Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control	False
Please explain reason for why this event was beyond this operator's control	Not answered.
Steps taken to limit the duration and magnitude of vent or flare	Maljamar gas plant backed out gas due to unit C-112 going down on high valves. BKU Station flared due to high suction which was caused by a pipeline leak, 311 and 312 going down for P/M, lube no flow, and high engine oil coolant temp.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	Backed out gas as needed, and flared to keep suction pressures at safe operating levels. Had mechanics address the down units and try to get them online as soon as possible. Resumed normal operations once capable and safe to do so.
