COMPULSORY POOLING APPLICATION CHECKLIST**ALL INFORMATION IN THE APPLICATION MUST BE SUPPORTED BY SIGNED AFFIDAVITS**

Case: 25996	APPLICANT'S RESPONSE
Date: July 28, 2026	
Applicant	Avant Operating II, LLC
Designated Operator & OGRID (affiliation if applicable)	332947
Applicant's Counsel:	Kaitlyn A. Luck
Case Title:	APPLICATION OF AVANT OPERATING II, LLC FOR APPROVAL OF A NON-STANDARD HORIZONTAL UNIT AND COMPULSORY POOLING, LEA COUNTY, NEW MEXICO.
Entries of Appearance/Intervenors:	Coterra Energy/Holliday ENERGY Law Group, 107 Katherine Ct, San Antonio Texas, 78209 O 210.469.3187
Well Family	Moonwatch wells
Formation/Pool	
Formation Name(s) or Vertical Extent:	Upper Bone Spring, from the top of the Bone Spring formation to the base of the Second Bone Spring formation at an approximate depth of 9,338'
Primary Product (Oil or Gas):	Oil
Pooling this vertical extent:	Bone Spring Formation
Pool Name and Pool Code:	WC-025 G-06 S183518A;BONE SPRING (Code: 97930)
Well Location Setback Rules:	Statewide oil well rules
Spacing Unit	
Type (Horizontal/Vertical)	Horizontal
Size (Acres)	960 acres, more or less
Building Blocks:	standard-40 acre oil pool
Orientation:	north-south
Description: TRS/County	S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico
Standard Horizontal Well Spacing Unit (Y/N), If No, describe <u>and is approval of non-standard unit requested in this application?</u>	No, Non-standard approval requested in application.
Other Situations	
Depth Severance: Y/N. If yes, description	No.
Proximity Tracts: If yes, description	No.
Proximity Defining Well: if yes, description	N/A.
Applicant's Ownership in Each Tract	Yes, Exhibit C

Avant Exhibit B
OCD Case Nos.
25996, 26129, 26130

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**APPLICATION OF AVANT OPERATING II,
LLC FOR APPROVAL OF A NON-STANDARD
HORIZONTAL UNIT AND COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO.**

CASE NO. _____

APPLICATION

Avant Operating II, LLC (“Avant”) (OGRID No. 332947), through its undersigned attorney, hereby files this application with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted interests in the Bone Spring formation, from the top of the Bone Spring formation to the base of the Second Bone Spring formation at an approximate depth of 9,338’, within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico (the “Unit”). In support of this application, Avant states as follows:

1. Avant has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Avant seeks to minimize cost and surface disturbance by consolidating facilities and commingling production from existing and future wells in the proposed non-standard spacing unit.
3. To allow the proposed wells to be dedicated to a state Communitization Agreement, Avant seeks approval of a corresponding non-standard horizontal well spacing unit in the Bone Spring formation.

4. Avant is proposing a Joint Operating Agreement covering the subject area and seeks approval of this non-standard horizontal well spacing unit to match a corresponding Communitization Agreement for the state leases within the subject area.

5. If the proposed non-standard spacing unit is approved by the Division, then Avant understands that the New Mexico State Land Office will issue a corresponding Communitization Agreement for the state leases within the subject area to allow commingling and the corresponding reduction of the necessary surface facilities.

6. Avant seeks to dedicate the Unit to the following wells:

- the Moonwatch 17 8 State Com #501H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NW/4 SW/4 (Unit L) of Section 8;
- the Moonwatch 17 8 State Com #502H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NE/4 SW/4 (Unit K) of Section 8;
- the Moonwatch 17 8 State Com #503H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NW/4 SE/4 (Unit J) of Section 8; and
- the Moonwatch 17 8 State Com #504H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8.

7. The wells will be horizontally drilled, and the producing areas for the wells are expected to be orthodox.

8. Avant sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed Unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

9. Approval of this non-standard spacing unit and the pooling of interests therein will allow Avant to efficiently locate surface facilities for the recovery of oil and gas underlying

the subject lands, reduce surface disturbance, lower operating costs, avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

WHEREFORE, Avant requests this application be set for a hearing before an Examiner of the Oil Conservation Division, to be consolidated with Case Nos. 25879-25882, and after notice and hearing as required by law, the Division enter an order:

- A. Approving the proposed non-standard horizontal spacing unit and pooling all uncommitted interests in the Bone Spring formation, from the top of the Bone Spring formation to the base of the Second Bone Spring formation at an approximate depth of 9,338', within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico;
- B. Designating Avant as operator of this unit and the wells to be drilled thereon;
- C. Authorizing Avant to recover its costs of drilling, equipping and completing the Wells;
- D. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- E. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully,

Kaitlyn A. Luck

CASE NO. _____: Application of Avant Operating II, LLC for approval of a non-standard horizontal unit and compulsory pooling, Lea County, New Mexico. Applicant seeks an order pooling all uncommitted interests in the Bone Spring formation, from the top of the Bone Spring formation to the base of the Second Bone Spring formation at an approximate depth of 9,338', within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the following wells: the Moonwatch 17 8 State Com #501H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NW/4 SW/4 (Unit L) of Section 8; the Moonwatch 17 8 State Com #502H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NE/4 SW/4 (Unit K) of Section 8; the Moonwatch 17 8 State Com #503H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NW/4 SE/4 (Unit J) of Section 8; and the Moonwatch 17 8 State Com #504H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8. The wells will be drilled at orthodox locations.. Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Avant Operating II, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 20 miles west of Hobbs, New Mexico.

**APPLICATION OF AVANT OPERATING II,
LLC FOR APPROVAL OF A NON-STANDARD
HORIZONTAL UNIT AND COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO.**

CASE NO. _____

APPLICATION

Avant Operating II, LLC (“Avant”) (OGRID No. 332947), through its undersigned attorney, hereby files this application with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted interests in the Bone Spring formation, from the base of the Second Bone Spring formation at an approximate depth of 9,338’ to the base of the Bone Spring formation, within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico (the “Unit”). In support of this application, Avant states as follows:

1. Avant has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Avant seeks to minimize cost and surface disturbance by consolidating facilities and commingling production from existing and future wells in the proposed non-standard spacing unit.
3. To allow the proposed wells to be dedicated to a state Communitization Agreement, Avant seeks approval of a corresponding non-standard horizontal well spacing unit in the Bone Spring formation.

4. Avant is proposing a Joint Operating Agreement covering the subject area and seeks approval of this non-standard horizontal well spacing unit to match a corresponding Communitization Agreement for the state leases within the subject area.

5. If the proposed non-standard spacing unit is approved by the Division, then Avant understands that the New Mexico State Land Office will issue a corresponding Communitization Agreement for the state leases within the subject area to allow commingling and the corresponding reduction of the necessary surface facilities.

6. Avant seeks to dedicate the Unit to the following wells:

- the Moonwatch 17 8 State Com #601H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NW/4 SW/4 (Unit L) of Section 8;
- the Moonwatch 17 8 State Com #602H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NW/4 SE/4 (Unit J) of Section 8;
- the Moonwatch 17 8 State Com #603H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NW/4 SE/4 (Unit J) of Section 8; and
- the Moonwatch 17 8 State Com #604H well with a proposed surface hole location in the SE/4 SE/4 (Unit P) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8.

7. The wells will be horizontally drilled, and the producing areas for the wells are expected to be orthodox.

8. This proposed horizontal spacing unit will overlap the following existing spacing units in the Bone Spring formation:

- a. A 40-acre spacing unit in the NW/4 SW/4 of Section 17, and dedicated to the Deep Jack 1 well (API 30-025-41499) [Pool code 97930];
- b. A 40-acre spacing unit in the SWSE of Section 17, and dedicated to the Barbara State 2 well (API 30-025-41757) [Pool code 97930]; and
- c. A 40-acre spacing unit in the SESW of Section 17, and dedicated to the Hustle State 1 well (API 30-025-53096) [Pool code 97930].

9. Avant sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed Unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

10. Approval of this non-standard spacing unit and the pooling of interests therein will allow Avant to efficiently locate surface facilities for the recovery of oil and gas underlying the subject lands, reduce surface disturbance, lower operating costs, avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

WHEREFORE, Avant requests this application be set for a hearing before an Examiner of the Oil Conservation Division, to be consolidated with Case Nos. 26062-26065, and after notice and hearing as required by law, the Division enter an order:

- A. Approving the proposed non-standard horizontal spacing unit and pooling all uncommitted interests in the Bone Spring formation, from the base of the Second Bone Spring formation at an approximate depth of 9,338' to the base of the Bone Spring formation, within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico;
- B. Designating Avant as operator of this unit and the wells to be drilled thereon;
- C. Authorizing Avant to recover its costs of drilling, equipping and completing the Wells;
- D. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- E. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully,

A handwritten signature in blue ink, appearing to read "Kaitlyn Luck", is written over a horizontal line.

