RE: South Blanco Federal 25-8,9,10 Tank Battery Release  
Closure Report  
Lease Number NM12233  
Facility ID fAPP2203258231  
Incident #nAPP2529633728  
San Juan County, New Mexico

To whom it may concern:

On behalf of Epic Energy (Operator), AnceLL Environmental Consulting Services (AECS) has prepared the following Remediation Closure Report to document remediation activities conducted at the Epic Energy South Blanco Federal 25-8,9, and 10 Tank Battery and adjacent areas (Site).

## Site Description and Release Summary

The Site is an active tank battery located approximately 1,850 feet southwest of the Well and is located in Unit K, Section 25, Township 24 North Range 08 West (Figure 1). The Site is located on federal land managed by the Bureau of Land Management (BLM).

On October 22, 2025, at approximately 9am MST, it was discovered that the South Blanco Federal 25-8,9,10 Tank Battery overflowed its primary 300-barrel (bbls), above ground storage tank (AST) into the secondary containment. The secondary containment overflowed, and the contents moved off location and down the road that parallels the location. It pooled in a low area on the access road 300 feet from the location and eventually began migrating into a field adjacent to the location where it flowed across the relatively flat field for several hundred additional feet and terminated on a reclaimed right of way (Figure 2). The Well was shut in and the Site was secured. The South Blanco Federal 25-9 is the only well currently contributing to the Tank Battery. The cause of the release is a direct result of the nearby Enduring Resources well stimulation activities on the Ridge Unit 127H & 128H horizontal wells extended beyond their notification period which impacted the South Blanco Federal 25-9 due to the lack of updated stimulation plan. On the same day, a sample of the drilling fluid released was collected. Laboratory results reported the chloride concentration of the fluid at 10,000 mg/L.

The release consisted of the contents of the AST (117 bbls of oil) plus an unknown volume of frack water from the Ridge Unit. A hydrovac truck was able to recover 40 bbls of oil leaving a

180 E. 12<sup>th</sup> St., Durango CO, 81301  
970-749-0124 [theresa@anceLLconsulting.com](mailto:theresa@anceLLconsulting.com)

Ancell Environmental Consulting Services, LLC

net volume loss of 77 bbls. During the initial survey of the release area, high accuracy GPS from the Trimble DA2 GNSS device was not available due to equipment malfunctions. In its place, the internal GPS system of the field mobile device was used. This resulted in position data of lower quality than would be preferred with an average accuracy of +/- 2.25 meters on a given position. This, combined with the necessity of navigating physical barriers and hazards in the field, produced a release area polygon that overestimates the size of the release on the ground. The surface area of the release is estimated to be approximately 23,850 square feet. Saturated surface soil scraped from roadways and ditches was taken to the Envirotech Landfarm for disposal and the release perimeter was marked with pinflags.

On October 23, 2025, Abiodun Adeloje (Emmanuel), BLM, was notified of the release via telephone and a Notice of a Release was submitted with the New Mexico Oil and Gas Conservation Division (NMOCD). Incident number nAPP2529633728 was assigned to the release. All agency notifications are included in Appendix A. A photographic log showing the release area is attached as Log 1.

## Site Characterization

Potential nearby receptors were assessed through the desktop reviews of the United States Geological Survey (USGS) topographic maps, Federal Emergency Management Administration (FEMA) Google Earth Pro (GEP) maps, New Mexico Office of the State Engineer (NMOSE) database, New Mexico Water Rights Reporting System (NMWRRS), aerial photographs, and site-specific observations. Results from the desktop characterization review are presented below and potential site receptors are identified on Figure 3.

According to the New Mexico Office of the State Engineers (NMOSE) reporting system, there are no water wells within 0.5 miles (800 meters) of the Site. The Site is located approximately 1 mile from the closest NMOSE permitted well San Juan (SJ) 01335 point of diversion (POD). The depth to the well is 185 feet below ground surface (bgs) and there is no depth to groundwater recorded.

The closest continuously flowing or significant watercourse to the Site as defined in 19.15.17.7 New Mexico Administrative Code (NMAC) is an unnamed tributary of Blanco Wash located approximately 94 ft south of the Site.

There are no registered private or domestic water sources listed within a half mile of the release area in the New Mexico (NM) Energy, Minerals and Natural Resources Department (EMNRD) imaging database in the same or adjacent Public Land Survey System (PLSS) sections. Additional site considerations showed there are no sinkholes, residences, schools, hospitals, institutions, churches, springs, private domestic water wells, playa lakes, wetlands, incorporated municipal boundaries, subsurface mines, or floodplains located within the distances specified in 19.15.29.12.(4) NMAC.

A review of the United States Department of Agriculture (USDA) Natural Resources

Ancestry Environmental Consulting Services, LLC

Conservation Service (NRCS) Web Survey mapped the soil in the immediate vicinity of the release as Blancot-Notal association. The Blancot unit is described as fan alluvium derived from sandstone and shale with loam from the surface down to 2 inches, sandy clay loam from 2 to 15 inches and clay loam from 15 to 60 inches. The Notal unit is described as stream alluvium derived from sandstone and shale. The published typical soil profile is silt clay loam from the surface down to 3 inches and clay from 3 to 60 inches bgs.

## Closure Criteria for Soils Impacted by a Release

Based on the information discussed in the Site Characterization, there is no available data to estimate a representative depth to groundwater. However, based on the distance to surface water, the most stringent closure criteria must be applied for soil screening levels.

**Benzene 10 mg/kg**  
**BTEX 50 mg/kg**  
**Total TPH (GRO+DRO+ORO) 100 mg/kg**  
**Chloride 600 mg/kg**

Additionally, in accordance with 19.15.29.13.D (1) NMAC and *Procedures for Implementation of the Spill Rule (2019)*, reclamation standards require a minimum of four feet of non-waste containing, uncontaminated, earthen material will be left in place to facilitate reseeding and revegetation after plugging and abandonment activities are completed with the same closure criteria.

## Cultural Resources

Because the release traveled beyond the previously disturbed oil and gas leasing areas and surveyed right-of-ways, an archeological survey was required to be completed prior to any disturbances. On October 27, 2025, the Division of Conservation Archaeology (DCA) in Bloomfield, New Mexico, was contacted to perform a records review and pedestrian archeological survey surrounding the release area. On November 18, 2025, the findings were reported to the BLM, and the area was cleared for remediation activities to commence.

## Remediation Activities

Between December 17, 2025, and February 20, 2026, performed delineation and excavation efforts at the Tank Battery Facility, along the roadway, and into the adjoining field. Field screening for total petroleum hydrocarbons (TPH) using a PetroFlag hydrocarbon analyzer was used to help guide the final horizontal and vertical excavation extents. The field notes and ongoing delineation activities are included in Appendix B, and a Remediation Photographic Log (Log 2) is attached.

Between January 20 and February 20, 2026, AECS collected two hundred and twenty-six soils samples (SC1 to SC-226) from the entire release path with no area representing more than 200 square feet. Soil samples were collected from the walls and base of the excavation at depths ranging from 0 to 10 feet bgs. All soil samples collected for laboratory analysis were

Incident #nAPP2529633728 Closure Report  
Page 3

Ancestry Environmental Consulting Services, LLC

placed into a new, clean, laboratory-supplied container, which was labeled with the location, date, time, and sample ID, and placed on ice. The soil samples were transported under strict chain-of-custody procedures to Envirotech Analytical Laboratory (Envirotech) in Farmington, New Mexico. All laboratory soil samples were submitted for analysis of BTEX per USEPA 8021, TPH (as GRO, DRO, and MRO) per USEPA 8015 and chloride per USEPA 300.0. All laboratory reports are included in Appendix C.

### *January 20 and 21, 2026*

One-hundred seventy-five composite samples (SC-1 through SC-175) were collected at depths ranging from 0 to 9 ft bgs. Laboratory analytical results for SC-1 through SC-175 reported all benzene concentrations below laboratory detection limits of 0.0250 milligrams per kilogram (mg/kg). BTEX concentrations were below laboratory detection limits of 0.150 mg/kg in all samples except SC-10, SC-26, SC-71, SC-98, SC-111, SC-125, SC-130, and SC-158, where concentrations ranged from 0.0298 mg/kg to 0.300 mg/kg. TPH concentrations ranged from below laboratory detection limits of 95.0 mg/kg (SC-8, SC-9, SC-10, SC-11 through SC-15, SC-21, SC-27 through SC-35, SC-38, SC-39, SC-41 through SC-47, SC-49, SC-51, SC-53, SC-55, SC-57, SC-69, SC-74, SC-75, SC-78 through SC-86, SC-98 through SC-110, SC-112 through SC-129, SC-131 through SC-142, SC-144 through SC-153, SC-156 through SC-160, SC-162, SC-163, SC-165, SC-166, SC-198, and SC-170 through SC-174) to 4,960 mg/kg in SC-20. Chloride concentrations ranged from below detection limits of 20.0 mg/kg (SC-3, SC-5, SC-6, SC-8, SC-21, SC-23, SC-24, SC-28, SC-29, SC-32, SC-39, SC-40, SC-52, SC-53, SC-58, SC-69, SC-78, SC-81, SC-83, SC-99 through SC-101, SC-103 through SC-105, SC-107, SC-109 through SC-113, SC-116, SC-122, SC-125, SC-128, SC-129, SC-132, SC-134, SC-135, SC-137, SC-138, SC-141, SC-142, SC-145, SC-146, SC-148 through SC-150, SC-154 through SC-156, SC-158, SC-160, SC-165, SC-166, and SC-171 through SC-174) to 338 mg/kg (SC-37). All sample locations are shown within the Figure 4 Series and laboratory analytical results are presented on Table 1. Based on these analytical results, 43 samples along the release pathway reported TPH concentrations above site specific closure criteria.

