CASE NO. 26134

**SELF-AFFIRMED STATEMENT
OF SHELLEY C. KLINGLER**

1. I am a New Mexico Land Supervisor with ConocoPhillips Company (“ConocoPhillips”). COG Operating LLC (“COG”) is a wholly owned subsidiary of ConocoPhillips. I am over 18 years of age, have personal knowledge of the matters addressed herein, and am competent to provide this Self-Affirmed Statement. I have previously testified before the New Mexico Oil Conservation Division (“Division”) and my credentials as an expert in petroleum land matters were accepted and made a matter of record.

2. Copies of COG’s application and proposed hearing notice are attached as **Exhibit A-1.**

3. None of the parties proposed to be pooled in this case indicated opposition to this matter proceeding by affidavit; therefore, I do not expect any opposition at hearing.

4. COG seeks to pool all uncommitted interests in the Bone Spring formation, underlying an 1,086.25-acre, more or less, non-standard, overlapping, horizontal spacing unit comprised of Section 18 (Lots 1–4 and E/2 W/2), Section 19 (Lots 1–3, SW/4 NW/4, and E/2 W/2), Section 30 (Lots 1–4 and E/2 W/2), and Section 31 (N/2 NW/4 and Lots 3–4), Township 26 South, Range 26 East, Eddy County, New Mexico (“Unit”).

5. The Unit will be dedicated to the following wells (“Wells”):

a. **Uni Roll Federal Com 501H** and **Uni Roll Federal Com 521H** wells, which

**COG Operating LLC
Case No. 26134
Exhibit A**

will be drilled from a surface hole location in the NW/4 NW/4 (Unit D) of Section 31, to a bottom hole location in Lot 1 of Section 18; and

- b. **Uni Roll Federal Com 502H** and **Uni Roll Federal Com 522H** wells, which will be drilled from a surface hole location in the NW/4 NW/4 (Unit D) of Section 31, to a bottom hole location in the NE/4 NW/4 (Unit C) of Section 18.

6. The completed intervals of the Wells will be orthodox.

7. The spacing unit for the Wells will partially overlap with the existing 382.98-acre spacing unit consisting of the E/2 W/2 of Section 19, the E/2 W/2 of Section 30, and the NE/4 NW/4 and Lot 3 of Section 31, Township 26 South, Range 26 East, Eddy County, New Mexico, dedicated to the Yellow Fin Federal Com 2H well (API No. 30-015-41129), which produces from the WC-015 G-04 S262619C; LWR BONE SPRING Pool (Code 98005).

8. COG's request for approval of a non-standard spacing unit will allow it to consolidate surface facilities and will consequently prevent surface, environmental, and economic waste.

- a. The non-standard unit will allow COG to minimize surface use. Centralizing equipment for facilities for the Wells will reduce the total acreage needed for surface facilities by 50% of the total amount that would be necessary absent a non-standard unit.
- a. Surface facilities and equipment, pipelines, and rights-of-way for one well cost approximately \$1.3MM. While the centralized facilities will be larger, so that they may handle production from multiple wells, I estimate the overall savings, if a non-standard unit is approved, will be approximately \$500,000. This will reduce the overall well costs and improve economics for the wells.

- b. A common facility also reduces the number of flares COG may need to use in the case of an emergency from 190tpy to 95tpy. Additionally, the VOC reduction is nearly 50%.

9. As a result, approval of a non-standard spacing unit is necessary to prevent waste and protect correlative rights.

10. A plat showing the offset tracts and the parties that were noticed of the non-standard spacing unit is attached as **Exhibit A-2**.

11. **Exhibit A-3** contains the C-102s for the Wells.

12. **Exhibit A-4** contains a plat identifying ownership by tract in the Unit. This exhibit also includes any applicable lease numbers, a unit recapitulation, and the interests COG seeks to pool highlighted in yellow. Exhibit A-4 also includes a plat depicting the overlapping spacing unit.

13. COG has conducted a diligent search of all county public records, including phone directories and computer databases, as well as internet searches, to locate the interest owners it seeks to pool.

14. **Exhibit A-5** contains a sample well proposal letter and AFEs sent to working interest owners for the Wells. The estimated costs reflected on the AFEs are fair and reasonable and comparable to the cost of other wells of similar depth and length drilled in the subject formation in the area.

15. In my opinion, COG made a good-faith effort to reach voluntary joinder of uncommitted interests in the Wells as indicated by the chronology of contact described in **Exhibit A-6**.

16. The ownership commitment status is included in Exhibit A-4. Exhibit A-4 includes a list of all owners in the Unit and identifies each owner's ownership status, whether the owner has committed to the proposed spacing unit, and the type of commitment, *i.e.*, whether a signed letter of commitment, joint operating agreement, or verbal agreement. Exhibit C identifies when notice of this hearing was sent to each interest owner by our outside counsel, Hardy McLean LLC.

17. COG requests that it be designated as the operator of the Unit and the Wells. COG requests overhead and administrative rates of \$14,000 per month while the Wells are being drilled and \$1,400 per month while the Wells are producing. These rates are fair and are comparable to the rates charged by COG and other operators in the vicinity.