**APPLICATION OF AVANT OPERATING II,
LLC FOR APPROVAL OF A NON-STANDARD
HORIZONTAL UNIT AND COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO.**

CASE NO. _____

APPLICATION

Avant Operating II, LLC (“Avant”) (OGRID No. 332947), through its undersigned attorney, hereby files this application with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted interests in the Cisco formation, within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico (the “Unit”). In support of this application, Avant states as follows:

1. Avant has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Avant seeks to minimize cost and surface disturbance by consolidating facilities and commingling production from existing and future wells in the proposed non-standard spacing unit.
3. To allow the proposed wells to be dedicated to a state Communitization Agreement, Avant seeks approval of a corresponding non-standard horizontal well spacing unit in the Cisco formation.
4. Avant is proposing a Joint Operating Agreement covering the subject area and seeks approval of this non-standard horizontal well spacing unit to match a corresponding Communitization Agreement for the state leases within the subject area.

5. If the proposed non-standard spacing unit is approved by the Division, then Avant understands that the New Mexico State Land Office will issue a corresponding Communitization Agreement for the state leases within the subject area to allow commingling and the corresponding reduction of the necessary surface facilities.

6. Avant seeks to dedicate the Unit to the following wells:

- the Moonwatch 17 8 State Com #801H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NE/4 SW/4 (Unit K) of Section 8;
-
- the Moonwatch 17 8 State Com #802H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8;
-
- the Moonwatch 17 8 State Com #831H well with a proposed surface hole location in the SE/4 SE/4 (Unit P) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8; and
-
- the Moonwatch 17 8 State Com #832H well with a proposed surface hole location in the SE/4 SW/4 (Unit N) of Section 17, and a proposed last take point in the NE/4 SW/4 (Unit K) of Section 8.

7. The wells will be horizontally drilled, and the producing areas for the wells are expected to be orthodox.

8. This proposed horizontal spacing unit will overlap the following existing spacing units in the Cisco formation:

- a. A 40-acre spacing unit in the SESE of Section 8, and dedicated to the Mid Vac 8 State 1 well (API 30-025-42457) [Pool code 61780]; and
- b. A 40-acre spacing unit in the SWSE of Section 8, and dedicated to the State AF 2 well (API 30-025-20979) [Pool code 61780].

9. Avant sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Cisco formation underlying the proposed Unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

10. Approval of this overlapping non-standard spacing unit and the pooling of interests therein will allow Avant to efficiently locate surface facilities for the recovery of oil and gas underlying the subject lands, reduce surface disturbance, lower operating costs, avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

WHEREFORE, Avant requests this application be set for a hearing before an Examiner of the Oil Conservation Division, to be consolidated with Case Nos. 26062-26065, and after notice and hearing as required by law, the Division enter an order:

- A. Approving the proposed non-standard horizontal spacing unit and pooling all uncommitted interests in the Cisco formation, within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico;
- B. Designating Avant as operator of this unit and the wells to be drilled thereon;
- C. Authorizing Avant to recover its costs of drilling, equipping and completing the Wells;
- D. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- E. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

CASE NOS. 25996, 26129, 26130

SELF-AFFIRMED STATEMENT OF SOPHIA GUERRA

Sophia Guerra, hereby states and declares as follows:

1. I have personal knowledge of the matter addressed herein and am competent to provide this self-affirmed statement.
2. I have previously testified before the New Mexico Oil Conservation Division (“Division”) as an expert witness in petroleum land matters. My credentials as a petroleum landman have been accepted by the Division and made a matter of record.
3. I am familiar with the applications filed by Avant in Case Nos. 25996, 26129, 26130.
4. Avant seeks the orders from the Division approving the pooling and operatorship requested by Avant in the Applications in Case Nos. 25996, 26129, 26130.
5. At hearing July 28, 2026, Avant requests the Division find that it is the appropriate operator for the proposed spacing units in Case Nos. 25996, 26129, 26130, as provided in the applications described below.
6. In Case No. **25996**, Avant seeks an order pooling all uncommitted interests in the Bone Spring formation, from the top of the Bone Spring formation to the base of the Second Bone Spring formation at an approximate depth of 9,338’, within a non-standard 960-acre, more

or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico.

7. Avant proposes and dedicates to the HSU the following:

- the Moonwatch 17 8 State Com #501H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NW/4 SW/4 (Unit L) of Section 8;
- the Moonwatch 17 8 State Com #502H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NE/4 SW/4 (Unit K) of Section 8;
- the Moonwatch 17 8 State Com #503H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NW/4 SE/4 (Unit J) of Section 8; and
- the Moonwatch 17 8 State Com #504H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8.

8. The wells will be horizontally drilled, and the producing areas for the wells are expected to be orthodox.

9. In Case No. **26129**, for an order pooling all uncommitted interests in the Bone Spring formation, from the base of the Second Bone Spring formation at an approximate depth of 9,338' to the base of the Bone Spring formation, within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico.

10. Avant seeks to dedicate the Unit to the following Wells:

- the Moonwatch 17 8 State Com #601H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NW/4 SW/4 (Unit L) of Section 8;
- the Moonwatch 17 8 State Com #602H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NW/4 SE/4 (Unit J) of Section 8;
- the Moonwatch 17 8 State Com #603H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NW/4 SE/4 (Unit J) of Section 8; and

- the Moonwatch 17 8 State Com #604H well with a proposed surface hole location in the SE/4 SE/4 (Unit P) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8.

11. The wells will be horizontally drilled, and the producing areas for the wells are expected to be orthodox.

12. This proposed horizontal spacing unit will overlap the following existing spacing units in the Bone Spring formation:

- a. A 40-acre spacing unit in the NW/4 SW/4 of Section 17, and dedicated to the Deep Jack 1 well (API 30-025-41499) [Pool code 97930];
- b. A 40-acre spacing unit in the SWSE of Section 17, and dedicated to the Barbara State 2 well (API 30-025-41757) [Pool code 97930]; and
- c. A 40-acre spacing unit in the SESW of Section 17, and dedicated to the Hustle State 1 well (API 30-025-53096) [Pool code 97930].

13. In Case No. **26130**, Avant seeks an order pooling all uncommitted interests in the Cisco formation, within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico.

- the Moonwatch 17 8 State Com #801H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NE/4 SW/4 (Unit K) of Section 8;
- the Moonwatch 17 8 State Com #802H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8;
- the Moonwatch 17 8 State Com #831H well with a proposed surface hole location in the SE/4 SE/4 (Unit P) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8; and
- the Moonwatch 17 8 State Com #832H well with a proposed surface hole location in the SE/4 SW/4 (Unit N) of Section 17, and a proposed last take point in the NE/4 SW/4 (Unit K) of Section 8.

14. The wells will be horizontally drilled, and the producing areas for the wells are

expected to be orthodox.

15. This proposed horizontal spacing unit will overlap the following existing spacing units in the Cisco formation:

a. A 40-acre spacing unit in the SESE of Section 8, and dedicated to the Mid Vac 8 State 1 well (API 30-025-42457) [Pool code 61780]; and

b. A 40-acre spacing unit in the SWSE of Section 8, and dedicated to the State AF 2 well (API 30-025-20979) [Pool code 61780].

16. Avant **Exhibit C-1** is a land tract map together with the C-102 for each of the wells in Case Nos. 25996, 26129, 26130.

17. For Case No. **25996**, the forms demonstrate the completed intervals for the wells will comply with the standard setbacks for oil wells and the wells are assigned to the **WC-025 G-06 S183518A; Bone Spring Pool (Pool Code [97930])**.

18. For Case No. **26129**, the forms demonstrate the completed intervals for the wells will comply with the standard setbacks for oil wells and the wells are assigned to the **WC-025 G-06 S183518A; Bone Spring Pool (Pool Code [97930])**.

19. For Case No. **26130**, the forms demonstrate the completed intervals for the wells will comply with the standard setbacks for oil wells and the wells are assigned to the **VACUUM; Upper Penn Pool (Pool Code [62320])**.

20. Attached as **Avant Exhibit C-2** are the Land Tract Map for each of the units and the Uncommitted Interest Owners in Case Nos. 25996, 26129, 26130. The Exhibit identifies the tracts of land in the proposed Units, the ownership interests in each tract, and the ownership interests on a spacing unit basis.

21. **Avant Exhibit C-3** are the Sample Well Proposal Letter with AFEs for each of the units in Case Nos. 25996, 26129, 26130. Also included in Exhibit C-3 are a Sample Revised AFE Letter that was sent to all parties to reflect current AFE costs. The costs reflected in the AFEs are consistent with what Avant and other operators have incurred for drilling similar horizontal wells in the area in this formation. Avant requests that the overhead and administrative costs for drilling and producing the proposed well be set at \$10,000 per month while drilling and \$1,000 per month while producing; these costs are consistent with what other operators are charging in this area for similar wells.

22. Finally, **Avant Exhibit C-4** are the Chronology of Contacts for Case Nos. 25996, 26129, 26130. Exhibit C-4 contains a general summary of the contacts with the uncommitted interest owners. As indicated in the exhibit, Avant has made a good faith effort to locate and has had communications with all of the parties that it seeks to pool in this case in an effort to reach voluntary joinder. In my opinion, Avant has undertaken good faith efforts to reach an agreement with the uncommitted interest owners, and has provided notice to each of them as reflected on this exhibit.

