Re: Blanco Wash Federal 2 – NSL application for Mesaverde Pool
Unit A (NE/NE), 400' FNL & 860' FEL, Sec. 34, T28N, R9W
API – 30-045-07090

Dear Sir:

Hilcorp Energy Company is requesting administrative approval for a non-standard gas well location in the Blanco Mesaverde Pool.

The Blanco Wash Federal 2 was originally drilled as a Dakota in 1965. We are currently proposing to recomplete this well adding the Mesaverde formation. This well will then be a MV/DK commingled well.

The Dakota and Mesaverde pools at this location is considered NSL since the location is less than 660' from the boundary liner per Rule 104. Dakota was and was approved for non-standard location on 5/13/1965, administrative order NSL-352.

Production from the Basin Dakota and Blanco Mesaverde are included in the 320.00 acre gas spacing unit N/2 Section 34, T28N, R9W.

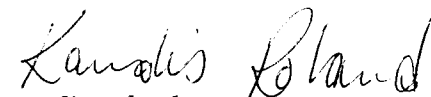

To comply with the New Mexico Oil Conservation Division rules, we are submitting the following to help with your decision process:

1. 9 Section Plat showing wells in the area
2. Offset Operator plat for Section 34 T28N, R9W
3. Topo and aerial maps showing the location of the well