### *February 9, 2026*

On February 9, 2026, forty-seven composite samples (SC-176 through SC-222) were collected at depths of 0 to 10 feet bgs. Laboratory results showed SC-176 through SC-188 and SC-190 through SC-222 reported benzene and BTEX concentrations below laboratory detection limits of 0.0250 mg/kg and 0.150 mg/kg, respectively. Composite soil sample SC-189 reported BTEX at 0.0891 mg/kg. Total TPH concentrations were reported below laboratory detection limits of 95.0 mg/kg (SC-176 through SC-180, SC-182, SC-184, SC-187, SC-189, SC-191 through SC-194, SC-196 through SC-205, SC-207, SC-209 through SC-211, SC-213 through SC-215, SC-217, and SC-219 through SC-222) to 424 mg/kg (SC-208). Chloride concentrations ranged from below laboratory detection limits of 20.0 mg/kg (SC-176, SC-179, SC-187, SC-199 through SC-201, SC-210, SC-212, SC-219, and SC-222) to 590 mg/kg (SC-183). All sample locations are shown within the Figure 5 Series, and the laboratory analytical results are presented on Table 2. Four sample areas along the release pathway remained above site specific closure

Incident #nAPP2529633728 Closure Report  
Page 4

AnceLL Environmental Consulting Services, LLC

criteria for TPH.

### *February 20, 2026*

On February 20, 2026, four composite samples (SC-223 through SC-226) were collected. Laboratory results reported benzene, BTEX, and total TPH concentrations below detection limits of 0.0250 mg/kg, 0.150 mg/kg, and 95.0 mg/kg, respectively. Chloride concentrations ranged from below laboratory detection limits of 20.0 mg/kg (SC-223 and SC-226) to 264 mg/kg (SC-225). All sample locations are shown on Figure 6 Series and laboratory analytical results are presented on Table 3.

### **Reclamation Activities**

The impacted surface areas have been restored to the condition that existed prior to the release. All affected roadways were backfilled, compacted, regraded, and restored to the original condition. All excavation areas were backfilled with clean soil void of weeds from an approved facility and the laboratory report for the backfill material is included in Appendix C. All areas were restored to the existing grade, compacted and stabilized with material suitable to establish vegetation. Reseeding with BLM Sagebrush seed mix and final stabilization of the disturbed areas will take place during the next favorable growing season (Table 4). A Reclamation Photolog (Log 3) is attached.

### **Discussion and Closure Request**

All work was performed in accordance with 19.15.29 NMAC where all final composite soil samples were below the most stringent NMOCD Table I closure criteria for soils impacted by a release and represented no more than 200 square feet. The final excavation extent covered 28,204 square feet. Approximately 4,070 cubic yards of impacted soil were removed from the Site and taken to the Envirotech Landfarm for disposal. Epic Energy believes this Closure Report is protective of human health, the environment, and groundwater and respectfully requests closure of Incident #nAPP2529633728 at the South Blanco Federal 25-9 Tank Battery.

If you have any questions, please contact AECS at (970) 749-0124.

Sincerely,

*Emilee Skyles*

**Table 4. BLM Sagebrush/grass community menu-based seed mix for use in reclamation (minimum requirement) \*\***

Common Name.	Scientific Names	Variety	Season	Form	PLS lbs./acre*
Plant two of the following:					
Fourwing saltbush	<i>Atriplex canescens</i>	VNS	Cool	Shrub	2.0
Antelope bitterbrush	<i>Purshia tridentata</i>	VNS	Cool	Shrub	2.0
Winterfat	<i>Krascheninnikovia lanata</i>	VNS	Cool	Shrub	2.0
and three of the following:					
Indian ricegrass	<i>Achnatherum hymenoides</i>	Paloma or Rimrock	Cool	Bunch	4.0
Blue grama	<i>Bouteloua gracilis</i>	Alma or Hachita	Warm	Sod- Forming	2.0
Galleta	<i>Pleuraphis jamesii</i>	Viva florets	Warm	Bunch/Sod - forming	3.0
Sand dropseed	<i>Sporobolus cryptandrus</i>	VNS	Warm	Bunch	0.5
Western wheatgrass	<i>Pascopyrum smithii</i>	Arriba	Cool	Sod-forming	4.0
and one of the following:					
Bottle brush squirreltail	<i>Elymus elymoides</i>	Tusas or VNS	Cool	Bunch	3.0
Siberian wheatgrass	<i>Agropyron fragile</i>	Vavilov	Cool	Bunch	3.0
and two of the following					
Small burnet	<i>Sanguisorba minor</i>	Delar	Cool	Forb	2.0
Rocky Mtn. bee	<i>Cleome serrulata</i>	Local collection or VNS	Cool	Forb	0.25
Blue flax	<i>Linum lewisii</i>	Apar	Cool	Forb	0.25

\*\*Based on 60 pure live seeds (PLS) per square foot, drill seeded. Double this rate (120 PLS per square foot) if broadcast or hydroseeded.

QUESTIONS

Action 519249

**QUESTIONS**

Operator: EPIC ENERGY, L.L.C. 332 Road 3100 Aztec, NM 87410	OGRID: 372834
	Action Number: 519249
	Action Type: [NOTIFY] Notification Of Release (NOR)

**QUESTIONS**

<b>Location of Release Source</b>	
<i>Please answer all the questions in this group.</i>	
Site Name	South Blanco Federal 25 #8,9,10 TB
Date Release Discovered	10/22/2025
Surface Owner	Federal

<b>Incident Details</b>	
<i>Please answer all the questions in this group.</i>	
Incident Type	Oil Release
Did this release result in a fire or is the result of a fire	No
Did this release result in any injuries	No
Has this release reached or does it have a reasonable probability of reaching a watercourse	No
Has this release endangered or does it have a reasonable probability of endangering public health	No
Has this release substantially damaged or will it substantially damage property or the environment	Yes
Is this release of a volume that is or may with reasonable probability be detrimental to fresh water	No

<b>Nature and Volume of Release</b>	
<i>Material(s) released, please answer all that apply below. Any calculations or specific justifications for the volumes provided should be attached to the follow-up C-141 submission.</i>	
Crude Oil Released (bbls) Details	Cause: Overflow - Tank, Pit, Etc.   Production Tank   Crude Oil   Released: 117 BBL   Recovered: 40 BBL   Lost: 77 BBL.
Produced Water Released (bbls) Details	Not answered.
Is the concentration of chloride in the produced water >10,000 mg/l	Not answered.
Condensate Released (bbls) Details	Not answered.
Natural Gas Vented (Mcf) Details	Not answered.
Natural Gas Flared (Mcf) Details	Not answered.
Other Released Details	Not answered.
Are there additional details for the questions above (i.e. any answer containing Other, Specify, Unknown, and/or Fire, or any negative lost amounts)	The cause of the release is a direct result of the nearby Enduring Resources well stimulation that extended beyond their notification period with no updates provided to the operator.

QUESTIONS, Page 2

Action 519249

**QUESTIONS (continued)**

Operator: EPIC ENERGY, L.L.C. 332 Road 3100 Aztec, NM 87410	OGRID: 372834
	Action Number: 519249
	Action Type: [NOTIFY] Notification Of Release (NOR)

**QUESTIONS**

<b>Nature and Volume of Release (continued)</b>	
Is this a gas only submission (i.e. only significant Mcf values reported)	<b>No, according to supplied volumes this does not appear to be a "gas only" report.</b>
Was this a major release as defined by Subsection A of 19.15.29.7 NMAC	<b>Yes</b>
Reasons why this would be considered a submission for a notification of a major release	<b>From paragraph A. "Major release" determine using: (1) an unauthorized release of a volume, excluding gases, of 25 barrels or more; (2) an unauthorized release of a volume that: (d) substantially damages property or the environment.</b>
<i>With the implementation of the 19.15.27 NMAC (05/25/2021), venting and/or flaring of natural gas (i.e. gas only) are to be submitted on the C-129 form.</i>	

**Initial Response**

*The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury.*

The source of the release has been stopped	True
The impacted area has been secured to protect human health and the environment	True
Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices	True
All free liquids and recoverable materials have been removed and managed appropriately	True
If all the actions described above have not been undertaken, explain why	Not answered.

*Per Paragraph 4 of Subsection B of 19.15.29.8 NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please prepare and attach a narrative of actions to date in the follow-up C-141 submission. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see 19.15.29.11(A)(5)(a) NMAC), please prepare and attach all information needed for closure evaluation in the follow-up C-141 submission.*

**Subject:** [EXTERNAL] South Blanco Federal 25-9 Tank Battery release

**This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.**

Good morning,

Hopefully the return to work is treating you well!

