**RE: Termination Request Report  
XTO Energy Inc. – Big Eddy Unit #74  
UL/B sec. 25 T21S R28E  
API # - 30-015-22839  
2RP-4573**

Ms. Weaver:

XTO Energy Inc. (XTO) has retained Basin Environmental Service Technologies (Basin) to address potential environmental concerns at the above-referenced site.

### **Background and Previous Work**

The site is located approximately eleven and one-half (11.5) miles northeast of Carlsbad, New Mexico at Unit Letter B of Section 25 in Township 21 South of Range 28 East. The longitude of the flare is 32.456770 and the latitude is -104.037534 (Figure 1). This site is located in an area where groundwater can be anticipated to found at a depth greater than two-hundred (200) feet below ground surface (bgs) (Figure 2).

On January 2<sup>nd</sup>, 2018, XTO discovered a release of less than one-half (0.5) barrels (bbl) of crude oil from an exit flare when the dump valves on vessels froze causing fluid to overflow the vessels and exit the flare. The valves have since been repaired. None of the product from the release was recovered. The release impacted an estimated seven-hundred (700) square feet (ft<sup>2</sup>) of pasture. The New Mexico Oil Conservation Division (NMOCD) and Department of Interior – Bureau of Land Management (BLM) were notified of the release on January 2<sup>nd</sup>, 2018, and an initial Release Notification and Corrective Action form (C-141) was submitted to NMOCD January 16<sup>th</sup>, 2018, for approval (Appendix A).

Micro-Blaze® was applied to the impacted area on January 6<sup>th</sup>, 2018. Initial surface and one-foot bgs soil samples were retrieved on March 5<sup>th</sup>, 2018 and submitted to an approved NMOCD approved commercial laboratory for concentration analysis of chloride, Benzene, Toluene, Ethylbenzene, Xylenes (BTEX), and total petroleum hydrocarbons (TPH). The analytical report

indicated that the impacted area was below the NMOCD recommended remediation action levels (RRAL) for BTEX, TPH, and chloride concentrations.

Samples from the XTO, Big Eddy Unit #74 flare release site were analyzed by an NMOCD approved laboratory, and concentrations of chloride, BTEX, and TPH were below the RRAL established for the site (Appendix B). XTO via Basin requests site closure to the Big Eddy Unit #74 flare release site.

Basin appreciates the opportunity to work with you on this project. Please contact me if you have any questions or wish to discuss the site.

