TABLE OF CONTENTS

- **Mewbourne Exhibit A:** Compulsory Pooling Application Checklists
- **Mewbourne Exhibit B:** Applications of Mewbourne for Compulsory Pooling
- **Mewbourne Exhibit C:** Self-Affirmed Statement of Tyler Jolly, Landman
 - Mewbourne Exhibit C-1: C-102s
 - Mewbourne Exhibit C-2: Land Tract Map & Ownership Breakdown/Status & Signed JOA (Hilcorp)
 - Mewbourne Exhibit C-3: Sample Well Proposal Letters with AFEs
 - Mewbourne Exhibit C-4: Chronology of Contacts
- **Mewbourne Exhibit D:** Self-Affirmed Statement of Charles Crosby, Geologist
 - Mewbourne Exhibit D-1: Locator Map
 - Mewbourne Exhibit D-2: Subsea Structure Map
 - Mewbourne Exhibit D-3: Isopach Maps
 - Mewbourne Exhibit D-4: Stratigraphic Cross-Section
 - Mewbourne Exhibit D-5: Gunbarrel Diagram
- **Mewbourne Exhibit E:** Self-Affirmed Statement of Gavin Edington, Reservoir Engineer
 - Mewbourne Exhibit E-1: Oil Rate vs. Cumulative Production Graph
 - Mewbourne Exhibit E-2: EUR Analysis
- **Mewbourne Exhibit F:** Self-Affirmed Statement of Notice
- **Mewbourne Exhibit G:** Affidavit of Publication

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**APPLICATION OF MEWBOURNE OIL
COMPANY FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO.**

CASE NO. 26446

APPLICATION

Mewbourne Oil Company (“Mewbourne” or “Applicant”) (OGRID No. 14744), through its undersigned attorneys, hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted interest owners in a standard 320-acre, more or less, well spacing unit in the Bone Spring formation underlying the W/2 of Section 17, Township 18 South, Range 34 East, NMPM, Lea County, New Mexico. In support of its application, Mewbourne states:

1. Applicant is a working interest owner in the proposed horizontal spacing unit and has the right to drill thereon.
2. Mewbourne seeks to dedicate the above-referenced spacing unit to the proposed **Nature Boy State Com 5231H** u-turn well, to be drilled from a surface location in the NW/4 NE/4 (Unit B) of Section 17 and a last take point in the NW/4 NW/4 (Unit D) of Section 17.
3. Applicant has sought and been unable to obtain voluntary agreement for the development of these lands from all interest owners in the subject spacing unit.
4. The pooling of interests will avoid the drilling of unnecessary wells, will prevent waste, and will protect correlative rights.

**BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. B
Submitted by: Mewbourne Oil Company
Hearing Date: September 15, 2026
Case Nos. 26446 & 26447**

WHEREFORE, Applicant requests that this matter be set for hearing before an Examiner of the Oil Conservation Division on September 3, 2026, and, after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted interest owners in the horizontal spacing unit;
- B. Designating Applicant as operator of this spacing unit and the horizontal well to be drilled thereon;
- C. Authorizing Applicant to recover its costs of drilling, completing, and equipping the well;
- D. Approving the actual operating charges and costs of supervision while drilling and after completion, together with a provision adjusting the rates pursuant to the COPAS accounting procedures; and
- E. Imposing a 200% charge for the risk assumed by Applicant in drilling and completing the well against any working interest owner who does not voluntarily participate in the drilling of the well.

Respectfully submitted,

HOLLAND & HART LLP

ATTORNEYS FOR MEWBOURNE OIL COMPANY

CASE: _____

Application of Mewbourne Oil Company for Compulsory Pooling, Lea County, New Mexico. Applicant in the above-styled cause seeks an order pooling all uncommitted interest owners in a standard 320-acre, more or less, well spacing unit in the Bone Spring formation underlying the W/2 of Section 17, Township 18 South, Range 34 East, NMPM, Lea County, New Mexico. This spacing unit will be initially dedicated to the proposed **Nature Boy State Com 5231H** u-turn well, to be drilled from a surface location in the NW/4 NE/4 (Unit B) of Section 17 and a last take point in the NW/4 NW/4 (Unit D) of Section 17. Also to be considered will be the cost of drilling and completing the well and the allocation of the costs thereof, the operating costs and charges for supervision, the designation of applicant as operator of the proposed spacing unit, and a 200% charge for risk involved in drilling said well. Said area is located approximately 20 miles southwest of Loving, New Mexico.

