Site Assessment/Characterization

This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

What is the shallowest depth to groundwater beneath the area affected by the release?	<u>42</u> (ft bgs)
Did this release impact groundwater or surface water?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a continuously flowing watercourse or any other significant watercourse?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 200 feet of any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of an occupied permanent residence, school, hospital, institution, or church?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 500 horizontal feet of a spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 1000 feet of any other fresh water well or spring?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within incorporated municipal boundaries or within a defined municipal fresh water well field?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within 300 feet of a wetland?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release overlying a subsurface mine?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release overlying an unstable area such as karst geology?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Are the lateral extents of the release within a 100-year floodplain?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
Did the release impact areas not on an exploration, development, production, or storage site?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

Attach a comprehensive report (electronic submittals in .pdf format are preferred) demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined. Refer to 19.15.29.11 NMAC for specifics.

Characterization Report Checklist: *Each of the following items must be included in the report.*

- Scaled site map showing impacted area, surface features, subsurface features, delineation points, and monitoring wells.
- Field data
- Data table of soil contaminant concentration data
- Depth to water determination
- Determination of water sources and significant watercourses within ½-mile of the lateral extents of the release
- Boring or excavation logs
- Photographs including date and GIS information
- Topographic/Aerial maps
- Laboratory data including chain of custody

If the site characterization report does not include completed efforts at remediation of the release, the report must include a proposed remediation plan. That plan must include the estimated volume of material to be remediated, the proposed remediation technique, proposed sampling plan and methods, anticipated timelines for beginning and completing the remediation. The closure criteria for a release are contained in Table 1 of 19.15.29.12 NMAC, however, use of the table is modified by site- and release-specific parameters.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Remediation Plan

Remediation Plan Checklist: *Each of the following items must be included in the plan.*

- Detailed description of proposed remediation technique
- Scaled sitemap with GPS coordinates showing delineation points
- Estimated volume of material to be remediated
- Closure criteria is to Table 1 specifications subject to 19.15.29.12(C)(4) NMAC
- Proposed schedule for remediation (note if remediation plan timeline is more than 90 days OCD approval is required)

Deferral Requests Only: *Each of the following items must be confirmed as part of any request for deferral of remediation.*

- Contamination must be in areas immediately under or around production equipment where remediation could cause a major facility deconstruction.
- Extents of contamination must be fully delineated.
- Contamination does not cause an imminent risk to human health, the environment, or groundwater.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Closure

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (electronic submittals in .pdf format are preferred) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.

Closure Report Attachment Checklist: *Each of the following items must be included in the closure report.*

- A scaled site and sampling diagram as described in 19.15.29.11 NMAC
- Photographs of the remediated site prior to backfill or photos of the liner integrity if applicable (Note: appropriate OCD District office must be notified 2 days prior to liner inspection)
- Laboratory analyses of final sampling (Note: appropriate ODC District office must be notified 2 days prior to final sampling)
- Description of remediation activities

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.

**Re: Site Closure Report Addendum
 Airstream State Com 503H/504H Dump Valve Release
 Centennial Resource Development, Inc
 Incident ID: nAB2206153404
 O-13-22S-34E, Lea County, New Mexico**

To Whom it May Concern:

New Tech Global Environmental, LLC (NTGE), on behalf of Centennial Resource Development, Inc. (Centennial), submits this addendum to the closure report for the Airstream 24 State Com 503H/504H Dump Valve Release (Site). This addendum provides documentation of delineation sampling and analyses conducted in the affected areas of the site. The Site is located in Lea County approximately 15.6 miles west of Eunice, New Mexico (Figure 1).

Background

A *Soil Assessment and Remediation Report*, dated August 25, 2022, which was prepared by SDR Enterprises, LLC (SDR), was submitted to the NMOCD for consideration. On September 23, the NMOCD responded to the report and denied the deferral request. The response stated:

"The deferred area needs to be fully delineated both horizontally and vertically. Please specify exactly which sample points you are asking for a deferral on and the reason the contaminants cannot be removed. Only sample locations that are right adjacent to equipment and require a major deconstruction will be available for a deferral. Please provide information on the installation of the liner, ex. what depth was liner installed at? Going forward, OCD requires prior approval for the placement of a liner. Please submit a revised Deferral Request to the OCD portal by October 24, 2022".

Liner Installation Details

SDR conducted limited excavation by hand around production equipment to limit the impacted soil being left in place. During excavation activities, an existing liner was encountered. Prior to backfilling the site SDR replaced the liner in the areas of the excavation where they encountered the liner. According to SDR the liner was installed at depths ranging from one and a half (1.5) to two (2) ft bgs. The liner encountered and re-installed within the mechanically excavated area, as outlined on SDR Figure 4, is not within the requested deferral area and all confirmation samples were below Table I closure criteria.

Follow-Up Assessment

In September 2022, Centennial assigned the project to NTGE to manage. On October 11, 2022, NTGE mobilized to the Site and collected delineation samples from and around the requested deferral areas. NTGE installed 8 soil borings to depths ranging from one (1) to one and a half (1.5) feet below ground surface (ft bgs) with a geotechnical handauger. A total of twelve (12) samples were collected from the soil borings and selected for chemical analysis. The soil boring locations for samples collected by both SDR and NTGE during the initial and follow-up assessment activities are shown on Figure 2. Additionally, the excavated area and the requested deferral area at also shown on Figure 2.

The soil samples were submitted to Eurofins Environmental Testing in Midland, Texas for chemical analysis. The soil samples were analyzed for benzene, toluene, ethylbenzene, and xylenes (BTEX) by EPA method 8021B, total petroleum hydrocarbons (TPH) by method 8015 modified, and chloride by EPA method 300.0. The analytical results are provided in Table 1, attached. Copies of the Laboratory Analytical Report and Chain-of Custody Documentation is attached.

The analytical results identified, two (2) samples {i.e., HA-3 (0-1') and HA-8 (0-1')} exceeded 19.15.29.12 Table I concentrations for groundwater fifty (50) feet or less. However, soil sample collected from the one (1) to one and a half (1.5) ft bgs depth interval in these soil boring were below the Table I closure criteria indicating the extent of impacts are defined in this area.

Closing

The requested deferral area is directly adjacent to or under production equipment. The area has been delineated by delineation samples collected by SDR and NTGE. NTGE, on behalf of Centennial, formally request NMOCD approval for deferral. For reference the SDR *Soil Assessment and Remediation Report* is attached to this letter.