23. As shown on Avant Exhibit C-5, each of the Division's competing pooling factors support a determination that Avant should be awarded pooling orders in Case Nos. 25996, 26129, and 26130.

24. First, Avant owns the majority working interest in the proposed units. Avant also owns a working interest in each tract of the proposed 960-acre spacing unit. Coterra does not own a working interest in the South-Half of Section 8, which is included in each of their four 560-acre spacing units.

25. Although Coterra was the first to propose development, Coterra has changed its plans and filed several sets of applications, which caused delay and cost to the Division due to the dismissals of prior applications and the expiration of pooling orders for the subject acreage without development by Franklin Mountain.

26. Throughout the course of its ownership in the subject acreage, Avant has had a straightforward development, with clear, and appropriate plans for the development of the subject acreage, which has been unduly delayed by Coterra's competing development plans that have changed.

27. As explained in more detail in the affidavit of Avant's geologist, Avant's development plan is more appropriate to efficiently recover hydrocarbons and with lower risks than Coterra's development plans.

28. Avant has conducted appropriate, good faith negotiations prior to filing its applications for force pooling.

29. Coterra's applications in Case Nos. 26062-26065 should be denied because there were previously issued pooling orders for the Ball State wells in Sections 20 and 29 that expired for lack of development. First, Coterra acquired the acreage at issue from Franklin Mountain Energy in January 2025, and the proposed wells and lands were subject to a pooling order issued October 2024 that both Franklin Mountain and Coterra failed to develop. The existing Ball State pooling orders in Sections 20 and 29 were set to expire in October 2025, but Coterra made no plans to develop the lands as they were originally proposed to their working interest owners and the Division. Coterra also failed to apply for an extension of their expiring pooling order. Instead, prior to the expiration of their existing Ball State pooling orders, Coterra sent well proposals for a revised development plan that extended the lateral lengths of their pre-existing

order. Subsequently, Coterra filed a new pooling application in December 2025, which Coterra then dismissed approximately 20 days later. In late December 2025, Coterra filed additional Ball State well pooling applications, which were again dismissed several months later. Finally, in March 2026, Coterra sent the apparently final version of its well proposal with its development plans and filed its existing applications in Case Nos. 26062-26065, which includes lands in the South-Half of Section 8. As of the date of this statement filing, there is no evidence that Coterra owns a working interest in the South-Half of Section 8.

30. Coterra's delay in developing this acreage, the expiration of the pooling order for the original Ball State wells, and the dismissal and re-filing of several pooling applications, should all weigh against any subsequent pooling order being issue to Coterra in its pending cases. Coterra has caused unnecessary delay in the development of their acreage and prevented their working interest owners the benefits of oil and gas production. Alternatively, Avant has proposed wells across tracts in which they own an interest and been consistent in their development plans.

31. Finally, Coterra's development plans are not appropriate for the geology in the area, and the proposed three and a half mile wells should not be approved due to the potential that the development will reach the end of the basin and not have each tract in the spacing unit contribute equally to the development.

32. Since Coterra's acquisition of its working interests in the proposed units, from a former interest owner, Coterra has unduly delayed Avant's attempts to reach a voluntary agreement or drill the wells proposed in Avant's Applications.

33. The above-referenced applications and notice of the hearing on these applications were sent by certified mail to the locatable affected parties, as reflected on ***Exhibit F***.

34. Avant's Exhibits C-1 to C-5 were either prepared by me or compiled under my direction and supervision.

35. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct.

36. I understand that this self-affirmed statement will be used as written testimony in this case.

37. This statement is made on the date next to my signature below.

A handwritten signature in blue ink, appearing to read "Sophia Guerra", is written over a light blue rectangular background.

Date: July 21, 2026

Sophia Guerra, Landman

RE: Moonwatch 17 8 State Com #501H, #502H, #503H, #504H
South-Half of Section 8 & All of Section 17, Township 18 South, Range 35 East
Lea County, New Mexico

Ladies and Gentlemen:

Avant Operating II, LLC ("Avant") hereby proposes to drill and complete the Moonwatch 17 8 State Com #501H, #502H, #503H, and #504H wells in the South-Half of Section 8 & All of Section 17, Township 18 South, Range 35 East, Lea County, New Mexico. Avant is finalizing reports and title shows you may have an interest in the referenced lands.

In connection with the above, please note the following:

- The estimated cost of drilling, testing, completing, and equipping of each proposed well is itemized on the enclosed Authority for Expenditures ("AFE") dated September 18, 2025.
- **Moonwatch 17 8 State Com #501H:** to be drilled from a SHL of 250' FSL & 1,100' FWL of T18S R35E Section 17 and a BHL of 2,540' FSL & 330' FWL of T18S R35E Section 8. The Well will have a targeted interval within the Bone Springs formation at a depth of approximately 9,230' TVD and will be drilled horizontally to a Measured Depth of approximately 17,273'.
- **Moonwatch 17 8 State Com #502H:** to be drilled from a SHL of 250' FSL & 1,160' FWL of T18S R35E Section 17 and a BHL of 2,540' FSL & 1,870' FWL of T18S R35E Section 8. The Well will have a targeted interval within the Bone Springs formation at a depth of approximately 9,230' TVD and will be drilled horizontally to a Measured Depth of approximately 17,273'.
- **Moonwatch 17 8 State Com #503H:** to be drilled from a SHL of 400' FSL & 1,360' FEL of T18S R35E Section 17 and a BHL of 2,540' FSL & 1,870' FEL of T18S R35E Section 8. The Well will have a targeted interval within the Bone Springs formation at a depth of approximately 9,230' TVD and will be drilled horizontally to a Measured Depth of approximately 17,273'.
- **Moonwatch 17 8 State Com #504H:** to be drilled from a SHL of 250' FSL & 1,400' FEL of T18S R35E Section 17 and a BHL of 2,540' FSL & 330' FEL of T18S R35E Section 8. The Well will have a targeted interval within the Bone Springs formation at a depth of approximately 9,230' TVD and will be drilled horizontally to a Measured Depth of approximately 17,273'.

1515 Wynkoop Street | Suite 700 | Denver, CO 80202
www.avantnr.com

Avant reserves the right to modify the locations and drilling plans described above to address topography, cultural or environmental concerns, among other reasons.

Avant is proposing to drill the proposed wells under the terms of a modified 1989 AAPL form of Operating Agreement ("JOA"). This JOA will be sent to you following this proposal with the following general provisions:

- 100%/300%/300% non-consent penalty
- \$10,000/\$1000 drilling and producing monthly overhead rates
- Contract Area of S2 of Section 8-T18S-R35E and ALL of Section 17-T18S-R35E
- This proposed Operating Agreement will supersede any and all existing Operating Agreements as to all depths on all horizontal wells drilled after the effective date of the JOA.

If we do not reach an agreement within thirty (30) days of receipt of these well proposals, Avant will file an application(s) with the New Mexico Oil Conservation Division to compulsory pool your interest into a spacing unit(s) for the proposed wells to promote the development of these lands.

Please indicate your elections in the spaces provided on the following pages. If you elect to participate in the drilling and completion of the wells proposed herein, please sign, and return a copy of this letter along with the enclosed AFEs within thirty (30) days of receipt of this proposal.

In the event you do not wish to participate in this proposed development and would be interested in selling your interest, please let us know. Should you have any questions, please contact the undersigned at sophia@avantnr.com or (303) 519-2870.

Sincerely,

A handwritten signature in blue ink, appearing to read "Sophia Guerra", is written over a light blue horizontal line.

Sophia Guerra

AUTHORIZATION FOR EXPENDITURE

AFE: NM1465

Date: September 18, 2025

Well Name: Moonwatch 17 8 State Com #502H

Projected MD/TVD: 17273/9230

Target: 2BS

SHL: S17-T18S-R35E 250' FSL, 1160' FWL

County: Lea

BHL: S8-T18S-R35E 2540' FSL, 1870' FWL

State: NM

PROJECT DESCRIPTION:

The proposed AFE is for the Moonwatch 17 8 State Com #502H, a 1.5 section Bone Spring horizontal well to be drilled in Lea County, NM.

	<u>TOTAL</u>
DRILLING:	\$3,162,945
COMPLETIONS:	\$4,721,924
FACILITIES:	\$1,592,965
COMPLETED WELL COST:	\$9,477,834

OPERATOR APPROVAL:

RE: Moonwatch 17 8 State Com
#601H, #602H, #603H, #604H, #801H, #802H, #831H, #832H
South-Half of Section 8 & All of Section 17, Township 18 South, Range 35 East
Lea County, New Mexico

Ladies and Gentlemen:

Avant Operating II, LLC ("Avant") previously sent well proposals to working interest owners for the Moonwatch 17 8 State Com #501H, #502H, #503H, #504H, #601H, #602H, #603H, #831H, #832H, #833H, and #834H wells in the South-Half of Section 8 and All of Section 17, Township 18 South, Range 35 East, Lea County, New Mexico. Avant recently made revisions to the development plan of the #601H, #602H, #603H, #831H, #832H, #833H, and #834H wells. Accordingly, the previously distributed well proposals for the #601H, #602H, #603H, #831H, #832H, #833H, and #834H wells should be disregarded, and the following should be considered a replacement. Please note that the development plan for the #501H, #502H, #503H, and #504H wells was not revised and therefore the originally distributed well proposals are still accurate and valid.