CASE NO. 26447

APPLICATION

Mewbourne Oil Company ("Mewbourne" or "Applicant") (OGRID No. 14744), through its undersigned attorneys, hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, for an order pooling all uncommitted interest owners in a standard 320-acre, more or less, well spacing unit in the Bone Spring formation underlying the E/2 of Section 17, Township 18 South, Range 34 East, NMPM, Lea County, New Mexico. In support of its application, Mewbourne states:

1. Applicant is a working interest owner in the proposed horizontal spacing unit and has the right to drill thereon.
2. Mewbourne seeks to dedicate the above-referenced spacing unit to the proposed **Nature Boy State Com 5257H** u-turn well, to be drilled from a surface location in the NW/4 NE/4 (Unit B) of Section 17 and a last take point in the NE/4 NE/4 (Unit A) of Section 17.
3. Applicant has sought and been unable to obtain voluntary agreement for the development of these lands from all interest owners in the subject spacing unit.
4. The pooling of interests will avoid the drilling of unnecessary wells, will prevent waste, and will protect correlative rights.

WHEREFORE, Applicant requests that this matter be set for hearing before an Examiner of the Oil Conservation Division on September 3, 2026, and, after notice and hearing as required by law, the Division enter an order:

- A. Pooling all uncommitted interest owners in the horizontal spacing unit;

ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION

APPLICATIONS OF MEWBOURNE OIL
COMPANY FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO.

CASE NOS. 26446 & 26447

SELF-AFFIRMED STATEMENT OF TYLER JOLLY

1. My name is Tyler Jolly. I work for Mewbourne Oil Company ("Mewbourne") as a Landman.
2. I have previously testified before the New Mexico Oil Conservation Division ("Division") as an expert witness in petroleum land matters. My credentials as a petroleum landman have been accepted by the Division and made a matter of record.
3. I am familiar with the applications filed by Mewbourne in these cases, and I am familiar with the status of the lands in the subject area. I am also familiar with FED Operating, LLC's ("FED") competing development plans and applications under Case Nos. 26131-26132.
4. Under its plan of development, Mewbourne seeks orders in the Bone Spring formation for the referenced acreage, all in Township 18 South, Range 34 East, NMPM, Lea County, New Mexico, as follows:
 - Under **Case No. 26446**, Mewbourne seeks to pool the uncommitted interest owners in a 320-acre, more or less, standard horizontal well spacing unit underlying the W/2 of Section 17, to be initially dedicated to the proposed **Nature Boy State Com 5231H** unit well, to be drilled from a surface location in the NW/4 NE/4 (Unit B) of Section 17 and a last take point in the NW/4 NW/4 (Unit D) of Section 17.

- Under **Case No. 26447**, Mewbourne seeks to pool the uncommitted interest owners in a 320-acre, more or less, standard horizontal well spacing unit underlying the E/2 of Section 17, to be initially dedicated to the proposed **Nature Boy State Com 5257H** unit well, to be drilled from a surface location in the NW/4 NE/4 (Unit B) of Section 17 and a last take point in the NE/4 NE/4 (Unit A) of Section 17.

5. **Mewbourne Exhibit C-1** contains a draft Form C-102 for the proposed wells. This form demonstrates that the completed interval for the wells will comply with statewide setbacks for oil wells. The exhibit shows that the wells will be assigned to the Mescalero Escarpe; Bone Spring [45793].

6. In between sending out Mewbourne's initial proposals and preparing draft C-102s, Mewbourne was informed by the Division that the well number could not contain more than three digits. Therefore, to conform to Division guidance on well naming conventions, the Nature Boy 17 State Com 5231H is now the 520H, and the Nature Boy 17 State Com 5257H is now the 529H.