If you have any questions or comments concerning this report, please do not hesitate to contact our Midland office at (432) 766-1918.

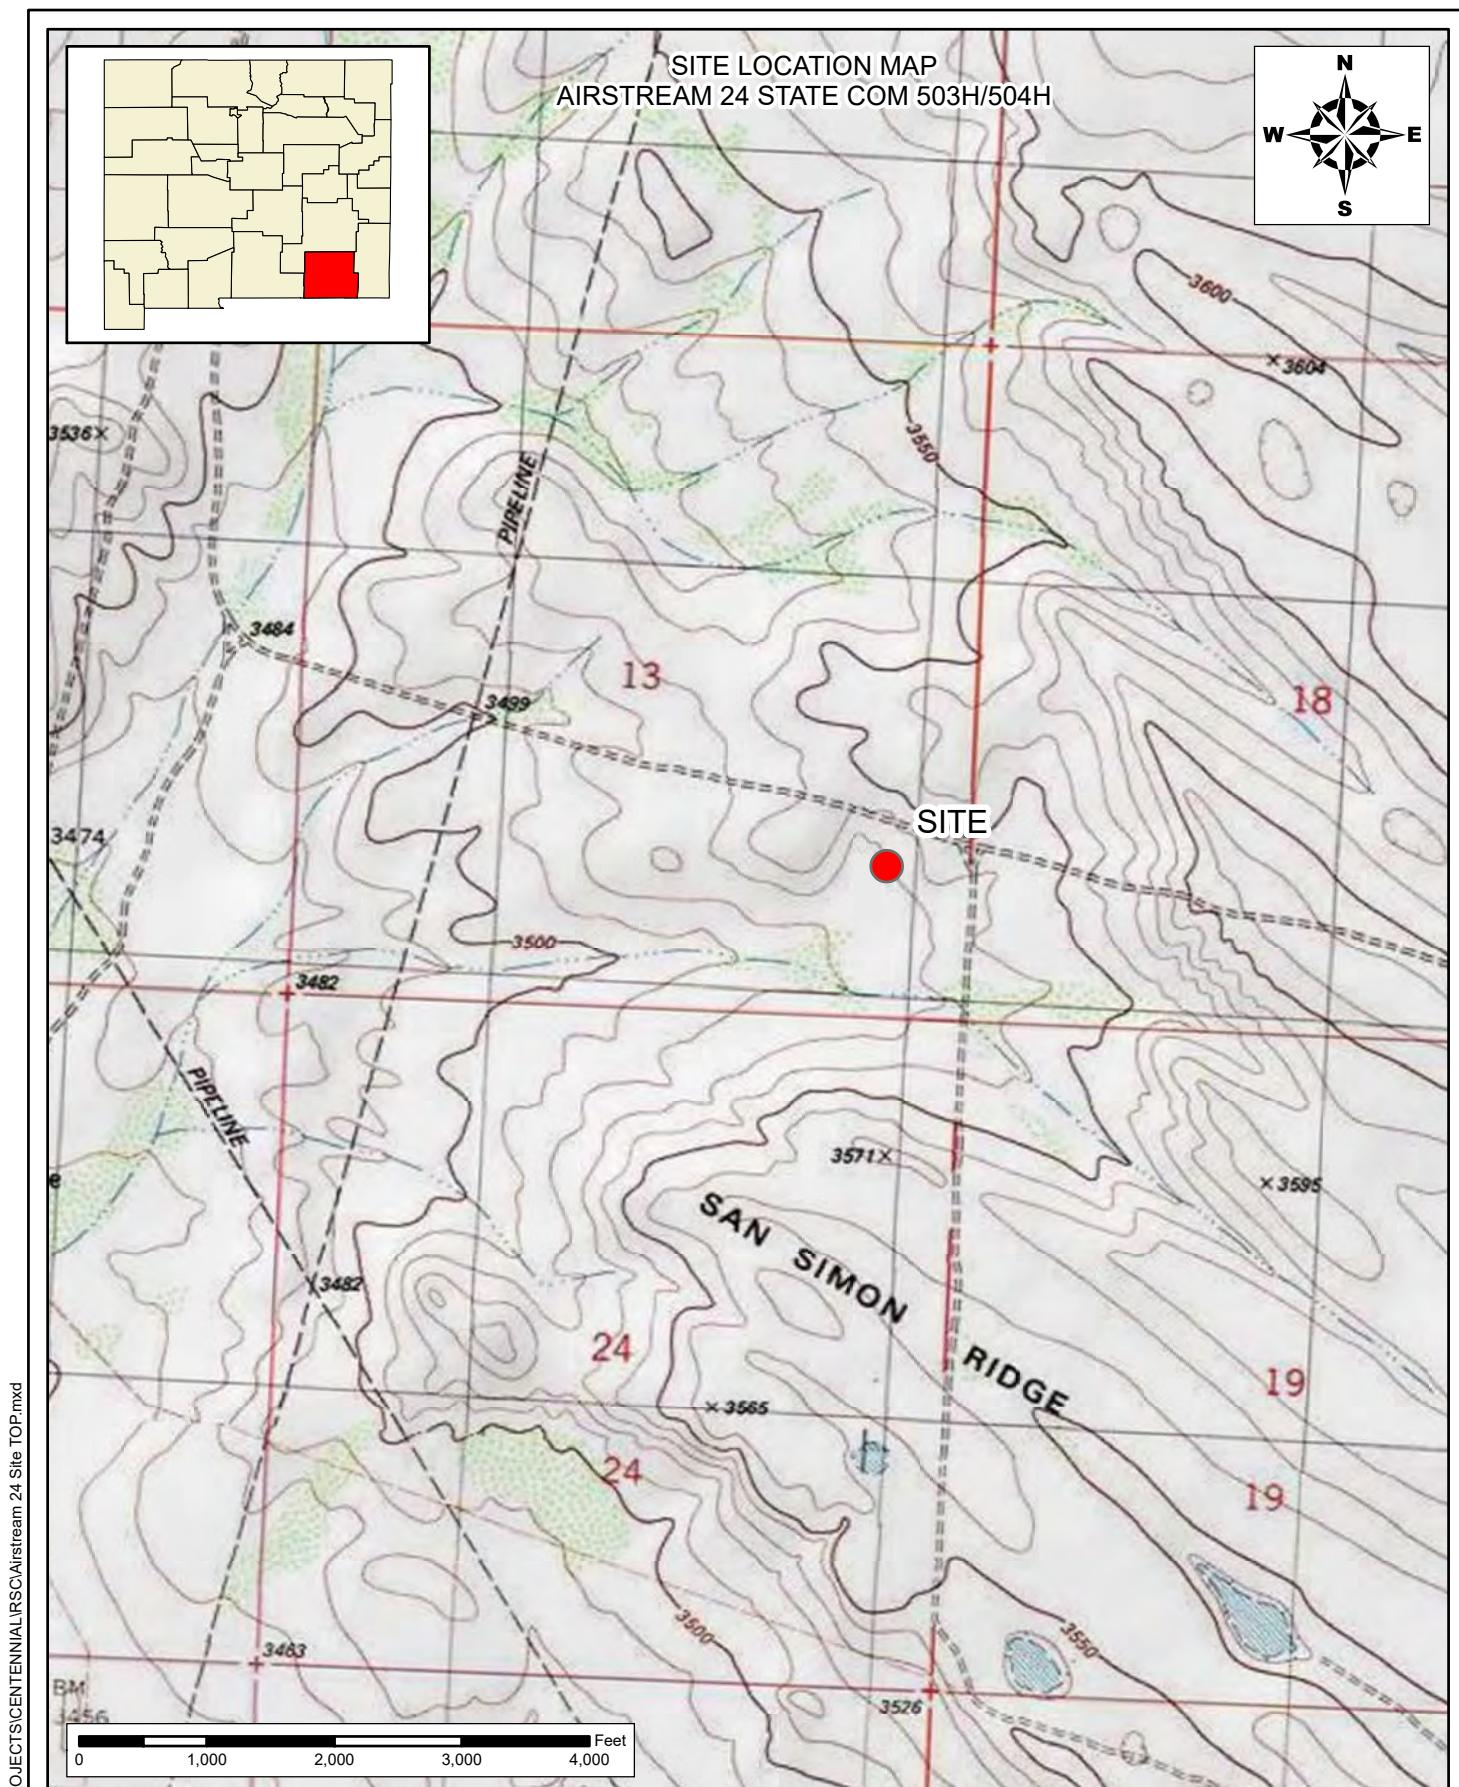

Sincerely,

NTG Environmental

Becky Haskell
Senior Project Manager

Qualifiers

GC VOA

Qualifier	Qualifier Description
S1-	Surrogate recovery exceeds control limits, low biased.
U	Indicates the analyte was analyzed for but not detected.

GC Semi VOA

Qualifier	Qualifier Description
*1	LCS/LCSD RPD exceeds control limits.
S1-	Surrogate recovery exceeds control limits, low biased.
U	Indicates the analyte was analyzed for but not detected.

HPLC/IC

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation

These commonly used abbreviations may or may not be present in this report.

□	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

 SDG: Lea County, New Mexico

Job ID: 880-20176-1**Laboratory: Eurofins Midland****Narrative****Job Narrative
880-20176-1****Receipt**

The samples were received on 10/11/2022 9:16 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 3.8°C

Receipt Exceptions

The following samples analyzed for method <FRACTION_METHOD> were received and analyzed from an unpreserved bulk soil jar: HA-1 (0-1') (880-20176-1), HA-1 (1'-1.5') (880-20176-2), HA-2 (0-1') (880-20176-3), HA-3 (0-1') (880-20176-4), HA-3 (1'-1.5') (880-20176-5), HA-4 (0-1') (880-20176-6), HA-4 (1'-1.5') (880-20176-7), HA-5 (0-1') (880-20176-8), HA-6 (0-1') (880-20176-9), HA-7 (0-1') (880-20176-10), HA-7 (0-1') (880-20176-11), HA-8 (0-1') (880-20176-12) and HA-8 (1'-1.5') (880-20176-13).

GC VOA

Method 8021B: Surrogate recovery for the following sample was outside control limits: (MB 880-36678/5-A). Evidence of matrix interferences is not obvious.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC Semi VOA

Method 8015MOD_NM: The surrogate recovery for the blank associated with preparation batch 880-36688 and analytical batch 880-36637 was outside the upper control limits.

Method 8015MOD_NM: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 880-36688 and analytical batch 880-36637 recovered outside control limits for the following analytes: Gasoline Range Organics (GRO)-C6-C10.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC

