Application for Non-Standard Well Location  
Ulibarri Gas Com Well No. 3N  
S/2 Section 35-T30N-R09W  
Basin Dakota and Blanco Mesaverde Pools  
San Juan County, New Mexico

BP America Production Company respectfully requests an administrative approval for a non-standard well location for the Ulibarri Gas Com Well No. 3N which was directionally drilled from a surface location of 2230' FNL & 715' from FWL of Section 35, T30N, R09W. The original bottom hole location was 1875' FSL & 660' FWL of Section 35, T30N, R09W, however, in the process of attempting to run production casing we encountered a tight spot and the casing became stuck. Attempts to free the casing were unsuccessful and 10 drill collars and 24 joints were left down hole. A decision was made to abandon the open hole and sidetrack downhole. Upon obtaining NMOCD verbal approval (BP's Harald Jordan spoke with Charlie Perrin with NMOCD), whipstock was set at 210 azimuth off 183 degree original.

For your review and consideration attached is a C-102 Well Location Plat showing the well location (SHL, original BHL, and sidetracked BHL although not to scale), a 9-section plat showing the offset wells and operators, and a Directional Plot with both original and actual BHL.

BP operates the 320 acre unit in which the subject well is located and has a 50/50 working interest partnership with ConocoPhillips. BP has a 100% working interest in the affected offsetting 320 acre unit in the E/2 of Section <sup>34</sup>30, T31N, R09W. This information is also reflected on the 9 Section Plat.

Your attention to this matter is greatly appreciated. Should you have any questions concerning this application please do not hesitate to call me at 281-366-4491.

Sincerely,

A handwritten signature in cursive script that reads "Mary Corley".
