of February 10, 2026.

15. WPX requests overhead and administrative rates of \$8,000/month for drilling each well and \$800/month for producing each well. These rates are fair and comparable to the rates charged by other operators for wells of this type in this area of southeastern New Mexico. WPX requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

16. WPX requests the maximum cost, plus 200% risk charge be assessed against non-consenting working interest owners to the extent permitted by law.

17. WPX requests that it be designated operator of the unit and the wells.

18. The granting of this Application is in the best interests of conservation, the prevention of waste, and the protection of correlative rights, and will avoid the drilling of unnecessary wells.

19. The Exhibits to this Statement were prepared by me or compiled from WPX's company business records under my direct supervision.

20. The foregoing is correct and complete to the best of my knowledge and belief.

*[Signature page follows]*

*Signature page of Amended Self-Affirmed Statement of Tim Prout:*

I understand that this Amended Self-Affirmed Statement will be used as written testimony before the Division in Case No. 25896 and affirm that my testimony herein is true and correct, to the best of my knowledge and belief and made under penalty of perjury under the laws of the State of New Mexico.

ACREAGE DEDICATION PLATS

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

**APPLICATION OF WPX ENERGY PERMIAN, LLC  
FOR A COMPULSORY POOLING,  
EDDY COUNTY, NEW MEXICO**

**Case No. 25896**

**SELF-AFFIRMED STATEMENT OF J. RUSSELL GOODIN**

I, J. Russell Goodin, state and affirm the following:

1. I am over the age of 18, and I have personal knowledge of the matters stated herein.

2. I am employed as a petroleum geologist for WPX Energy Permian, LLC (“WPX”), and I am familiar with the subject application and the geology involved.

3. I have testified previously by affidavit before the Oil Conservation Division (“Division”) as an expert petroleum geologist; my credentials have been made a matter of record, and I have been qualified as an expert by the Division.

a. I have a Bachelor of Science Degree in Geology from Weber State University and a Master of Science Degree in Geology from Simon Fraser University.

b. I have worked on New Mexico Oil and Gas matters since 2015.

4. This Self-Affirmed Statement is submitted in connection with the filing by WPX of the above-referenced compulsory pooling application pursuant to 19.15.4.12.A(1) NMAC.

5. **WPX Exhibit B-1** is a structure map showing the depth (subsea) to the top of the Bone Spring formation, a marker that defines the top of the target interval for the proposed wells. The contour interval is 100’. The units being pooled are outlined by red

rectangles. The structure map shows that there is a regional down-dip to the east. I do not observe any faulting, pinchouts, or other geologic impediments to developing this targeted interval.

6. **WPX Exhibit B-2** is a stratigraphic cross-section flattened on the Bone Spring top. Each well in the cross-section contains at least a gamma ray log. The cross-section demonstrates continuity and consistent thickness across the target zone. The well logs on the cross-section give a representative sample of the Bone Spring. The landing zones are highlighted by the well numbers.

7. Additional exhibits for the benefit of the Division's review include **WPX Exhibit B-3**, a gross isochore from the top of Bone Spring to the Wolfcamp, as well as **WPX Exhibits B-4 and B-5**. **WPX Exhibit B-4** is a gun barrel representation of the unit, and **WPX Exhibit B-5** is a three-dimensional structural cross section built along the wellbore trajectories.

8. I conclude from the attached exhibits that:

- a. The horizontal spacing and proration unit is justified from a geologic standpoint.
- b. There are no structural impediments or faulting that will interfere with horizontal development.
- c. Each quarter-quarter section in the unit will contribute more or less equally to production.

9. The preferred well orientation in this area is north-south so that the wells run sub-perpendicular to the inferred orientation of the maximum horizontal stress.

10. The granting of this Application is in the interests of conservation, the prevention of waste and the drilling of unnecessary wells, and the protection of correlative rights.

11. The Exhibits to this Self-Affirmed Statement were prepared by me or compiled from WPX's company business records under my direct supervision.

12. The Exhibits to this Self-Affirmed Statement were prepared by me or compiled from WPX's company records under my direct supervision.

13. The foregoing is correct and complete to the best of my knowledge and belief.

I understand that this Self-Affirmed Statement will be used as written testimony before the Division in Case No. 25896 and affirm that my testimony herein is true and correct, to the best of my knowledge and belief and made under penalty of perjury under the laws of the State of New Mexico.

Also to be considered will be the cost of drilling and completing the wells and the allocation of the costs thereof; actual operating costs and charges for supervision; the designation of the Applicant as Operator of the wells and unit; and a 200% charge for the risk involved in drilling and completing the wells. The wells and lands are located adjacent to the southern state line and approximately 31 miles southeast of Carlsbad, New Mexico.