Method 300_ORGFM_28D: The matrix spike / matrix spike duplicate (MS/MSD) recoveries and precision for preparation batch 880-36659 and analytical batch 880-36677 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory sample control duplicate (LCS/LCSD) precision was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

**RE: Soil Assessment and Remediation Report
Airstream 24 State Com 503H & 504H CTB Dump Valve Release
Centennial Resource Development LLC
Incident ID Number nAPP2206153404
Lea County, New Mexico**

Dear Madam or Sir,

This Soil Remediation Report provides photographic and written documentation associated with soil remediation corrective actions at Airstream 24 State Com 503H and 504H Central Tank Battery (Site). Corrective actions were managed and documented via field observations and photographs by SDR Enterprises, LLC (SDR) under the direction of Centennial Resource Development, Inc (Centennial). Incident ID Number nAPP2206153404 was assigned to this release by the New Mexico oil Conservation Division. The purpose of the soil remediation activities was to address the impacted soil after crude oil and produced water were released inside secondary containment of the facility from a pin hole in the bottom of the water dump valve. The purpose of soil excavation and sampling activities was to confirm the presence or absence of contaminant impacts to soils following a release of crude oil and produced water from the water dump valve at the facility.

RELEASE BACKGROUND

SDR was contacted by Centennial to provide photographic documentation, field observations, conduct soil remediation and site restoration, and prepare a report as to the nature, extent, and remediation of soils impacted with crude oil and produced water. The release occurred from the facility's water dump valve and remained inside the berm surrounding process and ancillary equipment. The Site is an operating tank battery that provides storage for oil and gas production activity and lies in Unit O, Section 13, Township 22 South, Range 34 East, in Lea County New Mexico. The GPS coordinates are 32.386319 degrees North and 103.420544 degrees West. The Site's location and facility details are depicted on figures 1 and 2, respectively.

