Dear Mr. McMillan,

LIME ROCK RESOURCES II-A, L.P. (operator) would like to surface commingle production from the referenced six Fee oil wells, which are located on several different Fee leases and producing from one State pool (Red Lake, Glorieta-Yeso – 51120). See the attached well list, which includes API number, Fee lease number, location, formation, and well tests.

The Brainard central tank battery is located on the Brainard Gas Com #2 well pad (B Sec 11 T18S R26E). Please see the attached lease diagram and the Brainard Battery schematic.

All production from the Higgins Cahoon 12 D #3 flows (off lease) to the Brainard Battery where it is treated in its separate FWKO and separator. The oil is then stored, measured, and sold separately to Holly Transportation, LLC. The gas is measured with a Total Flow G4 allocation meter #5240024. The gas is then commingled with the gas from the other wells and sold to DCP Midstream, L.P. in their Total Flow sales meter #720189-00.

All production from the five Brainard wells flows to the Brainard Battery where it is all surface commingled and treated in a FWKO and separator. The oil is then stored, measured, and sold to Holly Transportation, LLC. The gas is measured with a Total Flow G4 allocation meter #5240025. It is then commingled with the gas from the Higgins Cahoon 12 D #3 and sold to DCP Midstream, L.P. through their Total Flow sales meter #720189-00.

The interests in these Fee wells is not identical, so each of these wells is tested separately on a quarterly basis through the test FWKO and separator. The oil then flows to the test oil tank where it is measured. The gas flows through a Total Flow G5 test meter #5240031.

Also attached is form C-107B, C-102 for each well, a list of the interest owners, and a copy of the letter to the interest owners, along with other necessary supporting data.

This surface commingle of oil and gas and off lease storage and measurement of oil will maximize the ultimate recovery of oil and gas. Eliminating redundant surface equipment will prevent waste, reduce the environmental impact, lower expenses, and the premature P&A of many wells.

All the interest owners and the BLM have been notified.

Should you have any questions or concerns, please contact me at 505-327-4573.

Best Regards,