We surveyed the release area plus the 100 ft buffer zone for the South Blanco Federal 25-9 Tank Battery release. The project is being conducted for Ansell Environmental for Epic Energy.

Kim replied to my records search request for the project on 10/29/25 with no concerns.

There were no cultural resources identified during the survey nor any prior identified sites in the project area. We will submit the report as soon as possible.

If it is possible to give Ansell/Epic permission to begin the remediation from the release now that would be appreciated.

Thank you,  
Sarah

IN-HOUSE ARCHEOLOGICAL SURVEY DETERMINATION  
FARMINGTON FIELD OFFICE

NM-210-2026-002

Case No./Name: South Blanco Federal 25 #9  
Company: Epic Energy, LLC  
Type of Case: Soil Remediation

Date Submitted: November 7, 2025

**IS A CULTURAL RESOURCE INVENTORY REQUIRED?**

- Proposal involves non-Federal lands.
- Proposal is within an existing right-of-way.
- Proposal is along an existing road.
- Proposal is within an existing disturbed area.
- The well pad is to be expanded \_\_\_\_\_ feet to the \_\_\_\_\_.
- Other: Epic Energy LLC has proposed to remediate the release that occurred at their South Blanco Federal 25 #9 by digging and hauling. The contaminated soil removed would be transported to a private land farm, and clean soil void of noxious weeds would be used to backfill the excavated areas. The impact of the release extended beyond the existing disturbed areas as shown on the map approximately 335 feet off the access road. The Release also came from the existing pipeline on allotted land. However, the release remained on the existing disturbance. Please see the attached base map.  
Project Location: T24N R8W Sec 25

Submitted by: Abiodun Adeloje (NRS)

**CULTURAL RESOURCE SPECIALIST RECOMMENDATIONS**

- Inventory for cultural resources **is** required.
- Inventory for cultural resources **is not** required for the reason(s) indicated below.
  - Previous natural ground disturbance has modified the surface so extensively that the likelihood of finding cultural properties is negligible (e.g., within a floodplain), or
  - Human activity has created a new land surface to such an extent as to eradicate traces of cultural properties, or
  - Existing Class II or equivalent inventory or environmental data are sufficient to indicate that there is no likelihood of finding a National Register or eligible property, or
  - Inventory at the Class III level of intensity has previously been performed and records adequately documenting the location, methods, and results of the inventory are available in report no. NMCRIS 85538 and 134806, or
  - Natural environmental characteristics are unfavorable to the presence of cultural properties (such as recent landslide or rock falls), or
  - The nature of the proposed action is such that no impact can be expected on significant cultural resources (e.g. land use will not require any surface disturbing action, e.g., aerial spraying, hand application of chemicals, travel on existing roads, etc.), or
  - Other:

Recommended by: Kim Adams  
Archaeologist

Date: 11/14/2025

Cultural Notes (if any, e.g., conditions, stipulations, etc.):

**Conditions of Approval for Soil Removal Requests  
Occurring on the Well Pad and off pad Surfaces**

Operator: Epic Energy, LLC  
Well/Facility Name: South Blanco Federal 25 #9  
Legal Description: T24N, R8W Sec 25

Disclaimers: BLM's approval of this remediation plan does not relieve the lessee an operator from obtaining any other authorizations that may be required by other jurisdictional entities. These COA's may reiterate COAs attached to original permit though they do not negate any COA's attached to the original permit.

1. Epic Energy, LLC will notify the BLM at least 24 hours prior to any confirmation of soil or air sampling event. Contact Abiodun (Emmanuel) Adeloje at [aadeloje@blm.gov](mailto:aadeloje@blm.gov) or 505-564-7665 (office) or 505 635-0984 (cell)
2. The Soil Removal activity is approved for any soil removal occurring on the existing and off pad activities. If during the excavation, the contamination appears to impact the areas not cleared for the cultural and T&E, the activities will be required to stop immediately, and the operator will notify the BLM/ BLM cultural and T&E resources staffs of the soil removal location and request protocol for conducting further soil removal outside of the existing approved areas. A new request shall be submitted via Sundry (form 3160-005).
3. The backfill materials for the excavated area must be obtained from an approved landfarm, void of noxious weeds.
4. Construction, construction maintenance or any other activity outside the approved areas will require additional approval and may require a new cultural survey and clearance.
5. Employee Education: All employees of the project, including the Project Sponsor and its contractors and sub-contractors will be informed that cultural sites are to be avoided by all personnel, personal vehicles, and company equipment. They will also be notified that it is illegal to collect, damage, or disturb cultural resources, and that such activities are punishable by criminal and or administrative penalties under the provisions of the Archaeological Resources Protection Act (16 U.S.C. 470aa-mm) when on federal land and the New Mexico Cultural Properties Act NMSA 1978 when on state land.
6. Discovery of Cultural Resources during Monitoring: If monitoring confirms the presence of previously unidentified historic or prehistoric cultural resources, then work in the vicinity of the discovery will be suspended and the monitor will promptly report the discovery to the BLM Field Manager. BLM will then specify what action is to be taken. If there is an approved "discovery plan" in place for the project, then the plan will be executed. In the absence of an approved plan, the BLM will evaluate the significance of the discovery in accordance with 36 CFR Section 800.13, in consultation with the appropriate State or Tribal Historic Preservation Officer(s) and Indian tribe(s) that might attach religious and cultural significance to the affected property, or in

accordance with an approved program alternative. Minor recordation, stabilization, or data recovery may be performed by BLM or a third party acting on its behalf, such as a permitted cultural resources consultant. If warranted, more extensive archaeological or alternative mitigation, likely implemented by a permitted cultural resources consultant, may be required of the operator/holder prior to allowing the project to proceed. Further damage to significant cultural resources will not be allowed until any mitigations determined appropriate through the agency's Section 106 consultation are completed.

7. **Discovery of Cultural Resources in the Absence of Monitoring:** If, in its operations, operator/holder discovers any previously unidentified historic or prehistoric cultural resources, then work in the vicinity of the discovery the operator will suspend work, and the discovery will be promptly reported to BLM Field Manager. The same procedures to remedy the discovery in above section will be adhered to. Failure to notify the BLM about a discovery may result in civil or criminal penalties in accordance with the Archeological Resources Protection Act (ARPA) of 1979, as amended, the Native American Graves Protection and Repatriation Act (NAGPRA) of 1990, as amended, and other applicable laws.
8. **Damage to Sites:** If, in its operations, operator/holder damages, or is found to have damaged any previously documented or undocumented historic or prehistoric cultural resources, excluding "discoveries" as noted above, the operator/holder agrees at his/her expense to have a permitted cultural resources consultant prepare a BLM approved damage assessment and/or data recovery plan. The operator/holder agrees at his/her expense to implement a mitigation that the agency finds appropriate given the significance of the site, which the agency determines in consultation with the appropriate State or Tribal Historic Preservation Officer(s) and Indian tribe(s) that might attach religious and cultural significance to the affected property. This mitigation may entail execution of the data recovery plan by a permitted cultural resources consultant and/or alternative mitigations. Damage to cultural resources may result in civil or criminal penalties in accordance with the Archeological Resources Protection Act (ARPA) of 1979, as amended, the Native American Graves Protection and Repatriation Act (NAGRPA) of 1990, as amended, and other applicable laws.

Signature of Initiating Official & Title

11/07/2025  
Date

This proposal and relative data have been analyzed concerning the following species: SSS and habitat

The analysis indicates that there would be a  No-  May- affect situation as a result of approving this described proposed action and Formal Consultation  is  is not necessary.

This proposal is a  minor construction  major construction.

Method of Analysis:  Field Examination  Data bank/GIS  Other (explain)

COMMENTS The Proposed remediation would not impact any BLM sensitive animal spp due to lack of suitable habitat

Good afternoon,

On behalf of Epic Energy, we would like to request an extension for the Remediation Closure Report for the South Blanco Federal 25-9 Tank Battery Release (Incident #nAPP2529633728), due January 20, 2026. The start of activities were delayed due to the required archaeological surveys.

Confirmation soil sampling is scheduled for January 19 to 21, 2026. An estimated 168 samples will be collected from an area that covers approximately 32,890 square feet. The release was split into three areas (facility, road, and field) that have varying depths and widths. The scheduled sampling events represent two of the three areas (facility and field) with the final area soon to follow. At present, 760 cubic yards of soil have been removed from the impacted area, and 760 cubic yards of clean soil are being stockpiled and stored onsite for backfilling purposes.

It is our understanding that because the site is within 300 feet of a mapped blue line, that the Site is not eligible for a variance request to increase the representative sampling size.

If you require any additional information, please don't hesitate to reach out. Thank you for your time and consideration of this request.

Thank You,

Shawna Martinez

Brian Skyles,

Thank you for choosing Envirotech, Inc. as your analytical testing laboratory for the sample(s) received on, 12/31/2025 2:00:00PM, under the Project Name: South Blanco Tank Battery 25-9.

