EDDY COUNTY, NEW MEXICO.**

CASE NO 26074

**SECOND SUPPLEMENTAL SELF-AFFIRMED
STATEMENT OF DAVID A. WHITE**

1. My name is David A. White, P.G., and I am employed by Geolex, Inc., as Vice President and Senior Geologist. I previously submitted Self-Affirmed Statements in this matter.
2. I am submitting this supplemental statement to provide information requested by Technical Examiner, Phillip Goetze, at the June 30, 2026 hearing.
3. A copy of the C-102 for the Trace Midstream Hatch AGI #1 well is attached as **Exhibit E-1**.
4. I used the geographic coordinates 32.697902, -103.908681 (NAD83) for the Hatch AGI #1 surface-hole location and 32.703198, -103.903585 (NAD83) for the Hatch AGI #1 bottom-hole location to define the Hatch AGI #1 Area of Review (AOR).
5. All maps, analyses, notices, and supporting materials associated with the Hatch AGI #1 C-108 application were completed and developed using these geographic coordinates.
6. In preparing the C-108 application, I used ArcGIS mapping tools to estimate the corresponding footage calls for the above geographic coordinates.
7. Following submission of the C-108, surveying was performed in relation to the Form C-102 and produced footage measurements that differed slightly from the original estimated footage calls.

**Trace Delaware Treating Services, LLC
Case No. 26074
Exhibit E**

8. Notwithstanding these minor differences in footage measurements, the surveyed well location shown on the Form C-102 is consistent with the well location used in the AOR analysis and described in the Hatch AGI #1 C-108 application. Accordingly, the AOR analysis, mapping, notices, and supporting information submitted with the application remain valid and representative of the proposed well location.

9. The attached exhibits were either prepared by me or under my direction and supervision or were compiled from company business records.

10. I understand this Supplemental Self-Affirmed Statement will be used as written testimony in this case. I affirm that my testimony above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date next to my electronic signature below.

DAVID A. WHITE

OPERATOR CERTIFICATIONS					SURVEYOR CERTIFICATIONS				
I hereby certify that the information contained herein is true and complete to the best of my knowledge and belief, and, if the well is a vertical or directional well, that this organization either owns a working interest or unleased mineral interest in the land including the proposed bottom hole location or has a right to drill this well at this location pursuant to a contract with an owner of a working interest or unleased mineral interest, or to a voluntary pooling agreement or a compulsory pooling order heretofore entered by the division. If this well is a horizontal well, I further certify that this organization has received the consent of at least one lessee or owner of a working interest or unleased mineral interest in each tract (in the target pool or formation) in which any part of the well's completed interval will be located or obtained a compulsory pooling order from the division. <i>[Signature]</i> 05.06.26 Signature Date TRACY JENSEN Printed Name tjensen@tracemidstream.com Email Address					I hereby certify that the well location shown on this plat was plotted from field notes of actual surveys made by me or under my supervision, and that the same is true and correct to the best of my belief. <i>[Signature]</i> Signature and Seal of Professional Surveyor 30272 05/04/2026 Certificate Number Date of Survey 				

Note: No allowable will be assigned to this completion until all interests have been consolidated or a non-standard unit has been approved by the division.

SHT. 1 OF 2

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.