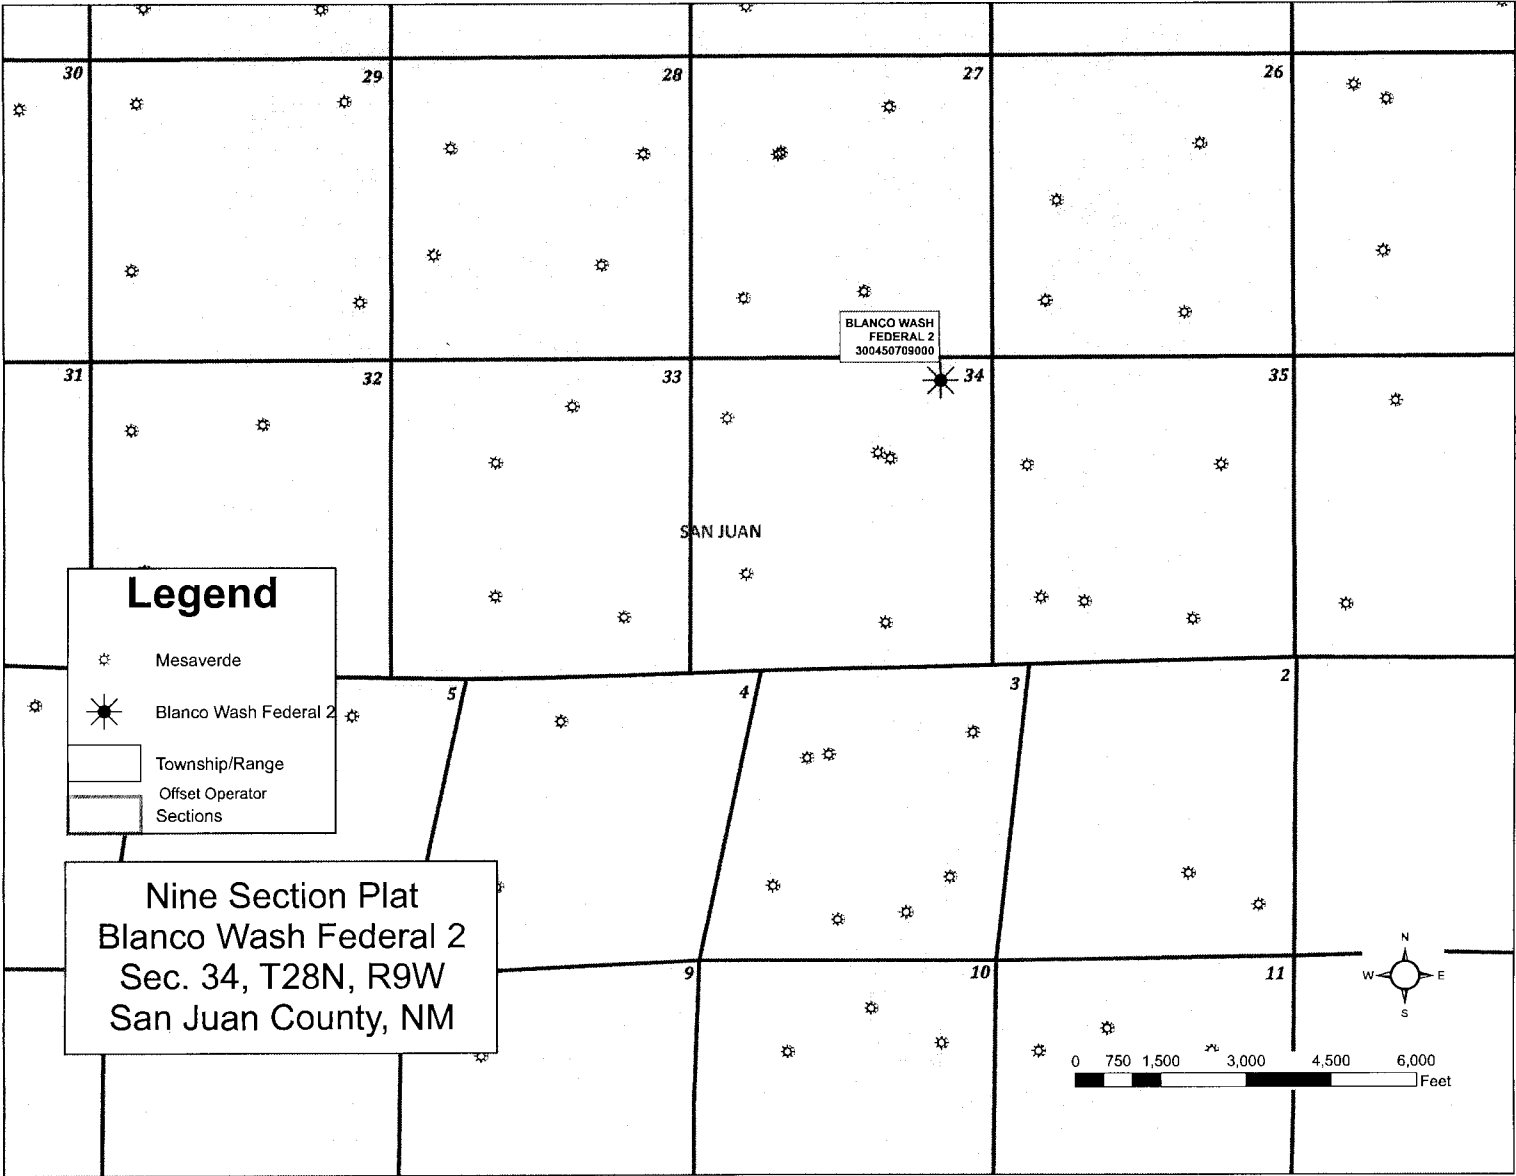

A notice of intent to recomplete into the Mesaverde pool has been filed with the Aztec OCD and BLM district offices.

