Re: ADMINISTRATIVE ORDER SWD-966

Sirs:

Per requirement (a) of the above referenced order, please find attached a copy of the temperature survey run after the cement job on the 8-5/8" casing. We were unable to locate nor do we have any information in our files about any logs that may have been run during the 1994 workover. Per requirement (b), a CIBP will be installed within 200 feet of the lowermost perforation prior to commencing injection operations. Don't hesitate to call or write if there are any additional questions.

Sincerely,

LYNX PETROLEUM CONSULTANTS, INC.

Larry R. Scott
