Other Released Details	Not answered.
Additional details for Measured or Estimated Volume(s). Please specify	Not answered.
Is this a gas only submission (i.e. only significant Mcf values reported)	Yes, according to supplied volumes this appears to be a "gas only" report.

Venting or Flaring Resulting from Downstream Activity	
Was this vent or flare a result of downstream activity	Yes
Was notification of downstream activity received by this operator	No
Downstream OGRID that should have notified this operator	[371960] LUCID ENERGY DELAWARE, LLC
Date notified of downstream activity requiring this vent or flare	Not answered.
Time notified of downstream activity requiring this vent or flare	Not answered.

Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	High line pressure attributed to Lucid system. Lucid doesn't let the operators know when high line pressure is observed. Intermittent flaring occurred for three days from 3/19-3/23.
Steps taken to limit the duration and magnitude of vent or flare	Control Room monitored flaring and Cimarex was to SI if flaring was to get out of hand.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	It should be noted that high line pressure by lucid's system continues to be an issue through out March.