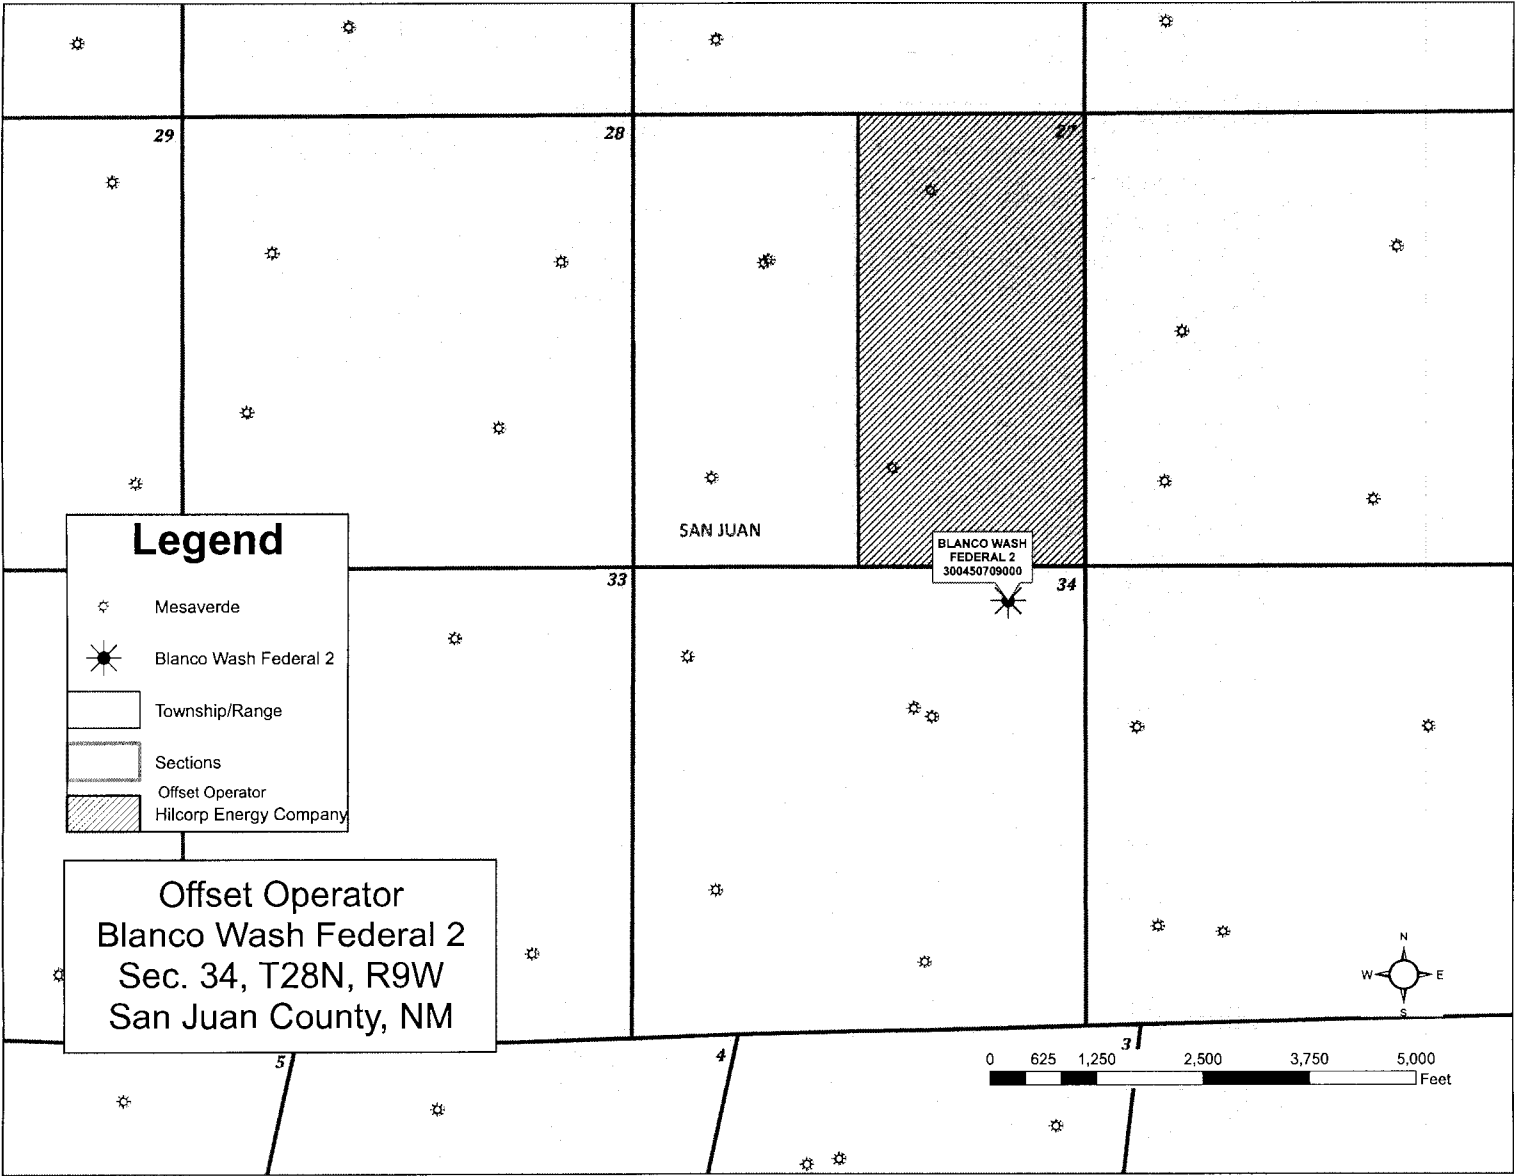

Hilcorp Energy Company is the offset operator of Section 27 and has 100% working interest therefore no notice to the Working Interest Owners was sent. Please let me know if you have any questions about this application by calling me at 505-324-5149.

