NUNC PRO TUNC ORDER

The Director of the New Mexico Oil Conservation Division (“OCD”), having determined that an error occurred in Order No. R-24270 in this matter, which requires correction, issues the following *Nunc Pro Tunc* Order.

FINDINGS

1. Order No. R-24270 (“Order”), approved March 27, 2026, contains an error in the succession and termination of the closed-loop gas capture (“CLGC”) pilot project within the Project Area for the enhanced oil recovery (“EOR”) project.
2. Ordering Paragraph 17 currently reads:

“17. With the approval of this Order, all injection authority approved under Division Order No. R-22106 is revoked and the associated CLGC pilot project is terminated.”
3. Review of testimony and exhibits for Case No. 25222 supports the clarification of the termination date for the CLGG pilot project which the Applicant requested to be effective until the implementation of the EOR project approved by the Order.

ORDER

4. Therefore, the content of Ordering Paragraph 17 is hereby amended to read in its entirety as follows:

“17. Injection authority approved under Division Order No. R-22106 is revoked and the associated CLGC pilot project is terminated upon commencement of the first injection for the EOR project approved by this Order. Using Form C-103Z, Operator shall provide formal notice

that all CLGC operations under Order No. R-22106 have ceased and EOR operations have commenced.”

5. The correction is effective *nunc pro tunc* as of the date of the Order.
6. All other provisions of the Order remain in full force and effect.
