Re: Legend Natural Gas III, LP, NSL and NSP Application
Pardue 29 Federal Com 8H
Unit B, Section 29 T-24S, R-28E
Eddy County, New Mexico

Attn: Mr. Michael McMillan:

Pursuant to Division Rule 19.15.15.13, Legend Natural Gas III, LP respectfully requests administrative approval of a non-standard location (NSL) for the Pardue 29 Federal Com 8H in Eddy County, New Mexico. This application is being sent in regards to the Pardue 29 Federal Com 8H proposed production interval being 51.8' at the first take point and 33.4' at the last take point from the East quarter/quarter line in Section 29, T-24-S, R-28-E in the Willow Lake; Bone Spring pool (64450).

The affected offset wells to the Pardue 29 Federal Com 8H are the Pardue 29 Federal Com 5H and the Pardue Federal Com 6H, all proposed APD's with the Bureau of Land Management. Notification has been send via certified mail to the offset mineral owners as well as working interest owners. Copies of the certified mail receipts are attached. We are also requesting a Non-Standard Spacing unit as we are requesting to dedicate 320 acres to the Pardue 29 Federal Com 8H.

Approval of this application will allow Legend Natural Gas to recover additional oil and gas reserves from the Willow Lake; Bone Spring pool underlying the middle two quarter sections of Section 29 that may otherwise not be recovered by the other proposed wells, thereby preventing waste and will not violate correlative rights.

If you have any questions please contact I at (817)872-7822 or Mr. John McCauley at (281)644-5972.

Sincerely,

A handwritten signature in black ink, appearing to read "Jennifer Elrod". The signature is written in a cursive, flowing style.

McMillan, Michael, EMNRD

From: John McCauley <JMcCauley@lng2.com>
Sent: Monday, May 05, 2014 10:42 AM
To: McMillan, Michael, EMNRD
Cc: 'jamesbruc@aol.com'
Subject: Non-Standard 320 acre Unit
Attachments: Pardue 29 Fed Com 8H_Revised C102_proposed perfs.pdf

Michael,

Per your request, and in follow up to Doug Parkhurst's email regarding the spacing of 5 wells in one (1) section, below is my summary and justification for the proposed non-standard 320 acre unit for Legend Natural Gas III, LP's Pardue 29 Fed Com 8H:

Currently, with a 5 well spacing program in a given Section, there will one well dedicated to each 160 acre N/S proration unit for a total of four (4) standard proration units/wells . However, we plan to drill an additional well (being the 5th well in the section) almost directly down the middle of the section line that has a proposed proration unit of 320 acres. Due to leasehold ownership not being common across the center 320 acres (E/W) of the Section, we feel that forming the 320 acre unit is only fair to the mineral/royalty owners in the sense that the mineral owners in the E/2W/2 and the W/2E/2 will share royalties from the production of the 5th (middle) well. Since the wellbore will be so close to the middle qtr/qtr line, there is question of fairness (from a royalty perspective) if one dedicates the production/well to a particular 160 acre unit. In the case of 5 wells per section, each owner in a given 160 acre proration unit will have one (1) well dedicated to their proration unit. As stated above, when adding in a 5th well in middle of the Section, we feel that it is only fair that production be shared amongst the owners in the E/2W/2 and the W/2E/2. With that being said, there will not be any lands left behind as everything in the section will be dedicated to a spacing unit.

In all, forming the 320 acre unit was proposed to the OCD in an attempt to be fair to the mineral owners in regard to payment of royalties.

I hope this helps justify our proposal with an attempt to get the non-standard 320 acre unit approved administratively. If you have any questions or concerns, please call or email.

Thanks,

John McCauley

Michael,

Yes, I did also notify the effected parties in the E/2E/2 and W/2W/2 of Section 29, T-24S, R-28E, Eddy County, New Mexico.

Thanks,

John McCauley
