Steve

Once you get the data in for the new monitoring wells that were just installed, we would like to see an updated well log addressing the free product which continues to migrate and impact State Trust land and water. This site has been showing some movement.

Once your new data is in, we can set up a meeting to discuss future plans if needed. We would like to see successful remediation technologies is likely needed due to the size and depth of the impacts.

Please continue to include plume maps in subsequent reports.
