NEW MEXICO OIL CONSERVATION DIVISION
 - Geological & Engineering Bureau -
 1220 South St. Francis Drive, Santa Fe, NM 87505

ADMINISTRATIVE APPLICATION CHECKLIST

THIS CHECKLIST IS MANDATORY FOR ALL ADMINISTRATIVE APPLICATIONS FOR EXCEPTIONS TO DIVISION RULES AND REGULATIONS WHICH REQUIRE PROCESSING AT THE DIVISION LEVEL IN SANTA FE

Applicant: OXY USA INC	OGRID Number: 16696
Well Name: PALLADIUM MDPI 7-6 FEDERAL COM 1H	API: 30-015-44298
Pool: COTTON DRAW; BONE SPRING	Pool Code: 13367

SUBMIT ACCURATE AND COMPLETE INFORMATION REQUIRED TO PROCESS THE TYPE OF APPLICATION INDICATED BELOW

FEB 12 2018 AM 09:56

CTB 840 B km

- 1) **TYPE OF APPLICATION:** Check those which apply for [A]
- A. Location - Spacing Unit - Simultaneous Dedication
 NSL NSP (PROJECT AREA) NSP (PRORATION UNIT) SD
- B. Check one only for [I] or [II]
- [I] Commingling - Storage - Measurement
 DHC CTB PLC PC OLS OLM
- [II] Injection - Disposal - Pressure Increase - Enhanced Oil Recovery
 WFX PMX SWD IPI EOR PPR

FEB 12 2018 AM 09:56

- 2) **NOTIFICATION REQUIRED TO:** Check those which apply.
- A. Offset operators or lease holders
 B. Royalty, overriding royalty owners, revenue owners
 C. Application requires published notice
 D. Notification and/or concurrent approval by SLO
 E. Notification and/or concurrent approval by BLM
 F. Surface owner
 G. For all of the above, proof of notification or publication is attached, and/or,
 H. No notice required

FOR OCD ONLY	
<input type="checkbox"/>	Notice Complete
<input type="checkbox"/>	Application Content Complete

FEB 12 2018 AM 09:56

3) **CERTIFICATION:** I hereby certify that the information submitted with this application for administrative approval is **accurate** and **complete** to the best of my knowledge. I also understand that **no action** will be taken on this application until the required information and notifications are submitted to the Division.

Note: Statement must be completed by an individual with managerial and/or supervisory capacity.

Revised August 1, 2011

OIL CONSERVATION DIVISION
1220 S. St Francis Drive
Santa Fe, New Mexico 87505

Submit the original application to the Santa Fe office with one copy to the appropriate District Office.

APPLICATION FOR SURFACE COMMINGLING (DIVERSE OWNERSHIP)

OPERATOR NAME: OXY USA INC
OPERATOR ADDRESS: PO BOX 4294 HOUSTON, TX 77210
APPLICATION TYPE:

Pool Commingling Lease Commingling Pool and Lease Commingling Off-Lease Storage and Measurement (Only if not Surface Commingled)

LEASE TYPE: Fee State Federal

Is this an Amendment to existing Order? Yes No If "Yes", please include the appropriate Order No. CTB-840
Have the Bureau of Land Management (BLM) and State Land office (SLO) been notified in writing of the proposed commingling
 Yes No

(A) POOL COMMINGLING
Please attach sheets with the following information

(1) Pool Names and Codes	Gravities / BTU of Non-Commingled Production	Calculated Gravities / BTU of Commingled Production	Calculated Value of Commingled Production	Volumes
SEE ATTACHED				

- (2) Are any wells producing at top allowables? Yes No
(3) Has all interest owners been notified by certified mail of the proposed commingling? Yes No.
(4) Measurement type: Metering Other (Specify): ALLOCATION BY WELL TEST
(5) Will commingling decrease the value of production? Yes No If "yes", describe why commingling should be approved

(B) LEASE COMMINGLING
Please attach sheets with the following information

- (1) Pool Name and Code.
(2) Is all production from same source of supply? Yes No
(3) Has all interest owners been notified by certified mail of the proposed commingling? Yes No
(4) Measurement type: Metering Other (Specify)

(C) POOL and LEASE COMMINGLING
Please attach sheets with the following information

- (1) Complete Sections A and E.

