Re: Application of EOG Resources, Inc. for administrative approval of an unorthodox well location for its Gem 36 State Com No. 102H Well in the W/2 E/2 of Section 36, Township 25 South, Range 32 East, N.M.P.M., Lea County, New Mexico.

Dear Ms. Riley:

EOG Resources, Inc. (OGRID No. 7377) seeks administrative approval of an unorthodox well location for its **Gem 36 State Com No. 102H Well** (API No. 30-025-45526) to be completed within the Jennings; Upper Bone Spring Shale Pool (Pool Code 97838) underlying the W/2 E/2 of Section 36, Township 25 South, Range 32 East, N.M.P.M., Lea County, New Mexico. This well will be drilled from a surface location 324 feet from the north line and 1,670 feet from the east line (Unit B) of Section 36. The upper most perforation will be located 100 feet from the north line and 1,460 feet from the east line (Unit B) of Section 36 and the lower most perforation will be 100 feet from the south line and 1,460 feet from the east line (Unit O) of Section 36. Since this acreage is governed by the Division's statewide rules, the completed interval for this well will be unorthodox because it is approximately 134 feet to the eastern boundary of the spacing unit. Approval of the unorthodox completed interval will allow EOG to use their preferred well spacing plan for horizontal wells in this area and thereby prevent waste.

Exhibit A is a Well Location and Acreage Dedication Plat (Form C-102), which shows that the completed interval of the proposed **Gem 36 State Com No. 102H Well** encroaches on the tracts to the east.

Exhibit B is a land plat for Section 36 that shows the proposed **Gem 36 State Com No. 102H Well** in relation to adjoining units and existing wells in Section 36. This exhibit also shows EOG's well spacing pattern for the subject area.

Exhibit C is a certification of the ownership in the E/2 E/2 of Section 36, the affected tract to the East. Because the W/2 E/2 and the E/2 E/2 of Section 36 have identical ownership, there are no affected parties. Each of the parties listed on Exhibit C have been provided notice of this application by certified mail. A copy of this application has been provided to the State Land Office.

Exhibit D is a statement from an engineer confirming that EOG's requested unorthodox location is necessary to optimize well spacing, thereby preventing waste.

Your attention to this matter is appreciated.

Sincerely,

A handwritten signature in black ink, appearing to read "Adam G. Rankin".

Re: EOG Resources, Inc. NSL Application
Gem 36 State Com #102H (Well)
W/2E/2 Sec. 36, T25S-R32E
Lea County, New Mexico

To Whom it may concern:

Considering the spacing of existing wells in the Leonard portion of the Bone Spring formation and production in the section, EOG believes the non-standard location is necessary to develop the Leonard A resource in an economic fashion. Based on current Leonard wells in Section 36-T25S-R32E, placing the well at this location prevents completion energy distribution to be skewed into a region of lower pressure caused by offset depletion, negatively impacting well's production. Granting the exception will allow for more total production from the section and more efficient development of the asset therefore protecting correlative rights.

Sincerely

EOG Resources, Inc.