The release occurred on March 1, 2022, and Centennial reported the release to the New Mexico Oil Conservation Division (NMOCD) on a Release Notification Form C-141 (Form C-141) dated March 2, 2022. The initial C-141 is included as Attachment 1. The release

was the result of a pin hole in the bottom of the water dump valve. The initial estimate of the release was two barrels (bbl) of crude oil and six bbl of produced water. The initial estimate of the area affected by the release was 1,300 square feet. Attached as Figure 3 is an aerial image depicting the apparent release area in green. Photos of the extent of the release are included in Attachment 2.

SITE CHARACTERIZATION

SDR characterized the Site according to Table 1, Closure Criteria for Soils Impacted by a Release, of Title 19, Chapter 15, Part 29, Section 12 (19.15.29.12) of the New Mexico Administrative Code (NMAC). Review of data available on the web site of the New Mexico Office of the State Engineer indicates that the depth to groundwater at the Site is approximately 42 feet below ground surface (bgs). The nearest permitted well (CP-01682-POD1) is located approximately 0.90 miles southwest of the Site and was completed in September 2019. This well lies on New Mexico State Trust Land. The well was installed by Merchant Livestock Company. The OSE POD Location Map and POD Summary is included in Attachment 3. Review of the topographic maps available on Google Earth indicate that the closest continuously flowing water or significant watercourse is Monument Draw located approximately 26.7 miles southeast of the Site in the downgradient direction. The Site is greater than 200 feet from a lakebed, sinkhole, or playa lake; greater than 300 feet from an occupied residence, school, hospital, institution, church, or wetland; and is greater than 1,000 feet from a freshwater well or spring. According to data available on the web site of the New Mexico Oil Conservation Division, the Site is in an area of low potential of karst occurrence. The Site is not within 200 feet of a sinkhole and does not overlie a subsurface mine. The Site is not within a 100-year floodplain map. The site is not within 300 feet of a wetland as mapped by the National Wetlands Inventory.

CLOSURE CRITERIA

Based on the information provided from the site characterization, the distance to the nearest water well, and well log data for a monitoring well completed in September of 2019 indicating that the depth to groundwater is approximately 42 feet bgs, the following NMOCD Table 1 Closure Criteria (Closure Criteria) were applied as remediation guidance for excavating and vertical delineation of impacted soil:

- Benzene: 10 milligrams per kilogram (mg/kg);
- Benzene, Toluene, Ethylbenzene, and Total Xylenes (BTEX): 50 mg/kg;
- Total Petroleum Hydrocarbons (TPH (Gas Range Organics (GRO)+Diesel Range Organics (DRO)+Motor Oil Range Organics (MRO))): 100 mg/kg;
- Chloride: 600 mg/kg

SITE ASSESSMENT, EXCAVATING, FIELD SCREENING, AND CONFIRMATION SOIL SAMPLING

On March 22 through June 10, 2022, SDR field personnel and equipment mobilized to the Site to conduct assessment activities and remediation of soil impacted by crude oil and produced water. Assessment activities consisted of photographic documentation of the Site; mapping the extent of the apparent release area; and advancing borings with a hand auger for collection of grab soil samples. Delineation soil samples were collected from borings outside the release area. Investigation samples from borings located within the secondary containment area for laboratory analysis. Soil remediation activities consisted of excavating areas of visibly stained surface soil; field screening of soil for hydrocarbon and chloride; and collecting composite confirmation wall and floor samples for laboratory analyses.

A calibrated RAE Systems MiniRAE 3000 photoionization detector (PID) and Hach Chloride QuanTab test strips were used to screen field samples for volatile organic compounds (VOCs) and chloride, respectively. Results of the field screening were used to determine if the excavation needed to be widened or deepened in order to satisfy the closure criteria limits for hydrocarbons and chloride enumerated above. Composite confirmation floor samples (CFS) and composite confirmation wall samples (CWS) were collected from the excavated area when screening indicated that closure criteria limits had been satisfied. Each composite sample was prepared by thoroughly mixing five aliquots of soil sampled from five separate points on the floor or from five separate points from the walls of the excavation in a resealable plastic bag. Samples were placed into clean, laboratory supplied glass jars and immediately placed on ice.

Assessment of soil at the Site began on March 22, 2022, with collection of delineation samples of soil from hand borings on all sides of and outside the margins of the visibly affected release area. Those samples include DS-W, DS-S, DS-NW, DS-E, DS-N, DS-WNW, and DS-SE. Screening of these samples indicated concentrations of VOC and chloride were within the closure criteria; therefore, these samples were submitted to the laboratory for analyses. Additional samples were collected at this time from various depths up to 5 feet bgs at five locations within the margins of the visibly affected area of the release. Screening indicated that concentrations of VOC or chloride exceeded the closure criteria, which indicated that further excavation would be required.

Excavation of affected soil resumed on March 28, 2022, in the area of processing piping and equipment using hydrovac techniques. Hydrovac excavation of visibly affected soil was conducted to the greatest extent possible without interfering with proper functioning of process equipment. Additional hand digging in this area was conducted on March 31, 2022. No confirmation samples around processing equipment were collected or analyzed. Further assessment and sampling in the area around processing piping and equipment will be conducted upon removal of process piping and equipment.

Excavation of visibly affected soil continued on March 28, 2022, with a backhoe in the area south of the processing piping and equipment. A preexisting liner was encountered in this area. No information regarding the purpose of this liner is available. The pre-existing liner was removed on March 29, 2022. Screening of 17 floor samples and 10 wall samples collected from beneath the level of the liner were conducted, the results of which were used to guide expansion of the excavation to the extent that the closure criteria with respect to benzene, BTEX, TPH, and chloride in soil were satisfied. Twelve composite floor samples (CFS-1, CFS-2, CFS-3, CFS-4, CFS-5, CFS-6, CFS-7, CFS-8, CFS-9, CFS-10, CFS-11, and CFS-12) and twelve composite wall samples (CWSE-1, CWSS-1, CWSS-2, CWSE-4, CWSS-4, CWSS-6, CWSS-8, CWSS-10, CWSN-11, CWSW-11, CWSS-12, and CWSW-12) were collected from the floor and walls of the excavation on March 31, 2022. The excavation was deepened by one foot in the vicinity of sample CFS-3 so that an additional composite confirmation floor sample (CFS-3 at 9-10' bgs) could be collected on April 5, 2022. Four additional discrete delineation samples (DS-WNW, DS-SE, IS-1, and IS-2) were also collected on April 5, 2022. All soil removed from the excavation was disposed off-site at Northern Delaware Basin Landfill in Jal, New Mexico. The volume of soil disposed at that facility was approximately 600 cubic yards.

