Application for Non-Standard Well Location  
Elliott Gas Com D Well No. 1C  
S/2 Section 09-T30N-R09W  
Blanco Mesaverde Pool  
San Juan County, New Mexico

BP America Production Company respectfully requests an administrative approval for a non-standard well location for the Elliott Gas Com D Well No. 1C to be drilled at a location of 2035' FSL and 745' FWL of Section 09, T30N-R09W. The non-standard location is necessitated by topographical conditions – steep terrain and existing pipelines - and would insure the conservation of surface and subsurface resources in the area.

To aid in your review attached is a C-102, Well Location Plat, indicating the proposed well location and the existing Mesaverde wells in the BP operated 320 acre unit in the S/2. Burlington is a working interest partner in the S/2 Mesaverde development and BP has a 100% working interest in the offsetting 320 acre unit in the N/2 of section 09. Also attached are a topographical map and a 9-section plat showing the offset wells.

Your attention to this matter is greatly appreciated. Should you have any questions concerning this application please do not hesitate to call me at 281-366-4491.

Sincerely,

A handwritten signature in black ink that reads "Mary Corley". The signature is written in a cursive, flowing style with a large initial "M".

Mary Corley
