Hello Mr. Leonard Lowe,

This letter accompanies Tacitus's Administrative Application Checklist for the Navajo Tribal N #11 requesting approval for a Non-Standard Location (NSL) and with No Notice Required.

Navajo Tribal U #24, API # 30-045-21476 is located 2100 FSL 540 FWL in Section 15 of T26NR18W. Tacitus abandoned and cement squeezed the well's historic Pennsylvanian D producing interval. Tacitus then deepened and perforated the well in the Mississippian-Aged Leadville Formation targeting Helium. Well became part of the North Tocito Dome Mississippian Pool, Code # 86120 which has no known Spacing or Setback Rules. This well is therefore Wildcat Status to follow NMOCD 19.15.15.10.

The well is located on Tacitus "U" Lease, Contract #14-20-603-5034. By rule this well infringes on the 1200 foot setback for Wildcat wells. Following Exhibits show Tacitus's Common Lease Ownership and Interests for the subject Tribal Indian Land Leases located on the Navajo Nation, San Juan County, New Mexico.

Tacitus requests approval for the Non-Standard Location (NSL) and with No Notice Required due to the Common Lease Ownership including Working Interest and Royalty Interests, plus Utilizing the Existing Wellbore for deepening to Leadville Formation Helium Gas is the Prevention of Waste.

Please contact me with any questions, comments or concerns...Thank You

Sincerely,

Peter Kondrat
Geologist