ANALYTICAL RESULTS

Collected soil samples were hand delivered at or below 4 degrees Celsius (°C) and under chain-of-custody (COC) protocol to the Eurofins-Xenco Laboratory in Midland, Texas. Analyses of BTEX, TPH, and chloride were performed according to United States Environmental Protection Agency (USEPA) methods 8021B, 8015M, 300.0, respectively. Laboratory analytical results for collected grab delineation soil samples and composite confirmation floor and wall samples indicate that concentrations of benzene, BTEX, TPH (GRO/DRO/MRO) and chloride are below and in compliance with the established closure concentrations. Laboratory analytical results are summarized in Table 1 and on the map in figures 3 and 4. Certified laboratory reports for all samples whose results are in Table 1 are included in Attachment 5.

EXCAVATION BACKFILLING AND SITE RESTORATION

Upon approval of Centennial, SDR installed a liner at the bottom of the excavation as depicted on Figure 4 and the area underlying process piping and equipment from which visibly affected soil had been removed by hand. To restore the excavated area, 1-foot layers of caliche were spread throughout the excavated area, watered, and compacted with a roller. Approximately 433 yards of caliche and 90 bbl of water were used during backfilling and compaction. This process continued until the caliche reached the surrounding pad surface and then the caliche was graded to match the surrounding pad

surface. Photographic documentation of the backfilled and restored excavated area is depicted in Attachment 2.

REQUEST FOR PARTIAL NO FURTHER ACTION AND CLOSURE

Extensive VOC and chloride field screening and excavating of soil impacted by the release of crude oil and produced water from the water dump valve were performed at the Site. Laboratory analytical results indicate that benzene, BTEX, TPH (GRO/DRO/MRO), and chloride concentrations are below and in compliance with the established target concentration criteria. Partial No Further Action and closure are warranted for the excavated area at the Airstream 24 State Com 503H & 504H Central Tank Battery (Incident ID Number nAPP2206153404) as depicted on Figure 4 of this report. Approval to delay assessment and remediation of affected soil underlying process piping and equipment, as depicted on Figure 3 of this report, until process equipment has been decommissioned and removed is hereby requested. It is understood that additional excavation, laboratory analyses, and restoration may be necessary at that time.

If you have any questions or comments, please do not hesitate to contact SDR Enterprises LLC at (575) 393-8420.

