**APPLICATION FOR POOL AND LEASE COMMINGLE, AND OFF-LEASE MEASUREMENT, STORAGE AND SALES FOR GAS PRODUCTION AT THE TURKEY TRACK STATE CTB**

OXY USA WTP LP is requesting to amend previously approved Order CTB-834 to add gas production from the following wells: Sparkplug State #1, Champion State #2, Auto State #1, Checker #3, Joel State #1, Conoco 7 State #10, Conoco 7 State #1 and Flag TD State Com #1. The gas sales compressor station for the aforementioned wells has failed. Rather than shut-in the wells, OXY requests to send the gas to the Turkey Track Central Tank Battery (CTB) to be commingled upstream of the Enterprise gas sales meter. Commingling production will result in maximum ultimate economic recovery of the gas with minimum waste and with minimum adverse effect on ultimate recovery of other mineral resources, as per NMAC 19.15.12.10. It is not in the best interest of the American public to have OXY USA WTP LP shut-in the wells at this time, since there are still recoverable reserves.

The Turkey Track CTB is located on State lease B080960 located at Unit B, Section 8, T19S, R29E in Eddy County, New Mexico. Wells feeding the battery are listed below.

**Gas metering:**

Turkey Track wells will be separated and tested at the Turkey Track CTB, which has 5 permanent test separators and 2 portable test separators, with orifice meters for gas for allocation purposes.

Wells will be tested according to Hearing Order R-14299, as detailed below.

Wells will be tested daily prior to Range 1 of decline, and will be tested at least three times per month during Range 1 of decline. When Range 2 of decline commences, wells will be tested at least twice per month, then once per month in Range 3 of decline.

Turkey Track 9-10 State 33H and 34H are in Range 1 of decline and are still on individual separation. They will be removed from individual separation when the equipment is needed for future Turkey Track wells. Turkey Track 9-10 State 21H, 22H, 23H, 24H, 32H, Turkey Track 8-7 State 22H, 23H and 24H are in Range 2 of decline and have been online for over 6 months. They have been removed from individual separation and share the production separator and five of the test separators.

Production from Sparkplug State #1, Champion State #2, Auto State #1, Checker #3, Joel State #1, Conoco 7 State #10, Conoco 7 State #1 and Flag TD State Com #1 is separated and tested at the individual wellsites using an orifice meter for gas measurement. The aforementioned wells have been online for over 9 years and have established production. They will be tested at least once per month. Gas production from the wells will tie into the Turkey Track CTB upstream of the Enterprise gas sales meter.

Gas production will be allocated back to all wells based on well test.

**Additional Application Components:**

The flow of production is shown in detail on the enclosed facility diagram. Also enclosed is a map showing the locations of wells and facilities.