Avant hereby proposes to drill and complete the Moonwatch 17 8 State Com #601H, #602H, #603H, #604H, #801H, #802H, #831H, and #832H wells in the South-Half of Section 8 & All of Section 17, Township 18 South, Range 35 East, Lea County, New Mexico. Title reports show you have an interest in the referenced lands.

In connection with the above, please note the following:

- The estimated cost of drilling, testing, completing, and equipping of each proposed well is itemized on the enclosed Authority for Expenditures ("AFE") dated February 23, 2026.
- **Moonwatch 17 8 State Com #601H:** to be drilled from a SHL of S17-T18S-R35E 405' FSL, 1194' FWL and a BHL of S8-T18S-R35E 2542' FSL, 330' FWL. The Well will have a targeted interval within the Bone Springs formation at a depth of approximately 9,641' TVD and will be drilled horizontally to a Measured Depth of approximately 17,594'.
- **Moonwatch 17 8 State Com #602H:** to be drilled from a SHL of S17-T18S-R35E 289' FSL, 1444' FEL and a BHL of S8-T18S-R35E 2544' FSL, 1870' FWL. The Well will have a targeted interval within the Bone Springs formation at a depth of approximately 9,641' TVD and will be drilled horizontally to a Measured Depth of approximately 17,594'.

1515 Wynkoop Street | Suite 700 | Denver, CO 80202
www.avantnr.com

- **Moonwatch 17 8 State Com #603H:** to be drilled from a SHL of S17-T18S-R35E 289' FSL, 1364' FEL and a BHL of S8-T18S-R35E 2546' FSL, 1870' FEL. The Well will have a targeted interval within the Bone Springs formation at a depth of approximately 9,641' TVD and will be drilled horizontally to a Measured Depth of approximately 17,594'.
- **Moonwatch 17 8 State Com #604H:** to be drilled from a SHL of S17-T18S-R35E 288' FSL, 1304' FEL and a BHL of S8-T18S-R35E 2547' FSL, 330' FEL. The Well will have a targeted interval within the Bone Springs formation at a depth of approximately 9,641' TVD and will be drilled horizontally to a Measured Depth of approximately 17,594'.
- **Moonwatch 17 8 State Com #801H:** to be drilled from a SHL of S17-T18S-R35E 555' FSL, 1175' FWL and a BHL of S8-T18S-R35E 2540' FSL, 1870' FWL. The Well will have a targeted interval within the Upper Penn formation at a depth of approximately 10,300' TVD and will be drilled horizontally to a Measured Depth of approximately 18,223'.
- **Moonwatch 17 8 State Com #802H:** to be drilled from a SHL of S17-T18S-R35E 289' FSL, 1384' FEL and a BHL of S8-T18S-R35E 2545' FSL, 330' FEL. The Well will have a targeted interval within the Upper Penn formation at a depth of approximately 10,300' TVD and will be drilled horizontally to a Measured Depth of approximately 18,223'.
- **Moonwatch 17 8 State Com #831H:** to be drilled from a SHL of S17-T18S-R35E 405' FSL, 1174' FWL and a BHL of S8-T18S-R35E 2540' FSL, 330' FWL. The Well will have a targeted interval within the Upper Penn formation at a depth of approximately 10,525' TVD and will be drilled horizontally to a Measured Depth of approximately 18,448'.
- **Moonwatch 17 8 State Com #832H:** to be drilled from a SHL of S17-T18S-R35E 289' FSL, 1424' FEL and a BHL of S8-T18S-R35E 2544' FSL, 1870' FEL. The Well will have a targeted interval within the Upper Penn formation at a depth of approximately 10,525' TVD and will be drilled horizontally to a Measured Depth of approximately 18,448'.

Avant reserves the right to modify the locations and drilling plans described above to address topography, cultural or environmental concerns, among other reasons.

Avant is proposing to drill the proposed wells under the terms of a modified 1989 AAPL form of Operating Agreement ("JOA"). This JOA will be sent to you following this proposal with the following general provisions:

- 100%/300%/300% non-consent penalty
- \$10,000/\$1000 drilling and producing monthly overhead rates
- Contract Area of S2 of Section 8-T18S-R35E and ALL of Section 17-T18S-R35E
- This proposed Operating Agreement will supersede any and all existing Operating Agreements as to all depths on all horizontal wells drilled after the effective date of the JOA.

If we do not reach an agreement within thirty (30) days of receipt of these well proposals, Avant will file an application(s) with the New Mexico Oil Conservation Division to compulsory pool your interest into a spacing unit(s) for the proposed wells to promote the development of these lands.

Please indicate your elections in the spaces provided on the following pages. If you elect to participate in the drilling and completion of the wells proposed herein, please sign, and return a copy of this letter along with the enclosed AFEs within thirty (30) days of receipt of this proposal.

In the event you do not wish to participate in this proposed development and would be interested in selling your interest, please let us know. Should you have any questions, please contact the undersigned at sophia@avantnr.com or (303) 519-2870.

Sincerely,

A handwritten signature in blue ink, appearing to read "Sophia Guerra".

Sophia Guerra
Land Operations Manager

AUTHORIZATION FOR EXPENDITURE

AFE: NM1644

Date: February 23, 2026

Well Name: Moonwatch 17 8 State Com #604H

Projected MD/TVD: 17594/9641

Target: 3BS

SHL: S17-T18S-R35E 288' FSL, 1304' FEL

County: Lea

BHL: S8-T18S-R35E 2547' FSL, 330' FEL

State: NM

PROJECT DESCRIPTION:

The proposed AFE is for the Moonwatch 17 8 State Com #604H, a 1.5 section Bone Spring horizontal well to be drilled in Lea County, NM.

	<u>TOTAL</u>
DRILLING:	\$3,230,015
COMPLETIONS:	\$4,713,251
FACILITIES:	\$1,592,965
COMPLETED WELL COST:	\$9,536,232

OPERATOR APPROVAL:

AUTHORIZATION FOR EXPENDITURE

AFE: NM1469

Date: February 27, 2026

Well Name: Moonwatch 17 8 State Com #831H

Projected MD/TVD: 18448/10525

Target: Upper Pennsylvanian

SHL: S17-T18S-R35E 405' FSL, 1174' FWL

County: Lea

BHL: S8-T18S-R35E 2540' FSL, 330' FWL

State: NM

PROJECT DESCRIPTION:

The proposed AFE is for the Moonwatch 17 8 State Com #831H, a 1.5 section Upper Pennsylvanian horizontal well to be drilled in Lea County, NM.

	<u>TOTAL</u>
DRILLING:	\$3,937,333
COMPLETIONS:	\$4,740,891
FACILITIES:	\$1,592,965
COMPLETED WELL COST:	\$10,271,189

Summary of Contacts with Coterra

Moonwatch 17 8 State Com

#501H-504H, #601H-604H, #801H, #802H, #831H, #832H

Avant Exhibit C-4
OCD Case Nos.
25996, 26129, 26130

AO II has been proactive and consistently engaged with Coterra to reach an agreement, showing intent to be prudent operator.

