12. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompilation.

BP America Production Company request permission to surface commingle production the Basin Dakota, Blanco Mesaverde, Otero Chacra and Aztec Pictured Cliffs Pools from our Lackey No. 1M & Warren A LS No. 6. Surface commingling Basin Dakota production will consist of the Lackey No. 1M; and Blanco Mesaverde production will be from the Lackey No. 1M; Otero Chacra from the Lackey No. 1M and Aztec Pictured Cliffs production will be from the Warren A LS No. 6. The production from each well will be metered prior to commingling, (PLEASE NOTE: Lackey No. 1M is approved for downhole commingling (DHC 1217 with production allocated to each Pool based on a fixed percentage DK 21%, MV 71% & CH 8%) then the commingled production will flow into through the separator where the liquids will be removed. The commingled gas will then be sent through compression prior to entering the sales meter. Please reference the attached schematic reflecting the Proposed Surface Commingling Layout provided for your reference.

The working interest, royalty and overriding royalty interest owners in the subject wells are identical. The proposed commingling of production is to reduce operating expenses between the wells and will result in increased economic life of the wells. The proposed commingling of production is to reduce operating expenses between the wells and will result in increased economic life of the wells.

BLM has also been notified of this proposal by copy of BLM Form 3160-5.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
