MATADOR PRODUCTION COMPANY

Attention: Mr. Michael Feldewert

CENTRAL TANK BATTERY

Administrative Order CTB-854
Administrative Application Reference No. pMAM1808139394

Reference your application of March 21, 2018

The Oil Conservation Division (Division) authorizes Matador Production Company (OGRID 228937) (Matador) for off-lease storage and off-lease marketing for surface commingled oil and gas production from the WC-025 G-09 S243310P; Upper Wolfcamp pool (pool code 98135) from the following diversely-owned leases located in Township 24 South, Range 33 East, Lea County, New Mexico.

Lease:	Leo Thorsness AR 13 24 33 Well No. 211H Lease		
Description:	W/2 W/2 of Section 13		
Well:	Leo Thorsness 13 24 33 Well No. 211H	API No.	30-025-43532
Lease:	Strong 24 24 33 AR Well No. 214H		
Description:	E/2 E/2 of Section 14		
Well:	Strong 14 24 33 AR Well No. 214H	API No.	30-025-44442

The commingled oil and gas production from the wells detailed above shall be measured and sold at the Leo Thorsness AR 13 24 33 Well No. 211H Central Tank Battery (CTB), in D-13-24S-33E.

Production from the subject wells shall be determined as follows.

1. The oil and gas production from each of the diversely-owned leases shall be measured with allocation meters.
2. The oil and gas production from each well will flow into a dedicated 3-phase separator. The production stream will be separated into three independent streams and each stream will be measured individually after it exits the separator, before commingling.
3. The allocation meters shall be calibrated quarterly in per Paragraph (2) of Subsection C of 19.15.12.10 NMAC.

For future additions of wells, leases, and pools to this commingling operation, Matador shall notify to those interest owners in the wells, leases or pools to be added, per Subparagraph (g) of Paragraph (4) of Subsection C of 19.15.12.10 NMAC.

Matador may add future wells that produce from the subject pool within the project areas approved by this order to this commingling authority by submitting of a Sundry Notice to the Engineering Bureau of the Division in Santa Fe.

Matador shall be install and operate these facilities per Division rules. Matador shall notify the transporter of this commingling authority.

Matador shall notify the Hobbs District Office of the Division prior to starting commingling operations.

APPLICATION FOR SURFACE COMMINGLING (DIVERSE OWNERSHIP)

OPERATOR NAME: Matador Production Company
OPERATOR ADDRESS: 5400 LBJ Freeway Tower 1 Suite 1500 Dallas, TX 75240
APPLICATION TYPE:

☐ Pool Commingling ☒ Lease Commingling ☐ Pool and Lease Commingling ☐ Off-Lease Storage and Measurement (Only if not Surface Commingled)

LEASE TYPE: ☒ Fee ☐ State ☐ Federal

Is this an Amendment to existing Order? ☐ Yes ☒ No If "Yes", please include the appropriate Order No. _____
Have the Bureau of Land Management (BLM) and State Land office (SLO) been notified in writing of the proposed commingling
☐ Yes ☒ No

(A) POOL COMMINGLING
Please attach sheets with the following information

(1) Pool Names and Codes	Gravities / BTU of Non-Commingled Production	Calculated Gravities / BTU of Commingled Production		Calculated Value of Commingled Production	Volumes

- (2) Are any wells producing at top allowables? ☐ Yes ☐ No
(3) Has all interest owners been notified by certified mail of the proposed commingling? ☐ Yes ☐ No.
(4) Measurement type: ☐ Metering ☐ Other (Specify)
(5) Will commingling decrease the value of production? ☐ Yes ☐ No If "yes", describe why commingling should be approved

(B) LEASE COMMINGLING
Please attach sheets with the following information

- (1) Pool Name and Code- WC-025 G-09 S243310P; Upper Wolfcamp Code: 98135
(2) Is all production from same source of supply? ☒ Yes ☐ No
(3) Has all interest owners been notified by certified mail of the proposed commingling? ☒ Yes ☐ No
(4) Measurement type: ☒ Metering ☐ Other (Specify)

(C) POOL and LEASE COMMINGLING
Please attach sheets with the following information

- (1) Complete Sections A and B.

(D) OFF-LEASE STORAGE and MEASUREMENT
Please attached sheets with the following information

- (1) Is all production from same source of supply? ☒ Yes ☐ No
(2) Include proof of notice to all interest owners.

(E) ADDITIONAL INFORMATION (for all application types)
Please attach sheets with the following information

- (1) A schematic diagram of facility, including legal location.
(2) A plat with lease boundaries showing all well and facility locations. Include lease numbers if Federal or State lands are involved.
(3) Lease Names, Lease and Well Numbers, and API Numbers.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

Senior Production Engineer

March 6, 2018

New Mexico Oil Conservation Division
1220 South St. Francis Drive
Santa Fe, NM 87505

Re: Application of Matador Production Company for administrative approval for off-lease measurement and approval to surface commingle (lease commingle) oil and gas production from the spacing units comprised of the E/4 of Section 14 and the W/4 of Section 13, Township 24 South, Range 33 East, NMPM, Eddy County, New Mexico (the "Lands")

To Whom This May Concern,

Matador Production Company ("Matador"), OGRID: 228937, requests to commingle current oil and gas production from two (2) distinct wells located on the Lands and future production from the Lands as described herein. Both wells will be metered through a test separator with an oil turbine meter and gas orifice meter. The gas commingling will occur after individual measurement at each well. Gas exiting each well test flows into one gathering line, as depicted on **Exhibit A**, the Agave Gathering line. Each well on the Lands will have its own test separator with an orifice meter manufactured and assembled in accordance with American Gas Association (AGA) specifications. All primary and secondary Electronic Flow Measurement (EFM) equipment is tested and calibrated by a reputable third party measurement company in accordance with industry specifications.