- 10/21: Initial well proposals sent to Coterra for 2BS and 3BS wells only as they did not own in Cisco formation.
- 12/10: Coterra landman emailed stating they acquired an interest in Cisco formation and requested copy of well proposals that were sent to predecessor in title.
- 12/15: Emailed Coterra asking for recorded Cisco assignment.
- 1/16: Emailed Cisco well proposals to Coterra.
- 1/21: Coterra landman asked if we would be interested in co-developing 3.5-mile laterals.
- 2/2: Responded to Coterra landman stating we are not interested in co-developing 3.5-mile laterals. Asked if they would be interested in trading out of overlapping spacing unit or trading AO II into operated unit.
- 2/26: Followed up with Coterra landman on trade idea. Also inquired as to why Coterra had dismissed original Ball State pooling applications.
- 6/8: AO II general counsel sent trade proposal letter to Coterra land manager.
- 6/8: Coterra land manager responded that they would be reviewing. Also discussed meeting in person.
- 6/16: AO II landman met with Coterra landman and land manager in Midland to discuss trade proposal. During discussions, determined next steps for potential trade ideas.
- 6/19: Coterra land manager sent list of potential trade ideas to AO II landman.
- 6/30: AO II general counsel sent email stating review of potential ideas was in progress.
- 7/2: AO II landman sent over revised trade proposal letter via email.
- 7/2: Coterra land manager responded to trade idea with desire to discuss thought process after the holiday.
- 7/6: AO II general counsel and Coterra land manager talked on phone to discuss various trade ideas circulated.
- 7/7: AO II general counsel sent additional tracts of interest to Coterra land manager.
- 7/9: AO II Eddy Co. landman texted Coterra Eddy Co. landman asking for a call to discuss some Eddy Co. acreage.
- 7/10: AO II general counsel sent follow-up email and Coterra land manager sent email with other Coterra representatives to continue discussion.
- 7/13: Phone call between Eddy Co. landmen at Coterra and AO II to discuss status of Eddy Co. acreage of interest.
- 7/13: Multiple texts between Eddy Co. landmen at both Coterra and AO II discussing the trade concept and acreage details.
- 7/14: Multiple texts between Eddy Co. landmen at both Coterra and AO II further discussing trade and acreage details.
- 7/14: Phone call between Eddy Co. landmen at Coterra and AO II further discussing Coterra acreage details and the trade.
- 7/14: Coterra Eddy Co. landman emailed new trade menu to AO II Eddy Co. landman.
- 7/14: AO II general counsel spoke with Coterra region manager by phone.
- 7/15: AO II Eddy Co. landman emailed AO II's net acres in Moonwatch to Coterra Eddy Co. landman.
- 7/16: Coterra landman asked by email if AO II had any drilling obligations on the Moonwatch acreage and AO II landman responded by email with requested information on obligations.
- 7/16: Phone call between Eddy Co. landmen at both Coterra and AO II discussing NRI details on the trade and a Coterra trade lease, the form of letter agreement, and the hearing.
- 7/16: Multiple texts between AO II general counsel and Coterra VP of Permian Business Unit
- 7/17: Multiple texts between Eddy Co. landmen at both Coterra and AO II discussing AO II's intent to counter Coterra's delivered NRI, and add additional trade lands.
- 7/17: Phone call between AO II general counsel and Coterra VP of Permian Business Unit delivering AO II's counter on the trade.

AOII

Summary of Contacts with WI Owners

Moonwatch 17 8 State Com

#501H-504H, #601H-604H, #801H, #802H, #831H, #832H

AO II has been proactive and consistently engaged with all working interest owners.

Owner Name	Summary of Contacts
Marshall & Winston, Inc	1/20: Sent well proposals to predecessor in title (Longboat Energy Partners). 3/9: Called Longboat Energy Partners and was informed they sold to Marshall & Winston, but assignment not filed of record. 3/18: Sent well proposals to Marshall & Winston upon confirmation of assignment. 3/19: Emailed with Marshall & Winston - provided JOA and asked if they are interested in us making an offer to purchase. 4/3: Sent formal offer to purchase via email. 4/10: Owner sent back signed well proposals and JOA.
V-F Petroleum Inc	11/7: Emailed owner representative and provided WI / NRI. 11/20: Emailed owner copy of JOA. 2/2: Emailed owner representatives and re-attached JOA. Expressed offer to work deal. 2/26: Emailed owner representatives to ask about the JOA. 3/6: Spoke with owner representatives on phone. Answered JOA questions and offered to send \$/acre offer following week. 4/8: Sent JOAs to owner and offer to purchase. 6/8: Sent follow up email with JOAs. 6/19: Sent follow up email with JOAs. 6/22: Called owner and left VM. 6/24: Called owner and left VM. 7/2: Called owner and left VM. 7/14: Called owner and followed up via email.
Fuel Products Inc.	11/5: Sent well proposals. 11/20: Emailed owner representative and provided WI / NRI for owner. Also sent copy of JOA and asked if they are interested in selling or trading. 12/11: Followed up with owner via email. 1/6: Followed up with owner on potential cash offer or JOA. 2/2: Emailed owner and re-attached JOA. Expressed offer to work deal. 5/14: Called owner and sent email. Offered to purchase interest and sent JOAs via email. 6/8: Sent follow-up email. 6/18: Sent JOA via email again. 6/24: Called and left VM at office.
Mark K Nearburg	11/5: Sent well proposals. 1/8: Spoke with owner on phone and answered questions regarding interest and dev timing. 1/13: Sent JOA via email upon request. 3/2: Sent revised well proposals. 5/4: Sent owner email asking if they have JOA questions. 5/29: Sent follow up email regarding JOA. 6/22: Sent follow up email regarding JOA.
HFLP E&P LLC	11/5: Sent well proposals. 3/2: Sent revised well proposals.
OWL Exploration, LLC	1/20: Sent well proposals. 1/29: Spoke with owner representative and answered well questions. 1/30: Owner returned election via email. Sent JOA to owner via email. 3/10: Sent email to owner asking if owner has any JOA questions or if wanted to sell interest. 3/11: Re-sent JOA to owner. 3/11: Owner returned signed JOA pages

Division's Factors in AO II Favor

Moonwatch 17 8 State Com
#801H, #802H, #831H, #832H

Avant Exhibit C-5
OCD Case Nos.
25996, 26129, 26130

S2 of Section 8 and All of Section 17, Township 18 South, Range 35 East, N.M.P.M, Lea County, New Mexico

Factor	AOII	CTRA	Comment
Ownership Interest	✓	X	- AO II owns majority working interest in all proposed formations in cases #25996, 26129 and 26130 - AO II owns working interest in both Sections 8 and 17 of contract area - CTRA does not own working interest in Section 8
Geologic Evidence	✓	X	- AO II development plan includes 2BS, 3BS and Cisco, CTRA development includes only 2BS and 3BS - AO II development has no existing horizontal depletion within the unit, CTRA's development will encounter depletion in the 2BS, degrading well performance on a per foot basis and unfairly harming Section 17 & 8 interest owners
Risk	✓	X	- AO II's 1.5-mile lateral plan develops undepleted acreage independently, limiting depletion and execution risk. - CTRA combines extended-reach completion risk with depleted 2BS reservoir and a 3.5-mile 3BS design unsupported by producing analogs. - Available field data does not demonstrate a recovery benefit sufficient to justify those additional risks
Negotiations	✓	✓	Both parties have demonstrated significant efforts to negotiate a mutually agreeable trade agreement
Prudent Operator and Prevent Waste	✓	X	- AO II has been consistent with development plans to expedite compulsory pooling process and prudently develop lands for partners and mineral interest owners - CTRA has been indecisive and frequently changed development plans, leading to significant delays in development and unnecessarily utilizing NMOCD resources through various hearings
Cost Estimates	✓	X	- AO II can economically develop 1.5-mile laterals without the need to extend lateral length - AO II sent revised AFEs to all parties on 7/20/26 that reflect current cost estimates
Surface Factor	✓	X	- AO II has pending surface use agreement with state grazing tenant - AO II has applied for a NSU to reduce CTBs needed for full-scale development

Case No. 25996, 26129, 26130

Timeline of Events

Moonwatch 17 8 State Com
#801H, #802H, #831H, #832H

AO II has diligently prosecuted development plans while Coterra has been inconsistent and caused unnecessary development delays

AO II

Coterra

- Coterra allowed pre-existing pooling applications to expire
- Coterra filed and dismissed 2 sets of pooling applications
- Coterra filed pooling application on lands they do not own an interest in
- **AO II has been consistent and persistent** with development plans and is prepared for near-term development

OIL CONSERVATION DIVISION**

**APPLICATION OF AVANT OPERATING II,
LLC FOR APPROVAL OF A NON-STANDARD
HORIZONTAL UNIT AND COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO.**

CASE NOS. 25996, 26129, 26130

SELF-AFFIRMED STATEMENT OF JOSH PAYNE

I, Josh Payne, hereby states and declares as follows:

1. I have personal knowledge of the matter addressed herein and am competent to provide this self-affirmed statement.
2. I have previously testified before the New Mexico Oil Conservation Division (“Division”) as an expert witness in petroleum geology. My credentials as a petroleum geologist have been accepted by the Division and made a matter of record.
3. I am familiar with the applications filed by Avant in Case Nos. 25996, 26129, 26130.
4. Exhibit D-1 is a locator map showing the approximate location of the proposed unit in relation to the Capitan Reef.
5. Exhibit D-2 is a wellbore schematic showing AO II’s development plan.
6. Exhibit D-3 compares the development plans submitted by AO II and CTRA by formation and illustrates that AO II’s proposal includes Cisco/Penn development, while CTRA’s does not. Exhibit D-3 also includes a regional map with Cisco/Penn development and permitting activity in the area.

7. Exhibit D-4 is a cross-section reference map that identifies four wells in the vicinity of the proposed wells, shown by a line of cross-section running from A-A'.

SECOND BONE SPRING GEOLOGY STUDY—CASE NO. 25996

8. Exhibit D-5 is a structure map of the base of the Second Bone Spring Sand formation. The proposed spacing unit in Case No. 25996 is identified by a red box. The proposed Moonwatch 17 8 State Com Second Bone Spring wells are identified by the black-dashed lines. The contour interval used in this exhibit is 100 feet. This exhibit shows that structure dips primarily to the north in section 17 and transitions to be more west-northwest trending in the S2 of section 8.

9. Exhibit D-6 is a stratigraphic cross-section (A-A'), and the well logs shown on the cross-section give a representative sample of the Second Bone Spring Sand formation in the area. The target zone for the Moonwatch 17 8 State Com #501-504H is identified by a red-dashed line and a box identifying the wells. In my opinion, the Second Bone Spring Sand shows minor variability, and some thickening northward but is overall relatively consistent.

