Subject: Owl's Brininstool SWD No3 - reconcile permits...

Phillip,

Sorry to bug you - this has been in awhile and I think it's just clerical essentially. Request went in Sept 20, 2017.

The old APD expired - got the SWD extended - filed a new APD and got that approved by 30-025-44000. We need SWD-1592 hooked to this new API.

Thanks,
Ben

Attn: Mr. David Catanach, Director

Re: Request for Extension of Administrative Order SWD-1592 pertaining to Owl SWD Operating, LLC's Brininstool SWD No.3; to include Spud Date and Injection Commencement Date; located in Section 19, T23S-R33E, NMPPM, Lea County, New Mexico.

Dear Mr. Catanach,

Owl SWD Operating, LLC had suspended some of its projects to accommodate the changes in the climate of the industry over the last couple years. Management has determined that it would now like to move forward with the subject project as permitted. The original permit is set to expire on October 28, 2017. Also, the APD C-101 that had been approved for this well just expired last week on August 28, 2017. A new C-101 is being filed today with the Hobbs district office.

I have reviewed the subject Area of Review and determined that no significant changes have taken place. Leases and offset interested operators are the same; no new wells drilled. The SWD well will be configured exactly as originally permitted.

Owl is currently close to completing drilling another of its Devonian SWDs and anticipates having that rig moved over to begin drilling this well by mid-to-late October. We therefore request an appropriate extension for the subject permit is applied to order SWD-1592.

If you or your staff has any questions, please do not hesitate to call or email me.

Best regards,

Ben Stone, SOS Consulting, LLC
Agent for Owl SWD Operating, LLC
