Process and Flow Description:

The flow of produced fluids is shown on the enclosed facility diagram. The surface location of the wells and battery are in Lot P of Sec 21, T26S, R26E. This location was the appropriate location for our battery facility as Cave/Karst conditions exist on our lease. The wells are producing from the East half of Sections 28 & 33 in T26S, R26E. Each well will be metered individually before being commingled. The fluid/gas enters the production unit where it is separated into the three components, gas, water and oil. The gas flows through a check meter on the production skid and then to the pipeline sales meter. The oil exits the vessel and flows through a turbine meter and then to the oil production tank. The water exits the vessel and flows through a turbine meter and then to the water production tank.

RE: Application for Pool/Lease Surface Commingle for
Cottonwood 28-33 W/2 of Sections for
Welch; Bone Spring & Purple Sage; Wolfcamp Pools
Eddy County, New Mexico

Gentlemen:

This is to advise you that Chisholm Energy Operating, LLC, is filing an application with the Bureau of Land Management (BLM) and New Mexico Oil Conservation Division (NMOCD) seeking approval for Pool/Lease Surface Commingle permit at a central Tank Battery. Our application to the BLM and NMOCD is attached. Each well is individually metered before being commingled. This battery location on Section 21 was the appropriate location for our battery facility as Cave/Karst conditions exist on our lease.

In accordance with Paragraph (4)(c) of Subsection C of 19.15.12.10 NMAC prescribes that the applicant shall notify the interest owners. The Applicant shall submit a statement attesting that the applicant, on or before the date the applicant is submitted to the division, notified each of the interest owners by sending them a copy of the application and the attachments to the application by certified mail, return receipt requested, and advising them that they must file an objection in writing with the division's Santa Fe office within 20 days from the date the division received the application. The division may approve the application administratively, without hearing, upon receipt of written waiver from the interest owner, or if no interest owner has filed an objection within the 20-day period. If the division receives an objection, it shall set the application for hearing. The division shall notify the applicant, who shall give formal notice of hearing to each party who has filed an objection and to such other persons as the division directs.

For future addition of wells, leases, and pools to this commingling operation, notice shall only be given to those interest owners in the wells, leases or pools to be added, in accordance with the Division Rule 19.15.12.10 C (4)(g) NMAC.

To expedite the approval process, I have provided a waiver statement below for your convenience. Please sign and return to my e-mail bwatson@chisholmenergy.com. Also, for your convenience, is a self-addressed stamped return envelope. If you have any questions, please call me at 972.979.0132.

Sincerely,

Bettie Watson, Regulatory Consultant

I have received a copy of the referenced commingle filing. I agree to waive the 20-day protest period required by the regulations as stated above for the referenced commingle filing.