THIRD BONE SPRING GEOLOGY STUDY—CASE NO. 26129

10. Exhibit D-7 is a structure map of the base of the Third Bone Spring Sand formation. The proposed spacing unit in Case No. 26129 is identified by a red box. The proposed Moonwatch 17 8 State Com Third Bone Spring wells are identified by the black-dashed lines. The contour interval used in this exhibit is 100 feet. This exhibit shows that structure dips primarily to the north in section 17 and transitions to be more west-northwest trending in the S2 of section 8.

11. Exhibit D-8 is a stratigraphic cross-section (A-A'), and the well logs shown on the cross-section give a representative sample of the Third Bone Spring Sand formation in the area.

The target zone for the Moonwatch 17 8 State Com #601-604H is identified by a red-dashed line and a box identifying the wells. In my opinion, the Third Bone Spring Sand shows some variability in the upper half of the formation and is relatively consistent in the lower half of the formation.

CISCO/PENN GEOLOGY STUDY—CASE NO. 26130

12. Exhibit D-9 is a cross-section reference map that identifies four wells in the vicinity of the proposed wells, shown by a line of cross-section running from B-B'.

13. Exhibit D-10 is a structure map of the Strawn formation. The proposed spacing unit in Case No. 26130 is identified by a red box. The proposed Moonwatch 17 8 State Com Cisco/Penn wells are identified by the black-dashed lines. The contour interval used in this exhibit is 100 feet. This exhibit shows that structure dips gently to the northeast.

14. Exhibit D-11 is a stratigraphic cross-section (B-B'), and the well logs shown on the cross-section give a representative sample of the Cisco/Penn formation in the area. The target zone for the Moonwatch 17 8 State Com #801-802H, #831-832H are identified by red-dashed lines and a box identifying the wells. In my opinion, the Cisco/Penn is relatively consistent.

15. The Cisco/Penn (targeted by AO II's Moonwatch 17 8 #801-802H, #831-832H) is a prospective target interval that CTRA has chosen not to develop. We feel that this will leave significant reserves behind by neglecting to pursue this target interval.

16. In my opinion, the preferred well orientation in this area is North South due to the S_{Hmax} direction.

17. Based on my geologic study, the formations underlying the subject area are suitable for development by horizontal wells and the acreage comprising the proposed spacing

unit will contribute more-or-less equally to the production from the wells. I have not identified any geologic impediments to drilling horizontal wells in the proposed spacing unit.

18. In my opinion, horizontal drilling will be the most efficient method to develop this acreage, to prevent drilling of unnecessary wells, and to result in the greatest ultimate recovery, and that approving Avant's application will be in the best interest of conservation, the prevention of waste, and protection of correlative rights.

19. Avant's Exhibits D-1 to D-11 were either prepared by me or compiled under my direction and supervision.

20. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct.

21. I understand that this self-affirmed statement will be used as written testimony in this case.

22. This statement is made on the date next to my signature below.

Josh Payne, Geologist

Development Comparison

Summary

- AOII proposes development across three productive reservoirs, while CTRA proposes development of only two
- CTRA's development plan leaves the Cisco / Penn interval undeveloped despite active regional development
- Multiple operators continue to permit and drill Cisco / Penn wells surrounding the proposed unit
- AOII's plan captures development opportunities that are not addressed under CTRA's proposal

CASE NOS. 25996, 26129, 26130

SELF-AFFIRMED STATEMENT OF SHANE KELLY

Shane Kelly, hereby states and declares as follows:

1. I have personal knowledge of the matter addressed herein and am competent to provide this self-affirmed statement.
2. I am over the age of 18, I am employed as a Senior Vice President of Engineering for Avant Operating II, LLC ("AO II"), and have personal knowledge of the matters stated herein. I have previously testified before the Oil Conservation Division ("Division") and my credentials as an expert reservoir engineer were accepted by the Division as a matter of record.
3. My area of responsibility at AO II includes the subject area of Lea County, New Mexico.
4. I am familiar with the applications filed by Avant in Case Nos. 25996, 26129, 26130.
5. Coterra's applications in Case Nos. 26062-26065 should be denied for the following reasons.
6. In my opinion, AO II's proposed development plan will maximize recovery, protect correlative rights, and prevent waste. AO II's applications should therefore be approved, and Coterra's competing applications should be denied.

7. Avant Exhibit E-1 compares the parties' proposed development plans. AO II proposes conventional-length development of the Second Bone Spring, Third Bone Spring, and Cisco/Penn formations, while Coterra proposes 3.5 mile Second and Third Bone Spring wells, with the Second Bone Spring wells traversing partially depleted reservoir. No Cisco/Penn wells are included in Coterra's pooling application.

8. Avant Exhibit E-2 presents an offset Second Bone Spring analog showing that wells drilled through depleted reservoir recovered approximately 40 percent less oil on a lateral length-normalized basis than wells developed in undepleted reservoir.

9. Avant Exhibit E-3 compares extended-reach and conventional-length Second Bone Spring development and shows that the 3.5-mile wells recovered approximately 30 percent less normalized oil than nearby 2-mile wells.

10. Avant Exhibit E-4 compares Third Bone Spring development and shows that the closest producing extended-reach analogs, which are 3-mile wells, recovered approximately 20 percent less normalized oil than nearby conventional-length wells, and that no producing 3.5-mile 3BS well analogs exist in the basin.

11. Avant Exhibit E-5 evaluates the estimated recovery attributable to the Moonwatch acreage under the competing Second Bone Spring plans. Although Coterra's proposed lateral would be approximately 2.3 times as long as AO II's proposed lateral, existing depletion and reduced extended-lateral efficiency result in approximately the same estimated whole-well recovery. Consequently, the recovery attributable to Moonwatch acreage under Coterra's plan would be approximately 58 percent lower than under AO II's plan.

12. Avant Exhibit E-6 compares total estimated recovery from the Moonwatch unit. AO II's twelve-well plan is estimated to recover approximately 6.8 million barrels of oil,

compared with approximately 2.3 million barrels attributable to the Moonwatch acreage under Coterra's plan.

13. Avant Exhibit E-7 shows that AO II's proposed 1.5-mile wells are economic and that Coterra can economically develop its acreage using conventional-length wells without extending laterals through the Moonwatch unit.

14. Avant Exhibit E-8 outlines AO II's progress in securing the crude oil, natural gas, produced-water, and water-supply infrastructure necessary to timely develop the Moonwatch acreage.

15. For these reasons, AO II's plan provides the more prudent and technically supported method of developing the subject acreage.

16. Exhibits E-1 through E-8 were prepared by me or compiled under my direction or supervision.

17. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct.

18. I understand that this self-affirmed statement will be used as written testimony in this case.

19. This statement is made on the date next to my signature below.

SHANE KELLY

AOII and CTRA Propose Fundamentally Different Development Strategies

Avant Operating II, LLC
Case Nos. 25996, 26129, 26130
Exhibit E-1

Pooling Application Comparison

Summary

- AOII proposes conventional-length (1.5-mile) development across the 2BS, 3BS, and Cisco/Penn.
- CTRA proposes extended lateral (3.5-mile) 2BS and 3BS laterals extending into the AOII unit.
- Existing 2BS production has already depleted portions of the proposed extended-reach development.
- Cisco/Penn development is proposed only by AOII.

Subject Units and Nearby Cisco/Penn Development

Offset Analog Demonstrates Correlative Rights Impacts From Traversing Depleted Reservoir

Avant Operating II, LLC
Case Nos. 25996, 26129, 26130
Exhibit E-2

Offset 2BS (2nd Bone Spring) Analog: Child Wells Traversing Depleted Reservoir

Traversing Depleted Reservoir Reduces Recovery by ~40%⁽¹⁾

Summary

- Offset analog demonstrates material recovery loss from traversing depleted reservoir.
- Child wells drilled through depletion materially underperform undepleted offsets.
- CTRA-owned acreage contains substantially more depletion than the analog.
- Mixing depleted and undeveloped reservoir shifts recovery away from undeveloped mineral owners.

Avant Operating II, LLC
Case Nos. 25996, 26129, 26130
Exhibit E-4

Closest Producing Extended-Reach 3BS Development (~36 miles from Subject Unit)

Longer 3BS Laterals Do Not Improve Normalized Recovery⁽¹⁾

Summary

- No producing 3.5-mile 3BS analog exists⁽²⁾.
- The closest producing extended-reach 3BS development underperforms shorter laterals.
- Public data provides no evidence that longer 3BS laterals increase recovery.
- The proposed 3.5-mile 3BS design is unsupported by field performance.

Source: Enverus

(1) Total cumulative oil by unit, normalized to 10,000 ft lateral length and time-zero.

(2) According to publicly available production data as of July 2026.

(3) Dashed line represents the normalized production of theoretical 3.5-mile 3BS wells and shows a 30% degradation relative to 1.5-mile wells, as shown in the 2BS analog exhibit.

