Consolidating our battery facilities will extend the economic life for these wells and lessen surface disturbance. We will allocate production using meters.

Commingle will not reduce the value of production.

This Battery has diverse ownership for all wells going into that facility. The #2H and #6H have common ownership, so we would like to meter these wells together using three day wells tests to allocation production between the two wells. These wells will be producing from the Atoka Glorieta-Yeso, 3250. Attached is a diagram of the battery facility, a map showing the well locations and the location of the CTB, admin checklist, and notice to all interest owners.

Please contact me at 432-685-4332 should you have any questions.

Sincerely,

Kanicia Castillo