(D) OFF-LEASE STORAGE and MEASUREMENT
Please attached sheets with the following information

- (1) Is all production from same source of supply? Yes No
(2) Include proof of notice to all interest owners.

(E) ADDITIONAL INFORMATION (for all application types)
Please attach sheets with the following information

- (1) A schematic diagram of facility, including legal location.
(2) A plat with lease boundaries showing all well and facility locations. Include lease numbers if Federal or State lands are involved.
(3) Lease Names, Lease and Well Numbers, and API Numbers.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

SIGNATURE: Taylor Stillman TITLE: Regulatory Engineer DATE: 2/9/12

APPLICATION FOR LEASE COMMINGLE, OFF-LEASE SALES AND STORAGE

Commingling proposal for Sand Dunes South Corridor Central Tank Battery

OXY USA INC respectfully requests a permit to commingle production from multiple leases in addition to off-lease measurement, sales and storage approval for wells feeding the Sand Dunes South Corridor Central Tank Battery. A well list showing expected production data can be found as an attachment within this application.

In addition, Oxy requests to remove the Patton 18 6H, from previously approved PLC-454 and move it to CTB-840.

A detailed process description can be found below. The oil and gas meters will be calibrated on a regular basis per API, NMOCD and BLM specifications.

12.5 % BLM Royalty; Cotton Draw; Bone Spring Pool (13367)

Re: Sand Dunes Commingle Application
Patton MDP1 18 Federal 6H (30-015-43854)
Palladium MDP1 7-6 Federal Com 5H (30-015-44294)
Palladium MDP1 7-6 Federal Com 6H (30-015-44293)

Mr. McMillan:

Per your email, at the time the Sand Dunes CTB-840 commingle application was submitted, Oxy did not include the decline ranges for the Patton MDP1 18 Federal 6H, Palladium MDP1 7-6 Federal Com 5H and the Palladium MDP1 7-6 Federal Com 6H.

Pursuant to Order R-14299, the current decline ranges for the aforementioned wells are listed below:

- Patton MDP1 18 Federal 6H – Range 3
- Palladium MDP1 7-6 Federal Com 5H – Range 1
- Palladium MDP1 7-6 Federal Com 6H – Range 1

Please let me know if you have any additional questions.

Respectfully,

OXY USA INC
Taylor Stillman
Regulatory Engineer
Taylor_Stillman@oxy.com
(713) 366-5945

Each CA allocated 93.75% of the production to the Federal leases at a Royalty Rate of 12.5%, for the interest allocation of 11.72%.

Process Description:

The Sand Dunes South Corridor CTB is located in Section 18 T24S R31E at 32.2233, -103.812737 in Eddy County, New Mexico.

All wells will be tested daily prior to Range one of decline. Once wells reach Range one of decline, they will begin being tested via the testing methodology presented in Hearing Order R-14299, described below.

Wells will be tested daily prior to Range one of decline. Wells will be tested at least three times per month once they reach Range one of decline. Once wells reach Range 2 of decline, they will be tested at least twice per month, and at least once per month during Range 3 of decline. Production allocated to each well will be based on the aforementioned well tests and the amount of hours a well was operating in a given month.

Production from all wells will be routed to one of three production trains, based on the federal royalty rate. For example, the 9.375% wells are all routed into the same production train with a dedicated production and test separator for that train with turbine meters for oil and water and an orifice meter for gas. The orifice meters off of the production and test separators will serve as the gas FMPs for that train. After separation, the oil stream will flow through a heater treater and then flow to tanks before being measured by a LACT for each royalty rate train. The aforementioned LACT units will serve as the oil FMPs for each train. Each well and the associated federal royalty rate per train can be seen on the attached facility diagram.

Wells will be tested through a three-phase 6'x20' test separator equipped with turbine meters for oil and water and an orifice meter for gas. After separation, oil production is sent to oil tanks before being measured by a LACT unit located at the Sand Dunes South Corridor CTB. Gas production will be sent through the facility check meter before being sent to an Enterprise sales meter. The Enterprise Sales Meter Serial number will be provided upon installation.

All water generated at the facility will be sent to the Sand Dunes SWD Integration System.

Additional Application Components:

The flow of production is shown in detail on the enclosed facility diagram. Also enclosed is a map detailing the lease boundaries, battery and well locations.