CTRA's Proposed 3.5-Mile Lateral Mixes
High- and Low-Contributing Reservoir

Avant Operating II, LLC
Case Nos. 25996, 26129, 26130
Exhibit E-5

Owners of undepleted reservoir should not have their recovery diluted by depleted 2BS reservoir.

- (1) Conceptual illustration, not to scale. Relative bar widths reflect observed extended-reach performance and are not measured stage-by-stage contributions.
- (2) CTRA EUR is an AOII estimate based on scaling the 1.5-mile type curve to 3.5 miles, applying the observed extended-reach degradation and a conservative whole-well depletion adjustment consistent with the offset analog.
- (3) CTRA Moonwatch-owner EUR reflects the modeled 3.5-mile well EUR multiplied by Moonwatch's 1.5/3.5 proportional unit share. Final tract participation factor has not yet been established; for illustrative purposes, Moonwatch allocation is estimated using this proportional unit share.

CTRA Proposal Leaves ~4.5 MMBO
Unrecovered in the Subject Unit

Avant Operating II, LLC
Case Nos. 25996, 26129, 26130
Exhibit E-6

Avant's Development Plan Maximizes Recovery and Minimizes Waste

AOII: POOLING APPLICATION WELLS

CTRA: POOLING APPLICATION WELLS

Estimated Recovery from the Subject 1.5-Mile Unit

Formation	AOII Pooling Application			CTRA Pooling Application			
	AOII Wells	EUR / Well (MMBO)	1.5-Mile Unit EUR (MMBO)	CTRA Wells	EUR / 3.5-mi Well (MMBO)	Allocated to 1.5-Mi (MMBO)	1.5-Mi Unit EUR (MMBO)
2BS	4	0.52	2.10	4	0.51	0.22	0.88
3BS	4	0.51	2.02	4	0.83	0.35	1.42
Cisco/Penn	4	0.66	2.65	0	0	0	0
Total	12		6.8	8			2.3

AOII 1.5-mile Unit Recovery	6.8 MMBO
CTRA recovery allocated to 1.5-mile Unit	2.3 MMBO
TOTAL UNRECOVERED RESOURCE (WASTE)	4.5 MMBO

Total Cumulative Oil Per 1.5-Mile Unit

- Avant's development plan maximizes recovery from the Subject Unit.
- CTRA's proposal combines depleted and undeveloped reservoir, reducing recoverable oil.
- Eliminating Penn development further reduces unit recovery.
- CTRA EUR figures are Avant estimates assuming 30% degradation due to extended reach lateral inefficiency (2BS and 3BS) and a 40% depletion degradation (2BS).
- The result is material waste and impaired correlative rights.

Avant Operating II, LLC
Case Nos. 25996, 26129, 26130
Exhibit E-7

Economic Development Does
Not Require 3.5-Mile Laterals

Subject Unit and Existing 2BS Development

Economic Returns Do Not Require 3.5-Mile Laterals

Metric	AOII 2BS 1.5 Mi Wells	AOII 3BS 1.5 Mi Wells	CTRA 3BS 2.0 Mi Wells
Lateral Length	7,500 ft	7,500 ft	10,000 ft
Oil EUR	524 MBO	506 MBO	694 MBO
D&C Cost	\$8.5 MM	\$8.6 MM	\$9.5 MM
NPV20 ⁽¹⁾	\$1.9 MM	\$1.9 MM	\$4.9 MM

Payout ⁽¹⁾	26 mo.	27 mo.	18 mo.

*1.5- and 2-mile laterals generate
economic returns for AOII and CTRA*

Summary

- Conventional-length laterals generate attractive economic returns.
- CTRA's existing acreage can be economically developed without 3.5-mile laterals.
- The application provides no economic justification for extending into AOII acreage.

(1) Based on 7.10.2026 NYMEX strip commodity pricing

Midstream Overview

Moonwatch 17 8 State Com

Avant Operating II, LLC
Case Nos. 25996, 26129, 26130
Exhibit E-8

Avant is executing on reliable midstream takeaway solutions

Crude Oil Transportation:

- Commercial agreements executed and dedication in place for crude volumes from Moonwatch.
- Service provider has approved NMSLO right-of-way grant and is released for pipeline construction to Avant's Moonwatch unit.
- Approximate 1-mile extension from existing system with sufficient capacity to transport 100% of forecasted production.

Natural Gas Transportation:

- Commercial agreements and dedication in place for gas volumes from Moonwatch.
- Service provider has approved NMSLO right-of-way grant and is released for pipeline construction to Avant's Moonwatch unit.
- Avant has firm transportation capacity sufficient to capture 100% of forecasted gas production from Moonwatch.

Water Supply and Gathering:

- Avant has approved NMSLO right-of-way grant and is released for pipeline construction to connect into an existing SWD and recycle facility as part of a broader fully integrated third-party produced water system.
 - Avant is analyzing the potential to tie-into nearby Avant owned water infrastructure to provide additional redundancy and reliability.
- Commercial agreements are in negotiation and nearing final executable form securing treated produced water supply for frac and reliable produced water takeaway.

CASE NOS. 25996, 26129, 26130

**SELF AFFIRMED STATEMENT OF
KAITLYN A. LUCK**

1. I am attorney in fact and authorized representative of Avant Operating II, LLC (“Avant”), the Applicant herein.

2. I have personal knowledge of the matter addressed herein and am competent to provide this self-affirmed statement.

3. The above-referenced application and notice of the hearing on this application was sent by certified mail to the locatable affected parties on the date set forth in the letter attached hereto. Notice was provided both for compulsory pooling and approval of an overlapping-nonstandard well spacing unit.

4. The spreadsheet attached hereto contains the names of the parties to whom notice was provided in Case No. **25996, 26129, 26130** (“Cases”) set for the July 28, 2026 Contested Hearing Docket of the New Mexico Oil Conservation Division.

5. The spreadsheet attached hereto contains the information provided by the United States Postal Service with the tracking information for all notices provided for this hearing.

6. I also caused a notice to be published to all parties subject to this compulsory pooling proceeding, and for approval of an overlapping non-standard well spacing unit. An

affidavit of publication from the Lea County newspaper's publication legal clerk with a copy of the notice of publication is attached herein.

7. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct.

8. I understand that this self-affirmed statement will be used as written testimony in this case.

9. This statement is made on the date next to my signature below.

Re: Case No. 25996- Avant Operating II, LLC for approval of a non-standard horizontal unit and compulsory pooling, Lea County, New Mexico - Moonwatch 17 8 State Com 501H-503H wells.

Ladies & Gentlemen:

This letter is to advise you that Avant Operating II, LLC, has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on **March 26, 2026**, and the status of the hearing can be monitored through the Division's website at <https://www.emnrd.nm.gov/ocd/>. It is anticipated that hearings will be held in a hybrid format with both in-person and virtual participation options. The meeting will be held in the Pecos Hall Hearing Room at the Wendall Chino Building, 1st Floor, 1220 South St. Francis Dr., Santa Fe, New Mexico. To participate virtually in the hearing, see the instructions posted on the OCD Hearings website: <https://www.emnrd.nm.gov/ocd/hearing-info/>.

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of OCD Rule 19.15.4.13.B NMAC.

If you have any questions about this matter, please contact Sophia Guerra, at sophia@avantnr.com, or 303-519-2870. Thank you for your consideration.

Sincerely,

Kaitlyn A. Luck

**APPLICATION OF AVANT OPERATING II,
LLC FOR APPROVAL OF A NON-STANDARD
HORIZONTAL UNIT AND COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO.**

CASE NO. 25996

APPLICATION

Avant Operating II, LLC (“Avant”) (OGRID No. 332947), through its undersigned attorney, hereby files this application with the Oil Conservation Division (“Division”) pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted interests in the Bone Spring formation, from the top of the Bone Spring formation to the base of the Second Bone Spring formation at an approximate depth of 9,338’, within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico (the “Unit”). In support of this application, Avant states as follows:

1. Avant has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Avant seeks to minimize cost and surface disturbance by consolidating facilities and commingling production from existing and future wells in the proposed non-standard spacing unit.
3. To allow the proposed wells to be dedicated to a state Communitization Agreement, Avant seeks approval of a corresponding non-standard horizontal well spacing unit in the Bone Spring formation.

4. Avant is proposing a Joint Operating Agreement covering the subject area and seeks approval of this non-standard horizontal well spacing unit to match a corresponding Communitization Agreement for the state leases within the subject area.

5. If the proposed non-standard spacing unit is approved by the Division, then Avant understands that the New Mexico State Land Office will issue a corresponding Communitization Agreement for the state leases within the subject area to allow commingling and the corresponding reduction of the necessary surface facilities.

6. Avant seeks to dedicate the Unit to the following wells:

- the Moonwatch 17 8 State Com #501H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NW/4 SW/4 (Unit L) of Section 8;
- the Moonwatch 17 8 State Com #502H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NE/4 SW/4 (Unit K) of Section 8;
- the Moonwatch 17 8 State Com #503H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NW/4 SE/4 (Unit J) of Section 8; and
- the Moonwatch 17 8 State Com #504H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8.

