April 18, 1977

Campbell & Hedrick  
P. O. Box 401  
Midland, Texas 79701

Attention: Oley F. Hedrick, Jr.

Administrative Order No. DHC-717  
L. E. Elliott Well No. 1, Unit G,  
Section 6, Township 23 South,  
Range 38 East, NMPM, Lea County,  
New Mexico, Blinebry Oil and Gas  
and Tubb Gas Pools

Gentlemen:

Reference is made to your recent application for an exception to Rule 303-A of the Commission Rules and Regulations for the subject well to permit the commingling of production from both pools in the well-bore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 303-C, and that reservoir damage or waste will not result from such down-hole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above.

In accordance with the provisions of Rule 403-C, total commingled oil production from the subject well shall not exceed 40 barrels per day, and total water production from the well shall not exceed 80 barrels per day. The maximum amount of gas which may be produced daily from the well shall be determined by multiplying 2000 by top unit allowable for the Tubb Gas Pool.

Assignment of allowable to the well and allocation of production from the well shall be on the following basis:

DHC-217  
-2-

Upper Pool: Oil 8%, Gas 9%  
Lower Pool: Oil 92%, Gas 91%

Pursuant to Rule 303-C 5, the commingling authority granted by this order may be rescinded by the Secretary-Director if, in his opinion, conservation is not being best served by such commingling.

Very truly yours,

JOE D. RAMEY  
Secretary-Director
