Steps and Actions to Prevent Waste	
For this event, this operator could not have reasonably anticipated the current event and it was beyond this operator's control.	True
Please explain reason for why this event was beyond this operator's control	K&M Resources purchased the Brantley B Oil Com 1 on December 5th 2022. The well was returned to production and did not have any gas pressure on the well. The well was producing until 12-22-22 when we were notified of gas the release. The well was checked daily by the lease operator and did not have any signs of gas leaking or venting from the separation equipment or tanks.
Steps taken to limit the duration and magnitude of vent or flare	The well will remain shut in until we obtain a gas meter at the existing meter run on location.
Corrective actions taken to eliminate the cause and reoccurrence of vent or flare	I was notified by Brandon Powell w/ NMOCD about the venting on 12-22-22 at 8:15 am. The neighboring resident (approx. 1,000' north) had a LEL reading close to his residence. I went to location and met with Barbara Lydick(NMOCD Field Inspector) about the release. The well was shut in and will remain down until the gas meter is installed on the meter run. The estimated released volume was <5 MCF but required a C-129 due to the health concern. K&M was not expecting any gas release due to no gas volumes from 12-5 to 12-21. We will continue to monitor the well daily to ensure no other health or safety concerns are present. All equipment will be tested and fully operational before returning to production.