7. The wells will be horizontally drilled, and the producing areas for the wells are expected to be orthodox.

8. Avant sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Bone Spring formation underlying the proposed Unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

9. Approval of this non-standard spacing unit and the pooling of interests therein will allow Avant to efficiently locate surface facilities for the recovery of oil and gas underlying

the subject lands, reduce surface disturbance, lower operating costs, avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

WHEREFORE, Avant requests this application be set for a hearing before an Examiner of the Oil Conservation Division, to be consolidated with Case Nos. 25879-25882, and after notice and hearing as required by law, the Division enter an order:

- A. Approving the proposed non-standard horizontal spacing unit and pooling all uncommitted interests in the Bone Spring formation, from the top of the Bone Spring formation to the base of the Second Bone Spring formation at an approximate depth of 9,338', within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico;
- B. Designating Avant as operator of this unit and the wells to be drilled thereon;
- C. Authorizing Avant to recover its costs of drilling, equipping and completing the Wells;
- D. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- E. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

1. Avant has an interest in the subject lands and has a right to drill and operate a well thereon.
2. Avant seeks to minimize cost and surface disturbance by consolidating facilities and commingling production from existing and future wells in the proposed non-standard spacing unit.
3. To allow the proposed wells to be dedicated to a state Communitization Agreement, Avant seeks approval of a corresponding non-standard horizontal well spacing unit in the Cisco formation.
4. Avant is proposing a Joint Operating Agreement covering the subject area and seeks approval of this non-standard horizontal well spacing unit to match a corresponding Communitization Agreement for the state leases within the subject area.

5. If the proposed non-standard spacing unit is approved by the Division, then Avant understands that the New Mexico State Land Office will issue a corresponding Communitization Agreement for the state leases within the subject area to allow commingling and the corresponding reduction of the necessary surface facilities.

6. Avant seeks to dedicate the Unit to the following wells:

- the Moonwatch 17 8 State Com #801H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NE/4 SW/4 (Unit K) of Section 8;
-
- the Moonwatch 17 8 State Com #802H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8;
-
- the Moonwatch 17 8 State Com #831H well with a proposed surface hole location in the SE/4 SE/4 (Unit P) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8; and
-
- the Moonwatch 17 8 State Com #832H well with a proposed surface hole location in the SE/4 SW/4 (Unit N) of Section 17, and a proposed last take point in the NE/4 SW/4 (Unit K) of Section 8.

7. The wells will be horizontally drilled, and the producing areas for the wells are expected to be orthodox.

8. This proposed horizontal spacing unit will overlap the following existing spacing units in the Cisco formation:

- a. A 40-acre spacing unit in the SESE of Section 8, and dedicated to the Mid Vac 8 State 1 well (API 30-025-42457) [Pool code 61780]; and
- b. A 40-acre spacing unit in the SWSE of Section 8, and dedicated to the State AF 2 well (API 30-025-20979) [Pool code 61780].

9. Avant sought, but has been unable to obtain, a voluntary agreement from all interest owners in the Cisco formation underlying the proposed Unit to participate in the drilling of the wells or to otherwise commit their interests to the wells.

10. Approval of this overlapping non-standard spacing unit and the pooling of interests therein will allow Avant to efficiently locate surface facilities for the recovery of oil and gas underlying the subject lands, reduce surface disturbance, lower operating costs, avoid the drilling of unnecessary wells, prevent waste, and protect correlative rights.

WHEREFORE, Avant requests this application be set for a hearing before an Examiner of the Oil Conservation Division, to be consolidated with Case Nos. 26062-26065, and after notice and hearing as required by law, the Division enter an order:

- A. Approving the proposed non-standard horizontal spacing unit and pooling all uncommitted interests in the Cisco formation, within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico;
- B. Designating Avant as operator of this unit and the wells to be drilled thereon;
- C. Authorizing Avant to recover its costs of drilling, equipping and completing the Wells;
- D. Approving actual operating charges and costs charged for supervision, together with a provision adjusting the rates pursuant to the COPAS accounting procedure; and
- E. Setting a 200% charge for the risk involved in drilling and completing the wells in the event a working interest owner elects not to participate in the wells.

Respectfully,

Kaitlyn A. Luck

CASE NO. _____: Application of Avant Operating II, LLC for approval of a non-standard horizontal unit and compulsory pooling, Lea County, New Mexico. Applicant seeks an order pooling all uncommitted interests in the Cisco formation, within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the following wells: the Moonwatch 17 8 State Com #801H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NE/4 SW/4 (Unit K) of Section 8; the Moonwatch 17 8 State Com #802H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8; the Moonwatch 17 8 State Com #831H well with a proposed surface hole location in the SE/4 SE/4 (Unit P) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8; and the Moonwatch 17 8 State Com #832H well with a proposed surface hole location in the SE/4 SW/4 (Unit N) of Section 17, and a proposed last take point in the NE/4 SW/4 (Unit K) of Section 8. The wells will be drilled at orthodox locations. This proposed horizontal spacing unit will overlap the following existing spacing units in the Cisco formation: a 40-acre spacing unit in the SESE of Section 8, and dedicated to the Mid Vac 8 State 1 well (API 30-025-42457) [Pool code 61780]; and a 40-acre spacing unit in the SWSE of Section 8, and dedicated to the State AF 2 well (API 30-025-20979) [Pool code 61780]. Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Avant Operating II, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 20 miles west of Hobbs, New Mexico.

MILLER TRUST; MAGIC DOG OIL & GAS, LTD.; JAMES TURBYFILL; THOMAS M BEALL; GAHR RANCH AND INVESTMENTS PARTNERSHIP LTD; BROKEN ARROW ROYALTIES LLC; CHASE OIL CORPORATION; PLAINS PRODUCTION, INC.; MORNINGSTAR OPERATING LLC; CONOCOPHILLIPS; TXO PARTNERS LP; MEWBOURNE OIL COMPANY; MATADOR RESOURCES; MACK ENERGY; BUREAU OF LAND MANAGEMENT; NEW MEXICO STATE LAND OFFICE - The State of New Mexico, Energy Minerals and Natural Resources Department, through its Oil Conservation Division, hereby gives notice that the Division will conduct a public hearing at 9:00 a.m. on March 26, 2026, to consider this application. The hearing will be conducted in a hybrid fashion, both in-person, at the Energy, Minerals and Natural Resources Department, Wendell Chino Building, Pecos Hall, at 1220 S. St. Francis, Santa Fe, New Mexico, 87505, and via the Teams virtual meeting platform. To participate in the hearings electronically, see instructions posted on the docket for the hearing date at: <https://www.emnrd.nm.gov/ocd/hearing-info/>, or call (505) 476-3441. You can attend the hearing in person at Pecos Hall or you can attend virtually through remote online access. Applicant in the above-styled cause seeks an order pooling all uncommitted interests in the Bone Spring formation, from the top of the Bone Spring formation to the base of the Second Bone Spring formation at an approximate depth of 9,338', within a non-standard 960-acre, more or less, horizontal spacing unit comprised of the S/2 of Section 8, and all of Section 17, Township 18 South, Range 35 East, N.M.P.M., Lea County, New Mexico. This spacing unit will be dedicated to the following wells: the Moonwatch 17 8 State Com #501H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NW/4 SW/4 (Unit L) of Section 8; the Moonwatch 17 8 State Com #502H well with a proposed surface hole location in the SW/4 SW/4 (Unit M) of Section 17, and a proposed last take point in the NE/4 SW/4 (Unit K) of Section 8; the Moonwatch 17 8 State Com #503H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NW/4 SE/4 (Unit J) of Section 8; and the Moonwatch 17 8 State Com #504H well with a proposed surface hole location in the SW/4 SE/4 (Unit O) of Section 17, and a proposed last take point in the NE/4 SE/4 (Unit I) of Section 8. The wells will be drilled at orthodox locations. Also to be considered will be the cost of drilling and completing said wells, the allocation of these costs as well as the actual operating costs and charges for supervision, designation of Avant Operating II, LLC as operator of the wells, and a 200% charge for risk involved in drilling said wells. Said area is located approximately 20 miles west of Hobbs, New Mexico.

RE: *Amended Exhibits for Cases 25996, 26129, 26130-September 15, 2026
Contested Hearing*

Greetings,

The purpose of this letter is to confirm that Amended Exhibits were filed by Avant Operating II, LLC in Case Nos. 25996, 26129, 26130. The changes are as follows:

- Page 5 (checklist) - 501H-504H LTPs amended to T18S R35E.
- Page 5 (checklist) - 503H FTP amended to 100' FSL.
- Page 5 – township says “18S R34E” for LTP – amended to **R35E**
- Page 5, 8, 11 (checklist) - Several wells say “Moonwatch 2 3 State Com” instead of “Moonwatch 17 8 State Com.”
- Page 7 (checklist) - 3BS checklist says Case 25996; amended to 26129.
- Page 10 (checklist) - Cisco checklist says Case 25996; amended to 26130.
- Page 161 (reservoir Exhibit E-5) – minor revision to the footnote.

Thank you for your consideration.

Sincerely,

Kaitlyn A. Luck