7. **Mewbourne Exhibit C-2** identifies the tracts of land comprising the horizontal spacing unit, the ownership interests in each tract, and ownership interests on a spacing unit basis for each case. The parties Mewbourne seeks to pool are highlighted in yellow. The subject acreage is comprised of state lands. The exhibit also includes the commitment status and, if applicable, type of commitment for each interest owner.

8. Mewbourne Exhibit C-2 shows that FED does not have an interest in Section 17. In contrast, Mewbourne owns or controls 31.25% of the working interest in the E/2 of Section 17 (Case No. 26447) and 62% in the W/2 of Section 17 (Case No. 26446), which means that Mewbourne owns or controls 46.875% of the working interest in Section 17.

9. Also included are copies of the signed Joint Operating Agreement (“JOA”) pages between Mewbourne and Hilcorp Permian, LLC (“Hilcorp”), showing the quick work that Mewbourne has done to gain support for its development plans since acquiring its interest in July 2026.

10. Because FED owns nothing in Section 17, Mewbourne should be allowed to move forward with its case, and FED can drill and operate wells in Sections 5 and 8 where it does own an interest.

11. **Mewbourne Exhibit C-3** contains a sample of the well proposal letter and AFEs sent to owners with a working interest. FED was not sent a well proposal because it does not own an interest in Section 17. The costs reflected in the AFEs are consistent with what Mewbourne and other operators have incurred for drilling similar horizontal wells in the area in this formation.

12. Mewbourne requests that the overhead and administrative costs for drilling and producing the proposed wells be set at \$11,000 per month while drilling and \$1,100 per month while producing. These costs are consistent with what other operators are charging in this area for similar wells.

13. Mewbourne’s plans include two-mile u-turn wells, dedicated to separate spacing units in the E/2 and W/2 of Section 17. In contrast, FED proposes three-mile wells in overlapping non-standard spacing units covering Sections 5, 8, and 17: four Bone Spring wells and four Wolfcamp wells. However, FED’s proposal conflicts with its filed application for the Bone Spring. In its proposal, FED’s initial Chancer 5-17 State 113H has a bottom hole location in Lot 2 (NW/4 NE/4 equivalent) of irregular Section 5 and the Chancer 5-17 State 114H has a bottom hole location in Lot 1 (NE/4 NE/4 equivalent) of irregular Section 5. Based on FED’s filed application, these wells have a bottom hole location in the NW/4 of irregular Section 5. Meaning FED’s Bone Spring

plan under Case No. 26131 appears to be inchoate and its application has a material defect because it does not match what was proposed to working interest owners. Mewbourne's competing applications should be approved over FED's defective applications on this basis alone.

14. **Mewbourne Exhibit C-4** contains a general summary of the contacts with the uncommitted working interest owners. As indicated in the exhibit, Mewbourne has made a good faith effort to locate and has had communications in an effort to reach voluntary joinder with all of the parties that it seeks to pool in these cases. In my opinion, Mewbourne has undertaken good faith efforts to reach an agreement with the uncommitted working interest owners.

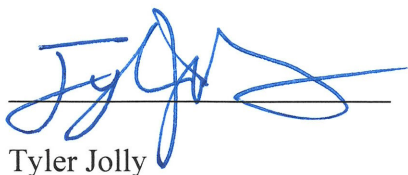

15. Mewbourne has provided the law firm of Holland & Hart LLP with the names and addresses of the parties that Mewbourne seeks to pool and instructed that they be notified of this hearing. Mewbourne has conducted a diligent search of all public records in the county where the property is located, reviewed telephone directories, and conducted computer searches to locate contact information for each interest owner.

16. Mewbourne is an experienced operator and has drilled and completed approximately ten (10) horizontal wells targeting multiple benches within the Bone Spring formation in this immediate area within the last five (5) years.

17. By contrast, FED has no experience drilling and operating wells in New Mexico and appears to have mainly participated in wells and developments as a non-operating working interest owner, according to Division records. It has no established track record as a prudent operator anywhere. Moreover, FED has never delivered on AFEs, it does not have an in-house drilling team, and it has no experience overseeing drilling operations and coordinating drilling contracts.