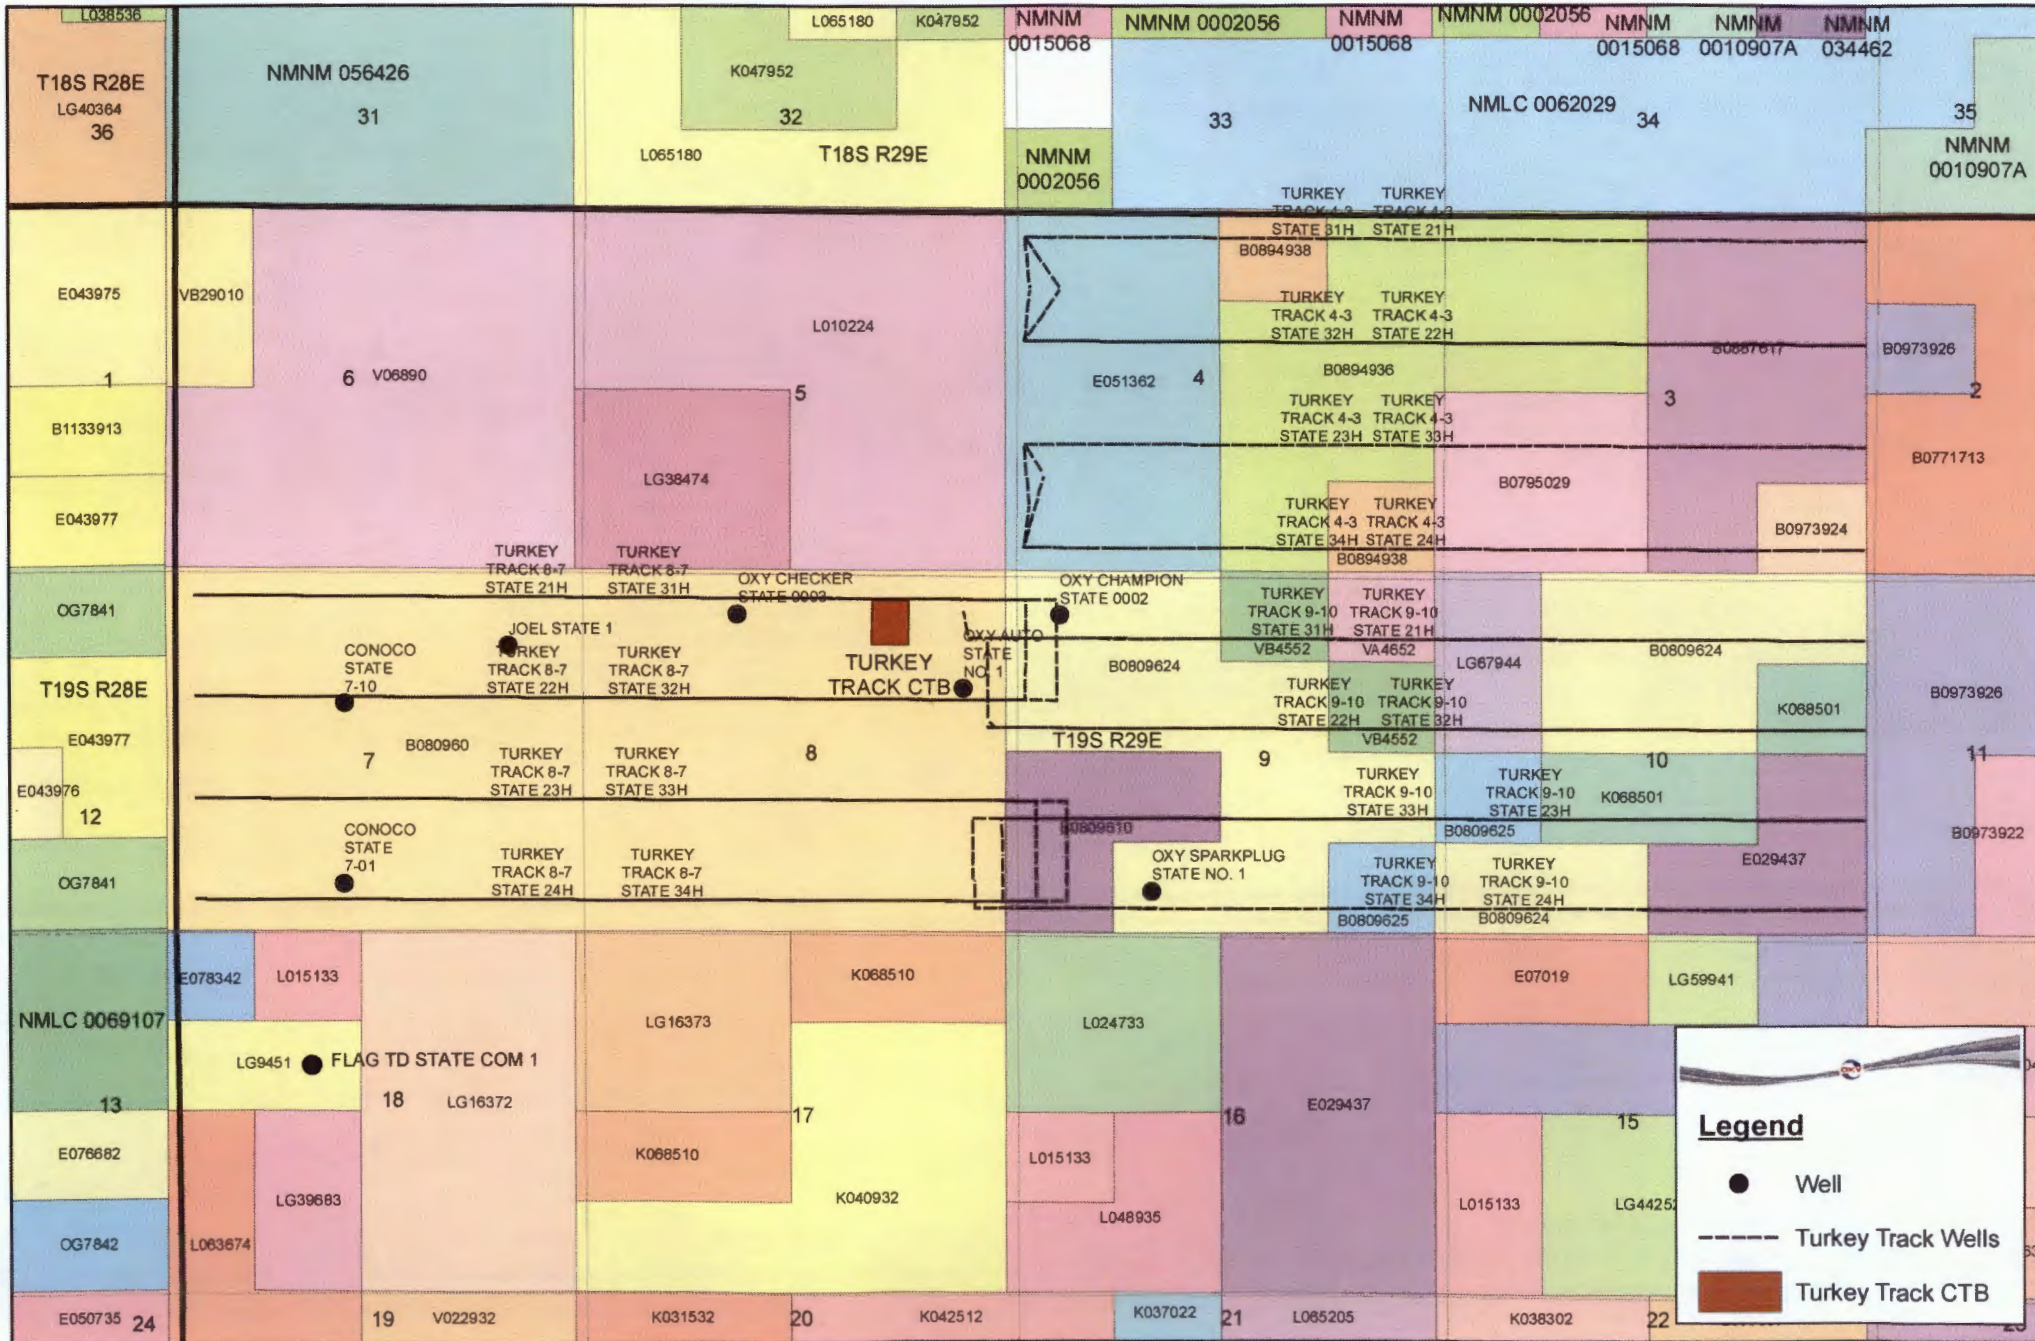

Commingling this production is the most effective means of producing the reserves. OXY USA WTP LP understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. These applications will be submitted separately for approval per NMOCD regulations. OXY USA WTP LP has submitted all required right-of-way's to the State Land Office.

The gas meters will be calibrated on a regular basis per API and NMOCD specifications.

