**APPLICATION OF MEWBOURNE OIL
COMPANY TO AMEND ORDER R-24114,
EDDY COUNTY, NEW MEXICO.**

CASE NO. _____

APPLICATION

Mewbourne Oil Company (“Mewbourne” or “Applicant”) (OGRID No. 14744), through its undersigned attorneys, hereby files this application with the Oil Conservation Division pursuant to the provisions of NMSA 1978, § 70-2-17, to amend Order No. R-24114 for the limited purpose of requesting a pool code change in order to align with adjacent Sections targeting the same interval. In support of its application, Mewbourne states:

1. On December 10, 2025, the Division issued Order No. R-24114, which pooled the uncommitted interest owners in a standard 635.50-acre, more or less, well spacing unit in the Wolfcamp (gas) formation underlying Lots 1-8 (N/2 equivalent) of irregular Section 12, Township 21 South, Range 25 East and Lots 5-12 (N/2 equivalent) of irregular Section 7, Township 21 South, Range 26 East, NMPM, Eddy County, New Mexico (the “Unit”). Mewbourne is the designated operator, and the Unit is dedicated to the drilled and producing **Stage Fright 12/7 Federal Com 711H** (API No. 30-015-57262) and **Stage Fright 12/7 Federal Com 713H** (API No. 30-015-57261).

2. Order No. R-24114 identifies the pool involved as “Avalon; Wolfcamp (gas) [71120],” which is a gas pool with 320-acre building block spacing requirements; thus, the above-referenced spacing was considered standard. However, Mewbourne has recently been informed by the Division that, based on the actual targeted interval for the wells, this spacing unit is in the Avalon; Wolfcamp, Southwest [97068], which is an oil pool. The Avalon; Wolfcamp, Southwest

[97068] pool is the dedicated pool for existing wells targeting the same bench as Mewbourne's Stage Fright wells in adjacent Sections 8, 9, and 10, Township 21 South, Range 26 East. Thus, to provide for administrative and productive efficiency across Sections 7, 8, 9, 10, and 12, for wells targeting the same interval in this area, Mewbourne is requesting a pool code change on the compulsory pooling checklist attached to Order No. R-24114.

3. Additionally, because the Avalon; Wolfcamp, Southwest [97068] is an oil pool with 40-acre building block spacing requirements, and neither well listed above is a proximity well, Mewbourne was required to seek approval for a non-standard spacing unit, which it did. *See Exhibit A.*

4. All other provisions of Order R-24114 are requested to remain unchanged.

WHEREFORE, Applicant requests that this matter be set for hearing before an Examiner of the Oil Conservation Division on October 8, 2026, and, after notice and hearing as required by law, the Division enter an order approving the pool code under Order R-24114.

Respectfully submitted,

Eddy County, New Mexico

Dear Mr. Lowe,

On December 10, 2025, the Division granted an NSP approval for the above referenced wells via Pooling Order R-24114. These wells spud on December 13, 2025 in the Avalon; Wolfcamp (Gas), [71120] pool per the approved Pooling Order R-24114 and began producing on March 6, 2026.

On March 26, 2026, after inquiring about a separate tract, Dean McClure informed Mewbourne Oil Company (“Mewbourne”) that the Avalon; Wolfcamp (Gas), [71120] pool approved previously in these sections was incorrect. Mewbourne met with Dean McClure on April 7, 2026 and it was determined that the Avalon;WC, Southwest [97068] pool should be used in all of Section 12, T21S, R25E; and all of Sections 7, 8, 9, and 10, T21S, R26E.

The Stage Fright 12/7 Fed Com #711H & Stage Fright 12/8 Fed Com #713H wells are dedicated to a 635.50-acre proration unit comprising Lots 1, 2, 3, 4, 5, 6, 7 & 8 (N/2) of Section 12, T21S, R25E; and the Lots 5, 6, 7, 8, 9, 10, 11, & 12 (N/2) of Section 7, T21S, R26E, Eddy County, New Mexico.

The affected offset acreage comprises the Lots 9, 10, 11, & 12 (N2S2) of Section 12; SENE & Lots 1 and E2NE4 of Section 11; SESE of Section 2; and S2SW, Lots 31 & 32 of Section 1 all in T21S, R25E; the Lots 35, 36, 37, & 38 (S2S2) of Section 6; Lot 33 of Section 5; W2NW4 & NWSW of Section 8; and Lot

3, NESW, N2SE4 of Section 7 all in T21S, R26E, Eddy County, New Mexico. Consequently, notice of this application is being provided to all parties listed on the attached list of affected parties.

Accordingly, pursuant to Division Rule 19.15.16.15(B)(5) and the aforementioned facts, Mewbourne respectfully requests administrative approval of a non-standard proration unit for its referenced Stage Fracture wells listed above as horizontal oil wells in the Avalon;WC, Southwest [97068] pool.

Notice by certified mail, return receipt requested, has been given to the affected parties listed in the notification list attached.

Thank you for your consideration of this application. Should you have any questions or need additional information regarding the above, please contact me at arodrigues@mewbourne.com or (432) 682-3715.

Very truly yours,

ACREAGE DEDICATION PLATS

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is a directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.

ACREAGE DEDICATION PLATS

This grid represents a standard section. You may superimpose a non-standard section, or larger area, over this grid. Operators must outline the dedicated acreage in a red box, clearly show the well surface location and bottom hole location, if it is a directionally drilled, with the dimensions from the section lines in the cardinal directions. If this is a horizontal wellbore show on this plat the location of the First Take Point and Last Take Point, and the point within the Completed interval (other than the First Take Point or Last Take Point) that is closest to any outer boundary of the tract.

Surveyors shall use the latest United States government survey or dependent resurvey. Well locations will be in reference to the New Mexico Principal Meridian. If the land is not surveyed, contact the OCD Engineering Bureau. Independent subdivision surveys will not be acceptable.
