

C. D. Borland AREA PRODUCTION MANAGER

P. O. Box 670 Hobbs. New Mexico 88240

Re: Administrative Order No. DHC-76

New Mexico Oil Conservation Commission P. O. Box 2088 Santa Fe, New Mexico 87501

Attention: Mr. Dan Knutter

Dear Sir:

As requested in your letter of January 28, 1971 pertaining to the above order, attached is the second test on Gulf's J. A. Stuart No. 8 after commingling production in well bore.

Production tests will be submitted weekly for 2 more weeks at which time you will advise allocation of production on a percentage basis.

Yours truly,

C. D. BORLAND

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Commission.

will be 0.60. Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Specific gravity base

Report casing pressure in lieu of tubing pressure for any well producing through casing.

Mail original and one copy of this report to the district office of the New Mexico Oil Conservation Commission in accordance with Rule 301 and appropriate pool rules.

is true and complete to the best of my know-ledge and belief.

April 30, 1971 Well Tester