Sincerely,

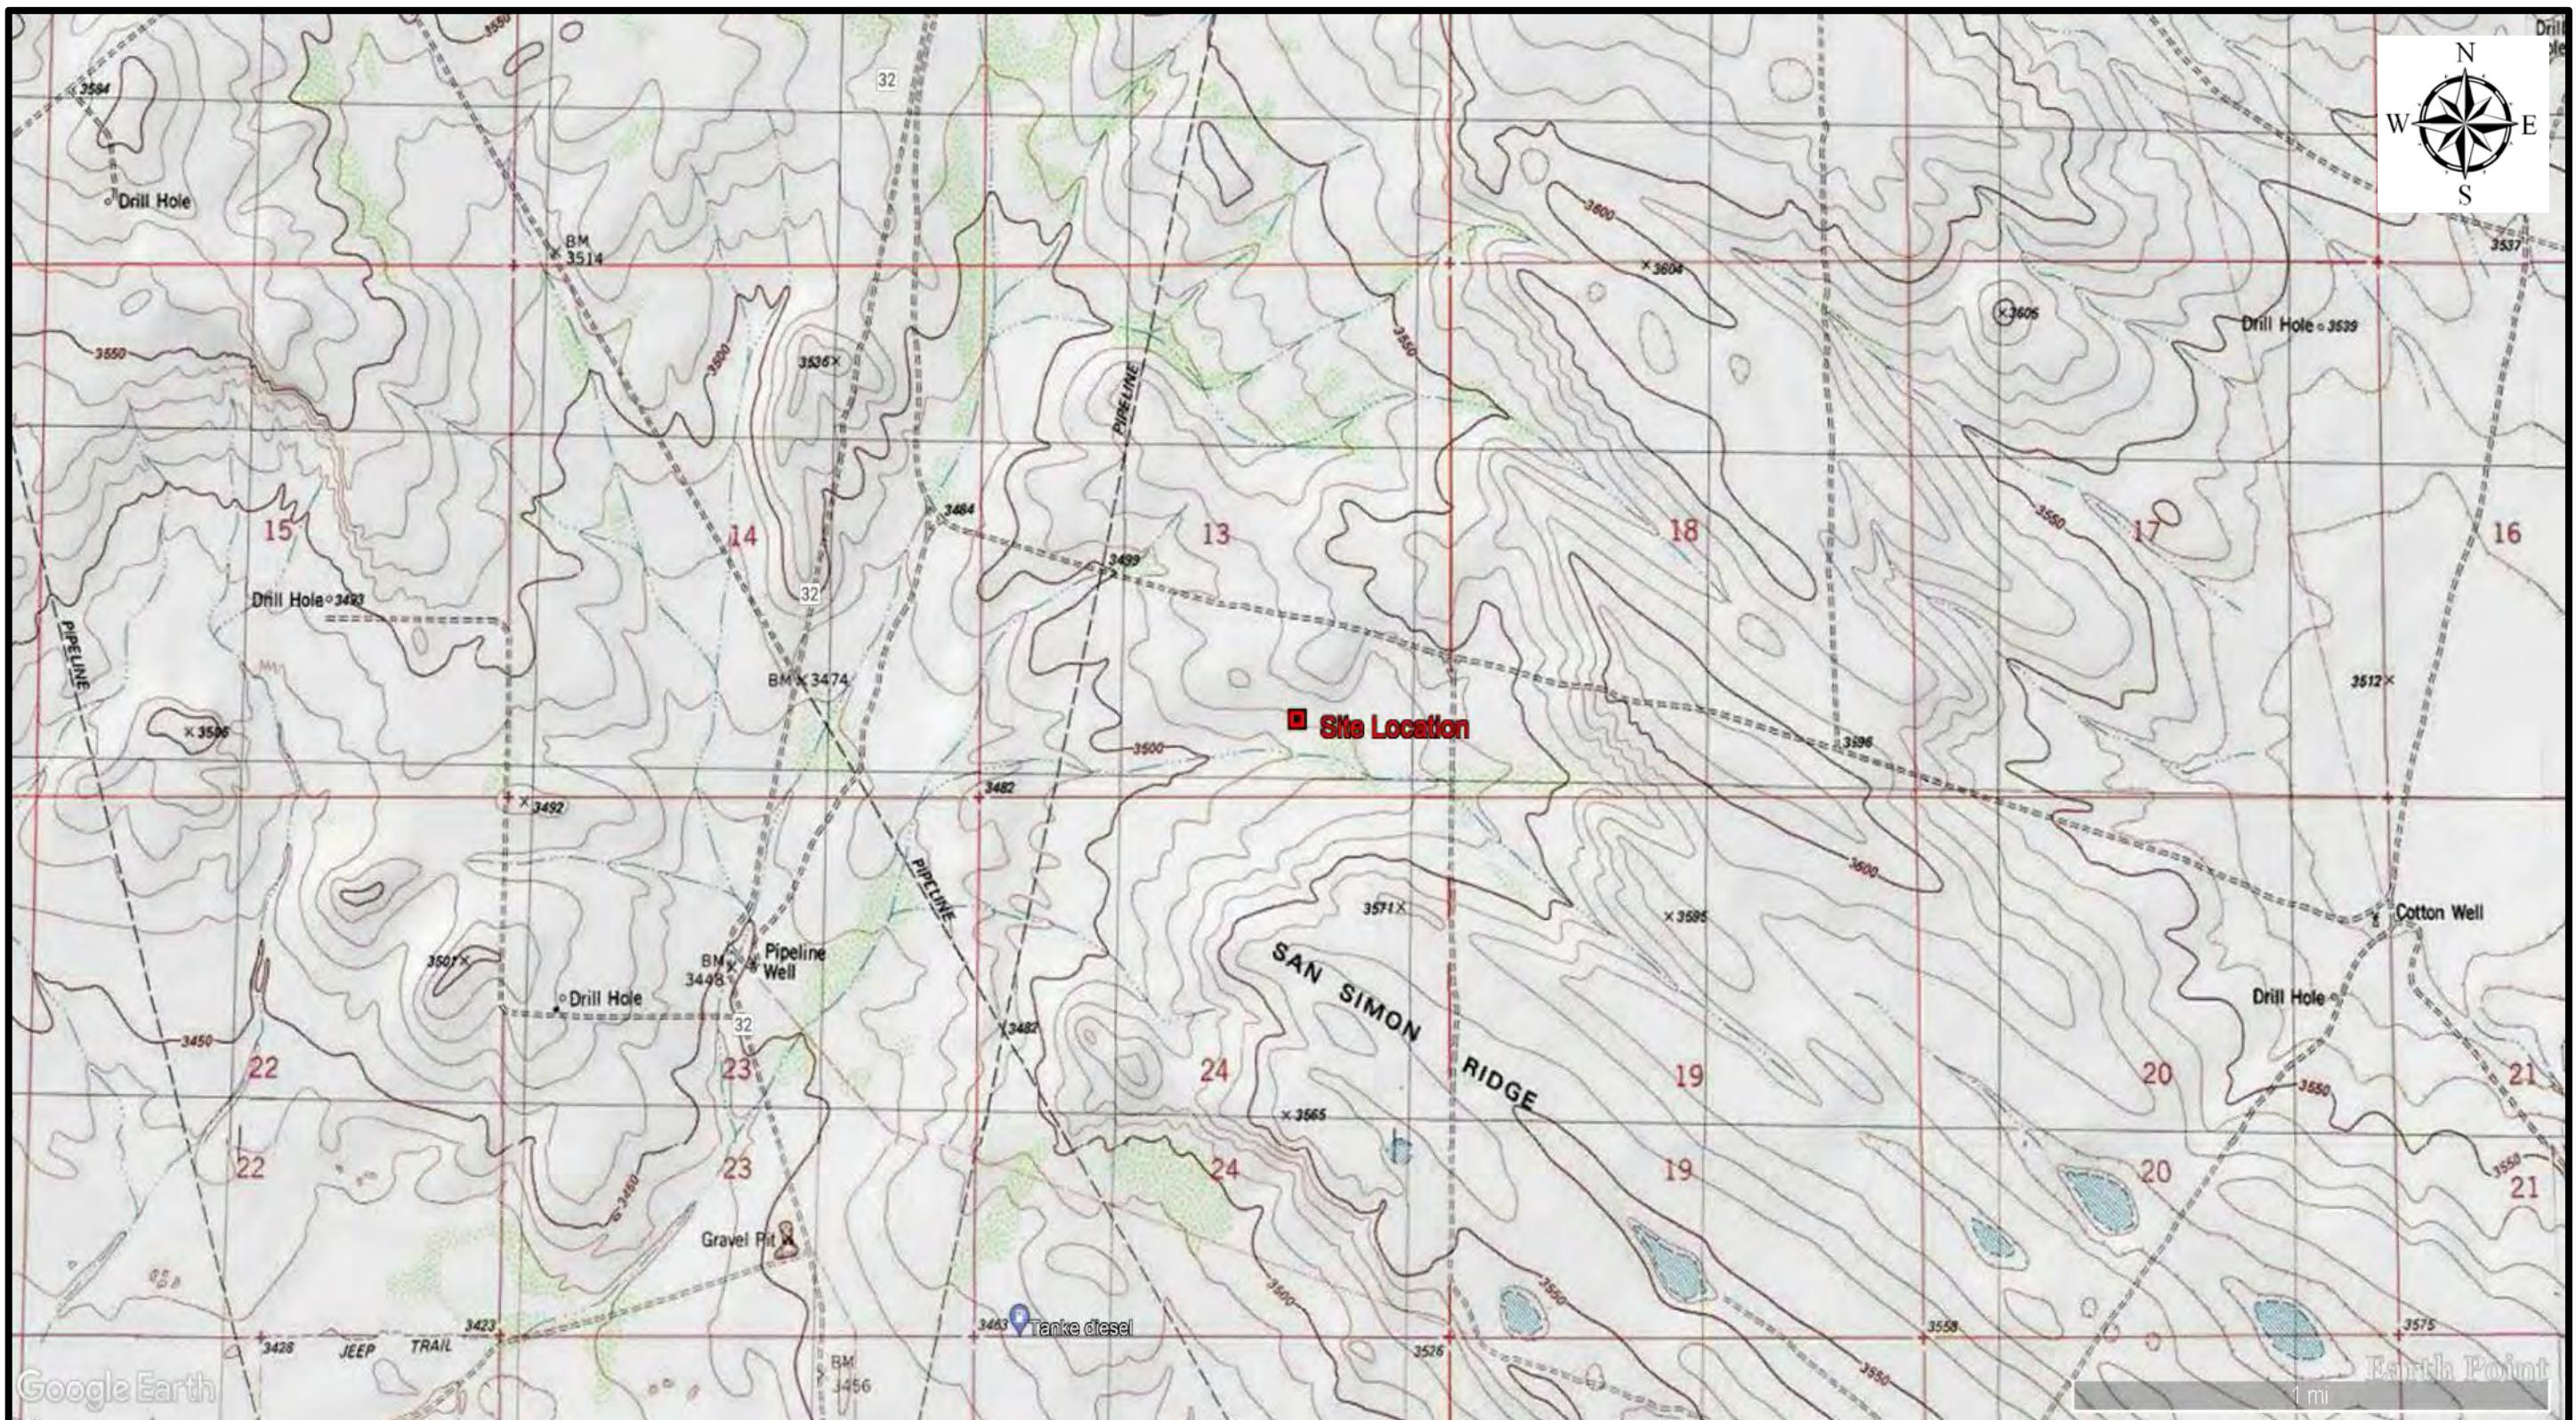

SDR Enterprises, LLC

John Schnable, M.S., P.G.

Cause of Release:

The water dump developed a pin hole in the valve due to corrosion which resulted in the release of crude oil and produced water. Based on the square footage of the impacted soil (1300 sq. ft.) and an estimated depth of impact at approximately 1', accounting for porosity and saturation % of the soils, an estimated total volume of 8 bbls of crude oil and produced water were released within the perimeter of the facility.

Was this a major release as defined by 19.15.29.7(A) NMAC?	If YES, for what reason(s) does the responsible party consider this a major release?
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	

If YES, was immediate notice given to the OCD? By whom? To whom? When and by what means (phone, email, etc)?

Initial Response

The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury

- The source of the release has been stopped.
- The impacted area has been secured to protect human health and the environment.
- Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices.
- All free liquids and recoverable materials have been removed and managed appropriately.

If all the actions described above have not been undertaken, explain why:

Per 19.15.29.8 B. (4) NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please attach a narrative of actions to date. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please attach all information needed for closure evaluation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

Release

Qualifiers

GC VOA

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.
F2	MS/MSD RPD exceeds control limits
U	Indicates the analyte was analyzed for but not detected.

GC Semi VOA

Qualifier	Qualifier Description
S1+	Surrogate recovery exceeds control limits, high biased.
U	Indicates the analyte was analyzed for but not detected.

HPLC/IC

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation

These commonly used abbreviations may or may not be present in this report.

□	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: SDR Enterprises, LLC.

Job ID: 880-13074-1

Project/Site: Airsteam 25 State Com 503H/504H Dump Valve Release

SDG: Lea County, NM

Job ID: 880-13074-1**Laboratory: Eurofins Midland****Narrative****Job Narrative**

880-13074-1

Receipt

The samples were received on 3/30/2022 11:10 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 1.4°C

GC VOA

Method 8021B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 880-22613 and analytical batch 880-22684 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC Semi VOA