The analytical test results summarized in this report with the Project Name: South Blanco Tank Battery 25-9 apply to the individual samples collected, identified and submitted bearing the project name on the enclosed chain-of-custody. Subcontracted sample analyses not conducted by Envirotech, Inc., are attached in full as issued by the subcontract laboratory.

Please review the Chain-of-Custody (COC) and Sample Receipt Checklist (SRC) for any issues regarding sample receipt temperature, containers, preservation etc. To best understand your test results, review the entire report summarizing your sample data and the associated quality control batch data.

All reported data in this analytical report were analyzed according to the referenced method(s) and are in compliance with the latest NELAC/TNI standards, unless otherwise noted. Samples or analytical quality control parameters not meeting specific QC criteria are qualified with a data flag. Data flag definitions are located in the Notes and Definitions section of this analytical report.

If you have any questions concerning this report, please feel free to contact Envirotech, Inc.

Respectfully,

**Walter Hinchman**

QC Summary Report Comment:

Calculations are based off of the raw (non-rounded) data. However, for reporting purposes all QC data is rounded to three significant figures. Therefore, hand calculated values may differ slightly.

### Definitions and Notes

Epic Energy 7415 Main Street Farmington NM, 87402	Project Name: South Blanco Tank Battery 25-9 Project Number: 18012-0006 Project Manager: Brian Skyles	<b>Reported:</b> 01/07/26 12:56
---	---	------------------------------------

ND Analyte NOT DETECTED at or above the reporting limit

NR Not Reported

RPD Relative Percent Difference

DNI Did Not Ignite

DNR Did not react with the addition of acid or base.

Note (1): Methods marked with \*\* are non-accredited methods.

Note (2): Soil data is reported on an "as received" weight basis, unless reported otherwise.

Sample Receipt Checklist (SRC)

Instructions: Please take note of any NO checkmarks.

If we receive no response concerning these items within 24 hours of the date of this notice, all the samples will be analyzed as requested.

Client: Epic Energy Date Received: 12/31/25 14:00 Work Order ID: E601004
Phone: 970-946-1123 Date Logged In: 01/05/26 10:17 Logged In By: Caitlin Mars
Email: bskylesenviro@outlook.com Due Date: 01/06/26 17:00 (2 day TAT)

Chain of Custody (COC)

- 1. Does the sample ID match the COC? Yes
2. Does the number of samples per sampling site location match the COC? Yes
3. Were samples dropped off by client or carrier? Yes
4. Was the COC complete, i.e., signatures, dates/times, requested analyses? Yes
5. Were all samples received within holding time? Yes

Carrier: Brian Skyles

Note: Analysis, such as pH which should be conducted in the field, i.e, 15 minute hold time, are not included in this discussion.

Sample Turn Around Time (TAT)

- 6. Did the COC indicate standard TAT, or Expedited TAT? Yes

Sample Cooler

- 7. Was a sample cooler received? Yes
8. If yes, was cooler received in good condition? Yes
9. Was the sample(s) received intact, i.e., not broken? Yes
10. Were custody/security seals present? No
11. If yes, were custody/security seals intact? NA
12. Was the sample received on ice? Yes

Note: Thermal preservation is not required, if samples are received within 15 minutes of sampling

- 13. See COC for individual sample temps. Samples outside of 0°C-6°C will be recorded in comments.

Sample Container

- 14. Are aqueous VOC samples present? No
15. Are VOC samples collected in VOA Vials? NA
16. Is the head space less than 6-8 mm (pea sized or less)? NA
17. Was a trip blank (TB) included for VOC analyses? NA
18. Are non-VOC samples collected in the correct containers? Yes
19. Is the appropriate volume/weight or number of sample containers collected? Yes

Field Label

- 20. Were field sample labels filled out with the minimum information:
Sample ID? Yes
Date/Time Collected? Yes
Collectors name? Yes

Sample Preservation

- 21. Does the COC or field labels indicate the samples were preserved? No
22. Are sample(s) correctly preserved? NA
24. Is lab filtration required and/or requested for dissolved metals? No

Multiphase Sample Matrix

- 26. Does the sample have more than one phase, i.e., multiphase? No
27. If yes, does the COC specify which phase(s) is to be analyzed? NA

Subcontract Laboratory

- 28. Are samples required to get sent to a subcontract laboratory? No
29. Was a subcontract laboratory specified by the client and if so who? NA Subcontract Lab: NA

Brian Skyles,

Thank you for choosing Envirotech, Inc. as your analytical testing laboratory for the sample(s) received on, 1/20/2026 4:27:00PM, under the Project Name: South Blanco Federal 25-9.

The analytical test results summarized in this report with the Project Name: South Blanco Federal 25-9 apply to the individual samples collected, identified and submitted bearing the project name on the enclosed chain-of-custody. Subcontracted sample analyses not conducted by Envirotech, Inc., are attached in full as issued by the subcontract laboratory.

Please review the Chain-of-Custody (COC) and Sample Receipt Checklist (SRC) for any issues regarding sample receipt temperature, containers, preservation etc. To best understand your test results, review the entire report summarizing your sample data and the associated quality control batch data.

All reported data in this analytical report were analyzed according to the referenced method(s) and are in compliance with the latest NELAC/TNI standards, unless otherwise noted. Samples or analytical quality control parameters not meeting specific QC criteria are qualified with a data flag. Data flag definitions are located in the Notes and Definitions section of this analytical report.

If you have any questions concerning this report, please feel free to contact Envirotech, Inc.

Respectfully,

QC Summary Report Comment:

Calculations are based off of the raw (non-rounded) data. However, for reporting purposes all QC data is rounded to three significant figures. Therefore, hand calculated values may differ slightly.

### Definitions and Notes

Epic Energy 7415 Main Street Farmington NM, 87402	Project Name: South Blanco Federal 25-9 Project Number: 18012-0006 Project Manager: Brian Skyles	<b>Reported:</b> 01/29/26 17:30
---	--	------------------------------------

ND Analyte NOT DETECTED at or above the reporting limit

NR Not Reported

RPD Relative Percent Difference

DNI Did Not Ignite

DNR Did not react with the addition of acid or base.

Note (1): Methods marked with \*\* are non-accredited methods.

Note (2): Soil data is reported on an "as received" weight basis, unless reported otherwise.

Envirotech Analytical Laboratory

Printed: 1/21/2026 9:20:10AM

Sample Receipt Checklist (SRC)

Instructions: Please take note of any NO checkmarks.

If we receive no response concerning these items within 24 hours of the date of this notice, all the samples will be analyzed as requested.

Client: Epic Energy Date Received: 01/20/26 16:27 Work Order ID: E601189
Phone: 970-946-1123 Date Logged In: 01/21/26 09:04 Logged In By: Noe Soto
Email: bskylesenviro@outlook.com Due Date: 01/27/26 17:00 (5 day TAT)

Chain of Custody (COC)

- 1. Does the sample ID match the COC? Yes
2. Does the number of samples per sampling site location match the COC? Yes
3. Were samples dropped off by client or carrier? Yes
4. Was the COC complete, i.e., signatures, dates/times, requested analyses? Yes
5. Were all samples received within holding time? Yes

Carrier: Brian Skyles

Note: Analysis, such as pH which should be conducted in the field, i.e, 15 minute hold time, are not included in this discussion.

Sample Turn Around Time (TAT)

- 6. Did the COC indicate standard TAT, or Expedited TAT? Yes

Sample Cooler

- 7. Was a sample cooler received? Yes
8. If yes, was cooler received in good condition? Yes
9. Was the sample(s) received intact, i.e., not broken? Yes
10. Were custody/security seals present? No
11. If yes, were custody/security seals intact? NA
12. Was the sample received on ice? Yes

Note: Thermal preservation is not required, if samples are received within 15 minutes of sampling

- 13. See COC for individual sample temps. Samples outside of 0°C-6°C will be recorded in comments.

Sample Container

- 14. Are aqueous VOC samples present? No
15. Are VOC samples collected in VOA Vials? NA
16. Is the head space less than 6-8 mm (pea sized or less)? NA
17. Was a trip blank (TB) included for VOC analyses? NA
18. Are non-VOC samples collected in the correct containers? Yes
19. Is the appropriate volume/weight or number of sample containers collected? Yes

Field Label

- 20. Were field sample labels filled out with the minimum information:
Sample ID? Yes
Date/Time Collected? Yes
Collectors name? No

Sample Preservation

- 21. Does the COC or field labels indicate the samples were preserved? No
22. Are sample(s) correctly preserved? NA
24. Is lab filtration required and/or requested for dissolved metals? No

Multiphase Sample Matrix

- 26. Does the sample have more than one phase, i.e., multiphase? No
27. If yes, does the COC specify which phase(s) is to be analyzed? NA

Subcontract Laboratory

- 28. Are samples required to get sent to a subcontract laboratory? No
29. Was a subcontract laboratory specified by the client and if so who? NA Subcontract Lab: NA

## Analytical Report

### Epic Energy

Project Name: SBF 25-9 Tank Battery Release

Work Order: E601210

Job Number: 18012-0006

Received: 1/22/2026

Revision: 1

Report Reviewed By:

Workorder: E601210  
Date Received: 1/22/2026 9:00:00AM

Brian Skyles,

Thank you for choosing Envirotech, Inc. as your analytical testing laboratory for the sample(s) received on, 1/22/2026 9:00:00AM, under the Project Name: SBF 25-9 Tank Battery Release.