18. The attached exhibits were either prepared by me or under my supervision or were compiled from company business records.

19. In my opinion, the granting of COG's application would serve the interests of conservation, the protection of correlative rights, and the prevention of waste.

20. I understand this Self-Affirmed Statement will be used as written testimony in this case. I affirm that my testimony above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date next to my electronic signature below.

CASE NO. 26134

AMENDED APPLICATION

Pursuant to NMSA 1978, Section 70-2-17, COG Operating LLC (OGRID No. 229137) (“COG” or “Applicant”) applies for an order pooling all uncommitted interests in the Bone Spring formation, underlying an 1,086.25-acre, more or less, non-standard, overlapping, horizontal spacing unit comprised of Section 18 (Lots 1–4 and E/2 W/2), Section 19 (Lots 1–3, SW/4 NW/4, and E/2 W/2), Section 30 (Lots 1–4 and E/2 W/2), and Section 31 (N/2 NW/4 and Lots 3–4), Township 26 South, Range 26 East, Eddy County, New Mexico (“Unit”). In support of this application, COG states the following.

1. Applicant is a working interest owner in the Unit and has the right to drill wells thereon.
2. The Unit will be dedicated to the following wells (“Wells”):
 - a. **Uni Roll Federal Com 501H** and **Uni Roll Federal Com 521H** wells, which will be drilled from a surface hole location in the NW/4 NW/4 (Unit D) of Section 31, to a bottom hole location in Lot 1 of Section 18; and
 - b. **Uni Roll Federal Com 502H** and **Uni Roll Federal Com 522H** wells, which will be drilled from a surface hole location in the NW/4 NW/4 (Unit D) of Section 31, to a bottom hole location in the NE/4 NW/4 (Unit C) of Section 18.
3. The completed interval of the Wells will be orthodox.

**COG Operating LLC
Case No. 26134
Exhibit A-1**

4. Applicant also requests approval of a non-standard horizontal spacing unit pursuant to 19.15.16.15(B)(5) NMAC.

5. The spacing unit for the Wells will partially overlap with the existing 382.98-acre spacing unit consisting of the E/2 W/2 of Section 19, the E/2 W/2 of Section 30, and the NE/4 NW/4 and Lot 3 of Section 31, Township 26 South, Range 26 East, Eddy County, New Mexico, dedicated to the Yellow Fin Federal Com 2H well (API No. 30-015-41129), which produces from the WC-015 G-04 S262619C; LWR BONE SPRING Pool (Code 98005).

6. Applicant has undertaken diligent, good-faith efforts to obtain voluntary agreements from all interest owners to participate in the drilling of the Wells but has been unable to obtain voluntary agreements from all interest owners.

7. The pooling of uncommitted interests will avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

8. In order to allow Applicant to obtain its just and fair share of the oil and gas underlying the subject lands, all uncommitted interests in the Unit should be pooled and Applicant should be designated as the operator of the Wells and Unit.

WHEREFORE, Applicant requests that this application be set for hearing before an Examiner of the Oil Conservation Division on June 4, 2026, and, after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted interests in the Unit;
- B. Approving the Wells in the Unit;
- C. Approving the non-standard spacing unit;
- D. Approving the overlapping spacing unit;
- E. Designating Applicant as operator of the Unit and the Wells to be drilled thereon;

- F. Authorizing Applicant to recover its costs of drilling, equipping and completing the Wells;
- G. Approving the actual operating charges and costs of supervision while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- H. Imposing a 200% penalty for the risk assumed by Applicant in drilling and completing the Wells against any working interest owner who does not voluntarily participate in the drilling of the Wells.

Respectfully submitted,

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

The enclosed Operating Agreement dated May 1, 2026, covers the new Uni Roll Federal Com project area and will supersede the previous form.

April 1, 2026 –Page 3

UNI ROLL FEDERAL COM 501H, 502H, 521H, 522H, 701H, 901H, 902H

In the interest of time, if we are unable to reach an agreement with all interest owners in the Uni Roll Federal Com Bone Spring and Wolfcamp drilling spacing units for the above-mentioned wells within 30 days of the date of this letter, COG will apply to the NMOCD for compulsory pooling of any non-committed interest into a horizontal spacing unit for the proposed wells.

The BLM Lease sale scheduled for May 20, 2026, includes Lot 1 of Section 18-26S-26E, Eddy County, New Mexico. Since this project is scheduled to spud after the sale and new lease is issued, we plan to sundry the BHL of Uni Roll Federal Com 501H, 521H, and 901H from Lot 2 to Lot 1 to include the acreage in our drilling spacing units. The BLM has informed COG that they expect this tract to be included in our drilling spacing units so as to not strand the federal lands. The new Operating Agreement Exhibit A working interest numbers were calculated with this intention.

Please indicate your participation elections in the space provided below, sign and return this letter, along with a signed copy of the enclosed AFEs and a copy of your geologic requirements, to my attention at the letterhead address or by email to shelley.c.klingler@conocophillips.com. Should you have any questions, please do not hesitate to contact me.