Sincerely,

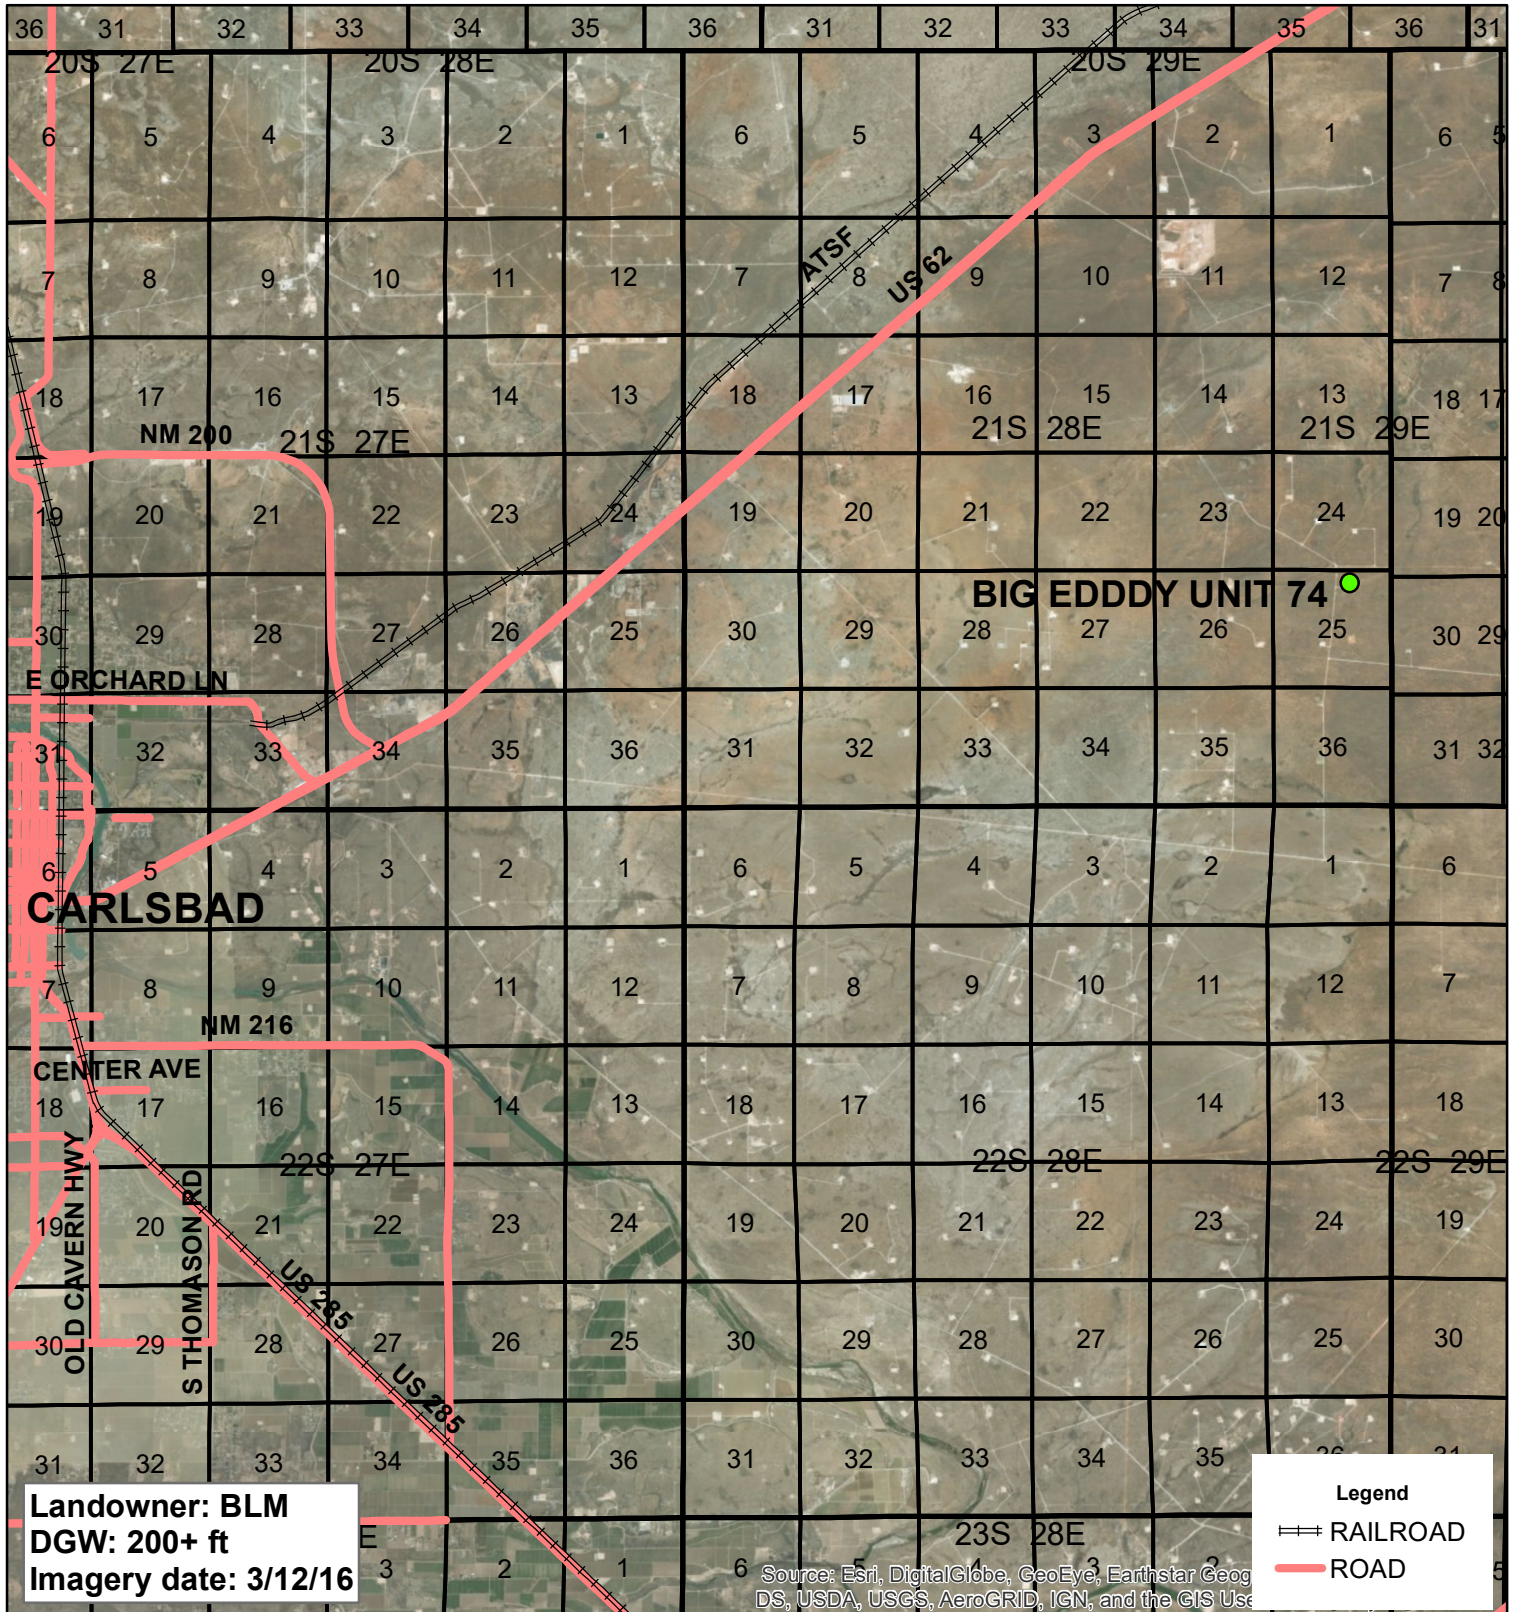

Robbie Runnels  
Project Manager  
Basin Environmental Service Technologies  
(575) 396-2378

Describe Area Affected and Cleanup Action Taken.\*

Micro-Blaze® was applied to the impacted area on January 6<sup>th</sup>, 2018. Initial surface and one-foot bgs soil samples were retrieved on March 5<sup>th</sup>, 2018 and submitted to an approved NMOCD approved commercial laboratory for concentration analysis of chloride, Benzene, Toluene, Ethyl-benzene, Xylenes (BTEX), and total petroleum hydrocarbons (TPH). The analytical report indicated that the impacted area was below the NMOCD recommended remediation action levels (RRAL) for BTEX, TPH, and chloride concentrations.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

RE: BIG EDDY

Enclosed are the results of analyses for samples received by the laboratory on 03/07/18 14:35.

Cardinal Laboratories is accredited through Texas NELAP under certificate number T104704398-17-10. Accreditation applies to drinking water, non-potable water and solid and chemical materials. All accredited analytes are denoted by an asterisk (\*). For a complete list of accredited analytes and matrices visit the TCEQ website at [www.tceq.texas.gov/field/qa/lab\\_accred\\_certif.html](http://www.tceq.texas.gov/field/qa/lab_accred_certif.html).

Cardinal Laboratories is accredited through the State of Colorado Department of Public Health and Environment for:

Method EPA 552.2	Haloacetic Acids (HAA-5)
Method EPA 524.2	Total Trihalomethanes (TTHM)
Method EPA 524.4	Regulated VOCs (V1, V2, V3)

Accreditation applies to public drinking water matrices.

This report meets NELAP requirements and is made up of a cover page, analytical results, and a copy of the original chain-of-custody. If you have any questions concerning this report, please feel free to contact me.