The analytical test results summarized in this report with the Project Name: SBF 25-9 Tank Battery Release apply to the individual samples collected, identified and submitted bearing the project name on the enclosed chain-of-custody. Subcontracted sample analyses not conducted by Envirotech, Inc., are attached in full as issued by the subcontract laboratory.

Please review the Chain-of-Custody (COC) and Sample Receipt Checklist (SRC) for any issues regarding sample receipt temperature, containers, preservation etc. To best understand your test results, review the entire report summarizing your sample data and the associated quality control batch data.

All reported data in this analytical report were analyzed according to the referenced method(s) and are in compliance with the latest NELAC/TNI standards, unless otherwise noted. Samples or analytical quality control parameters not meeting specific QC criteria are qualified with a data flag. Data flag definitions are located in the Notes and Definitions section of this analytical report.

If you have any questions concerning this report, please feel free to contact Envirotech, Inc.

Respectfully,

**Walter Hinchman**

QC Summary Report Comment:

Calculations are based off of the raw (non-rounded) data. However, for reporting purposes all QC data is rounded to three significant figures. Therefore, hand calculated values may differ slightly.

### Definitions and Notes

Epic Energy 7415 Main Street Farmington NM, 87402	Project Name: SBF 25-9 Tank Battery Release Project Number: 18012-0006 Project Manager: Brian Skyles	<b>Reported:</b> 01/29/26 14:38
---	--	------------------------------------

- M2 Matrix spike recovery was outside quality control limits. The associated LCS spike recovery was acceptable.
- M3 Matrix spike recovery was outside quality control limits due to matrix interference. The associated LCS spike recovery was acceptable.
- M6 Matrix spike recovery has a high bias. The native sample results were below the RL, but appears to have contributed to high MS recoveries.
- ND Analyte NOT DETECTED at or above the reporting limit
- NR Not Reported
- RPD Relative Percent Difference
- DNI Did Not Ignite
- DNR Did not react with the addition of acid or base.

Note (1): Methods marked with \*\* are non-accredited methods.

Note (2): Soil data is reported on an "as received" weight basis, unless reported otherwise.

Envirotech Analytical Laboratory

Printed: 1/22/2026 1:48:29PM

Sample Receipt Checklist (SRC)

Instructions: Please take note of any NO checkmarks.

If we receive no response concerning these items within 24 hours of the date of this notice, all the samples will be analyzed as requested.

Client: Epic Energy	Date Received: 01/22/26 09:00	Work Order ID: E601210
Phone: 970-946-1123	Date Logged In: 01/22/26 13:23	Logged In By: Noe Soto
Email: bskylesenviro@outlook.com	Due Date: 01/29/26 17:00 (5 day TAT)	

**Chain of Custody (COC)**

- 1. Does the sample ID match the COC? Yes
- 2. Does the number of samples per sampling site location match the COC? Yes
- 3. Were samples dropped off by client or carrier? Yes
- 4. Was the COC complete, i.e., signatures, dates/times, requested analyses? Yes
- 5. Were all samples received within holding time? Yes

Carrier: Brian Skyles

Note: Analysis, such as pH which should be conducted in the field, i.e, 15 minute hold time, are not included in this discussion.

**Comments/Resolution**

Project SBF 25-9 Tank Battery Release has been separated into 2 work orders due to sample volume. Work orders are E601210 and E601211.

**Sample Turn Around Time (TAT)**

- 6. Did the COC indicate standard TAT, or Expedited TAT? Yes

**Sample Cooler**

- 7. Was a sample cooler received? Yes
- 8. If yes, was cooler received in good condition? Yes
- 9. Was the sample(s) received intact, i.e., not broken? Yes
- 10. Were custody/security seals present? No
- 11. If yes, were custody/security seals intact? NA
- 12. Was the sample received on ice? Yes

Note: Thermal preservation is not required, if samples are received within 15 minutes of sampling

- 13. See COC for individual sample temps. Samples outside of 0°C-6°C will be recorded in comments.

**Sample Container**

- 14. Are aqueous VOC samples present? No
- 15. Are VOC samples collected in VOA Vials? NA
- 16. Is the head space less than 6-8 mm (pea sized or less)? NA
- 17. Was a trip blank (TB) included for VOC analyses? NA
- 18. Are non-VOC samples collected in the correct containers? Yes
- 19. Is the appropriate volume/weight or number of sample containers collected? Yes

**Field Label**

- 20. Were field sample labels filled out with the minimum information:
  - Sample ID? Yes
  - Date/Time Collected? Yes
  - Collectors name? No

**Sample Preservation**

- 21. Does the COC or field labels indicate the samples were preserved? No
- 22. Are sample(s) correctly preserved? NA
- 24. Is lab filtration required and/or requested for dissolved metals? No

**Multiphase Sample Matrix**

- 26. Does the sample have more than one phase, i.e., multiphase? No
- 27. If yes, does the COC specify which phase(s) is to be analyzed? NA

**Subcontract Laboratory**

- 28. Are samples required to get sent to a subcontract laboratory? No
- 29. Was a subcontract laboratory specified by the client and if so who? NA Subcontract Lab: NA

**Client Instruction**

Signature of client authorizing changes to the COC or sample disposition.

Workorder: E601211  
Date Received: 1/22/2026 9:00:00AM

Brian Skyles,

Thank you for choosing Envirotech, Inc. as your analytical testing laboratory for the sample(s) received on, 1/22/2026 9:00:00AM, under the Project Name: SBF 25-9 Tank Battery Release.

The analytical test results summarized in this report with the Project Name: SBF 25-9 Tank Battery Release apply to the individual samples collected, identified and submitted bearing the project name on the enclosed chain-of-custody. Subcontracted sample analyses not conducted by Envirotech, Inc., are attached in full as issued by the subcontract laboratory.

Please review the Chain-of-Custody (COC) and Sample Receipt Checklist (SRC) for any issues regarding sample receipt temperature, containers, preservation etc. To best understand your test results, review the entire report summarizing your sample data and the associated quality control batch data.

All reported data in this analytical report were analyzed according to the referenced method(s) and are in compliance with the latest NELAC/TNI standards, unless otherwise noted. Samples or analytical quality control parameters not meeting specific QC criteria are qualified with a data flag. Data flag definitions are located in the Notes and Definitions section of this analytical report.

If you have any questions concerning this report, please feel free to contact Envirotech, Inc.

Respectfully,

**Walter Hinchman**

QC Summary Report Comment:

Calculations are based off of the raw (non-rounded) data. However, for reporting purposes all QC data is rounded to three significant figures. Therefore, hand calculated values may differ slightly.

## Definitions and Notes

Epic Energy 7415 Main Street Farmington NM, 87402	Project Name: SBF 25-9 Tank Battery Release Project Number: 18012-0006 Project Manager: Brian Skyles	<b>Reported:</b> 01/30/26 13:36
---	--	------------------------------------

ND Analyte NOT DETECTED at or above the reporting limit

NR Not Reported

RPD Relative Percent Difference

DNI Did Not Ignite

DNR Did not react with the addition of acid or base.

Note (1): Methods marked with \*\* are non-accredited methods.

Note (2): Soil data is reported on an "as received" weight basis, unless reported otherwise.

Released to Imaging: 5/28/2026 1:50:19 PM

Sample Receipt Checklist (SRC)

Instructions: Please take note of any NO checkmarks.

If we receive no response concerning these items within 24 hours of the date of this notice, all the samples will be analyzed as requested.

Client: Epic Energy Date Received: 01/22/26 09:00 Work Order ID: E601211
Phone: 970-946-1123 Date Logged In: 01/22/26 13:24 Logged In By: Noe Soto
Email: bskylesenviro@outlook.com Due Date: 01/29/26 17:00 (5 day TAT)

Chain of Custody (COC)

- 1. Does the sample ID match the COC? Yes
2. Does the number of samples per sampling site location match the COC? Yes
3. Were samples dropped off by client or carrier? Yes
4. Was the COC complete, i.e., signatures, dates/times, requested analyses? Yes
5. Were all samples received within holding time? Yes

Carrier: Brian Skyles

Note: Analysis, such as pH which should be conducted in the field, i.e, 15 minute hold time, are not included in this discussion.

Sample Turn Around Time (TAT)

- 6. Did the COC indicate standard TAT, or Expedited TAT? Yes

Sample Cooler

- 7. Was a sample cooler received? Yes
8. If yes, was cooler received in good condition? Yes
9. Was the sample(s) received intact, i.e., not broken? Yes
10. Were custody/security seals present? No
11. If yes, were custody/security seals intact? NA
12. Was the sample received on ice? Yes

Note: Thermal preservation is not required, if samples are received within 15 minutes of sampling

- 13. See COC for individual sample temps. Samples outside of 0°C-6°C will be recorded in comments.

