Re: San Juan 28-4 Unit #32N
2270' FSL, 170' FEL, Section 32, T-28-N, R-4-W, Rio Arriba County
30-039-26596

Dear Mr. Stogner:

Burlington Resources proposes to drill the above referenced well location as a commingled well in the Mesaverde and Dakota formations and is applying for administrative approval of an unorthodox gas well location for the Blanco Mesaverde formation. The Dakota formation falls within a standard location.

The subject well was staked 2270 feet FSL and 170 feet FEL due to rugged terrain and archaeological sites within the legal spacing window for the Mesaverde formation, as shown on the attached Aerial Photography map. This location offsets the outside of the Participating Area as shown on the attached Offset Operator Plat. The U. S. Forest Service requested we stake this well in this non-standard location to stay within 300 feet of existing roads and to avoid the above-mentioned archaeological sites.

The following attachments are for your review:

- Approved application for Permit to Drill, Intent Sundry stating well location and name change
- C-102 at referenced location
- Offset operators plat, showing Participating Area for Mesaverde & Dakota formations
- 9 Section plat
- Aerial Photography map

Copies of this application are being submitted to offset operator / working interest owners by certified mail. Please let me know if you have any questions about this application.

Sincerely,

Joni Clark
Regulatory Specialist

Re: San Juan 28-4 Unit #32N
2270' FSL, 170' FEL, Section 32, T28N, R4W, Rio Arriba County
30-039-26596

I hereby certify that the following offset owners/operators have been notified by certified mail of our application for administrative approval for non-standard well location of the above well.

13. Describe Proposed or Completed Operations

The location for the subject well has been moved from 2370' FSL, 75' FEL at the request of the Carson National Forest. The well name has been changed from San Juan 28-4 Unit #9B. It is intended to add the Dakota formation to the well. Attached is a new C-102 plat, operations plan, multi-point surface use plan, topographic map, blow out preventer diagram and production facilities diagram. The well will be down hole commingled. A down hole commingle application will be submitted.

14. I hereby certify that the foregoing is true and correct.