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Notice: Signature of this document and relinquishment of samples constitutes a valid purchase order from client company to Eurofins Xenco, its affiliates and subcontractors. It assigns standard terms and conditions of service. Eurofins Xenco will be liable only for the cost of samples and shall not assume any responsibility for any losses or expenses incurred by the client if such losses are due to circumstances beyond the control of Eurofins Xenco. A minimum charge of \$5.00 will be applied to each project and a charge of \$5 for each sample submitted to Eurofins Xenco, but not analyzed. These terms will be enforced unless previously negotiated.

Question	Answer	Comment	
The cooler's custody seal, if present, is intact.	N/A		1
Sample custody seals, if present, are intact.	N/A		2
The cooler or samples do not appear to have been compromised or tampered with.	True		3
Samples were received on ice.	True		4
Cooler Temperature is acceptable.	True		5
Cooler Temperature is recorded.	True		6
COC is present.	True		7
COC is filled out in ink and legible.	True		8
COC is filled out with all pertinent information.	True		9
Is the Field Sampler's name present on COC?	True		10
There are no discrepancies between the containers received and the COC.	True		11
Samples are received within Holding Time (excluding tests with immediate HTs)	True		12
Sample containers have legible labels.	True		13
Containers are not broken or leaking.	True		14
Sample collection date/times are provided.	True		
Appropriate sample containers are used.	True		
Sample bottles are completely filled.	True		
Sample Preservation Verified.	N/A		
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True		
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A

Qualifiers

GC VOA

Qualifier	Qualifier Description
S1-	Surrogate recovery exceeds control limits, low biased.
S1+	Surrogate recovery exceeds control limits, high biased.
U	Indicates the analyte was analyzed for but not detected.

GC Semi VOA

Qualifier	Qualifier Description
F2	MS/MSD RPD exceeds control limits
S1+	Surrogate recovery exceeds control limits, high biased.
U	Indicates the analyte was analyzed for but not detected.

HPLC/IC

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation These commonly used abbreviations may or may not be present in this report.

□	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

Case Narrative

Client: SDR Enterprises, LLC.

Job ID: 880-13167-1

Project/Site: Airstream 24 StateCom 503H/504H Dump Valve Release

SDG: Lea County, NM

Job ID: 880-13167-1**Laboratory: Eurofins Midland****Narrative****Job Narrative**

880-13167-1

Receipt

The samples were received on 4/1/2022 8:23 AM. Unless otherwise noted below, the samples arrived in good condition, and, where required, properly preserved and on ice. The temperature of the cooler at receipt time was 0.8°C

GC VOA

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

GC Semi VOA

Method 8015MOD_NM: Surrogate recovery for the following sample was outside control limits: CFS-2 (880-13167-4). Evidence of matrix interferences is not obvious.

Method 8015MOD_NM: Surrogate recovery for the following sample was outside control limits: (MB 880-22768/1-A). Evidence of matrix interferences is not obvious.