Sample Container

- 14. Are aqueous VOC samples present? No
15. Are VOC samples collected in VOA Vials? NA
16. Is the head space less than 6-8 mm (pea sized or less)? NA
17. Was a trip blank (TB) included for VOC analyses? NA
18. Are non-VOC samples collected in the correct containers? Yes
19. Is the appropriate volume/weight or number of sample containers collected? Yes

Field Label

- 20. Were field sample labels filled out with the minimum information:
Sample ID? Yes
Date/Time Collected? Yes
Collectors name? No

Sample Preservation

- 21. Does the COC or field labels indicate the samples were preserved? No
22. Are sample(s) correctly preserved? NA
24. Is lab filtration required and/or requested for dissolved metals? No

Multiphase Sample Matrix

- 26. Does the sample have more than one phase, i.e., multiphase? No
27. If yes, does the COC specify which phase(s) is to be analyzed? NA

Subcontract Laboratory

- 28. Are samples required to get sent to a subcontract laboratory? No
29. Was a subcontract laboratory specified by the client and if so who? NA Subcontract Lab: NA

Client Instruction

Empty box for client instruction.

Comments/Resolution

Project SBF 25-9 Tank Battery Release has been separated into 2 work orders due to sample volume. Work orders are E601210 and E601211.

Signature of client authorizing changes to the COC or sample disposition.

Workorder: E602107  
Date Received: 2/9/2026 12:44:00PM

Brian Skyles,

Thank you for choosing Envirotech, Inc. as your analytical testing laboratory for the sample(s) received on, 2/9/2026 12:44:00PM, under the Project Name: SBF 25-9 Tank Battery.

The analytical test results summarized in this report with the Project Name: SBF 25-9 Tank Battery apply to the individual samples collected, identified and submitted bearing the project name on the enclosed chain-of-custody. Subcontracted sample analyses not conducted by Envirotech, Inc., are attached in full as issued by the subcontract laboratory.

Please review the Chain-of-Custody (COC) and Sample Receipt Checklist (SRC) for any issues regarding sample receipt temperature, containers, preservation etc. To best understand your test results, review the entire report summarizing your sample data and the associated quality control batch data.

All reported data in this analytical report were analyzed according to the referenced method(s) and are in compliance with the latest NELAC/TNI standards, unless otherwise noted. Samples or analytical quality control parameters not meeting specific QC criteria are qualified with a data flag. Data flag definitions are located in the Notes and Definitions section of this analytical report.

If you have any questions concerning this report, please feel free to contact Envirotech, Inc.

Respectfully,

QC Summary Report Comment:

Calculations are based off of the raw (non-rounded) data. However, for reporting purposes all QC data is rounded to three significant figures. Therefore, hand calculated values may differ slightly.

### Definitions and Notes

Epic Energy 7415 Main Street Farmington NM, 87402	Project Name: SBF 25-9 Tank Battery Project Number: 18012-0006 Project Manager: Brian Skyles	<b>Reported:</b> 02/16/26 15:20
---	--	------------------------------------

ND Analyte NOT DETECTED at or above the reporting limit

NR Not Reported

RPD Relative Percent Difference

DNI Did Not Ignite

DNR Did not react with the addition of acid or base.

Note (1): Methods marked with \*\* are non-accredited methods.

Note (2): Soil data is reported on an "as received" weight basis, unless reported otherwise.

Sample Receipt Checklist (SRC)

Instructions: Please take note of any NO checkmarks.

If we receive no response concerning these items within 24 hours of the date of this notice, all the samples will be analyzed as requested.

Client: Epic Energy Date Received: 02/09/26 12:44 Work Order ID: E602107
Phone: 970-946-1123 Date Logged In: 02/09/26 13:30 Logged In By: Caitlin Mars
Email: bskylesenviro@outlook.com Due Date: 02/16/26 17:00 (5 day TAT)

Chain of Custody (COC)

- 1. Does the sample ID match the COC? Yes
2. Does the number of samples per sampling site location match the COC? Yes
3. Were samples dropped off by client or carrier? Yes
4. Was the COC complete, i.e., signatures, dates/times, requested analyses? Yes
5. Were all samples received within holding time? Yes

Carrier: Brian Skyles

Note: Analysis, such as pH which should be conducted in the field, i.e, 15 minute hold time, are not included in this discussion.

Sample Turn Around Time (TAT)

- 6. Did the COC indicate standard TAT, or Expedited TAT? Yes

Sample Cooler

- 7. Was a sample cooler received? Yes
8. If yes, was cooler received in good condition? Yes
9. Was the sample(s) received intact, i.e., not broken? Yes
10. Were custody/security seals present? No
11. If yes, were custody/security seals intact? NA
12. Was the sample received on ice? Yes

Note: Thermal preservation is not required, if samples are received within 15 minutes of sampling

- 13. See COC for individual sample temps. Samples outside of 0°C-6°C will be recorded in comments.

Sample Container

- 14. Are aqueous VOC samples present? No
15. Are VOC samples collected in VOA Vials? NA
16. Is the head space less than 6-8 mm (pea sized or less)? NA
17. Was a trip blank (TB) included for VOC analyses? NA
18. Are non-VOC samples collected in the correct containers? Yes
19. Is the appropriate volume/weight or number of sample containers collected? Yes

Field Label

- 20. Were field sample labels filled out with the minimum information:
Sample ID? Yes
Date/Time Collected? Yes
Collectors name? Yes

Sample Preservation

- 21. Does the COC or field labels indicate the samples were preserved? No
22. Are sample(s) correctly preserved? NA
24. Is lab filtration required and/or requested for dissolved metals? No

Multiphase Sample Matrix

- 26. Does the sample have more than one phase, i.e., multiphase? No
27. If yes, does the COC specify which phase(s) is to be analyzed? NA

Subcontract Laboratory

- 28. Are samples required to get sent to a subcontract laboratory? No
29. Was a subcontract laboratory specified by the client and if so who? NA Subcontract Lab: NA

Date Received: 2/20/2026 11:17:00AM

Brian Skyles,

Thank you for choosing Envirotech, Inc. as your analytical testing laboratory for the sample(s) received on, 2/20/2026 11:17:00AM, under the Project Name: SBF 25-9 Tank Battery.

The analytical test results summarized in this report with the Project Name: SBF 25-9 Tank Battery apply to the individual samples collected, identified and submitted bearing the project name on the enclosed chain-of-custody. Subcontracted sample analyses not conducted by Envirotech, Inc., are attached in full as issued by the subcontract laboratory.

Please review the Chain-of-Custody (COC) and Sample Receipt Checklist (SRC) for any issues regarding sample receipt temperature, containers, preservation etc. To best understand your test results, review the entire report summarizing your sample data and the associated quality control batch data.

All reported data in this analytical report were analyzed according to the referenced method(s) and are in compliance with the latest NELAC/TNI standards, unless otherwise noted. Samples or analytical quality control parameters not meeting specific QC criteria are qualified with a data flag. Data flag definitions are located in the Notes and Definitions section of this analytical report.

If you have any questions concerning this report, please feel free to contact Envirotech, Inc.

Respectfully,

**Walter Hinchman**

Sample Receipt Checklist (SRC)

Instructions: Please take note of any NO checkmarks.

If we receive no response concerning these items within 24 hours of the date of this notice, all the samples will be analyzed as requested.

Client: Epic Energy Date Received: 02/20/26 11:17 Work Order ID: E602243
Phone: 970-946-1123 Date Logged In: 02/20/26 11:22 Logged In By: Caitlin Mars
Email: bskylesenviro@outlook.com Due Date: 02/24/26 17:00 (2 day TAT)

Chain of Custody (COC)

- 1. Does the sample ID match the COC? Yes
2. Does the number of samples per sampling site location match the COC? Yes
3. Were samples dropped off by client or carrier? Yes
4. Was the COC complete, i.e., signatures, dates/times, requested analyses? Yes
5. Were all samples received within holding time? Yes

Carrier: Brian Skyles

Note: Analysis, such as pH which should be conducted in the field, i.e, 15 minute hold time, are not included in this discussion.

Sample Turn Around Time (TAT)

- 6. Did the COC indicate standard TAT, or Expedited TAT? Yes

Sample Cooler

- 7. Was a sample cooler received? Yes
8. If yes, was cooler received in good condition? Yes
9. Was the sample(s) received intact, i.e., not broken? Yes
10. Were custody/security seals present? No
11. If yes, were custody/security seals intact? NA
12. Was the sample received on ice? Yes

Note: Thermal preservation is not required, if samples are received within 15 minutes of sampling

- 13. See COC for individual sample temps. Samples outside of 0°C-6°C will be recorded in comments.