18. **Mewbourne Exhibits C-1 through C-4** were either prepared by me or compiled under my direction and supervision.

19. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in this case. This statement is made on the date next to my signature below.

Tyler Jolly

ACREAGE DEDICATION PLATS

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is a directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

Re: Well Proposals – Nature Boy 17 Prospect
Section 17-T18S-R34E (“Section 17”)
Lea County, New Mexico

Ladies and Gentlemen:

Mewbourne Oil Company (“MOC”) as Operator, hereby proposes to form a 640.00 acre Working Interest Unit (“WIU”) comprising Section 17-T18S-R34E, covering the Bone Spring formation. As part of our initial development, MOC hereby proposes drilling the following U-Zontal wells targeting the Bone Spring formation:

NATURE BOY STATE COM #5231H – API #30-025-pending

Surface Location: 205' FNL & 2480' FEL (Section 17-T18S-R34E)

Bottom Hole Location: BHL: 100' FNL & 660' FWL (Section 17-T18S-R34E)

Proposed Total Vertical Depth: 9,500'; Proposed Total Measured Depth: 19,500'

NATURE BOY STATE COM #5257H – API #30-025-pending

Surface Location: 205' FNL & 2440' FEL (Section 17-T18S-R34E)

Bottom Hole Location: BHL: 100' FNL & 660' FEL (Section 17-T18S-R34E)

Proposed Total Vertical Depth: 9,500'; Proposed Total Measured Depth: 19,500'

These wells are tentatively planned to spud in Q1 of 2027 depending on rig availability and commodity prices. In the event EOG Resources, Inc., elects to participate in the above-referenced wells, please execute the enclosed AFEs before returning them to the undersigned within thirty (30) days. After receipt of the executed AFEs, our Operating Agreement will be sent naming MOC as Operator, providing a drilling and producing well rate of \$12,000 and \$1,200, respectively.

Please enclose your most current well information requirements' so that we may supply well data when available.

Please contact me at (432) 682-3715 or brendon.johnson@mewbourne.com if you have any questions or need additional information.

Sincerely,

MEWBOURNE OIL COMPANY

Brendon Johnson
Landman

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**APPLICATIONS OF MEWBOURNE OIL
COMPANY FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO.**

CASE NOS. 26446 & 26447

SELF-AFFIRMED STATEMENT OF CHARLES CROSBY

1. My name is Charles Crosby. I work for Mewbourne Oil Company (“Mewbourne”) as a Geologist.
2. I have previously testified before the New Mexico Oil Conservation Division (“Division”) as an expert witness in petroleum geology. My credentials as an expert in petroleum geology have been accepted by the Division and made a matter of record.
3. I am familiar with the applications filed by Mewbourne in these cases, and I am familiar with the status of the lands in the subject area. I am also familiar with FED Operating, LLC’s (“FED”) competing development plans and applications under Case Nos. 26131-26132.
4. **Mewbourne Exhibit D-1** is a general locator map.
5. **Mewbourne Exhibit D-2** is a subsea structure map that I prepared for the Bone Spring. The contour intervals are 100 feet. The area comprising Mewbourne’s proposed spacing units is outlined in dashed black lines with the approximate location and orientation of the initial wells noted with dashed green arrows. The structure map shows the targeted formation dipping to the south, with an approximate 500 foot of dip over Mewbourne’s proposed u-turn wells. In contrast, FED’s proposed wells, covering Sections 5, 8 and 17, have a 1,500-foot climb over their proposed three-mile laterals. This incline is a significant geological hurdle, especially for an inexperienced operator that has never drilled any wells, let alone three-mile horizontal wells. The

**BEFORE THE OIL CONSERVATION DIVISION
Santa Fe, New Mexico
Exhibit No. D
Submitted by: Mewbourne Oil Company
Hearing Date: September 15, 2026
Case Nos. 26446 & 26447**

exhibit shows that no horizontal wells have been drilled targeting the Bone Spring formation across the structural incline FED targets in offsetting Sections 5 & 8. As to Mewbourne's proposed development initially targeting the Second Bone Spring interval in Section 17, the structure appears consistent, and I do not observe any faulting, pinch outs, or other geologic impediments to drilling horizontal wells. The exhibit also shows development targeting the First, Second, and Third Bone Spring intervals in a similar structural environment to FED's proposed section 5 & 8 development that fared poorly. The Second Bone Spring Sand is Mewbourne's preferred initial target in section 17 due to good offset results and consistent presence of the target reservoir.

