I also have an approved delineation proposal for this site for 2RP-4022 - DOR 11.16.2016. Has that work been completed? I approved the proposal on 02.14.2017.

If you have any questions or concerns, please do not hesitate to contact me.

The **BLM acceptance/approval does not** relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment or if the location fails to reclaim properly. In such an event that the location does not revegetate, or future issues with contaminants are encountered, the operator will be asked to address the issues until the contaminant issues are fully

mitigated and the location is successfully reclaimed. In addition, BLM approval does not relieve the operator of responsibility for compliance with any other federal, state or local laws/regulations.

RE: OXY * Peaches 19 CTB * 30-015-40250 * 2RP-4211

Casey,

I have included a scanned copy of the signed Initial C-141 Remediation Permit along with an attached Conditions of Approval. The OCD tracking number for this event is 2RP-4211.

PLEASE NOTE: I was also looking in the files for this site location to see if there were any other remediations that we needed an update on and I came across case number 2RP-4022. Could we please get an update on that one. Work plan was approved 2/15/17 and OCD asked to be advised once remedial activities had begun but I have nothing following after that.

Thank you,

Crystal Weaver