Sincerely,

COG Operating LLC

COG is proposing to drill these wells under the terms of a new Operating Agreement dated effective May 1, 2026, which will supersede the Yellow Fin Fed Com 2H OA dated July 1, 1999, COG Operating LLC, Operator, to which your interest is subject. The enclosed Operating Agreement dated May 1, 2026, covers the new Uni Roll Federal Com project area and will supersede the previous form.

April 1, 2026 –Page 3

UNI ROLL FEDERAL COM 501H, 502H, 521H, 522H, 701H, 901H, 902H

In the interest of time, if we are unable to reach an agreement with all interest owners in the Uni Roll Federal Com Bone Spring and Wolfcamp drilling spacing units for the above-mentioned wells within 30 days of the date of this letter, COG will apply to the NMOCD for compulsory pooling of any non-committed interest into a horizontal spacing unit for the proposed wells.

The BLM Lease sale scheduled for May 20, 2026, includes Lot 1 of Section 18-26S-26E, Eddy County, New Mexico. Since this project is scheduled to spud after the sale and new lease is issued, we plan to sundry the BHL of Uni Roll Federal Com 501H, 521H, and 901H from Lot 2 to Lot 1 to include the acreage in our drilling spacing units. The BLM has informed COG that they expect this tract to be included in our drilling spacing units so as to not strand the federal lands. The new Operating Agreement Exhibit A working interest numbers were calculated with this intention.

Please indicate your participation elections in the space provided below, sign and return this letter, along with a signed copy of the enclosed AFEs and a copy of your geologic requirements, to my attention at the letterhead address or by email to shelley.c.klingler@conocophillips.com. Should you have any questions, please do not hesitate to contact me.

Sincerely,

**APPLICATION OF COG OPERATING LLC
FOR COMPULSORY POOLING AND APPROVAL
OF NON-STANDARD AND OVERLAPPING
SPACING UNIT, EDDY COUNTY,
NEW MEXICO.**

CASE NO. 26134

**SELF-AFFIRMED STATEMENT
OF MALACHI LOPEZ**

1. I am employed by ConocoPhillips Company ("ConocoPhillips") as an Associate Geologist. COG Operating LLC ("COG") is a wholly owned subsidiary of ConocoPhillips. I am over 18 years of age, have personal knowledge of the matters addressed herein, and am competent to provide this Self-Affirmed Statement. I have not previously testified before the New Mexico Oil Conservation Division ("Division"). I have a Masters degree from Oklahoma State University and have worked as a geologist in the petroleum industry for 13 years. A copy of my resume is attached as **Exhibit B-1**.

2. I am familiar with the geological matters that pertain to the above-referenced case.

3. **Exhibit B-2** is a location map of the proposed Bone Spring horizontal spacing unit ("Unit"). The approximate wellbore paths for proposed **Uni Roll Federal Com 501H, Uni Roll Federal Com 502H, Uni Roll Federal Com 521H, and Uni Roll Federal Com 522H** wells ("Wells") are represented by red dashed lines. Existing producing wells in the BS3C are represented by solid blue lines. Existing producing wells in the BS2S are represented by solid orange lines.

4. **Exhibit B-3** is a subsea structure map that I prepared for the Third Bone Spring Carb formation. The contour interval is 50 feet and data points used to construct the map are indicated as red crosses. The proposed Wells are depicted as described for Exhibit B-2. The

**COG Operating LLC
Case No. 26134
Exhibit B**

structure map shows the targeted formation gently dipping to the east. The structure appears consistent across the proposed spacing Unit, and I do not observe any faulting, pinch outs, or other geologic impediments to drilling horizontal wells.

5. **Exhibit B-4** is a cross-section map that identifies three wells penetrating the targeted intervals used to construct a stratigraphic cross-section from A to A'. I chose the logs from these wells to create the cross-section because they penetrate the targeted intervals, are of good quality and have been subjected to petrophysical analysis of the targeted intervals. In my opinion, these well logs are representative of the geology in the subject area.

6. **Exhibit B-5** is a stratigraphic cross-section using the representative wells identified on Exhibit B-4. It contains gamma ray, resistivity and porosity logs. The proposed landing zones for the Wells are labeled on the exhibit. This cross-section demonstrates the target intervals are continuous across the Unit.

7. In my opinion, a stand-up orientation for the Wells is appropriate to properly develop the subject acreage because of consistent rock properties throughout the Unit and the lack of preferred fracture orientation in this portion of the trend.

8. Based on my geologic study of the area, the targeted interval underlying the Unit is suitable for development by horizontal wells and the tracts comprising the Unit will contribute more or less equally to the production of the Wells.

9. In my opinion, the granting of COG's application will serve the interests of conservation, the protection of correlative rights, and the prevention of waste.

10. The attached exhibits were either prepared by me or under my supervision or were compiled from company business records.

11. I understand this Self-Affirmed Statement will be used as written testimony in this case. I affirm my testimony above is true and correct and is made under penalty of perjury under the laws of the State of New Mexico. My testimony is made as of the date identified next to my signature below.