6. Mewbourne Exhibit D-2 also shows a line of cross-section through Mewbourne's and FED's proposed horizontal spacing units from A to A'. I chose the logs from these wells to create the cross-section because they penetrate the targeted intervals, are of good quality and have been subjected to petrophysical analysis of the targeted intervals. In my opinion, these well logs are representative of the geology in the subject area, including the contested acreage in Section 17.

7. **Mewbourne Exhibit D-3** includes isopach maps for the First, Second and Third Bone Spring Sand. The darker colors represent areas of higher net pay in the formation, and a thicker pay zone. As indicated by comparing the three maps, the First Bone and Second Bone Spring Sand net pay appears thicker in Section 17, where Mewbourne owns its interest and FED owns no interest, than in Sections 5 and 8 where FED owns. Moreover, the net pay across the First and Second Bone Spring appears relatively consistent over Section 17, where it thins out as the formation extends into FED's acreage to the north.

8. Based on the quality of rock in these intervals within Section 17, Mewbourne's initial wells are targeting the Second Bone Spring Sand, with plans to drill infill wells in the First Bone Spring Sand.

9. In contrast, FED is targeting the Third Bone Spring Sand in Case No. 26131 and what appears to be the Penn formation in Case No. 26132 (although their application lists the Wolfcamp as the formation being pooled and targeted). The Third Bone Spring Sand appears to be the thinnest net pay interval within the Bone Spring formation in Section 17, making it a poor target in this acreage. But also, Sections 5, 8 and 17 do not show consistent net pay across the 3rd Bone Spring Sand formation. In fact, Sections 5 and 8 show little net pay for the First or Second Bone Spring Sand, whereas Section 17 reflects higher net pay values in those intervals. That means the tracts that FED plans to include in its development likely will not contribute equally to the production from any of its proposed wells—Mewbourne's acreage in Section 17 with a higher net pay will likely contribute disproportionately more production to FED's proposed wells.

10. The only Section with good, high-quality rock in FED's plan is Section 17, where it owns no interest.

11. FED's plan is not protective of correlative rights because it will dilute the interests of the owners in Section 17 with poor reservoir and production from Sections 5 and 8. That will result in the impairment of Mewbourne's correlative rights—and the correlative rights of other owners in Section 17. This should not stand.

12. **Mewbourne Exhibit D-4** are stratigraphic cross-sections that I prepared using the logs from the representative wells shown in Mewbourne Exhibit D-3. The first cross-section is for the Bone Spring formation, and the second cross-section is for the Penn formation. Each well on the cross-section contains gamma ray, resistivity, and porosity logs. The target intervals for Mewbourne's proposed wells and infill wells are marked on the cross-section with an orange line (First Bone Spring Sand) and a green line (Second Bone Spring Sand). The cross-section

demonstrates that Mewbourne's targeted Second Bone Spring interval is continuous across its proposed spacing units.

13. Mewbourne Exhibit D-4 also shows the targeted interval for FED in the Third Bone Spring Sand and Penn formation. The Third Bone Spring and is thin to no existent throughout the area. The Penn formation has poor results directly offsetting the area.

14. **Mewbourne Exhibit D-5** is a simplified gunbarrel block illustration depicting the landing and well spacing for Mewbourne's proposed wells, including Mewbourne's future infill wells for Section 17.

15. In my opinion, standup orientation of the proposed wells is the appropriate orientation for horizontal well development in this area.

16. Based on my geologic study, the Bone Spring formation underlying Section 17 is suitable for development by horizontal wells and the acreage comprising Mewbourne's proposed spacing units will contribute more-or-less equally to the production from the wellbores. I have not identified any geologic impediments to drilling Mewbourne's horizontal wells in the area of the spacing unit proposed.