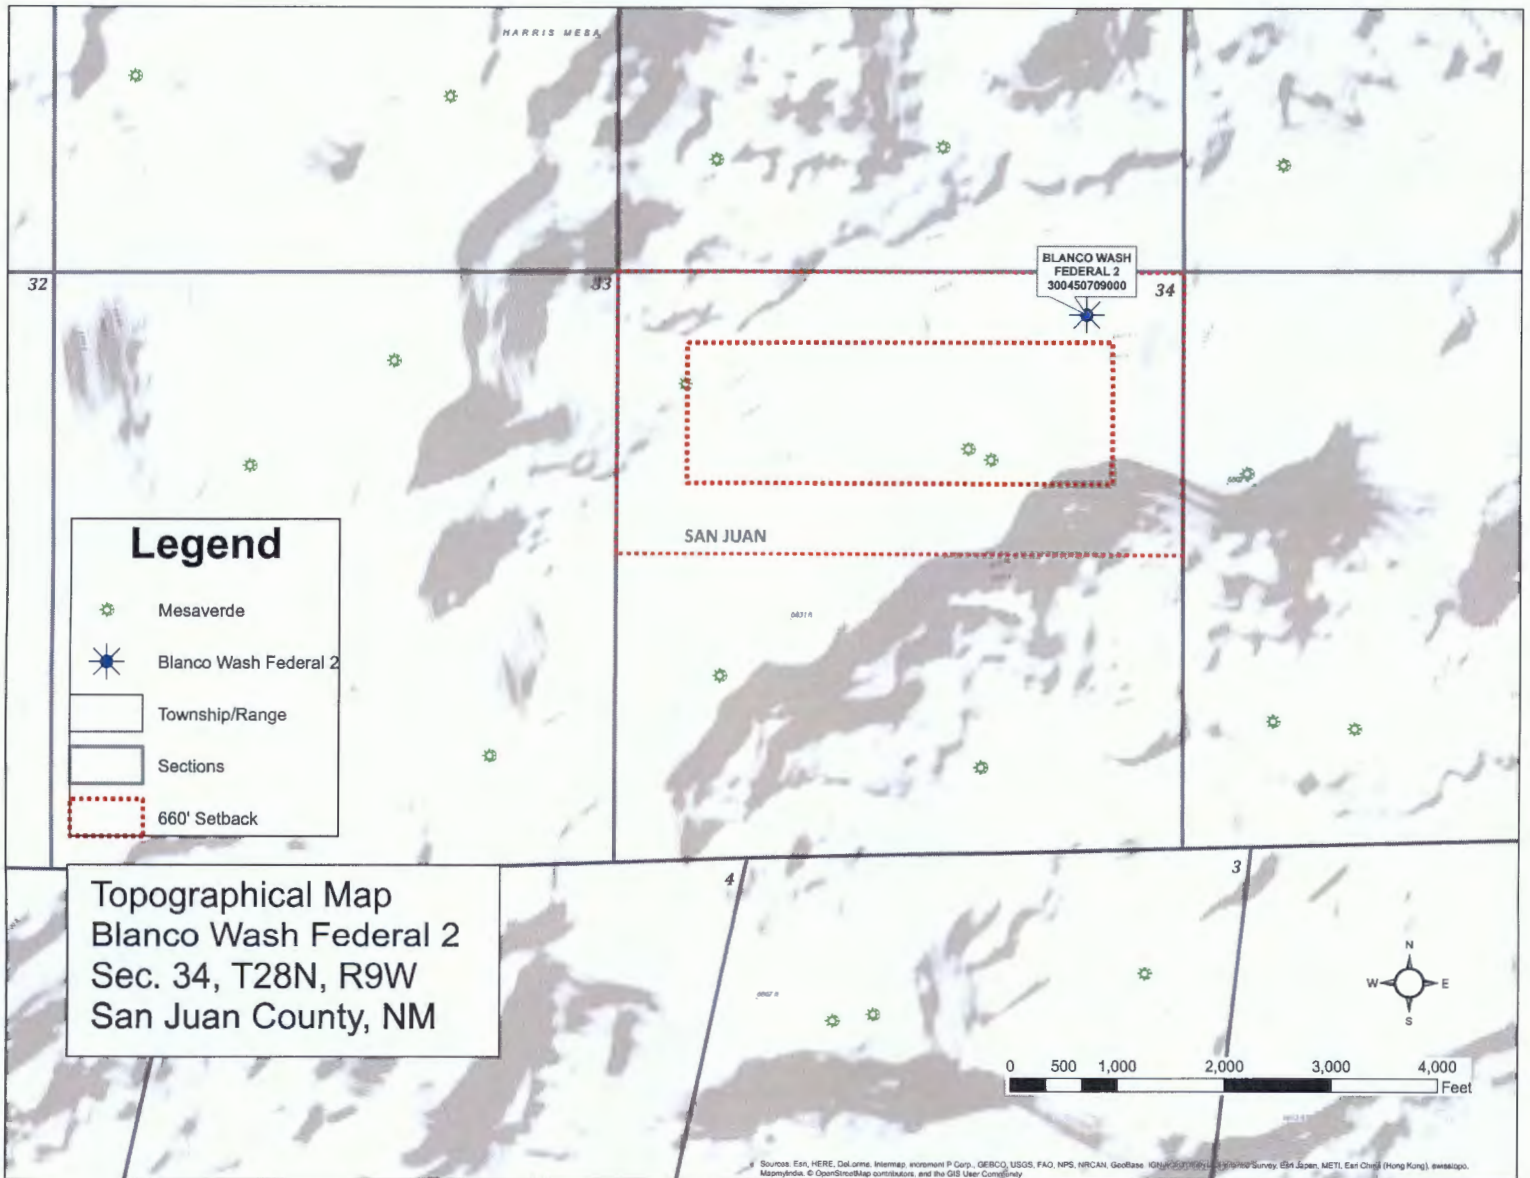