Sample Container

- 14. Are aqueous VOC samples present? No
15. Are VOC samples collected in VOA Vials? NA
16. Is the head space less than 6-8 mm (pea sized or less)? NA
17. Was a trip blank (TB) included for VOC analyses? NA
18. Are non-VOC samples collected in the correct containers? Yes
19. Is the appropriate volume/weight or number of sample containers collected? Yes

Field Label

- 20. Were field sample labels filled out with the minimum information:
Sample ID? Yes
Date/Time Collected? Yes
Collectors name? No

Sample Preservation

- 21. Does the COC or field labels indicate the samples were preserved? No
22. Are sample(s) correctly preserved? NA
24. Is lab filtration required and/or requested for dissolved metals? No

Multiphase Sample Matrix

- 26. Does the sample have more than one phase, i.e., multiphase? No
27. If yes, does the COC specify which phase(s) is to be analyzed? NA

Subcontract Laboratory

- 28. Are samples required to get sent to a subcontract laboratory? No
29. Was a subcontract laboratory specified by the client and if so who? NA Subcontract Lab: NA

Brian Skyles,

Thank you for choosing Envirotech, Inc. as your analytical testing laboratory for the sample(s) received on, 1/20/2026 4:27:00PM, under the Project Name: South Blanco Federal 25-9.

The analytical test results summarized in this report with the Project Name: South Blanco Federal 25-9 apply to the individual samples collected, identified and submitted bearing the project name on the enclosed chain-of-custody. Subcontracted sample analyses not conducted by Envirotech, Inc., are attached in full as issued by the subcontract laboratory.

Please review the Chain-of-Custody (COC) and Sample Receipt Checklist (SRC) for any issues regarding sample receipt temperature, containers, preservation etc. To best understand your test results, review the entire report summarizing your sample data and the associated quality control batch data.

All reported data in this analytical report were analyzed according to the referenced method(s) and are in compliance with the latest NELAC/TNI standards, unless otherwise noted. Samples or analytical quality control parameters not meeting specific QC criteria are qualified with a data flag. Data flag definitions are located in the Notes and Definitions section of this analytical report.

If you have any questions concerning this report, please feel free to contact Envirotech, Inc.

Respectfully,

RPD Relative Percent Difference

DNI Did Not Ignite

DNR Did not react with the addition of acid or base.

Note (1): Methods marked with \*\* are non-accredited methods.

Note (2): Soil data is reported on an "as received" weight basis, unless reported otherwise.

Envirotech Analytical Laboratory

Printed: 1/20/2026 5:52:46PM

Sample Receipt Checklist (SRC)

Instructions: Please take note of any NO checkmarks.

If we receive no response concerning these items within 24 hours of the date of this notice, all the samples will be analyzed as requested.

Client: Epic Energy Date Received: 01/20/26 16:27 Work Order ID: E601188
Phone: 970-946-1123 Date Logged In: 01/20/26 17:48 Logged In By: Noe Soto
Email: bskylesenviro@outlook.com Due Date: 01/27/26 17:00 (5 day TAT)

Chain of Custody (COC)

- 1. Does the sample ID match the COC? Yes
2. Does the number of samples per sampling site location match the COC? Yes
3. Were samples dropped off by client or carrier? Yes
4. Was the COC complete, i.e., signatures, dates/times, requested analyses? Yes
5. Were all samples received within holding time? Yes

Carrier: Brian Skyles

Note: Analysis, such as pH which should be conducted in the field, i.e, 15 minute hold time, are not included in this discussion.

Sample Turn Around Time (TAT)

- 6. Did the COC indicate standard TAT, or Expedited TAT? Yes

Sample Cooler

- 7. Was a sample cooler received? Yes
8. If yes, was cooler received in good condition? Yes
9. Was the sample(s) received intact, i.e., not broken? Yes
10. Were custody/security seals present? No
11. If yes, were custody/security seals intact? NA
12. Was the sample received on ice? Yes

Note: Thermal preservation is not required, if samples are received within 15 minutes of sampling

- 13. See COC for individual sample temps. Samples outside of 0°C-6°C will be recorded in comments.

Sample Container

- 14. Are aqueous VOC samples present? No
15. Are VOC samples collected in VOA Vials? NA
16. Is the head space less than 6-8 mm (pea sized or less)? NA
17. Was a trip blank (TB) included for VOC analyses? NA
18. Are non-VOC samples collected in the correct containers? Yes
19. Is the appropriate volume/weight or number of sample containers collected? Yes

Field Label

- 20. Were field sample labels filled out with the minimum information:
Sample ID? Yes
Date/Time Collected? Yes
Collectors name? No

Sample Preservation

- 21. Does the COC or field labels indicate the samples were preserved? No
22. Are sample(s) correctly preserved? NA
24. Is lab filtration required and/or requested for dissolved metals? No

Multiphase Sample Matrix

- 26. Does the sample have more than one phase, i.e., multiphase? No
27. If yes, does the COC specify which phase(s) is to be analyzed? NA

Subcontract Laboratory

- 28. Are samples required to get sent to a subcontract laboratory? No
29. Was a subcontract laboratory specified by the client and if so who? NA Subcontract Lab: NA

Client Instruction

Empty box for client instruction.

Comments/Resolution

Large empty box for comments/resolution.

Signature of client authorizing changes to the COC or sample disposition.

QUESTIONS

Action 584323

**QUESTIONS**

Operator: EPIC ENERGY, L.L.C. 332 Road 3100 Aztec, NM 87410	OGRID: 372834
	Action Number: 584323
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

**QUESTIONS**

<b>Prerequisites</b>	
Incident ID (n#)	nAPP2529633728
Incident Name	NAPP2529633728 SOUTH BLANCO FEDERAL 25 #8,9,10 TB @ FAPP2203258231
Incident Type	Oil Release
Incident Status	Reclamation Report Received
Incident Facility	[fAPP2203258231] South Blanco Federal 25 #8, 9, 10 TB

<b>Location of Release Source</b>	
<i>Please answer all the questions in this group.</i>	
Site Name	South Blanco Federal 25 #8,9,10 TB
Date Release Discovered	10/22/2025
Surface Owner	Federal

<b>Incident Details</b>	
<i>Please answer all the questions in this group.</i>	
Incident Type	Oil Release
Did this release result in a fire or is the result of a fire	No
Did this release result in any injuries	No
Has this release reached or does it have a reasonable probability of reaching a watercourse	No
Has this release endangered or does it have a reasonable probability of endangering public health	No
Has this release substantially damaged or will it substantially damage property or the environment	Yes
Is this release of a volume that is or may with reasonable probability be detrimental to fresh water	No

<b>Nature and Volume of Release</b>	
<i>Material(s) released, please answer all that apply below. Any calculations or specific justifications for the volumes provided should be attached to the follow-up C-141 submission.</i>	
Crude Oil Released (bbls) Details	Cause: Overflow - Tank, Pit, Etc.   Production Tank   Crude Oil   Released: 117 BBL   Recovered: 40 BBL   Lost: 77 BBL.
Produced Water Released (bbls) Details	Not answered.
Is the concentration of chloride in the produced water >10,000 mg/l	No
Condensate Released (bbls) Details	Not answered.
Natural Gas Vented (Mcf) Details	Not answered.
Natural Gas Flared (Mcf) Details	Not answered.
Other Released Details	Not answered.
Are there additional details for the questions above (i.e. any answer containing Other, Specify, Unknown, and/or Fire, or any negative lost amounts)	Stimulation activities at the nearby Enduring Resources well caused the AST at the Tank Battery to overflow and release the tank contents and an unknown volume of frac fluid, however, approximately 300 bbls was recovered during hydrovac activities. The release extended beyond the secondary containment, across the roadway, and into a field adjacent to the tank battery. The cause of the release is a direct result of the stimulation activities that extended beyond the notification period with no update provided to the operator.

QUESTIONS, Page 2

Action 584323

**QUESTIONS (continued)**

Operator: EPIC ENERGY, L.L.C. 332 Road 3100 Aztec, NM 87410	OGRID: 372834
	Action Number: 584323
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

**QUESTIONS**

<b>Nature and Volume of Release (continued)</b>	
Is this a gas only submission (i.e. only significant Mcf values reported)	<b>No, according to supplied volumes this does not appear to be a "gas only" report.</b>
Was this a major release as defined by Subsection A of 19.15.29.7 NMAC	<b>Yes</b>
Reasons why this would be considered a submission for a notification of a major release	<b>From paragraph A. "Major release" determine using: (1) an unauthorized release of a volume, excluding gases, of 25 barrels or more; (2) an unauthorized release of a volume that: (d) substantially damages property or the environment.</b>
<i>With the implementation of the 19.15.27 NMAC (05/25/2021), venting and/or flaring of natural gas (i.e. gas only) are to be submitted on the C-129 form.</i>	

**Initial Response**

*The responsible party must undertake the following actions immediately unless they could create a safety hazard that would result in injury.*

The source of the release has been stopped	True
The impacted area has been secured to protect human health and the environment	True
Released materials have been contained via the use of berms or dikes, absorbent pads, or other containment devices	True
All free liquids and recoverable materials have been removed and managed appropriately	True
If all the actions described above have not been undertaken, explain why	Not answered.

