Hobbs, New Mexico 88240

Attention: R. E. Irelan

Re: Warren Unit No. 59 Well, Unit L,  
Sec. 26, T-20-S, R-38-E, NMPM,  
Lea County, New Mexico  
Blinebry Oil & Gas and Warren Tubb Pools

Gentlemen:

Reference is made to your recent application for an exception to Rule 303-A of the Division Rules and Regulations to permit the subject well to commingle the production from both pools in the wellbore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 303-C, and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the two zones is hereby placed in abeyance.

In accordance with the provisions of Rule 303.C.4., total commingled oil production from the subject well shall not exceed 40 barrels per day, and total water production from the well shall not exceed 80 barrels per day. The maximum amount of gas which may be produced daily from the well shall be determined by multiplying 2000 by the top unit allowable for the Warren Tubb Oil Pool.

Assignment of allowable to the well and allocation of production from the well shall be on the following basis:

Blinebry Pool: Oil 43%, Gas 22%  
Tubb Pool: Oil 57%, Gas 78%

Pursuant to Rule 303-C 5, the commingled authority granted by this order may be rescinded by the Division Director if, in his opinion, conservation is not being best served by such commingling.

Very truly yours,

A handwritten signature in cursive script, appearing to read "William J. Lemay". The signature is written in black ink and extends across the right side of the page, with a long, thin tail that curves downwards.

WILLIAM J. LEMAY  
Director
