Application for Non-Standard Well Location
Florance R Well No. 8C
S/2 Section 14-T30N-R09W
Blanco Mesaverde Pool
San Juan County, New Mexico

BP America Production Company respectfully requests an administrative approval for a non-standard well location for the Florance R Well No. 8C to be drilled at a location of 2065' FSL and 1670' FWL of Section 149, T30N-R09W. The non-standard location is necessitated by topographical conditions – steep terrain, archeological concerns and an existing pipeline - and would insure the conservation of surface and subsurface resources in the area.

To aid in your review attached is a C-102, Well Location Plat, indicating the proposed well location and the existing Mesaverde wells in the BP operated 320 acre unit in the S/2. BP has a 100% working interest in the offsetting 320 acre unit in the N/2 of section 14. Also attached are a topographical map and a 9-section plat showing the offset wells.

Your attention to this matter is greatly appreciated. Should you have any questions concerning this application please do not hesitate to call me at 281-366-4491.

Sincerely,

A handwritten signature in cursive script that reads "Mary Corley".