Sincerely,

A handwritten signature in black ink that reads "Celey D. Keene".

Notes and Definitions

- QR-03            The RPD value for the sample duplicate or MS/MSD was outside of QC acceptance limits due to matrix interference. QC batch accepted based on LCS and/or LCS/D recovery and/or RPD values.
- ND                Analyte NOT DETECTED at or above the reporting limit
- RPD               Relative Percent Difference
- \*\*                 Samples not received at proper temperature of 6°C or below.
- \*\*\*                Insufficient time to reach temperature.
- Chloride by SM4500Cl-B does not require samples be received at or below 6°C
- Samples reported on an as received basis (wet) unless otherwise noted on report

Cardinal Laboratories

\*=Accredited Analyte

PLEASE NOTE: Liability and Damages. Cardinal's liability and client's exclusive remedy for any claim arising, whether based in contract or tort, shall be limited to the amount paid by client for analyses. All claims, including those for negligence and any other cause whatsoever shall be deemed waived unless made in writing and received by Cardinal within thirty (30) days after completion of the applicable service. In no event shall Cardinal be liable for incidental or consequential damages, including, without limitation, business interruptions, loss of use, or loss of profits incurred by client, its subsidiaries, affiliates or successors arising out of or related to the performance of the services hereunder by Cardinal, regardless of whether such claim is based upon any of the above stated reasons or otherwise. Results relate only to the samples identified above. This report shall not be reproduced except in full with written approval of Cardinal Laboratories.