Pursuant to Statewide rule 19.15.12.10(C)(4)(g) OXY USA INC requests the option to include additional pools or leases within the defined parameters set forth in the order for future additions.

Commingling this production is the most effective means of producing the reserves. OXY USA INC understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. These applications will be submitted separately for approval per NMOCD and BLM regulations.

CENTRAL TANK BATTERY

Administrative Order CTB-840-A

December 27, 2017

OXY USA Inc
Attention: Ms. Taylor Stillman

OXY USA Inc (OGRID 16696) is hereby authorized to surface commingle oil and gas production from diversely owned federal leases from the Cotton Draw; Bone Spring Pool (Pool code 13367) located in Township 24 South, Range 31 East, NMPM, Eddy County, New Mexico, and from wells, and their associated leases identified in Attachment No. A and made part of this order.

Production from the subject wells shall be determined as follows:

It is understood that the test separator and meters are designed to accurately measure production from the wells with the highest production rate. It is also assumed that all of the oil and gas production from the wells in this application will display a hyperbolic decline, and will fit the decline parameters described in Hearing Order R-14299. Wells that are in prior to Range 1 of decline shall be measured separately. Wells that are in Range 1 of decline shall be measured with a combination of metering and well testing, and shall be tested at least three times a month. Wells that are in Range 2 of decline shall be measured with a combination of metering and well testing, and shall be tested at least twice a month. Wells in Range 3 of decline shall be measured with a combination of metering and well testing, and shall be tested at least once a month. However, only two wells have been drilled, and are in pre-flow stage of decline.

The combined surface commingling project area and spacing units for these wells include E/2 E/2 Section 13, Township 24 South, Range 30 East, the entire Section 5, Section 6, Section 7, Section 8, Section 17, and Section 18, all in Township 24 South, Range 31 East, NMPM, Eddy County, New Mexico.

The oil and gas production from these wells listed as part of this application shall be measured and sold from the Sand Dunes South Corridor Central Tank Battery (CTB), located in Unit B, Section 18, Township 24 South, Range 31 East, NMPM, Eddy County, New Mexico.

OXY USA, Inc. shall provide a Sundry Notice to the Engineering Bureau in Santa Fe when a well is removed from a dedicated separator.

Administrative Order CTB-840-A
OXY USA Inc
December 27, 2017
Page 2 of 2

The allocation meters shall be calibrated quarterly in accordance with Rule 19.15.12.10.C (2) NMAC.

This approval is subject to like approval from the Bureau of Land Management before commencing commingling operations.

For future additions of wells, leases, and pools to this commingling operation, notice shall only be given to those interest owners in the wells, leases or pools to be added, in accordance with Division Rule 19.15.12.10 C (4) (g) NMAC.

This administrative order supersedes CTB-840 issued on November 28, 2017. The amended order changes the measurement method, and requires the Applicant to send a Sundry notice when a production separator is removed.

The operator shall notify the Artesia District office of the Division prior to implementation of the commingling operations.

DAVID R. CATANACH
Director

Process Description:

The Sand Dunes South Corridor CTB is located in Section 18 T24S R31E at 32.2233, -103.812737 in Eddy County, New Mexico.

All wells will be tested daily prior to Range one of decline. Once wells reach Range one of decline, they will begin being tested via the testing methodology presented in Hearing Order R-14299, described below.

Wells will be tested daily prior to Range one of decline. Wells will be tested at least three times per month once they reach Range one of decline. Once wells reach Range 2 of decline, they will be tested at least twice per month, and at least once per month during Range 3 of decline. Production allocated to each well will be based on the aforementioned well tests and the amount of hours a well was operating in a given month.

Production from all wells will be routed to one of three production trains, based on the federal royalty rate. For example, the 9.375% wells are all routed into the same production train with a dedicated production and test separator for that train with turbine meters for oil and water and an orifice meter for gas. The orifice meters off of the production and test separators will serve as the gas FMPs for that train. After separation, the oil stream will flow through a heater treater and then flow to tanks before being measured by a LACT for each royalty rate train. The aforementioned LACT units will serve as the oil FMPs for each train. Each well and the associated federal royalty rate per train can be seen on the attached facility diagram.