The orifice meter is the preferred measurement device utilized by midstream and E&P companies in natural gas measurement. The gas samples are obtained at the time of the meter testing/calibration and the composition and heating value are determined by a laboratory in accordance with American Petroleum Institute (API) specifications to ensure accurate volume and Energy (MMBTU) determinations. See example from Fesco Laboratory attached as **Exhibit B** hereto.

The flow stream from each wellhead is demonstrated in the Process Flow Diagram (PFD) attached as **Exhibit A** hereto. The PFD shows that the water, oil, and gas leave the wellbore and flow into a wellhead test separator which separates the oil, gas, and water. The oil is measured via turbine meter which is calibrated periodically by a third party measurement company for accuracy. The gas is measured on a volume and MMBTU basis by an orifice meter and supporting EFM equipment in accordance with American Petroleum Institute (API) Chapter 21.1. The gas is then

sent into a gathering line where it is commingled with each of the other wells' metered gas. The gathering line gas is then metered by another orifice meter at the tank battery check to show the total volume of gas leaving the Tank Battery. This meter is tested and calibrated in accordance with industry specifications and volume and energy are determined on an hourly, daily, and monthly basis. Once the gas exits this final tank battery sales check it travels directly into a third party sales connect meter. Agave has its own orifice meter that measures the gas for custody transfer. These meters are also calibrated periodically to ensure the measurement accuracy.

In conclusion, all the oil and gas produced on the Lands is and will be metered at each wellhead and allocated correctly using the same measurement equipment as the pipeline sales measurement specifications accepted by API as industry standard.

Very truly yours,

MATADOR PRODUCTION COMPANY

Re: Application of Matador Production Company to authorize off-lease storage and off-lease marketing at the Leo Thorsness Tank Battery located in the NW/4 NW/4 (Unit D) of Section 13, Township 24 South, Range 33 East, NMPM, Lea County, New Mexico.

Dear Ms. Riley:

Under NMAC 19.15.12.7, individual spacing and proration units are considered separate "leases" for surface commingling purposes. Accordingly, Matador Production Company (OGRID No. 228937) seeks administrative approval for off-lease storage and off-lease marketing at the Leo Thorsness Tank Battery of production from the WC-025 G-09 S243310P; Upper Wolfcamp Pool (98135) produced from *all existing and future wells* drilled in the following "leases:"

- (a) The 160-acre spacing and proration unit comprised of the W/2 W/2 of Section 3, which is currently dedicated to the Leo Thorsness 13-24S-33E AR 211H (API No. 30-025-43532);
- (b) The 160-acre spacing and proration unit comprised of the E/2 E/2 of Section 14, which is currently dedicated to the Strong 14-23S-33E AR 214H (API No. 30-025-44442); and
- (c) Pursuant to NMAC 19.15.12.10.C(4)(g), in *future spacing and proration units connected to this central tank battery* with notice provided only to the interest owners within these future "leases."

Oil and gas production from these "leases" will be commingled and sold at the Leo Thorsness Tank Battery located in the NW/4 NW/4 (Unit D) of Section 13. Prior to commingling, gas production from each "lease" will be separately metered using individual test separators with calibrated orifice meters that are manufactured to AGA specifications. Oil production from each "lease" will also be separately metered using turbine meters.

Exhibit 1 is a land plat showing Matador's current development plan, the flow lines, central tank batter ("production facility") and gathering system in the subject area;

Exhibit 2 contains the C-102s for each well currently planned or drilled for the subject leases along with any available six-month production reports.

Exhibit 3 contains a completed Application for Surface Commingling (Diverse Ownership) Form C-107-B that includes a statement from Benjamin D. Peterson, P.E. identifying the facilities and the measurement devices to be utilized, a detailed schematic of the surface facilities (attachment A to the statement) and a referenced gas sample (attachment B to the statement).

Exhibit 4 is a list of all mineral owners (including owners of royalty and overriding royalty interests) affected by this application, a copy of the letters sent by certified mail advising them that if they have an objection it must file it in writing with the division within 20 days from the date the Division receives this application, and proof of mailing.

Thank you for your attention to this matter and please feel free to call if you have any questions and require additional information.

Sincerely,

Michael H. Feldewert

Re: Application of Matador Production Company to authorize pool commingling, off-lease storage and off-lease marketing at the Leslie Fed East Tank Battery located in the center of the S/2 S/2 (Units O and P) of Section 17, Township 25 South, Range 35 East, NMPM, Lea County, New Mexico.

Ladies and Gentlemen:

Enclosed is a copy of the above-referenced application which was filed with the New Mexico Oil Conservation Division on this date. Any objection to this application must be filed in writing within twenty days from this date at the Division's Santa Fe office located at 1220 South St. Francis Drive, Santa Fe, New Mexico, 87505. If no objection is received within this twenty-day period, this application may be approved administratively by the Division.

If you have any questions about this application, please contact the following:

Sherri Gore
Matador Production Company
