Re: Application of Percussion Petroleum Operating, LLC for administrative approval of an unorthodox well location for its South Boyd Federal Com No. 17H Well in the E/2 E/2 of Section 27, Township 19 South, Range 25 East, NMPM, Eddy County, New Mexico.

Dear Ms. Riley:

Percussion Petroleum Operating, LLC ("Percussion") (OGRID 371755) seeks administrative approval of an unorthodox location for its **South Boyd Federal Com No. 17H Well** (API number pending) to be completed in the N. Seven Rivers Glorieta Yeso Pool (Pool Code 97565) underlying Section 27, Township 19 South, Range 25 East, NMPM, Eddy County, New Mexico. This well will be drilled from a surface location 584 feet from the north line, 1,244 feet from the east line (Unit A) of Section 34. The upper most perforation will be located 330 feet from the south line, 1,278 feet from the east line (Unit P) of Section 27 and the lower most perforation will be located 100 feet from the north line, 1,278 feet from the east line (Unit A) of Section 27. Since this acreage is governed by the Division's statewide rules which provide for wells to be located no closer than 330 feet to the outer boundary of the spacing unit, the completed interval for this well will be unorthodox because it encroaches on the northern, northwestern, western, and southwestern boundaries of the project area.

The W/2 W/2 of Section 27 will be developed by Percussion's South Boyd Federal Com No. 18H (API No. 30-015-44685) and South Boyd Federal Com No. 19H (API No. 30-015-44686). The purpose for the unorthodox location is for engineering reasons and approval will allow Percussion to use their preferred well spacing plan for horizontal wells in this area and thereby prevent waste.

HOLLAND & HART^{LLP}

Exhibit A is the Well Location and Acreage Dedication Plat (Form C-102), which shows that the completed interval of the proposed **South Boyd Federal Com No. 17H Well** encroaches on the spacing and proration units to the north, northwest, west, and southwest.

Exhibit B is a land plat for Section 27 and the surrounding sections that shows the **South Boyd Federal Com No. 17H Well** in relation to the adjoining units and existing wells.

Exhibit C is a list of the parties affected by Percussion's request for an unorthodox location. Each of these parties has been provided a copy of this application and all attachments by certified mail, and has been advised that if they have an objection it must be filed in writing with the Division within 20 days from the date the Division receives this application. A copy of this application has been provided to the Bureau of Land Management–Carlsbad District Office.

Your attention to this application is appreciated.

Sincerely,

Adam G. Rankin

Re: Application of EOG Resources, Inc. for administrative approval of an unorthodox well location for its Bandit 29 State Com No. 502H Well in the E/2 E/2 of Section 29 and the E/2 NE/4 of Section 32, Township 24 South, Range 33 East, N.M.P.M., Lea County, New Mexico.

Dear Ms. Riley:

EOG Resources, Inc. (OGRID No. 7377) seeks administrative approval of an unorthodox well location for its **Bandit 29 State Com No. 502H Well** (API No. 30-025-44384) to be completed within the Triste Draw; Bone Spring, East Pool (96682) underlying Sections 29 and 32, Township 24 South, Range 33 East, N.M.P.M., Lea County, New Mexico. This well will be drilled from a surface location 423 feet from the north line and 734 feet from the east line (Unit A) of Section 29. The upper most perforation will be located 330 feet from north line and 1,100 feet from the east line (Unit A) of Section 29 and the lower most perforation will be 2,309 feet from the north line and 1,100 feet from the east line (Unit H) of Section 32. Since this acreage is governed by the Division's statewide rules which provides for wells to be located no closer than 330 feet to the outer boundary of the spacing unit, the completed interval for this well will be unorthodox because it is closer than 330 feet to the northwestern, western, and southwestern boundaries of the project area.

Approval of the unorthodox completed interval will allow EOG to use their preferred well spacing plan for horizontal wells in this area and thereby prevent waste.