*Per Paragraph (4) of Subsection B of 19.15.29.8 NMAC the responsible party may commence remediation immediately after discovery of a release. If remediation has begun, please prepare and attach a narrative of actions to date in the follow-up C-141 submission. If remedial efforts have been successfully completed or if the release occurred within a lined containment area (see Subparagraph (a) of Paragraph (5) of Subsection A of 19.15.29.11 NMAC), please prepare and attach all information needed for closure evaluation in the follow-up C-141 submission.*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

I hereby agree and sign off to the above statement	Name: Shawna Martinez Title: Regulatory Technician Email: shawna@walsheng.net Date: 05/19/2026

QUESTIONS, Page 3

Action 584323

**QUESTIONS (continued)**

Operator: EPIC ENERGY, L.L.C. 332 Road 3100 Aztec, NM 87410	OGRID: 372834
	Action Number: 584323
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

**QUESTIONS**

**Site Characterization**  
*Please answer all the questions in this group (only required when seeking remediation plan approval and beyond). This information must be provided to the appropriate district office no later than 90 days after the release discovery date.*

What is the shallowest depth to groundwater beneath the area affected by the release in feet below ground surface (ft bgs)	Between 100 and 500 (ft.)
What method was used to determine the depth to ground water	NM OSE iWaters Database Search
Did this release impact groundwater or surface water	No
<b>What is the minimum distance, between the closest lateral extents of the release and the following surface areas:</b>	
A continuously flowing watercourse or any other significant watercourse	Between 1 and 100 (ft.)
Any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)	Between 1000 (ft.) and ½ (mi.)
An occupied permanent residence, school, hospital, institution, or church	Between ½ and 1 (mi.)
A spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes	Between ½ and 1 (mi.)
Any other fresh water well or spring	Between 1 and 5 (mi.)
Incorporated municipal boundaries or a defined municipal fresh water well field	Greater than 5 (mi.)
A wetland	Between 1 and 100 (ft.)
A subsurface mine	Greater than 5 (mi.)
An (non-karst) unstable area	Greater than 5 (mi.)
Categorize the risk of this well / site being in a karst geology	None
A 100-year floodplain	Between 1000 (ft.) and ½ (mi.)
Did the release impact areas not on an exploration, development, production, or storage site	Yes

**Remediation Plan**

*Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.*

Requesting a remediation plan approval with this submission	Yes
<i>Attach a comprehensive report demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined, pursuant to 19.15.29.11 NMAC and 19.15.29.13 NMAC.</i>	
Have the lateral and vertical extents of contamination been fully delineated	Yes
Was this release entirely contained within a lined containment area	No

**Soil Contamination Sampling:** (Provide the highest observable value for each, in milligrams per kilograms.)

Chloride (EPA 300.0 or SM4500 Cl B)	338
TPH (GRO+DRO+MRO) (EPA SW-846 Method 8015M)	4960
GRO+DRO (EPA SW-846 Method 8015M)	3680
BTEX (EPA SW-846 Method 8021B or 8260B)	0.3
Benzene (EPA SW-846 Method 8021B or 8260B)	0

*Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.*

On what estimated date will the remediation commence	12/17/2025
On what date will (or did) the final sampling or liner inspection occur	02/20/2026
On what date will (or was) the remediation complete(d)	02/20/2026
What is the estimated surface area (in square feet) that will be reclaimed	28204
What is the estimated volume (in cubic yards) that will be reclaimed	4070
What is the estimated surface area (in square feet) that will be remediated	28204
What is the estimated volume (in cubic yards) that will be remediated	4070

*These estimated dates and measurements are recognized to be the best guess or calculation at the time of submission and may (be) change(d) over time as more remediation efforts are completed.*

*The OCD recognizes that proposed remediation measures may have to be minimally adjusted in accordance with the physical realities encountered during remediation. If the responsible party has any need to significantly deviate from the remediation plan proposed, then it should consult with the division to determine if another remediation plan submission is required.*

	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

**QUESTIONS**

**Remediation Plan (continued)**

Please answer all the questions that apply or are indicated. This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

**This remediation will (or is expected to) utilize the following processes to remediate / reduce contaminants:**

(Select all answers below that apply.)

(Ex Situ) Excavation and <b>off-site</b> disposal (i.e. dig and haul, hydrovac, etc.)	Yes
Which OCD approved facility will be used for <b>off-site</b> disposal	fSC0000000048 ENVIROTECH
<b>OR</b> which OCD approved well (API) will be used for <b>off-site</b> disposal	Not answered.
<b>OR</b> is the <b>off-site</b> disposal site, to be used, out-of-state	Not answered.
<b>OR</b> is the <b>off-site</b> disposal site, to be used, an NMED facility	Not answered.
(Ex Situ) Excavation and <b>on-site</b> remediation (i.e. On-Site Land Farms)	Not answered.
(In Situ) Soil Vapor Extraction	Not answered.
(In Situ) Chemical processing (i.e. Soil Shredding, Potassium Permanganate, etc.)	Not answered.
(In Situ) Biological processing (i.e. Microbes / Fertilizer, etc.)	Not answered.
(In Situ) Physical processing (i.e. Soil Washing, Gypsum, Disking, etc.)	Not answered.
Ground Water Abatement pursuant to 19.15.30 NMAC	Not answered.
OTHER (Non-listed remedial process)	Not answered.

Per Subsection B of 19.15.29.11 NMAC unless the site characterization report includes completed efforts at remediation, the report must include a proposed remediation plan in accordance with 19.15.29.12 NMAC, which includes the anticipated timelines for beginning and completing the remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

I hereby agree and sign off to the above statement	Name: Shawna Martinez Title: Regulatory Technician Email: shawna@walsheng.net Date: 05/19/2026

Operator: EPIC ENERGY, L.L.C. 332 Road 3100 Aztec, NM 87410	OGRID: 372834
	Action Number: 584323
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

**QUESTIONS**

<b>Sampling Event Information</b>	
Last sampling notification (C-141N) recorded	<b>544359</b>
Sampling date pursuant to Subparagraph (a) of Paragraph (1) of Subsection D of 19.15.29.12 NMAC	<b>02/09/2026</b>
What was the (estimated) number of samples that were to be gathered	<b>42</b>
What was the sampling surface area in square feet	<b>8400</b>

**Remediation Closure Request**

*Only answer the questions in this group if seeking remediation closure for this release because all remediation steps have been completed.*

Requesting a remediation closure approval with this submission	Yes
Have the lateral and vertical extents of contamination been fully delineated	Yes
Was this release entirely contained within a lined containment area	No
All areas reasonably needed for production or subsequent drilling operations have been stabilized, returned to the sites existing grade, and have a soil cover that prevents ponding of water, minimizing dust and erosion	Yes
What was the total surface area (in square feet) remediated	28204
What was the total volume (cubic yards) remediated	4070
All areas not reasonably needed for production or subsequent drilling operations have been reclaimed to contain a minimum of four feet of non-waste contain earthen material with concentrations less than 600 mg/kg chlorides, 100 mg/kg TPH, 50 mg/kg BTEX, and 10 mg/kg Benzene	Yes
What was the total surface area (in square feet) reclaimed	28204
What was the total volume (in cubic yards) reclaimed	4070
Summarize any additional remediation activities not included by answers (above)	N/A

*The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (in .pdf format) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15.29.12 NMAC.*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.

I hereby agree and sign off to the above statement	Name: Shawna Martinez Title: Regulatory Technician Email: shawna@walsheng.net Date: 05/19/2026

QUESTIONS, Page 7

Action 584323

**QUESTIONS (continued)**

Operator: EPIC ENERGY, L.L.C. 332 Road 3100 Aztec, NM 87410	OGRID: 372834
	Action Number: 584323
	Action Type: [C-141] Reclamation Report C-141 (C-141-v-Reclamation)

**QUESTIONS**

<b>Reclamation Report</b>	
<i>Only answer the questions in this group if all reclamation steps have been completed.</i>	
Requesting a reclamation approval with this submission	Yes
What was the total reclamation surface area (in square feet) for this site	28204
What was the total volume of replacement material (in cubic yards) for this site	4070
<i>Per Paragraph (1) of Subsection D of 19.15.29.13 NMAC the reclamation must contain a minimum of four feet of non-waste containing, uncontaminated, earthen material with chloride concentrations less than 600 mg/kg as analyzed by EPA Method 300.0, or other test methods approved by the division. The soil cover must include a top layer, which is either the background thickness of topsoil or one foot of suitable material to establish vegetation at the site, whichever is greater.</i>	
Is the soil top layer complete and is it suitable material to establish vegetation	Yes
On what (estimated) date will (or was) the reseeded commence(d)	10/05/2026
Summarize any additional reclamation activities not included by answers (above)	N/A
<i>The responsible party must attach information demonstrating they have complied with all applicable reclamation requirements and any conditions or directives of the OCD. This demonstration should be in the form of attachments (in .pdf format) including a scaled site map, any proposed reseeded plans or relevant field notes, photographs of reclaimed area, and a narrative of the reclamation activities. Refer to 19.15.29.13 NMAC.</i>	
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to OCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the OCD does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to groundwater, surface water, human health or the environment. In addition, OCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations. The responsible party acknowledges they must substantially restore, reclaim, and re-vegetate the impacted surface area to the conditions that existed prior to the release or their final land use in accordance with 19.15.29.13 NMAC including notification to the OCD when reclamation and re-vegetation are complete.