Method 8015MOD_NM: The matrix spike / matrix spike duplicate (MS/MSD) recoveries and precision for preparation batch 880-22805 and analytical batch 880-22877 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory sample control duplicate (LCS/LCSD) precision was within acceptance limits.

Method 8015MOD_NM: Surrogate recovery for the following sample was outside control limits: (MB 880-22769/1-A). Evidence of matrix interferences is not obvious.

Method 8015MOD_NM: Surrogate recovery for the following samples were outside control limits: (MB 880-22842/1-A) and (880-13195-A-1-D). Evidence of matrix interferences is not obvious.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

HPLC/IC

No additional analytical or quality issues were noted, other than those described above or in the Definitions/ Glossary page.

Project/Site: Airstream 24 StateCom 503H/504H Dump Valve

SDG: Lea County, NM

Release

Laboratory: Eurofins Midland

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

Authority	Program	Identification Number	Expiration Date
Texas	NELAP	T104704400-21-22	06-30-22

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

Analysis Method	Prep Method	Matrix	Analyte
8015 NM		Solid	Total TPH
Total BTEX		Solid	Total BTEX

Notice: Signature of this document and relinquishment of samples constitutes a valid purchase order from client company to Eurofins Xenco, its affiliates and subcontractors. It assigns standard terms and conditions of service. Eurofins Xenco will be liable only for the cost of samples and shall not assume any responsibility for any losses or expenses incurred by the client if such losses are due to circumstances beyond the control of Eurofins Xenco. A minimum charge of \$85.00 will be applied to each project and a charge of \$5 for each sample submitted to Eurofins Xenco but not analyzed. These terms will be enforced unless previously negotiated.

Question	Answer	Comment	
The cooler's custody seal, if present, is intact.	N/A		1
Sample custody seals, if present, are intact.	N/A		2
The cooler or samples do not appear to have been compromised or tampered with.	True		3
Samples were received on ice.	True		4
Cooler Temperature is acceptable.	True		5
Cooler Temperature is recorded.	True		6
COC is present.	True		7
COC is filled out in ink and legible.	True		8
COC is filled out with all pertinent information.	True		9
Is the Field Sampler's name present on COC?	True		10
There are no discrepancies between the containers received and the COC.	True		11
Samples are received within Holding Time (excluding tests with immediate HTs)	True		12
Sample containers have legible labels.	True		13
Containers are not broken or leaking.	True		14
Sample collection date/times are provided.	True		
Appropriate sample containers are used.	True		
Sample bottles are completely filled.	True		
Sample Preservation Verified.	N/A		
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True		
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A

Qualifiers

GC VOA

Qualifier	Qualifier Description
F1	MS and/or MSD recovery exceeds control limits.
S1+	Surrogate recovery exceeds control limits, high biased.
U	Indicates the analyte was analyzed for but not detected.

GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

HPLC/IC

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation These commonly used abbreviations may or may not be present in this report.

□	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CFU	Colony Forming Unit
CNF	Contains No Free Liquid
DER	Duplicate Error Ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL	Detection Limit (DoD/DOE)
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision Level Concentration (Radiochemistry)
EDL	Estimated Detection Limit (Dioxin)
LOD	Limit of Detection (DoD/DOE)
LOQ	Limit of Quantitation (DoD/DOE)
MCL	EPA recommended "Maximum Contaminant Level"
MDA	Minimum Detectable Activity (Radiochemistry)
MDC	Minimum Detectable Concentration (Radiochemistry)
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
MPN	Most Probable Number
MQL	Method Quantitation Limit
NC	Not Calculated
ND	Not Detected at the reporting limit (or MDL or EDL if shown)
NEG	Negative / Absent
POS	Positive / Present
PQL	Practical Quantitation Limit
PRES	Presumptive
QC	Quality Control
RER	Relative Error Ratio (Radiochemistry)
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
TNTC	Too Numerous To Count

No additional comments.

Receipt

The samples were received on 4/6/2022 10:38 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 3.4° C.

GC VOA

Method 8021B: The continuing calibration verification (CCV) associated with batch 880-23049 recovered above the upper control limit for m-Xylene & p-Xylene and o-Xylene>. The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The associated samples are impacted: CFS-3 (880-13385-1), DS-WNW (880-13385-2) and (CCV 880-23049/21).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Notice: Signature of this document and relinquishment of samples constitutes a valid purchase order from client company to Eurofins Xeno. It assigns standard terms and conditions of service. Eurofins Xeno will be liable only for the cost of samples and shall not assume any responsibility for any losses or expenses incurred by the client if such losses are due to circumstances beyond the control of Eurofins Xeno. A minimum charge of \$65.00 will be applied to each project and a charge of \$5 for each sample submitted to Eurofins Xeno, but not analyzed. These terms will be enforced unless previously negotiated.

Question	Answer	Comment	
The cooler's custody seal, if present, is intact.	N/A		1
Sample custody seals, if present, are intact.	N/A		2
The cooler or samples do not appear to have been compromised or tampered with.	True		3
Samples were received on ice.	True		4
Cooler Temperature is acceptable.	True		5
Cooler Temperature is recorded.	True		6
COC is present.	True		7
COC is filled out in ink and legible.	True		8
COC is filled out with all pertinent information.	True		9
Is the Field Sampler's name present on COC?	True		10
There are no discrepancies between the containers received and the COC.	True		11
Samples are received within Holding Time (excluding tests with immediate HTs)	True		12
Sample containers have legible labels.	True		13
Containers are not broken or leaking.	True		14
Sample collection date/times are provided.	True		
Appropriate sample containers are used.	True		
Sample bottles are completely filled.	True		
Sample Preservation Verified.	N/A		
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True		
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	N/A

CONDITIONS

Action 152986

CONDITIONS

Operator: CENTENNIAL RESOURCE PRODUCTION, LLC 1001 17th Street, Suite 1800 Denver, CO 80202	OGRID: 372165
	Action Number: 152986
	Action Type: [C-141] Release Corrective Action (C-141)

CONDITIONS

Created By	Condition	Condition Date
jnobui	Deferral Request Approved. The Deferral Request and C-141 will be accepted for record and marked accordingly. The release will remain open in OCD database files and reflect an open environmental issue. The OCD will not close a release, where contaminants are left in place, due to close proximity to equipment. The incident will only be closed after all contaminated soil has been remediated to meet OCD Spill Rule Standards.	11/18/2022