17. In my opinion, horizontal drilling will be the most efficient method to develop this acreage, to prevent the drilling of unnecessary wells, and to result in the greatest ultimate recovery, and that approving Mewbourne's applications will be in the best interest of conservation, the prevention of waste, and protection of correlative rights.

18. **Mewbourne Exhibits D-1 through D-5** were either prepared by me or compiled under my direction and supervision.

19. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be

used as written testimony in this case. This statement is made on the date next to my signature below.

ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION

APPLICATIONS OF MEWBOURNE OIL
COMPANY FOR COMPULSORY POOLING,
LEA COUNTY, NEW MEXICO.

CASE NOS. 26446 & 26447

SELF-AFFIRMED STATEMENT OF GAVIN EDINGTON

1. My name is Gavin Edington. I work for Mewbourne Oil Company ("Mewbourne") as a petroleum engineer.
2. I have previously testified before the New Mexico Oil Conservation Division ("Division") as an expert witness in petroleum engineering. My credentials as a petroleum engineer have been accepted by the Division and made a matter of record.
3. I am familiar with the applications filed by Mewbourne in these cases, and I am familiar with the status of the lands in the subject area. I am also familiar with FED Operating, LLC's ("FED") competing development plans and applications under Case Nos. 26131-26132.
4. Mewbourne is an experienced operator that has demonstrated high-level performance relative to operators in northern Lea County offsetting Section 17, T18S, R34E. **Mewbourne Exhibit D-1** is a graph I prepared showing production curves for surrounding developments as a function of cumulative oil production on the x-axis and average daily oil rate (bbls) on the y-axis. Each offsetting development is depicted in a different color. The key at the bottom of the exhibit identifies the operator & zone each grouping depicts and also provides information on the development location, number of wells included in the production curve, and details on the completion stimulation used for each development. The curve is normalized to 10,000-foot laterals.

5. Among offsetting operators—including Devon and Matador Production—Mewbourne’s wells are among the highest producing in the area, outperforming many offset operators.

6. **Mewbourne Exhibit D-2** depicts three tables I prepared comparing Mewbourne as an operator to FED, which has no experience drilling and operating wells in New Mexico and appears to have mainly participated in wells and developments as a non-operating working interest owner, according to Division records.

7. The top table summarizes the data from the previous exhibit and shows that Mewbourne, which has initially focused its drilling and development on the Second Bone Spring targets in the area, has drilled and operated wells that have produced on average approximately 150 thousand barrels of oil with a projected EUR of approximately 80 bbls per foot of lateral. In contrast, wells drilled and operated by others in the area targeting the Second Bone Spring have produced about 170 thousand barrels of oil with a projected EUR of approximately 55 bbls per foot of lateral. Mewbourne’s Second Bone Spring wells have a projected EUR that is more than 45% higher than the offsetting operator’s wells.

8. . The middle table compares the economics of Mewbourne’s proposed development against FED’s proposal, assuming each operator has the benefit of 100% working interest with 75% net royalty interest and a flat oil price of \$75/bbl for oil and \$2.50/mcf for gas. The table shows that Mewbourne’s proposal development of 6 total wells targeting the First and Second Bone Spring in only Section 17 will have a 15% discounted net present value of about \$57 million compared to \$-13 million for FED’s plan. Clearly Mewbourne’s proposed plan is the better, more prudent, plan of development across section 17.

9. Finally, the bottom table is a summary of the number of wells drilled in Northern Lea County, New Mexico (north of and including Township 21) by Mewbourne, FED, and all other operators. Since 2020, Mewbourne has drilled 166 wells with laterals equal and shorter than 2 miles and 18 wells with laterals longer than 2 miles. In comparison, FED has drilled no laterals of any length. As a fraction of the total number of wells drilled in this area of interest, Mewbourne has drilled approximately 22% of the total number of wells. It is very active in this area and is committed to drilling effective and efficient wells. In contrast, FED has not yet established itself as an operator with any kind of track record.

10. In my opinion, Mewbourne's plan of development, with its proven track record, will protect correlative rights and prevent waste. The economics of FED's proposal, on the other hand, is projected to be negative based on a 15% net present value using FED's proposed AFEs, geologic and operational challenges in their proposed unit, and Mewbourne's evaluation of reserve potential.

