ADMINISTRATIVE ORDER SWD-880

APPLICATION OF HAL J. RASMUSSEN OPERATING FOR SALT WATER DISPOSAL, LEA COUNTY, NEW MEXICO.

ADMINISTRATIVE ORDER OF THE OIL CONSERVATION DIVISION

Under the provisions of Rule 701(B), Hal J. Rasmussen Operating made application to the New Mexico Oil Conservation Division on April 17, 2003, for permission to utilize for salt water disposal its Gecko "27" State Well No. 1 (API 30-025-33021) located 660 feet from the North and East lines (Unit A) of Section 27, Township 15 South, Range 38 East, NMPM, Lea County, New Mexico.

THE DIVISION DIRECTOR FINDS THAT:

- (1) The application has been duly filed under the provisions of Rule 701(B) of the Division Rules and Regulations;
- (2) Satisfactory information has been provided that all offset operators and surface owners have been duly notified;
- (3) The applicant has presented satisfactory evidence that all requirements prescribed in Rule 701 will be met; and
- (4) No objections have been received within the waiting period prescribed by said rule.

IT IS THEREFORE ORDERED THAT:

Hal J. Rasmussen Operating is hereby authorized to utilize its Gecko "27" State Well No. 1 (API 30-025-33021) located 660 feet from the North and East lines (Unit A) of Section 27, Township 15 South, Range 38 East, NMPM, Lea County, New Mexico, in such a manner as to permit the injection of produced water for disposal purposes into the Pennsylvanian formation through the open-hole interval from a depth of 9,850 feet to 11,183 feet through 3-1/2 inch plastic-lined tubing set in a packer located at approximately 9,800 feet.

IT IS FURTHER ORDERED THAT:

The operator shall take all steps necessary to ensure that the injected water enters only the proposed injection interval and is not permitted to escape to other formations or onto the surface.

Water samples shall be obtained from at least one fresh water well within one mile of the Gecko "27" State Well No. 1, and water analysis supplied to the Division.

Prior to commencing injection operations, the applicant shall run approximately 9,850 of 5 ½-inch casing in the Gecko "27" State Well No. 1 and shall cement this casing with 756 sacks of Class "H" cement.

The casing-tubing annulus shall be loaded with an inert fluid and equipped with a pressure gauge at the surface or left open to the atmosphere to facilitate detection of leakage in the casing, tubing, or packer.

The injection well or system shall be equipped with a pressure limiting device which will limit the wellhead pressure on the injection well to no more than 1970 psi.

The Director of the Division may authorize an increase in injection pressure upon a proper showing by the operator of said well that such higher pressure will not result in migration of the injected fluid from the injection formations. Such proper showing shall consist of a valid step-rate test run in accordance with and acceptable to this office.

The operator shall notify the supervisor of the Hobbs district office of the Division of the date and time of the installation of disposal equipment and of any mechanical integrity test so that the same may be inspected and witnessed.

The operator shall immediately notify the supervisor of the Hobbs district office of the Division of the failure of the tubing, casing, or packer in said well and shall take such steps as may be timely and necessary to correct such failure or leakage.

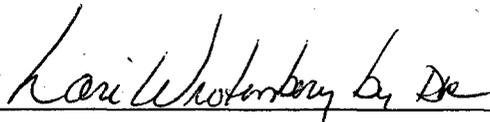

PROVIDED FURTHER THAT, jurisdiction is retained by the Division for the entry of such further orders as may be necessary for the prevention of waste and/or protection of correlative rights or upon failure of the operator to conduct operations (1) to protect fresh water or (2) consistent with the requirements in this order, whereupon the Division may, after notice and hearing, terminate the injection authority granted herein.

The operator shall submit monthly reports of the disposal operations on Division Form C-120-A, in accordance with Rule Nos. 706 and 1120 of the Division Rules and Regulations.

Administrative Order SWD-880
Hal J. Rasmussen Operating
May 9, 2003
Page 3

The injection authority granted herein shall terminate one year after the effective date of this order if the operator has not commenced injection operations into the subject well, provided however, the Division, upon written request by the operator, may grant an extension thereof for good cause shown.

Approved at Santa Fe, New Mexico, on this 9th day of May, 2003.

LORI WROTENBERY, Director
