Unit M, Section 17, Township 21 South, Range 37 East, NMPM, Lea  
County, New Mexico.  
Blinebry, Tubb and Drinkard Oil and Gas Pools*

Dear Mr. Hedrick:

Reference is made to your recent application for an amendment to Administrative Order No. DHC-285, dated July 23, 1979, which authorized the downhole commingling of production from the Blinebry and Tubb Oil and Gas Pools in the wellbore, to permit the addition of a third zone of production to be commingled in the wellbore.

It appearing that the subject well qualifies for approval for such amendment pursuant to the provisions of Rule 303-C, and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above.

In accordance with the provisions of Rule 303-C-4., total commingled oil production from the subject well shall not exceed 40 barrels per day, and total water production shall not exceed 80 barrels per day. The maximum amount of gas which may be produced daily from the well shall be determined by multiplying 2000 by the top unit allowable for the Tubb Oil and Gas Pool.