11. **Mewbourne Exhibits D-1 through D-2** were either prepared by me or compiled under my direction and supervision.

12. I affirm under penalty of perjury under the laws of the State of New Mexico that the foregoing statements are true and correct. I understand that this self-affirmed statement will be used as written testimony in this case. This statement is made on the date next to my signature below.

CERTIFIED RECEIPT REQUESTED

TO: ALL INTEREST OWNERS SUBJECT TO POOLING PROCEEDINGS

Re: Application of Mewbourne Oil Company for Compulsory Pooling, Lea County, New Mexico: Nature Boy State Com 5231H u-turn well

Greetings:

This letter is to advise you that Mewbourne Oil Company has filed the enclosed application with the New Mexico Oil Conservation Division. A hearing has been requested before a Division Examiner on September 3, 2026, and the status of the hearing can be monitored through the Division's website at <https://www.emnrd.nm.gov/ocd/>.

It is anticipated that hearings will be held in a hybrid format with both in-person and virtual participation options. The meeting will be held in the Pecos Hall Hearing Room at the Wendall Chino Building, 1st Floor, 1220 South St. Francis Dr., Santa Fe, New Mexico. To participate virtually in the hearing, see the instructions posted on the OCD Hearings website: <https://www.emnrd.nm.gov/ocd/hearing-info/>.

You are not required to attend this hearing, but as an owner of an interest that may be affected by this application, you may appear and present testimony. Failure to appear at that time and become a party of record will preclude you from challenging the matter at a later date. Parties appearing in cases are required to file a Pre-hearing Statement four business days in advance of a scheduled hearing that complies with the provisions of NMAC 19.15.4.13.B.

If you have any questions about this matter, please contact Brendon Johnson at (432) 682-3715, or at brendon.johnson@mewbourne.com.

Sincerely,

A handwritten signature in blue ink that reads "Paula M. Vance".

GUSSIE RUTH BLACK
COMMISSION # 1087526

COMMISSION EXPIRES 01/29/2027

This newspaper is duly qualified to publish legal notices or advertisements within the meaning of Section 3, Chapter 167, Laws of 1937 and payment of fees for said publication has been made.

LEGAL NOTICE
August 18, 2026

Case No. 26446: Application of Mewbourne Oil Company for Compulsory Pooling, Lea County, New Mexico. Notice to all affected interest owners, including all heirs, devisees and successors of: EOG Resources, Inc.; Hilcorp Permian CT TXNM, LLC; Occidental Permian, LP; and Seely Oil Company. The State of New Mexico, Energy Minerals and Natural Resources Department, Oil Conservation Division ("Division") hereby gives notice that the Division will hold public hearing 8:30 a.m. on September 3, 2026, to consider this application. The hearing will be conducted in a hybrid fashion, both in-person at the Energy, Minerals, Natural Resources Department, Wendell Chino Building, Pecos Hall, 1220 South St. Francis Drive, 1st Floor, Santa Fe, NM 87505 and via the WebEx virtual meeting platform. To participate in the hearings electronically, see the instructions posted on the docket for the hearing date: <https://www.emnrd.nm.gov/ocd/hearing-info/> or contact Freya Tschantz, at Freya.Tschantz@emnrd.nm.gov. Applicant in the above-styled cause seeks an order pooling all uncommitted interest owners in a standard 320-acre, more or less, well spacing unit in the Bone Spring formation underlying the W/2 of Section 17, Township 18 South, Range 34 East, NMPM, Lea County, New Mexico. This spacing unit will be initially dedicated to the proposed **Nature Boy State Com 5231H** u-turn well, to be drilled from a surface location in the NW/4 NE/4 (Unit B) of Section 17 and a last take point in the NW/4 NW/4 (Unit D) of Section 17. Also to be considered will be the cost of drilling and completing the well and the allocation of the costs thereof, the operating costs and charges for supervision, the designation of applicant as operator of the proposed spacing unit, and a 200% charge for risk involved in drilling said well. Said area is located approximately 20 miles southwest of Loving, New Mexico.