Pursuant to Statewide rule 19.15.12.10(C)(4)(g) OXY USA WTP LP requests the option to include additional pools or leases within the defined parameters set forth in the order for future additions.

The working interest, royalty interest and overriding royalty interest owners of the added wells have been notified of this proposal by certified mail (see attached).

Dear Mr. McMillan:

Regarding the submitted commingle application for Turkey Track State Central Tank Battery, the production decline of all of the Turkey Track wells going to the battery is in accordance with the production decline presented in Order R-14299.

For questions regarding this application, please contact me at (713) 366-5106.

Respectfully,

**OXY USA WTP LP**

Re: Amendment to CTB-834 to Add Wells to Turkey Track State CTB for Pool and Lease  
Commingling and Off-lease Measurement, Sales, & Storage  
Eddy County, New Mexico

Dear Interest Owner:

This is to advise you that OXY USA WTP LP is filing an amendment to previously approved CTB-834 for surface commingling at the Turkey Track State CTB. A copy of the application submitted to the Division is attached.

Any objections or requests for a hearing regarding this application must be submitted to the New Mexico Oil Conservation Division Santa Fe Office within 20 Days from the date of this letter.

Pursuant to Statewide rule 19.15.12.10(C)(4)(g) OXY USA WTP LP requests the option to include additional pools or leases within the defined parameters set forth in the Order for future additions.

For questions regarding this application, please contact Sandra Musallam at (713) 366-5106.

Respectfully,

**OXY USA WTP LP**  
Sandra Musallam  
Regulatory Engineer – Compliance Lead

**OXY USA WTP LIMITED PARTNERSHIP**  
Attention: Mr. Justin Morris

OXY USA TWP Limited Partnership (OGRID 192463) is hereby authorized to surface commingle oil and gas production from diversely owned state leases from the Turkey Track; Bone Spring Pool (Pool code 60660) located in Township 19 South, Range 29 East, NMPM, Eddy County, New Mexico, and from wells, and their associated leases identified in Attachment No. A and made part of this order. These wells are located on state leases in Township 24 South, Range 29 East, NMPM, Eddy County, New Mexico.

Production from the subject wells shall be determined as follows:

It is understood that the test separator and meters are designed to accurately measure production from the wells with the highest production rate. It is also assumed that all of the oil and gas production from the wells in this application will display a hyperbolic decline, and will fit the decline parameters described in Hearing Order R-14299. Wells that are in range 1 of decline shall be measured separately. Wells that are in Range 2 of decline shall be measured with a combination of metering and well testing, and shall be tested at least twice a month. Wells in Range 3 of decline shall be measured with a combination of metering and well testing, and shall be tested at least once a month.

Since all of the wells in this application are subject to compulsory pooling orders listed in Attachment A, for at least the first six months of production each well will have its own dedicated separator and measurement equipment. If production has not declined after 6 months, the well shall remain on continuous metering until the well has declined to Range 2 as specified in Hearing Order R-14299. Further, none of the wells in this application have been completed.

The combined surface commingling project area and spacing units for these wells include the entire Section 3, Section 4, Section 5, Section 7, Section 8, Section 9, and Section 10, all in Township 19 South, Range 29 East, NMPM, Eddy County, New Mexico.

---

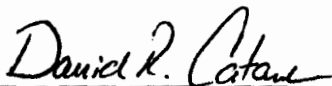

The oil and gas production from these wells listed as part of this application shall be measured and sold from the Turkey Track Central Tank Battery (CTB), located in Unit B, Section 8, Township 19 South, Range 29 East, NMPM, Eddy County, New Mexico.

OXY USA, Inc. shall provide a Sundry Notice to the Engineering Bureau in Santa Fe when a test separator is removed.

The allocation meters shall be calibrated quarterly in accordance with Rule 19.15.12.10.C (2) NMAC.

This approval is subject to like approval from the New Mexico State Land Office before commencing commingling operations.

The operator shall notify the Artesia District office of the Division prior to implementation of the commingling operations.