Respectfully,

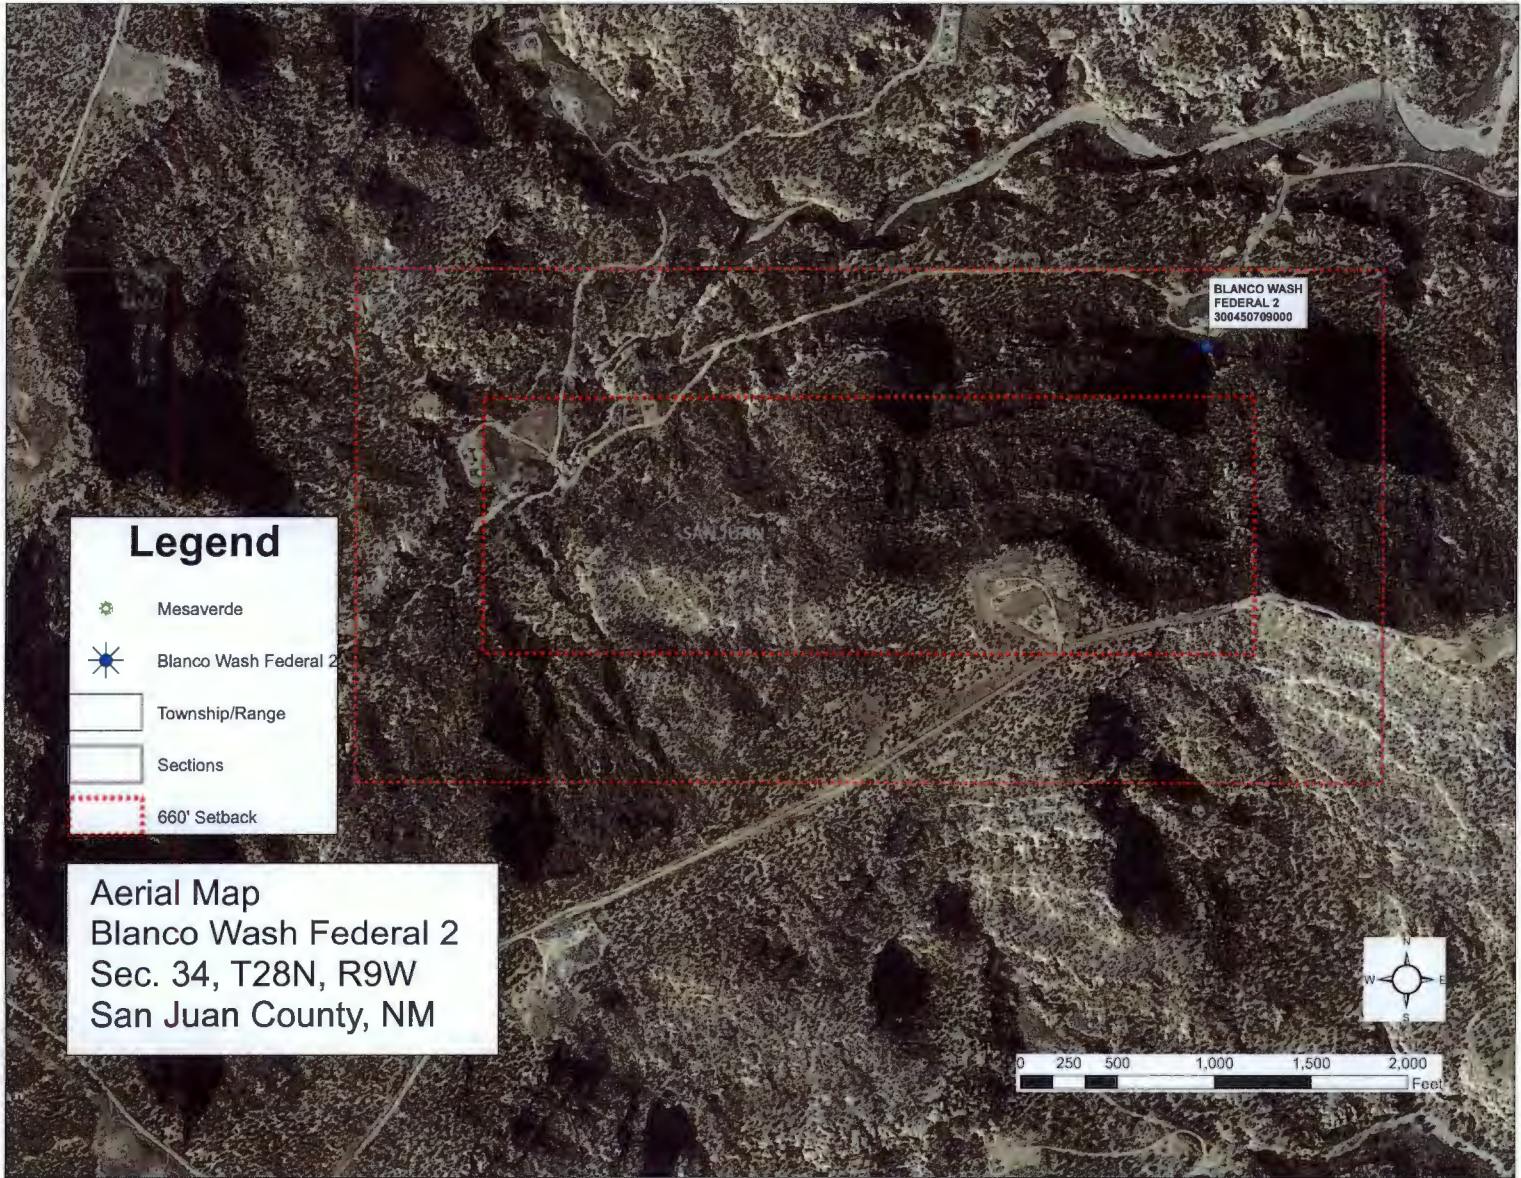

Kandis Roland
