Re: San Juan 29-7 Unit #82B
Unit A, 835' FNL, 140' FEL, Section 4, T-29-N, R-7-W, Rio Arriba County
30-039-27697

Dear Mr. Stogner:

Burlington Resources proposes to drill the above referenced well location as a commingled well in the Mesaverde and Dakota formations and is applying for administrative approval of an unorthodox gas well location for the Basin Dakota formation.

The subject well had to be staked 835 feet FNL and 140' FEL in order to avoid a surface drainage silt pond located to the west as per the land owner's request. Archaeology, topography and geology within the legal spacing window are other reasons for a nonstandard location as shown on the attached archaeology site map and aerial photography map. In order to fit the geology of the surrounding Mesaverde Dakota and Fruitland Coal wells, this location needed to be staked in a portion of the legal window what was heavily encompassed by steep terrain and archaeological sites. Consequently this location was staked non-standard for the Dakota formation, to best fit the surrounding geology, terrain, not interfere with archaeology, and to satisfy the landowner's request.

The following attachments are for your review:

- Approved application for Permit to Drill and C-102 at referenced location
- Working Interest Owners / Owner Plat
- 9 Section plat
- Aerial Photography map
- Topographic Map of Section 4
- Archeology Site Map
- Aerial Photography Map
- Drainage Map

Copies of this application are being submitted to offset operator / working interest owners by certified mail. Please let me know if you have any questions about this application.

Sincerely,

Joni Clark
Regulatory Specialist

Re: San Juan 29-7 Unit #82B
835' FNL, 140' FEL, Section 4, T29N, R7W, Rio Arriba County
30-039-27697

I hereby certify that the following offset owners/operators have been notified by certified mail of our application for administrative approval for non-standard well location of the above well.
