Downstream OGRID that should have notified this operator	Not answered.
Date notified of downstream activity requiring this vent or flare	Not answered.
Time notified of downstream activity requiring this vent or flare	Not answered.

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	Compressor down time off and on during the week of 3/7--3/14. Compressor issues consisted of downtime as a result of the cat panel and high discharge. Consequently as wells were turn back on wells would unload resulting in additional intermittent flaring.
Steps taken to limit the duration and magnitude of vent or flare	Field team have fixed compressor issues and brought production back to normal levels.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	As noted compressor run time has improved.
